The following table tabulates, for each calendar month of valuation ending after the effective date of this part, the interest rates (denoted by i_1, i_2 * * *, and referred to generally as i_t) assumed to be in effect between specified anniversaries of a valuation date that occurs within that calendar month; those anniversaries are specified in the columns adjacent to the rates. The last listed rate is assumed to be in effect after the last listed anniversary date.

TABLE II

[Annuity valuations]

For valuation dates occurring in the month—	The values of i_t are:					
	i_t	for t =	i_t	for t =	i_t	for t =
*	*	*	*	*	*	*
October 1995	.0630	1–20	.0575	>20	N/A	N/A

PART 2676—[AMENDED]

3. The authority citation for part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), 1441(b)(1).

4. In appendix B, Rate Set 24 is added to Table I, and a new entry is added to Table II, as set forth below. The introductory text of both tables is republished for the convenience of the reader and remains unchanged.

Appendix B to Part 2676—Interest Rates Used To Value Lump Sums and Annuities

Lump Sum Valuations

In determining the value of interest factors of the form $v^{0:n}$ (as defined in § 2676.13(b)(1)) for purposes of applying the formulas set forth in § 2676.13 (b) through (i) and in determining the value of any interest factor used in valuing benefits under this subpart to be paid as lump sums, the PBGC shall use the values of i_t prescribed in Table I hereof. The interest rates set forth in Table I shall be used by the PBGC to calculate benefits payable as lump sum benefits as follows:

(1) For benefits for which the participant or beneficiary is entitled to be in pay status on the valuation date, the immediate annuity rate shall apply.

(2) For benefits for which the deferral period is *y* years (*y* is an integer and $0 < y \leq n_1$), interest rate i_1 shall apply from the valuation date for a period of *y* years; thereafter the immediate annuity rate shall apply.

(3) For benefits for which the deferral period is *y* years (*y* is an integer and $n_1 < y \leq n_1 + n_2$), interest rate i_2 shall apply from the valuation date for a period of $y - n_1$ years, interest rate i_1 shall apply for the following n_1 years; thereafter the immediate annuity rate shall apply.

(4) For benefits for which the deferral period is *y* years (*y* is an integer and $y > n_1 + n_2$), interest rate i_3 shall apply from the valuation date for a period of $y - n_1 - n_2$ years, interest rate i_2 shall apply for the following n_2 years, interest rate i_1 shall apply for the following n_1 years; thereafter the immediate annuity rate shall apply.

TABLE I

[Lump sum valuations]

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities (percent)				
	On or after	Before		i_1	i_2	i_3	n_1	n_2
*	*	*	*	*	*	*		
24	10–1–95	11–1–95	4.75	4.00	4.00	4.00	7	8

Annuity Valuations

In determining the value of interest factors of the form $v^{0:n}$ (as defined in § 2676.13(b)(1)) for purposes of applying the formulas set forth in § 2676.13 (b) through (i) and in determining the value of any interest factor used in valuing annuity benefits under this subpart, the plan administrator shall use the values of i_t prescribed in the table below.

The following table tabulates, for each calendar month of valuation ending after the effective date of this part, the interest rates (denoted by i_1, i_2, * * *, and referred to generally as i_t) assumed to be in effect between specified anniversaries of a valuation date that occurs within that calendar month; those anniversaries are specified in the columns adjacent to the rates. The last listed rate is assumed to be in effect after the last listed anniversary date.

TABLE II

[Annuity valuations]

For valuation dates occurring in the month—	The values of i_t are:					
	i_t	for t =	i_t	for t =	i_t	for t =
*	*	*	*	*	*	*
October 1995	.0630	1–20	.0575	>20	N/A	N/A

Issued in Washington, DC, on this 12th day of September 1995.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD02–95–056]

RIN 2115–AA97

Safety Zone; Lower Mississippi River, Mile 727.0 to Mile 730.0

AGENCY: Coast Guard, DOT.

ACTION: Temporary rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the Lower Mississippi River between mile 727.0 and mile 730.0. The zone is needed to rig overhead power cables. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port.

DATES: This regulation is effective at 7 a.m. on September 13, 1995, and terminates at 5 p.m. on September 27, 1995.

FOR FURTHER INFORMATION CONTACT: ENS Bauer, Assistant Chief Port Operations Officer, Captain of the Port, 200 Jefferson Avenue, Suite 1301, Memphis, TN 38103, Phone: (901) 544–3941.

SUPPLEMENTARY INFORMATION:

Background and Purpose

At approximately 7:00 a.m. on September 13, 1995, the Tennessee Valley Authority will commence overhead cable rigging operations across the channel at Lower Mississippi River mile 727.8. The operation is expected to be completed within fourteen days from the commencement date. The navigable channel will be blocked during the operations. A safety zone has been established on the Lower Mississippi River from mile 727.0 to mile 730.0 in order to facilitate safe vessel passage. All vessels shall establish passing arrangements with the LOMRC Representative, via VHF Marine Band Radio, Channel 13, prior to entering the safety zone and shall abide by the conditions of the arrangement. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port.

In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publication of a notice of proposed rulemaking and delay of effective date would be contrary to the public interest because immediate action is necessary. Specifically, immediate action is necessary to facilitate overhead cable rigging operations during a period when vessel traffic will be least affected. Harm to the public or environment may result if vessel traffic is not controlled during the operations. As a result, the Coast Guard deems it to be in the public's best interest to issue a regulation immediately.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Collection of Information

This rule contains no information collection requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under paragraph 2.B.2 of Commandant Instruction M16475.1B (as revised by 59 FR 38654; July 29, 1994), this rule is categorically excluded from further environmental documentation.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A new temporary section 165.T02–056 is added to read as follows:

§ 165.T02–056 Safety Zone; Lower Mississippi River.

(a) *Location.* The following area is a Safety Zone: Lower Mississippi River Mile 727.0 to mile 730.0

(b) *Effective dates.* This section is effective at 7 a.m. on September 13, 1995, and terminates at 5 p.m. on September 27, 1995.

(c) *Regulations.* In accordance with the General regulations in § 165.23 of this part, entry into this zone is prohibited except as authorized by the Captain of the Port. The Captain of the Port, Memphis, Tennessee, will notify the maritime community of conditions affecting the area covered by this safety zone by Marine Safety Information Radio Broadcast on VHF Marine Band Radio, Channel 22 (157.1 MHZ).

Dated: August 29, 1995.

A. L. Thompson, Jr.,

Commander, USCG, Captain of the Port.

33 CFR Part 165

[CGD01–95–138]

RIN 2115–AA97

Safety Zone: Periphonics Corporation 25th Anniversary Fireworks, Upper New York Bay, NY

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for the Periphonics Corporation 25th Anniversary fireworks located in Upper New York Bay, New York. The safety zone is in effect from 10 p.m. until 11:20 p.m. on Saturday, September 16, 1995, unless extended or terminated sooner by the Captain of the Port New York. The safety zone temporarily closes all waters of Upper New York Bay, within a 300 yard radius of a fireworks barge anchored approximately 300 yards east of Liberty Island, New York.

EFFECTIVE DATE: This rule is in effect from 10 p.m. until 11:20 p.m. on September 16, 1995, unless extended or terminated sooner by the Captain of the Port New York.

FOR FURTHER INFORMATION CONTACT: Lieutenant (Junior Grade) K. Messenger, Maritime Planning Staff Chief, Coast Guard Group New York (212) 668–7934.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are LTJG K. Messenger, Project Manager, Coast Guard Group New York and CDR J. Stieb, Project Attorney, First Coast Guard District, Legal Office.

Regulatory History

Pursuant to 5 U.S.C. 553, a notice of proposed rulemaking (NPRM) was not published for this regulation. Good cause exits for not publishing an NPRM, and for making this regulation effective less than 30 days after **Federal Register** publication. Due to the date this application was received, there was insufficient time to draft and publish a notice of proposed rulemaking that allows for a reasonable comment period prior to the event. The delay encountered if normal rulemaking procedures were followed would effectively cancel this event. Cancellation of this event is contrary to the public interest.

Adequate measures are being taken to ensure mariners are made aware of this regulation. Notification of this rule will be locally published in the First Coast Guard District's Local Notice to Mariners, and announced via Safety Marine Information Broadcasts.

Background and Purpose

On August 22, 1995, Fireworks by Grucci, Inc. submitted an Application for Approval of Marine Event to hold a fireworks program in the waters of Federal Anchorage 20C, in Upper New York Bay. The fireworks program is being sponsored by the Periphonics Corporation. This regulation establishes a temporary safety zone in all waters of Upper New York Bay, within a 300 yard radius of the fireworks barge anchored approximately 300 yards east of Liberty Island, New York, at approximately 40°41′18″ N latitude, 074°02′25″ W longitude (NAD 1983). The safety zone is in effect from 10 p.m. until 11:20 p.m. on September 16, 1995, unless extended or terminated sooner by the Captain of the Port New York. The safety zone prevents vessels from transiting this portion of Upper New York Bay, adjacent to the eastern shoreline of Liberty Island, and is needed to protect mariners from the hazards associated with fireworks exploding in the area.

Regulatory Evaluation

This regulation is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this regulation to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary. This regulation closes a portion of Upper New York Bay, Federal Anchorage 20C, off of Liberty Island, New York, to vessel traffic from 10 p.m. until 11:20 p.m. on September 16, 1995, unless extended or terminated sooner by the Captain of the Port New York. Federal Anchorage 20C is mainly used by commercial sightseeing vessels and recreational vessels. Although the regulation prevents traffic from transiting this area, the effect of the regulation will not be significant for several reasons: the duration of the event is limited; the event is at a late hour; the zone is located within a Federal Anchorage and does not impact a navigable channel; vessel traffic may safely pass to the east of this area; and the extensive, advance advisories which will be made. Accordingly, the Coast Guard expects the economic impact of this regulation to be so minimal that a Regulatory Evaluation is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Coast Guard must consider whether this regulation will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under Section 3 of the Small Business Act (15 U.S.C. 632).

For the reasons set forth in the Regulatory Evaluation, the Coast Guard expects the impact of this regulation to be minimal. The Coast Guard certifies under 5 U.S.C. 605(b) that this regulation will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This regulation contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501).

Federalism

The Coast Guard has analyzed this action in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this regulation does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has considered the environmental impact of this regulation and concluded that under section 2.B.2.e. of Commandant Instruction M16475.1B, revised 59 FR 38654, July 29, 1994, the promulgation of this regulation is categorically excluded from further environmental documentation. A Categorical Exclusion Determination and Environmental Analysis Checklist are included in the docket. Under the National Environmental Policy Act, the approval of the permit for marine event for this event is a federal action which is categorically excluded in accordance with section 2.B.2.e(35)(h) of Commandant Instruction M16475.1B. This fireworks display lasts less than 30 minutes and is expected to involve less than 200 spectator craft.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For reasons set out in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; 49 CFR 1.46.

2. A temporary section 165.T01–138, is added to read as follows:

§ 165.T01–138 Safety Zone; Periphonics Corporation 25th Anniversary Fireworks, Upper New York Bay, New York.

(a) *Location.* The safety zone includes all waters of Upper New York Bay, within a 300 yard radius of the fireworks barge anchored approximately 300 yards east of Liberty Island, New York, at approximately 40°41′18″ N latitude, 074°02′25″ W longitude (NAD 1983).

(b) *Effective period.* This section is in effect from 10 p.m. until 11:20 p.m. on September 16, 1995, unless extended or terminated sooner by the Captain of the Port New York.

(c) *Regulations.* (1) The general regulations contained in 33 CFR 165.23 apply.

(2) All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port or the designated on scene patrol personnel. U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the Coast Guard. Upon being hailed by a U.S. Coast Guard vessel via siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed.

Dated: September 5, 1995.

T.H. Gilmour,

Captain, U.S. Coast Guard, Captain of the Port New York.

RIN 2070–AB78

Plant Pesticide Bacillus Thuringiensis CryIA(c) Delta-Endotoxin and the Genetic Material Necessary for its Production in Cotton; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for residues of the plant pesticide active ingredient *Bacillus thuringiensis* CryIA(c) delta-endotoxin and the genetic material necessary for its production in cotton. The Monsanto Co. requested the exemption from the requirement of a tolerance under the Federal Food, Drug and Cosmetic Act. The rule eliminates the need to establish a maximum permissible level for residues of this plant pesticide in cotton.

EFFECTIVE DATE: September 15, 1995.

ADDRESSES: Written objections and hearing requests, identified by the document control number [PP 4F4331/R2170] may be submitted to: Hearing Clerk (1900), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460. A copy of any objections and hearing requests filed with the Hearing Clerk should be identified by the document control number and submitted to: Public Response and Program Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring copy of objections and hearing requests to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Fees accompanying objections shall be labeled "Tolerance Petition Fees" and forwarded to: EPA Headquarters Accounting Operations Branch, OPP (Tolerance Fees), P.O. Box 360277M, Pittsburgh, PA 15251.

A copy of objections and hearing requests filed with the Hearing Clerk may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Copies of objections and hearing requests must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Copies of objections and hearing requests will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All copies of objections and hearing requests in electronic form must be identified by the docket number [PP 4F4331/R2170]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic copies of objections and hearing requests on this rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

FOR FURTHER INFORMATION CONTACT: By mail: Willie H. Nelson, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 51B6 CS, 2800 Crystal Drive, Arlington, VA 22202, telephone no.: 703-308-8128; e-mail: nelson.willie@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of September 14, 1994 (59 FR 47137), which announced that Monsanto Co., 700 Chesterfield Village Parkway, St. Louis, MO 63198, had submitted pesticide petition (PP) 4F4331 to EPA requesting that the Administrator, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), exempt from the requirement of a tolerance the plant pesticide *Bacillus thuringiensis* var. *kurstaki* delta-endotoxin protein as produced by the CryIA(c) gene and its controlling sequences. EPA has assigned the active ingredient of this product the name *Bacillus thuringiensis* CryIA(c) delta-endotoxin and the genetic material necessary for its production. "Genetic material necessary for production" means the CryIA(c) gene and its regulatory regions. "Regulatory regions" are the genetic materials that control the expression of the gene, such as promoters, terminators, and enhancers. Monsanto has genetically modified cotton plants to produce the pesticidal protein derived from the common soil bacterium *Bacillus thuringiensis*. The protein produced by these cotton plants is identical to that found in nature.

There were no adverse comments or requests for referral to an advisory committee received in response to the notice of filing.

Residue Chemistry Data

Residue chemistry data were not required because of the lack of toxicity to this active ingredient. This position is similar to that the Agency has taken regarding the submission of residue data for the microbial *Bacillus thuringiensis* products from which this plant pesticide was derived. (See 40 CFR 158.740(b).) For microbial products, residue data are required only when Tier II or III toxicology data are required. The kinds of studies submitted for this plant pesticide are like those in Tier I, not Tier II or III. Submitted data indicated that the product is of low mammalian toxicity/pathogenicity and the kinds of studies required in Tier II or III were not appropriate. Therefore, no residue data are required to grant an exemption from the requirements of a tolerance for Monsanto's plant pesticide, *Bacillus thuringiensis* CryIA(c) delta-endotoxin protein, the CryIA(c) gene and the genetic material necessary for its production in cotton.

Product Analysis

Monsanto submitted information which adequately described the CryIA(c) delta-endotoxin from B.t., as expressed in cotton, along with the genetic material necessary for its production. Because it would be difficult, or impossible, to extract sufficient biologically active toxin from the plants to perform toxicology tests, Monsanto used delta-endotoxin produced in bacteria. Product analysis data were submitted to show that the microbially expressed and purified CryIA(c) delta-endotoxin is sufficiently similar to that expressed in the plant to be used for mammalian toxicological purposes. Plant and microbially produced CryIA(c) delta-endotoxin were shown by these studies to have similar molecular weights and immunoreactivity (SDS-PAGE and Western blots), to lack detectable post-translational modication (glycosylation tests), to have identical amino acid sequences in the *N*-terminal region and to have similar results in bioassays against *Heliothis virescens* and *Helicoverpa zea*. While it is difficult to prove that two proteins are identical, the combined results of the above studies indicate a high probability that these two sources produce proteins that are essentially identical by available protein analytical assays.

Toxicology Assessment

Toxicity

The delta-endotoxin proteins of *B. thuringinesis* have been intensively studied and no indications of mammalian toxicity have been reported. Furthermore, approximately 176 different *B. thuringiensis* products have been registered since 1961, and the Agency has not received any reports of dietary toxicity attributable to their use. This is especially significant because FIFRA section 6(a)(2) requires registrants to report any adverse effects to EPA. Therefore, the Agency does not anticipate any mammalian toxicity from this protein in plants based on the use history of B. thuringiensis products. The *in vitro* digestibility assay provides useful information to predict the metabolic fate of the CryIA(c) protein and its potential as a food allergen. However, it is not clear how this assay's results relate to protein toxicity. Therefore, the Agency requested that an acute oral toxicity study be done to confirm the expected lack of toxicity indicated by the *in vitro* digestibility results.

Monsanto's submitted oral toxicity data support the prediction that this protein would be nontoxic to humans. CryIA(c) delta-endotoxin was chosen in order to obtain sufficient material for mammalian testing if any exposure were anticipated in food or feed. The *in vitro* digestibility studies indicate that the protein would rapidly be degraded following ingestion.

The genetic material necessary for the production of the *Bacillus thuringiensis* CryIA(c) delta endotoxin are the nucleic acids (DNA and RNA) that constitute the CryIA(c) gene and its controlling sequences. DNA and RNA are common to all forms of life, including plants, and the Agency knows of no instance where these nucleic acids have been associated with toxic effects related to the consumption of food. These ubiquitous nucleic acids as they appear in the subject active ingredient have been adequately characterized by the applicant. Therefore, no mammalian toxicity is anticipated from dietary exposure to the genetic material necessary for the production of the *Bacillus thuringiensis* CryIA(c) delta-endotoxin in cotton.

Allergenicity

Despite decades of widespread use of *Bacillus thuringiensis* as a pesticide (it has been registered since 1961), there have been no confirmed reports of immediate or delayed allergic reactions from exposure. Such incidents, should they occur, are required to be reported under FIFRA section 6(a)(2) and as a data requirement for registration of microbial pesticides (40 CFR 158.740 and Subdivision M of the FIFRA testing guidelines, NTIS # PB89-211676).

Studies done in laboratory animals as reported in the literature also have not indicated any potential for allergic reactions to *B. thuringiensis* or its components, including the delta-endotoxin in the crystal protein. Recent *in vitro* studies also confirm that the delta-endotoxin would be readily digestible *in vivo*.

Current scientific knowledge suggests that common food allergens tend to be resistant to degradation by heat, acid, and proteases, are glycosylated, and are present at high concentrations in the food (Conference on Scientific Issues, Related to Potential Allergenicity in Transgenic Food Crops, April 18 and 19, Annapolis, MD, sponsored by FDA, EPA, and USDA). The delta-endotoxins are not present at high concentrations, are not resistant to degradation by heat, acid and proteases, and are apparently not glycosylated when produced in plants. The company has submitted data to indicate that the CryIA(c) delta-endotoxin is rapidly degraded by gastric fluid *in vitro*, that it is not present as a major component of food, and that it is apparently nonglycosylated when produced in plants.

Submitted Data

1. *Product characterization (431452-01).* Southern blot analysis restriction digests of DNA extracts from cotton line 531 and the parental Coker 312 showed that there is probably only one insert of the cryIA(c) gene cassette present in the transformed line. The introduced gene appears to be genetically stable in the cotton according to the results of progeny selfing and backcrosses with elite lines. The amino acid sequence is homologous to the cryIA(b) gene from HD-1 for positions 1-466 and homologous to cryIA(c) for positions 467-1178 with a single exception of a leucine–serine 766 in the crystal portion of the protein cleaved prior to toxin activation. Western blot analysis of purified toxin, leaf tissue from cotton line 531 and the parental Coker 312 shows that trypsinized extracts have comigrating bands similar to that found in B.t.k HD-73 protein reference material and commercial preparations.
Classification: Acceptable.

2. *Product characterization (431452-02).* B.t.k. HD-73 toxin isolated from either cotton line 531 or 931 were compared to the same toxin expressed in *E. coli* by SDS-PAGE, western blot, glycosylation and bioactivity (Conference on Scientific Issues Related to Potential Allergenicity in Transgenic Food Crops, April 18 and 19, 1994, Annapolis, MD, sponsored by FDA, EPA, andUSDA). The data presented suggest the bacterially produced protein and that found in cotton are equivalent and suggest the bacterially produced B.t.k. HD-73 toxin can serve as a surrogate test substance for the toxicological tests to support the registration of transgenic cotton. This initial submission was classified as supplementary because of the absence of sufficient description of how the B.t.k. HD-73 protein was isolated and purified from the cotton plant. A cursory description is found in "Assessment of Equivalence Between *E. coli*-Produced and Cotton-Produced Btk HD73 Protein * * *." (MRID 431452-02, p.13). Monsanto has since provided complete details regarding isolation and purification. With the clarification of the extraction procedure described above, the product characterization study (MRID 431452-02) has been upgraded from supplementary to acceptable.
Classification: Acceptable.

3. *Product characterization (431452-03).* The delta-endotoxin from B.t.k. HD-73 (lot 5025385) produced in *E. coli* containing the plasmid pMON10569 was purified, lyophilized and found to have the following characteristics: 4.5% moisture, 75.6% protein (amino acid analysis), 70% protein (BCA), 88% HD-73 specific protein (ELISA), 80% HD-73 specific protein (Coomassie blue PAGE), 1.6 ug gram negative endotoxin/mg and no significant trace metals except for sodium, potassium, and phosphate. The molecular weight of the B.t.k. HD-73 toxin was estimated to be 134.8 kD for the full length species and 77.1 kD for the tryptic. The functional activity was found to be an LC_{50} of 0.28 ppm against *Heliothis virescens*.
Classification: Acceptable.

4. *Product characterization (431452-04).* Ten insect pest species from 5 families were tested for their sensitivity to B.t.k. HD-73 protein. Only in the lepidopteran species was there significant mortality. The green peach aphid showed marginal effects from treatment with a tryptic digest of the CryIA(c) toxin from B.t.k. which was not reproducible in a repeat test. The tryptic digest preparation positive control also showed higher mortality in the TBW test.
Classification: Acceptable.

5. *Acute oral toxicity (431452-13).* Ten male and female CD-1 mice per dose level were exposed by oral gavage to 500, 1,000 and 4,200 mg/kg body weight of *E. coli* produced B.t.k. HD-73 toxin. Controls were given the protein equivalent of 6,340 mg/kg of BSA. No mortalities or treatment related adverse effects were seen in either the treated or control mice. There were no observable dose-related effects seen upon necropsy. Classification: Acceptable. Tox category IV.

6. *In vitro digestibility (431452-14).* The B.t.k. HD-73 protein was rapidly degraded to fragments not recognized in a western blot after 7 minutes incubation in simulated gastric fluid (SGF) and was not active in a TBW bioassay after SGF incubation. The *in vitro* digestibility assay provides useful information to predict the metabolic fate of the CryIA(c) protein and its potential as a food allergen.
Classification: Acceptable.

Conclusions

In summary, based upon the submitted studies and other available information, the Agency does not foresee any human health hazards from the use of the *Bacillus thuringiensis* CryIA(c) delta-endotoxin and the genetic material necessary for its production.

Based upon submitted data and a review of its use, EPA has found that when used in accordance with good agricultural practice, this ingredient is useful for the purpose for which the tolerance exemption is sought. Based on the information considered, EPA concludes that a tolerance is not necessary to protect the public health. Therefore, the exemption from the requirement of a tolerance is established as set forth below.

Acceptable daily intake (ADI) and maximum permissible intake (MPI) considerations are not relevant to this petition because the data/information submitted demonstrate that this active ingredient is not toxic to mammalian species. No enforcement actions are expected, based upon the toxicity for this plant pesticide. Therefore, the requirement for an analytical method for enforcement purposes is not applicable to this exemption request.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections and/or a request for a hearing with the Hearing Clerk, at the address given above (40 CFR 178.20). A copy of the objections and hearing requests filed with the Hearing Clerk should be submitted to the OPP docket for this rulemaking. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections, and must conform to the other requirements of 40 CFR 178.25. Each objection must be accompanied by the fee prescribedby 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on each such issue, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

A record has been established for this rulemaking under docket number [PP 4F4331/R2170] (including objections and hearing requests submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Written objections and hearing requests, identified by the document control number [PP 4F4331/R2170], may be submitted to the Hearing Clerk (1900), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

A copy of electronic objections and hearing requests filed with the Hearing Clerk can be sent directly to EPA at:

opp-Docket@epamail.epa.gov

A copy of electronic objections and hearing requests filed with the Hearing Clerk must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any objections and hearing requests received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all objections and hearing requests submitted directly in writing. The official rulemaking record is the paper record maintained at the address in **ADDRESSES** at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. Under section 3(f), the order defines a "significant regulatory action" as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs or the rights and obligations or recipients thereof; or (3) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of the Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemption from tolerance requirements do not have a significant economic effect on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (49 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 31, 1995.

Daniel M. Barolo,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In subpart D, by adding new § 180.1155, to read as follows:

§ 180.1155 Bacillus thuringiensis CryIA(c) delta-endotoxin and the genetic material necessary for its production; exemption from the requirement of a tolerance.

Bacillus thuringiensis CryIA(c) delta endotoxin and the genetic material necessary for its production are exempted from the requirement of a tolerance when used as a plant pesticide in cotton. "Genetic material necessary for its production" means the CryIA(c) gene and its regulatory regions. "Regulatory regions" are the genetic materials that control the expression of the gene, such as promoters, terminators, and enhancers.

BILLING CODE 6560-50-F

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 7159

[AZ-930-1430-01; A-1880, A-12962, A-13003]

Revocation of Coal Land Withdrawals; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes in their entirety two Secretarial Orders and two Executive Orders insofar as they affect the remaining 134,960 acres of lands withdrawn for Federal coal classification purposes. The lands are located within the Coronado and Sitgreaves National Forests and the San Carlos Indian Reservation. The withdrawals are no longer needed as the United States Geological Survey has classified the lands as Non-Coal lands and has recommended revocation of the withdrawals. The lands located within the National Forests will be opened to nonmetalliferous mining and to such forms of disposition as may by law be made of National Forest System lands. The lands located within the Indian Reservation will not be opened since reservation lands are not subject to entry under the general land laws or the United States mining laws.

EFFECTIVE DATE: October 16, 1995.

FOR FURTHER INFORMATION CONTACT: John Mezes, BLM Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 650–0518.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. The Secretarial Orders dated November 29, 1909, and December 28, 1909, and the Executive Order dated July 7, 1910, which withdrew lands and created Coal Land Withdrawal, Arizona No. 1, are hereby revoked in their entirety insofar as they affect the remaining withdrawn lands described as follows:

Gila and Salt River Meridian

San Carlos Indian Reservation

- T. 4 S., Rgs. 18, 19 and 20 E., (Portion located within the San Carlos Indian Reservation).

Gila and Salt River Meridian

Coronado and Sitgreaves National Forests

- T. 4 S., R. 20 E., (Portion located within the Coronado National Forest).
- T. 10 N., R. 18 E., (Portion located outside of the Fort Apache Indian Reservation).
- T. 11 N., R. 18 E.,
  - Sec. 13, SW¼ W½SE¼;
  - Sec. 14, E½SE¼;
  - Sec. 19, Lots 3, 4, E½SW¼, and SE¼;
  - Sec. 20, S½;
  - Sec. 21, SW¼SW¼;
  - Sec. 22, E½SE¼, N½NW¼SE¼, S½SW¼SE¼, S½N½SW¼SE¼, N½NE¼SW¼,W½SW¼, S½N½SE¼SW¼, and S½SE¼SW¼;
  - Sec. 23, NE¼NE¼, W½, NE¼SE¼, and S½SE¼;
  - Sec. 24, NW¼NE¼, and N½NW¼;
  - Secs. 25 to 30, inclusive;
  - Secs. 31 to 34, inclusive (portion located outside of the Fort Apache Indian Reservation);
  - Secs. 35 and 36.
- T. 10 N., R. 19 E.,
  - Secs. 1 to 6, inclusive;
  - Sec. 7 (portion located outside of the Fort Apache Indian Reservation);
  - Secs. 8 to 17, inclusive;
  - Secs. 18 to 20, inclusive (portion located outside of the Fort Apache Indian Reservation);
  - Secs. 21 to 25, inclusive;
  - Secs. 26 to 29, inclusive (portion located outside of the Fort Apache Indian Reservation);
  - Secs. 35 and 36 (portion located outside of the Fort Apache Indian Reservation).
- T. 11 N., R. 19 E.,
  - Sec. 19, Lots 3, and 4, and E½SW¼;
  - Sec. 25, S½;
  - Sec. 26, S½;
  - Sec. 27, S½;
  - Sec. 29, W½, and W½SE¼;
  - Secs. 30 and 31;
  - Sec. 32, W½, and W½E½;
  - Sec. 33, E½;
  - Secs. 34 to 36, inclusive.

The areas described aggregate 85,754 acres in Pinal, Graham, and Navajo Counties.

2. The Executive Order dated April 13, 1917, which withdrew lands and created Coal Land Withdrawal, Arizona No. 2 are hereby revoked in their entirety insofar as they affect the remaining withdrawn lands described as follows:

Gila and Salt River Meridian

Sitgreaves National Forest

- T. 10 N., R. 16 E.,
  - Sec. 1, (Portion located outside of the Fort Apache Indian Reservation).
- T. 11 N., R. 16 E.,
  - Sec. 25, S½;
  - Sec. 36.
- T. 10 N., R. 17 E.,
  - Sec. 3 to 9, inclusive (Portion located outside of the Fort Apache Indian Reservation).
- T. 11 N., R. 17 E.,
  - Sec. 25, S½;
  - Sec. 26, S½;
  - Sec. 27, S½;
  - Sec. 28, S½;
  - Sec. 29, S½;
  - Sec. 30, S½;
  - Secs. 31 to 33, inclusive;
  - Secs. 34 to 36, inclusive (Portion located outside of the Fort Apache Indian Reservation).
- T. 10 N., R. 20 E.,
  - Secs. 5 to 8, inclusive;
  - Secs. 13 to 20, inclusive;
  - Secs. 21 to 23, inclusive (Portion located outside of the Fort Apache Indian Reservation);
  - Sec. 24;
  - Secs. 25, 26 and 28 (Portion located outside of the Fort Apache Indian Reservation);
  - Secs. 29 and 30;
  - Secs. 31 to 33; inclusive (Portion located outside of the Fort Apache Indian Reservation).
- T. 9 N., R. 21 E., (Portion located outside of the Fort Apache Indian Reservation).
- T. 10 N., R. 21 E.,
  - Secs. 19 to 22, inclusive;
  - Sec. 25, NW¼NW¼NE¼NE¼, N½N½NW¼NE¼, W½NW¼SW¼NE¼, SW¼SW¼NE¼, W½SE¼SW¼NE¼, E½E½NW¼, N½NW¼NE¼NW¼, N½S½NW¼NE¼NW¼, N½N½NW¼NW¼, N½S½N½NW¼NW¼, N½NE¼NE¼SW¼, SW¼NE¼NE¼SW¼, SE¼NW¼NE¼SW¼, E½SW¼NE¼SW¼, SW¼SW¼, W½W½SE¼SW¼, NE¼NW¼SE¼SW¼, NW¼NE¼SE¼SW¼, N½NW¼NW¼SE¼, NW¼NE¼NW¼SE¼, SE¼NE¼NW¼SE¼, E½SE¼NW¼SE¼, E½E½SW¼SE¼, S½N½NE¼SE¼, S½NE¼SE¼, and SE¼SE¼;
  - Secs. 26 to 29, inclusive;
  - Secs. 30 to 33, inclusive (Portion located outside of the Fort Apache Indian Reservation);
  - Secs. 34 to 36, inclusive.
- T. 9 N., R. 22 E.,
  - Secs. 1 to 3, inclusive;
  - Secs. 6 and 7 (Portion located outside of the Fort Apache Indian Reservation);
  - Sec. 9;
  - Sec. 10, E½, E½W½, W½NW¼, W½W½SW¼, W½E½W½SW¼;
  - Secs. 11 and 12.
- T. 10 N., R. 22 E.,
  - Secs. 28, 31, 34 and 35.
- T. 8 N., R. 23 E.,
  - Sec. 2;
  - Secs. 11 and 12 (Portion located outside of the Fort Apache Indian Reservation).
- T. 9 N., R. 23, E.,
  - Secs. 7 to 9, inclusive;
  - Secs. 16 to 21, inclusive;
  - Secs. 28, 29 and 33;
  - Sec. 34, W½.

The areas described aggregate 49,206 acres in Navajo County.

3. At 10 a.m. on October 16, 1995, the Forest Service lands described in paragraphs 1 and 2 shall be opened to such forms of disposition as may by law be made of National Forest System lands, including location and entry for nonmetalliferous minerals under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of the lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38 (1988), shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

4. The lands located within the San Carlos Indian Reservation will not be opened since reservation lands are not subject to entry under the general land laws or the United States mining laws.

Dated: September 5, 1995.

Bob Armstrong,

Assistant Secretary of the Interior.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 95–73; RM–8568]

Radio Broadcasting Services; Boonville and Fayette, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 230C3 for Channel 230A at Boonville, Missouri, reallots the Channel to Fayette, Missouri, and modifies the license for Station KTLH to specify operation on Channel 230C3 at Fayette, Missouri, in response to a petition filed by Big Country of Missouri. *See* 60 FR 29816, June 6, 1995. The coordinates for Channel 230C3 at Fayette are 39–05–00 and 92–28–30. With this action, this proceeding is terminated.

EFFECTIVE DATE: October 27, 1995.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, MM Docket No. 95–73, adopted September 1, 1995, and released September 12, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the Commission's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Services, Inc., 2100 M Street, NW., Suite 140, Washington, DC 20037, (202) 857–3800.

Radio Broadcasting Services; Cape Girardeau, Chaffee, Scott City and Miner, MO and Union City, TN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 296A to Miner, Missouri, as a first local service, in response to a proposal filed by Stephen W. Sikes (RM–8570) and Channel 230A to Scott City, Missouri, as a first local service, in response to a proposal filed by Scott City Broadcasters (RM–8569). *See* 59 FR 50886, October 6, 1994. The coordinates for Channel 296A at Miner are 36–55–14 and 89–40–00 and the coordinates for Channel 230A at Scott City are 37–13–00 and 89–31–28. The proposal filed by Kevin G. Greaser, RM–8514, to add Channel 230A to Cape Girardeau, Missouri, has been dismissed. The proposal filed by Twin States Broadcasting, Inc. to substitute Channel 284C2 for Channel 285A at Union city, Tennessee and substitute Channel 230A for Channel 284A at Chaffee, Missouri, has also been dismissed (RM–8517). With this action, this proceeding is terminated.

DATES: Effective October 27, 1995. The window period for filing applications will open on October 27, 1995, and close on November 27, 1995.

47 CFR Part 76

[MM Docket Nos. 92–266 and 93–215; FCC 95–196]

Cable Act of 1992—Small Systems

AGENCY: Federal Communications Commission.

ACTION: Final rule; notice of effective date.

SUBJECT: FCC Form 1230 Approved by Office of Management and Budget.

SUMMARY: The FCC Form 1230 was approved by the Office of Management and Budget on August 21, 1995. That date also serves as the effective date for the rules and regulations adopted in the Sixth Report and Order and Eleventh Order on Reconsideration in MM Docket Nos. 92–266 and 93–215, Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992: Rate Regulation. The Sixth Report and Order amends definitions of small cable entities to encompass a broader range of cable systems that are eligible for special rate and administrative treatment. To implement these rule changes, the Commission created the FCC Form 1230. In introducing the FCC Form 1230 and new simplified small system rate relief, the Commission continues its ongoing efforts to offer small cable companies administrative relief from rate regulation in furtherance of congressional intent.

DATES: Regulations published in MM Doc Nos. 92–266 and 93–215 published on July 12, 1995 (60 FR 35854) are effective August 21, 1995.

FOR FURTHER INFORMATION CONTACT: Thomas Power at (202) 416–0877.

SUPPLEMENTARY INFORMATION: On June 5, 1995, the Commission released the Sixth Report and Order and Eleventh Order on Reconsideration in MM Docket Nos. 92–266 and 93–215, Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992: Rate Regulation ("Sixth Report and Order"), 60 FR 35854 (July 12, 1995). Copies of FCC Form 1230 can be obtained from the Commission's duplicating contractor, International Transcription Service (ITS), at (202) 857–3800; and free of charge from Garcia Consulting, Inc., at (202) 416–0919. Copies can also be obtained via the Commission's Fax on Demand System. To obtain faxed copies, contact (202) 418–0177 from the handset on your fax machine and enter the document retrieval number 001230 when prompted by the system. Assistance with the Fax on Demand System can be obtained by calling Dorothy Conway at (202) 418–0217.

Federal Communications Commission.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 531

[Docket No. 95–45; Notice 2]

Passenger Automobile Average Fuel Economy Standards; MedNet Incorporated; Final Decision

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final decision.

SUMMARY: This decision responds to a petition filed by MedNet Incorporated (MedNet) requesting that it be exempted from the generally applicable average fuel economy standard of 27.5 miles per gallon (mpg) for model years 1996 through 1998, and that lower alternative standards be established for it for each of these model years. This decision exempts MedNet and establishes an alternative standard of 17.0 mpg for MY 1996, MY 1997, and MY 1998.

DATES: Effective date: October 30, 1995. This exemption and the alternative standards apply to MedNet for MYs 1996, 1997, and 1998. Petitions for reconsideration must be submitted by October 16, 1995.

ADDRESSES: Petitions for reconsideration must be submitted to: Administrator, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590. It is requested, but not required, that 10 copies be provided.

FOR FURTHER INFORMATION CONTACT: Ms. Henrietta Spinner, Office of Market Incentives, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590. Ms. Spinner's telephone number is: (202) 366–4802.

SUPPLEMENTARY INFORMATION: NHTSA is exempting MedNet from the generally applicable average fuel economy standard for 1996, 1997, and 1998 model years and establishing alternative standards applicable to MedNet for each of these model years. This exemption is issued under the authority of 49 U.S.C. 32902(d), providing that NHTSA may exempt a low volume manufacturer of passenger automobiles from the generally applicable average fuel economy standards if NHTSA concludes that those standards are more stringent than the maximum feasible average fuel economy for that manufacturer and if NHTSA establishes an alternative standard for that manufacturer at its maximum feasible level. Under the statute, a low volume manufacturer is one that manufactured (worldwide) fewer than 10,000 passenger automobiles in the second model year before the model year for which the exemption is sought (the affected model year) and that will manufacture fewer than 10,000 passenger automobiles in the affected model year. In determining the maximum feasible average fuel economy, the agency is required under 49 U.S.C. 32902(f) to consider:

(1) Technological feasibility

(2) Economic practicability

(3) The effect of other Federal motor vehicle standards on fuel economy, and

(4) The need of the Nation to conserve energy.

This final decision was preceded by a proposed decision announcing the agency's tentative conclusion that it would not be technologically feasible and economically practicable for MedNet to improve the fuel economy of its vehicles in MY 1996 through 1998 above an average of 17.0 mpg for MY 1996, 17.0 mpg for MY 1997, and 17.0 mpg for MY 1998 and that the maximum feasible average fuel economy for MedNet is 17.0 mpg in MY 1996, 17.0 mpg in MY 1997, and 17.0 mpg in MY 1998. (60 FR 31937) No comments were received on the proposed decision.

The agency is adopting the tentative conclusions set forth in the proposed decision as its final conclusions, for the reasons set forth in the proposed decision. Based on the conclusions that the maximum feasible average fuel economy level for MedNet in each of MYs 1996, 1997, and 1998 is 17.0 mpg, that other Federal motor vehicle safety standards will not affect achievable fuel economy beyond the extent considered in the proposed decision, and that the nation's need to conserve energy will not be affected by granting this exemption, NHTSA hereby exempts MedNet from the generally applicable passenger automobile average fuel economy standard for the 1996, 1997, and 1998 model years and establishes an alternative standard of 17.0 mpg for MedNet for each of these years.

NHTSA has analyzed this decision and determined that neither Executive Order 12866 nor the Department of Transportation's regulatory policies and procedures apply. Under Executive Order 12866, the proposal would not establish a "rule," which is defined in the Executive Order as "an agency statement of general applicability and future effect." This exemption is not generally applicable, since it would apply only to MedNet, Inc., as discussed in this decision. Under DOT regulatory policies and procedures, this decision is not a "significant regulation." If the Executive Order and the Departmental policies and procedures were applicable, the agency would have determined that this proposed action is neither major nor significant. The principal impact of this exemption is that MedNet will not be required to pay civil penalties if it achieves a CAFE level equivalent to the alternative standard published in this notice. Since this decision sets an alternative standard at the level determined to be MedNet's maximum feasible level for MYs 1996 through 1998, no fuel would be saved by establishing a higher alternative standard. The impacts for the public at large are minimal.

The agency has also considered the environmental implications of this decision in accordance with the National Environmental Policy Act and determined that this decision will not significantly affect the human environment. Regardless of the fuel economy of the exempted vehicles, they must pass the emissions standards which measure the amount of emissions per mile traveled. Thus, the quality of the air is not affected by the decision and alternative standards. Further, since MedNet's MY 1996, 1997, and 1998 automobiles cannot achieve better fuel economy than 17.0 mpg, granting this exemption will not affect the amount of fuel used.

Since the Regulatory Flexibility Act may apply to a decision exempting a manufacturer from a generally applicable standard, I certify that this decision will not have a significant impact on a substantial number of small entities. This decision does not impose any burdens on MedNet. It does relieve the company from having to pay civil penalties for noncompliance with the generally applicable standard for MY's 1996, 1997, and 1998. Since the price of 1996, 1997, and 1998 MedNet automobiles will not be affected by this decision, the purchasers will not be affected.

List of Subjects in 49 CFR Part 531

Energy conservation, Gasoline, Imports, Motor Vehicles.

In consideration of the foregoing, 49 CFR part 531 is amended to read as follows:

PART 531—[AMENDED]

1. The authority citation for part 531 is revised to read as follows:

Authority: 49 U.S.C. 32902; Delegation of authority at 49 CFR 1.50.

2. In § 531.5, the introductory text of paragraph (b) is republished for the convenience of the reader and paragraph (b)(12) is added to read as follows:

VOL 60
SS 179
SE 15
995
MI

§ 531.5 Fuel economy standards.

* * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

* * * * *

(12) MedNet, Inc.

Model year	Average fuel economy standard (miles per gallon)
1996	17.0
1997	17.0
1998	17.0

Issued on: September 12, 1995.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

RIN 2127–AG03

Motor Vehicle Content Labeling

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule; further response to petitions for reconsideration.

SUMMARY: The American Automobile Labeling Act requires passenger cars and other light vehicles to be labeled with information about their domestic and foreign content. This document responds to several petitions for reconsideration of the agency's July 1994 final rule implementing that statute. NHTSA is making several changes to the final rule in response to the petitions, which will reduce the burdens associated with making content calculations and also result in more accurate information. The agency has also decided not to make a number of the changes requested by the petitions.

DATES: *Effective date.* The amendments made by this rule are effective October 16, 1995.

Petitions for reconsideration. Petitions for reconsideration must be received not later than October 16, 1995.

ADDRESSES: Petitions for reconsideration should be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street SW, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Orron Kee, Office of Market Incentives, National Highway Safety Administration, Room 5313, 400 Seventh Street SW, Washington, DC 20590 (202–366–0846).

I. Background

A. Statutory Requirements

Congress enacted the American Automobile Labeling Act (Labeling Act) as part of the Department of Transportation and Related Agencies Appropriation Act for Fiscal Year 1993, P.L. 102–388. The Labeling Act amended Title II of the Motor Vehicle Information and Cost Savings Act (Cost Savings Act) by adding a new section 210.

Subsequently, on July 5, 1994, the President signed a bill (P.L. 103–272) which revised and codified "without substantive change" the Cost Savings Act and two other NHTSA statutes. The content labeling provisions, which formerly existed as section 210 of the Cost Savings Act, are now codified at 49 U.S.C. § 32304, Passenger motor vehicle country of origin labeling. NHTSA will use the new statutory citations in this notice.

Section 32304 requires passenger motor vehicles[1] manufactured on or after October 1, 1994 to be labeled with information about their domestic and foreign content. The purpose of the section is to enable consumers to take country of origin information into account in deciding which vehicle to purchase.

Section 32304(b) requires each new passenger motor vehicle to be labeled with the following five items of information:

(1) The percentage U.S./Canadian equipment (parts) content;

(2) The names of any countries[2] other than the U.S. and Canada which individually contribute 15 percent or more of the equipment content, and the percentage content for each such country;

(3) The final assembly place by city, state (where appropriate), and country;

(4) The country of origin of the engine; and

(5) The country of origin of the transmission.

Section 32304(b) specifies that the first two items of information, the equipment content percentages for the U.S./Canada and foreign countries, are calculated on a "carline" basis rather than for each individual vehicle. The term "carline" refers to a name of a group of vehicles which has a degree of commonality in construction such as body and chassis.

Manufacturers of passenger motor vehicles are required to establish the required information annually for each model year, and are responsible for the affixing of the required label to the vehicle. Dealers are responsible for maintaining the labels.

In order to calculate the information required for the label, the vehicle manufacturer must know certain information about the origin of each item of passenger motor vehicle equipment used to assemble its vehicles. For example, in order to calculate the information for the first item of the label, i.e., the percentage of the value of the motor vehicle equipment installed on passenger motor vehicles within a carline which originated in the U.S./Canada, the manufacturer must know the U.S./Canadian content of each item of motor vehicle equipment.

The statute specifies that suppliers of passenger motor vehicle equipment must provide information about the origin of the equipment they supply. For purposes of determining U.S./Canadian origin for the first item on the label, the statute provides different procedures depending on whether equipment is received from an allied supplier (a supplier wholly owned by the manufacturer) or an outside supplier.

For equipment received from outside suppliers, section 32304(a)(9)(A) provides that the equipment is considered U.S./Canadian if it contains at least 70 percent value added in the U.S./Canada. Thus, any equipment that is at least 70 percent U.S./Canadian is valued at 100 percent U.S./Canadian, and any equipment under 70 percent is valued at zero percent. This statutory provision is sometimes referred to as the "roll-up, roll-down" provision. For equipment received from allied suppliers, section 32304(a)(9)(B) provides that the actual amount of U.S./Canadian content is used.

The statute requires the Department of Transportation to promulgate regulations implementing the content labeling requirements. Section 32304(d) requires the promulgation of regulations which specify the form and content of the required labels, and the manner and location in which the labels must be affixed. Section 32304(e) requires promulgation of such regulations as may be necessary to carry out the labeling requirements, including regulations to establish a procedure to verify the required labeling information. That section also directs that such regulations provide the ultimate purchaser of a new passenger motor vehicle with the best and most understandable information possible about the foreign content and U.S/Canadian origin of the equipment of such vehicles without imposing costly and unnecessary burdens on the manufacturers. Finally, section 32304(e) also specifies that the regulations include provisions requiring suppliers to certify whether their equipment is of U.S., U.S./Canadian, or foreign origin.

B. July 1994 Final Rule

On July 21, 1994, NHTSA published in the **Federal Register** (59 FR 37294) a final rule establishing a new regulation, 49 CFR Part 583, Automobile Parts Content Labeling, to implement the Labeling Act. The regulation established requirements for (1) manufacturers of passenger motor vehicles; (2) suppliers of motor vehicle equipment used in the assembly of passenger motor vehicles; and (3) dealers of passenger motor vehicles. A summary of the requirements is set forth below.

1. Manufacturers of Passenger Motor Vehicles

Vehicle manufacturers are required to affix to all new passenger motor vehicles a label which provides the following information:

(1) *U.S./Canadian Parts Content*—the overall percentage, by value, of the U.S./Canadian content of the motor vehicle equipment installed on the carline of which the vehicle is a part;

(2) *Major Sources of Foreign Parts Content*—the names of the two countries, if any, other than the U.S./Canada, which contributed the greatest amount (at least 15 percent), by value, of motor vehicle equipment for the carline, and the percentage, by value, of the equipment originating in each such country;

(3) *Final Assembly Point*—the city, state (where appropriate), and country in which the final assembly of the vehicle occurred;

(4) *Country of Origin for the Engine Parts;*

(5) *Country of Origin for the Transmission Parts.*

The label is also required to include a statement below this information reading as follows:

> **Note:** Parts content does not include final assembly, distribution, or other non-parts costs.

Manufacturers are permitted, but not required, to provide at the end of the note the following additional statement for carlines assembled in the U.S. and/or Canada, and another country:

> This carline is assembled in the U.S. and/or Canada, and in [insert name of each other country]. The U.S./Canadian parts content for the portion of the carline assembled in [insert name of country, treating the U.S. and Canada together, i.e., U.S./Canada] is [ ]%.

The information for items (1) and (2) of the label is calculated, prior to the beginning of the model year, for each carline. The information for items (3), (4) and (5) is determined for each individual vehicle. However, the country of origin for groups of engines and transmissions is determined once a model year.

Vehicle manufacturers are to calculate the information for the label, relying on information provided to them by suppliers. Under the final rule, manufacturers and allied suppliers are required to request their suppliers to provide the relevant content information specified in Part 583, and the suppliers are required to provide the specified information in response to such requests. The vehicle manufacturers are required to maintain records of the information used to determine the information provided on the labels.

2. Suppliers of Motor Vehicle Equipment

For any equipment that an outside supplier (a supplier not wholly owned by the vehicle manufacturer) supplies to a vehicle manufacturer, a supplier wholly owned by the vehicle manufacturer (an allied supplier) or, in the case of a joint venture vehicle assembly arrangement, a supplier that is wholly owned by one member of the joint venture arrangement, the outside supplier is required to provide, at the request of that manufacturer or allied supplier, the following information:

(1) the price of the equipment to the manufacturer or allied supplier;

(2) whether the equipment has, or does not have, at least 70 percent of its value added in the U.S. and Canada;

(3) for any equipment for which the U.S./Canadian content is less than 70 percent, the country of origin of the equipment (treating the U.S. and Canada together);

(4) for equipment that may be used in an engine or transmission, the country of origin of the equipment (separating the U.S. and Canada).

For any equipment that an allied supplier supplies to a vehicle manufacturer, the supplier is required to provide, at the request of the manufacturer, the following information:

(1) the price of the equipment to the manufacturer;

(2) the percentage U.S./Canadian content of the equipment;

(3) the country of origin of the equipment (treating the U.S. and Canada together);

(4) for equipment that may be used in an engine or transmission, the country of origin of the equipment (separating the U.S. and Canada).

A supplier of engines and transmissions is, in addition to the above requirements, required to provide, at the request of the vehicle manufacturer, the country of origin for each engine or transmission it supplies to the manufacturer, determined as follows: the country in which the greatest percentage, by value (using the total cost of *equipment* to the engine or transmission supplier, while excluding the cost of final assembly labor), was added to the engine or transmission.

---

[1] The term "passenger motor vehicle," defined in 49 U.S.C. 32101 as a motor vehicle with motive power designed to carry not more than 12 individuals, is amended for purposes of section 32304 to include any "multipurpose vehicle" and "light duty truck" that is rated at not more than 8,500 pounds gross vehicle weight. Thus, the motor vehicle content labeling requirements apply to passenger cars, light trucks, multipurpose passenger vehicles, and certain small buses. Motorcycles are excluded.

[2] If there are more than two such countries, only the names of the two countries providing the greatest amount of content need be listed.

Both outside and allied suppliers that directly supply equipment to vehicle manufacturers are required to provide the specified information directly to the vehicle manufacturers, in the form of a certification. Outside suppliers that directly supply to allied suppliers are required to provide the specified information and certification directly to the allied suppliers. Suppliers are also required to maintain records of the information used to compile the information provided to the manufacturers and outside suppliers.

The requirements apply only to suppliers which supply directly to the vehicle manufacturer or to an allied supplier. No requirements are imposed on suppliers earlier in the chain, *e.g.*, a company which supplies an item of equipment to an outside supplier which then supplies it to a vehicle manufacturer.

3. Dealers of Passenger Motor Vehicles

Dealers are required to maintain the label on each vehicle until the vehicle is sold to a consumer.

II. Petitions for Reconsideration

NHTSA received petitions for reconsideration from the American Automobile Manufacturers Association (AAMA), General Motors (GM), the Association of International Automobile Manufacturers (AIAM), Volkswagen (VW), the American International Automobile Dealers Association (AIADA), and the Kentucky Cabinet for Economic Development (Kentucky Cabinet). A summary of these petitions follows.

AAMA argued that certain requirements specified in section 583.6, *Procedure for determining U.S./Canadian parts content*, result in U.S./Canadian content being understated and impose costly and unnecessary burdens on manufacturers and suppliers. That organization identified three major issues.

First, AAMA was concerned that section 583.6 provides that materials used by a supplier located in the U.S./Canada are considered foreign to whatever extent part or all of the cost of the material is not determined to represent value added in the United States or Canada, traced back to raw materials. AAMA stated that suppliers may avoid the costly process of tracing simply by defaulting U.S./Canadian content to zero, with the result that U.S./Canadian content will be understated. That organization urged that the regulation allow first-tier suppliers to use methods other than tracing to accurately calculate a material's U.S./Canadian value added.

Second, AAMA was concerned that the U.S./Canadian content of components must be defaulted to zero if suppliers fail to respond to a manufacturer's or allied supplier's request for content information. That organization argued that the content information ultimately provided to consumers will be more accurate if manufacturers are permitted to establish the U.S./Canadian content of a component by other means when a supplier fails to respond.

Third, AAMA was concerned that section 583.6 specifies that whenever material or motor vehicle equipment is imported into the U.S. or Canada from a third country, the value added in the U.S./Canada for that material or equipment is considered zero, even if part of the material originated in the U.S. or Canada. AAMA argued that this provision is inconsistent with the Labeling Act's definition of "foreign." It also noted that if a manufacturer installed identical parts both in a vehicle assembled in the U.S or Canada and in one assembled in a third country, the two parts would have different U.S./Canadian content. AAMA urged that if a manufacturer is able to identify the U.S./Canadian content, it should be permitted to include the actual U.S./Canadian content of the imported component in the calculations.

AAMA recommended specific changes to Part 583 in light of the three major issues it identified. That organization also recommended a number of other changes to provide clarification.

GM joined in the AAMA petition and also submitted a separate petition urging the agency to permit manufacturers to use alternative procedures to determine U.S./Canadian parts content. That company expressed concern that Part 583 requires it to collect content data on millions of unique part numbers when tracing beyond the first tier of suppliers is required. According to GM, this represents the most burdensome and costly procedure possible, even more burdensome than any other trade-related content data requirements administered by any other U.S. government entity.

With respect to AAMA's and GM's petitions, NHTSA notes that the FY 1995 Conference Report on DOT Appropriations included the following language:

> The conferees are aware that several petitions for reconsideration have been submitted to NHTSA since the publication of the final rule. Among the issues raised in the petitions are whether it is consistent with the Act that the final rule requires that a first-tier supplier of equipment produced or assembled in the U.S. or Canada must consider material used in that equipment to have zero U.S./Canadian content unless the material's U.S./Canadian value has been verified by full tracing to its origin, and that a manufacturer or supplier that does not receive information from its suppliers concerning the U.S./Canadian content of equipment must consider the U.S./Canadian value of the equipment to be zero.
>
> These provisions of the final rule will not ensure that the most accurate, understandable, and cost-effective information is provided to consumers, and thus contradict the expressed intent of Congress in passing the AALA. Therefore, the conferees direct NHTSA to amend the final rule to permit first-tier suppliers to use other methods, such as country-of-origin marking, substantial transformation, or other customs data in their records, to determine the U.S./Canadian content of equipment, and manufacturers and allied suppliers to use other methods to determine U.S./Canadian content of equipment when suppliers fail to provide adequate information.
>
> Furthermore, to ensure that the final rule does not impose costly and unnecessary burdens on manufacturers, the conferees also direct NHTSA to amend the rule to allow manufacturers to propose alternative procedures for determining domestic content if such procedures produce reliable results.

NHTSA notes that the inclusion of this language in an Appropriations Report does not have the effect of changing the existing statute or the agency's duty to follow that statute. The agency will respectfully treat this language as expressing the sentiment of Congress as to how the issues raised by the petitions for reconsideration should be resolved.

AIAM raised four issues in its petition for reconsideration. First, that organization stated that NHTSA did not respond to its comment on the NPRM urging that the regulation provide that any state action which challenges the information provided on the label is Federally preempted. Second, AIAM argued that the regulation contains an overly broad interpretation of the term "final assembly." That organization stated that the definition includes within its scope (and thereby excludes from U.S./Canada parts content) assembly operations that are not performed on the motor vehicle but instead on parts and components of that motor vehicle. Third, AIAM argued that the provision in the regulation concerning tracing back to raw materials is inconsistent with the language of the Labeling Act and also outside the scope of notice of the NPRM. Finally, AIAM argued that a provision in the regulation which specifies that major foreign source percentages are "rounded down" to bring the combined total of U.S./Canadian and major foreign source content to no higher than 100 percent is

outside NHTSA's authority under the Labeling Act.

VW, a member of AIAM, submitted a separate petition requesting that NHTSA reconsider its determination that it is statutorily prohibited from permitting manufacturers selling motor vehicles with minimal U.S./Canadian parts content to state that fact rather than providing specific content numbers. That manufacturer cited the case of *Alabama Power Company* v. *Costle*, 636 F.2d 323 (1979), in support of its request.

AIADA requested that the agency "reconsider and vacate its final rule on Motor Vehicle Content Labeling." That organization stated that the rule is unconstitutionally vague and unequal and discriminatory in its application and therefore constitutes a denial of due process in violation of the Fifth Amendment to the Constitution and the Administrative Procedure Act. It also cited its comments to the agency on the NPRM and on an earlier request for comments but did not provide any other arguments or analysis in support of its petition.

The Kentucky Cabinet argued that the tracing provisions included in the final rule impose unnecessary administrative burdens on the Kentucky automotive industry. It expressed concern that companies will be required to undergo expensive and time-consuming efforts to trace a part back to raw materials. It also stated that in some cases a second tier supplier may not want to divulge proprietary information. The Kentucky Cabinet also expressed concern that the calculations for domestic content do not include the value of labor performed by Kentuckians. It stated that consumers will be forced to make purchasing decisions based on information that does not reflect the actual amount of domestic content. The Kentucky Cabinet specifically expressed concern about the exclusion of final assembly in the calculation of domestic content. It stated that an automotive manufacturer which does substantial "in-house" final assembly will not be able to include the full value of domestic parts and therefore be at a competitive disadvantage.

III. Initial Response to Petitions

In a notice published March 16, 1995 (60 FR 14228), the agency partially responded to the petitions for reconsideration by extending a temporary alternative approach for data collection and calculations. This approach permits manufacturers and suppliers to use procedures that are expected to yield similar results. This alternative was originally available, under the July 1994 final rule, for model year 1995 and model year 1996 carlines which were first offered for sale to ultimate purchasers before June 1, 1995. The notice extended the alternative to all model year 1996 carlines and model year 1997 carlines which are first offered for sale to ultimate purchasers before June 1, 1996.

IV. Overview of Further Response to Petitions

In response to the petitions for reconsideration, NHTSA is making several changes in Part 583. These changes include:

(1) Providing that whenever material or motor vehicle equipment is imported into the U.S. or Canada from a third country, the value added in the U.S. or Canada is presumed zero, but that if documentation is available to the supplier which identifies value added in the U.S. or Canada for that equipment, such value added in the U.S. or Canada is counted;

(2) Amending the clarifying procedures concerning the determination of U.S./Canadian content to (a) make it clear that, for materials used by suppliers in producing passenger motor vehicle equipment (other than for materials imported from third countries), suppliers are to make a good faith estimate of the value added in the United States or Canada (to the extent necessary to make required determinations concerning the value added in the U.S./Canada of their passenger motor vehicle equipment), (b) provide suppliers greater flexibility in the information they can use in making these estimates, and (c) reduce the number of stages for which suppliers must consider where value was added (although not to the degree recommended by AAMA);

(3) Providing that manufacturers can petition to use alternative calculation procedures based on representative or statistical sampling to determine U.S./Canadian parts content and major sources of foreign parts content; and

(4) Several minor clarifying changes.

NHTSA is granting the petitions to the extent that they are accommodated by these changes; the agency is otherwise denying the petitions.

V. Response to Petitions

In this section, NHTSA presents its analysis of the issues raised by the petitioners and its response. The major issues are organized according to the sections of the final rule to which they relate.

A. Definition of Final Assembly (Section 583.4)

Section 32304(a)(15) provides that "costs incurred or profits made at the final assembly place and beyond (including advertising, assembly, labor, interest payments, and profits)" are excluded from the calculation of parts content. In earlier notices, NHTSA recognized that manufacturers may conduct some pre-assembly operations, e.g., production of parts, at the same location as final assembly. The agency included a definition of "final assembly" in the final rule to distinguish between production of parts, for which labor and other costs are included in parts content calculations, and final assembly, for which labor and other costs are not included.

Two of the petitions for reconsideration addressed the exclusion of final assembly costs from the calculation of U.S./Canadian parts content and/or the final rule's definition of final assembly. As indicated above, the Kentucky Cabinet expressed concern that the calculations for domestic content do not include the value of labor performed by Kentuckians. It stated that consumers will be forced to make purchasing decisions based on information that does not reflect the actual amount of domestic content. The Kentucky Cabinet expressed specific concern about the exclusion of final assembly costs in the calculation of domestic content. It stated that an automotive manufacturer which does substantial "in-house" final assembly will not be able to include the full value of domestic parts and therefore be at a competitive disadvantage.

AIAM argued that the final rule contains an overly broad interpretation of the term "final assembly" that will mislead the motor vehicle purchaser to believe that the value of many auto parts made in-house by a U.S. motor vehicle manufacturer are not part of the U.S./Canadian parts content of the vehicle. It argued that the rule creates an unfair and anomalous situation, since a manufacturer that assembles a large number of components to produce a complex piece of equipment (other than an engine or transmission) must exclude the assembled value of that item from the reported U.S./Canadian parts content of the motor vehicle, while a less integrated manufacturer that obtained the same piece of equipment from an outside supplier in the United States or Canada would include its entire value in the U.S./Canada parts content of the vehicle if the "70 percent" test was met. AIAM also argued that the definition of "final assembly" is so broad that it includes within its scope (and thereby excludes from U.S./Canada parts content) assembly operations that are not performed on the motor vehicle but instead are performed on parts and components of that motor vehicle. AIAM alleged that there is no statutory basis, or even a rational one, to exclude substantial U.S. value added to in-house produced components other than engines and transmissions.

With respect to the Kentucky Cabinet's concerns about excluding final assembly costs, including the exclusion of the value of labor performed by Kentuckians, in the calculation of U.S./Canadian parts content, NHTSA notes that Congress decided to require manufacturers to provide prospective passenger motor purchasers with calculations of parts content rather than overall vehicle content. As indicated above, the statute specifically provides that final assembly costs, including labor costs, are excluded from these calculations. NHTSA does not have the authority to depart from the statute. The agency observes, however, that the value of final assembly labor is reflected on the label since the final assembly point is specified by city, state and country. Thus, prospective purchasers will know whether the vehicle they are considering purchasing was assembled in Kentucky.

With respect to AIAM's concerns about the final rule's definition of "final assembly," NHTSA notes that numerous commenters on the NPRM addressed this subject, and the agency discussed it at length in the preamble to the final rule. In its petition, AIAM did not address the agency's extensive analysis of this issue. The agency will repeat a portion of that discussion in this notice (the statutory references in the quoted language have been superseded, but the substance has not changed):

> The starting place for resolving the question of what operations should be considered to be part of "final assembly" and therefore excluded from parts content calculations is the language of the Labeling Act. The Act includes several relevant sections. First, section 210(b)(1)(A) provides that the label must indicate "the percentage (by value) of passenger motor vehicle equipment installed in such vehicle within a carline which originated in the United States and Canada . . . ." Second, section 210(f)(10) provides that "(c)osts incurred or profits made *at the final vehicle assembly point* and beyond (i.e., advertising, assembly, labor, interest payments, profits, etc.) shall not be included in [the calculation of value added in the United States and Canada]." Third, section 210(f)(14) defines "final assembly point" as "the plant, factory, or other *place* at which a new passenger motor vehicle is produced or assembled by a manufacturer and *from* which such vehicle is delivered to a dealer or importer in such a condition that all component parts necessary to the mechanical operation of such automobile are included with such vehicle . . . ." (Emphasis added.).
>
> While final assembly point can be considered as either a physical place or a phase in the assembly process, it is significant that section 210 defines it as a place, i.e., the plant, factory, or other place at which a new vehicle is produced or assembled. Thus, looking at the plain language of section 210, assembly and labor costs "at" the plant, factory or other place at which a new vehicle is assembled are excluded from parts content calculations.
>
> It is also significant that the language in section 210(f)(14) about the vehicle being in such a condition that "all component parts necessary to the mechanical operation of such automobile are included with such vehicle" refers to the vehicle when it leaves the final assembly point for delivery to a dealer or importer. In citing this language for the proposition that "final assembly" is defined in terms of completeness, AIAM and Toyota confuse the completion of final assembly with the final assembly process. Section 210(f)(14) defines "final assembly point" as the plant, factory, or other place at which a vehicle is "produced or assembled" by a manufacturer. All of the operations that make up the production or assembly process are part of final assembly. There is no basis to interpret section 210(f)(10)'s requirement that assembly and labor costs incurred "at the plant, factory or other place" at which a new vehicle is assembled only applies to the costs associated with the last step in completing the vehicle.
>
> Since section 210 expressly provides that assembly and labor costs at the plant, factory or other place at which a new vehicle is assembled are excluded from parts content calculations, NHTSA believes that all assembly and labor costs that are ordinarily associated with final assembly must be excluded. However, the agency believes that the costs associated with parts production that may occur at a final assembly plant should not be excluded from parts content calculations. . . .
>
> . . . A failure to consider parts produced at the final assembly plant as "passenger motor vehicle equipment" would result in significant differences among manufacturers. Further, if a plant were very highly integrated, it could result in a situation where the parts content percentages do not reflect the greater number of a vehicle's parts.
>
> At the same time, however, NHTSA must give full effect to the Congressional intent to exclude the costs of final assembly from parts content calculations. The agency believes that the best way to accomplish this is the method suggested by AAMA: define "final assembly" to include all operations involved in the assembly of the vehicle performed at the final assembly point (the final assembly plant), including but not limited to assembly of body panels, painting, final chassis assembly, and trim installation, except engine and transmission fabrication and assembly and the fabrication of motor vehicle equipment components produced at the same final assembly point using stamping, machining or molding processes.
>
> Under this approach, all costs incurred at the final assembly plant are excluded except for those that are incurred in producing either engines/transmissions or in producing parts using forming processes such as stamping, machining or molding. In addition to ensuring that final assembly costs are excluded as required by section 210, the agency also believes that a definition along these lines is much clearer than the proposed definition. For example, this type of definition will not raise issues concerning whether a part is assembled on the main assembly line or off of it.
>
> NHTSA cannot accept the recommendation of foreign vehicle manufacturers to define final assembly as starting at the time when the engine and body are fastened together. Under such a definition, manufacturers could add the engine to the body as the last step in assembling the vehicle, thereby reducing final assembly costs to a nullity. Such an approach would be inconsistent with the statutory requirement to exclude assembly and labor costs at the final assembly plant from parts content calculations.

The arguments raised in AIAM's petition for reconsideration do not lead the agency to change the definition of "final assembly." That organization argued that the definition includes within its scope assembly operations that are not performed on the motor vehicle but instead are performed on parts and components of that motor vehicle. However, this is an incorrect distinction. AIAM views final assembly as performing operations on a vehicle when, in fact, the final assembly process consists of assembling parts to produce a vehicle.

NHTSA recognizes that there are many levels of "parts." For example, any individual item that is used in the assembly of a chassis is a "part," yet the chassis as a whole can also be called a "part." It appears that AIAM would like almost all assembly that takes place at the final assembly plant to be outside the definition of final assembly and instead be considered parts production, so that the costs of such assembly are included within the parts content calculations.

However, NHTSA must give effect to section 32304(a)(15)'s requirement that costs incurred at the final assembly place, including assembly and labor, are excluded from the calculation of parts content. As discussed in the above-quoted section of the final rule preamble, the agency believes that all assembly and labor costs that are ordinarily associated with final assembly must be excluded.

NHTSA believes that the definition of final assembly included in the final rule strikes an appropriate balance in distinguishing between parts production

at a final assembly plant and final assembly. First, all costs associated with producing engines and transmissions are excluded from the definition of final assembly, and hence counted as parts content. These are very expensive parts, and it is common both for manufacturers to assemble them at vehicle final assembly plants and to assemble them at separate plants. Therefore, including these costs in parts content, notwithstanding the fact that these items may have been produced at a final assembly plant, helps maintain comparability of the information provided on the labels of different vehicles.

Second, all costs incurred in producing parts using forming processes such as stamping, machining or molding are excluded from the definition of final assembly. The production of parts using forming processes is not assembly, and these operations are thus readily distinguishable from final assembly.

All other costs incurred at the final assembly plant are included within the definition of final assembly, and are thus not included in parts content. These costs basically reflect all assembly costs at the final assembly plant other than those associated with producing engines and transmissions. NHTSA believes that the bulk of these costs, e.g., assembling body panels, building up the chassis, etc., come within the generally understood meaning of final assembly and must therefore be excluded from parts content calculations under the statute.

NHTSA notes that AIAM did not provide specific details or examples about differences between more integrated and less integrated manufacturers. Since manufacturing processes differ among manufacturers, it is inevitable that some differences will be reflected on the label. However, the final's rule inclusion of all costs associated with engine/transmission production and production of parts using forming processes within parts content will reduce such differences.

B. Procedure for Determining U.S./Canadian Parts Content (Section 583.6)

Section 583.6 of the final rule specifies a procedure for determining U.S./Canadian parts content. A number of the major issues raised by the petitioners for reconsideration relate to this section.

1. Calculation by Suppliers of the Portion of their Equipment's Value that Represents Value Added in the U.S./Canada

One of the major issues addressed in the final rule was how suppliers are to calculate the portion of their equipment's value that represents value added in the U.S./Canada. It is necessary for suppliers to make such calculations[3] since the Labeling Act provides that determinations of U.S./Canadian parts content are based on the value added in the U.S./Canada of the equipment used to assemble vehicles within a carline.

As part of avoiding unnecessary costs and keeping the regulatory scheme as simple as possible, NHTSA decided to limit tracking and reporting requirements to "first-tier" suppliers (including both suppliers which deliver equipment to the vehicle manufacturer itself and ones which deliver equipment to an allied supplier). The agency noted in the NPRM, however, that suppliers which are subject to the information requirements may need in some cases to arrange to obtain information from their suppliers.

Commenters on the NPRM raised a number of issues about how suppliers are to make the required determinations about U.S./Canadian content. NHTSA therefore included in the final rule clarifying procedures concerning the determination of value added in the U.S./Canada.

NHTSA recognized that the basic way suppliers add value in the U.S./Canada is by producing or assembling passenger motor vehicle equipment within the territorial borders of the United States or Canada. The final rule (§ 583.6(c)(4)(ii)) therefore specified that, in determining the value added in the United States or Canada of passenger motor vehicle equipment produced or assembled within the territorial boundaries of the United States or Canada, the cost of all foreign materials is subtracted from the total value (e.g., the price paid at the final assembly plant) of the equipment. The procedures specified that material is considered foreign to whatever extent part or all of the cost of the material is not determined to represent value added in the United States or Canada, traced back to raw materials. As explained in the final rule preamble, under this approach, neither suppliers nor anyone else is required to trace the value added in the United States or Canada back to raw materials; however, any portion of the cost of a material which is not traced to value added in the United States or Canada is considered foreign.

The clarifying procedures (§ 583.6(c)(4)(ii) and (iv)) also provided that for any material or equipment which is imported into the United States or Canada from a third country, the value added in the United States or Canada is zero, even if part of the material originated in the United States or Canada. NHTSA stated that, for purposes of simplicity and consistency, it believed it appropriate to deem any materials which are imported in the United States or Canada from a third country as foreign. The agency did not believe that any attempt to separate out the possible portion of such materials that may have originated in the United States or Canada would provide significantly more useful information to the consumer.

The petitioners for reconsideration raised concerns about both the tracing provision and the provision deeming any equipment or materials which are imported into the United States or Canada from a third country as foreign. The agency will discuss the latter concern first.

a. *Issues concerning equipment or materials imported into the U.S. or Canada.* AAMA argued that the final rule's provisions stipulating that whenever material or motor vehicle equipment is imported into the U.S. or Canada from a third country, the value added in the U.S. or Canada is zero, even if part of the material originated in the U.S. or Canada, are inconsistent with the Labeling Act's definition of "foreign." That organization noted that section 210(f)(16) defined foreign or foreign content as "passenger motor vehicle equipment not determined to be U.S./Canadian origin." (This reference has been superseded by 49 U.S.C. 32304(a)(6).) AAMA believed that the provisions at issue are inconsistent with that section since a portion of the value of the material or equipment could be determined to be of U.S./Canadian origin. AAMA also noted that if a manufacturer installed identical parts both in a vehicle assembled in the U.S or Canada and in one assembled in a third country, the two parts would have different U.S./Canadian content.

In additional information provided to the agency in support of its petition, AAMA cited a specific example of the consequences of these provisions. In the example, it was assumed that $800 of U.S. engine parts were shipped abroad to the foreign engine assembly plant of an allied supplier. If the engine were shipped back to the U.S., it would be

---

[3] As noted in the final rule preamble, however, only allied suppliers typically need to calculate actual value added in the U.S./Canada of their equipment. 59 FR 37309. As a result of the roll-up, roll-down provision, outside suppliers only need to determine whether the value added in the U.S./Canada is at least 70 percent or not. In order to make this determination, of course, outside suppliers need to understand how value added in the U.S./Canada is calculated. Moreover, if the value added in the U.S./Canada of their equipment is close to 70 percent, outside suppliers will need to calculate actual value added.

considered to have $0 U.S./Canadian content. This would occur as a result of the provision which specifies that any motor vehicle equipment imported into the U.S. or Canada from a third country is considered to have zero U.S./Canadian content. However, if the engine were shipped to a foreign vehicle assembly plant, it would be considered to have $800 U.S./Canadian content. This would occur because the provision about motor vehicle equipment being imported into the U.S. or Canada from a third country would not apply.

AAMA urged that if a manufacturer is able to identify the U.S./Canadian content, it should be permitted to include the actual U.S./Canadian content of the imported component in the calculations.

After considering AAMA's arguments, NHTSA has decided to make a change along the lines recommended by the petitioner. The revised final rule provides that whenever material or motor vehicle equipment is imported into the U.S. or Canada from a third country, the value added in the U.S. or Canada is presumed zero, but that if documentation is available to the supplier which identifies value added in the United States or Canada for that equipment, such value added in the United States or Canada is counted.

The agency fully agrees with AAMA that $800 of U.S. engine parts should not be converted to foreign content simply because the engine is assembled in another country. NHTSA included the provision deeming any materials which are imported into the United States or Canada from a third country as foreign for reasons of simplicity and because it did not believe that separating out the portion that may have originated in the United States or Canada would significantly affect the information provided on the label. Since AAMA has clearly demonstrated that the provision can have a significant effect on the label, the agency believes that the change recommended by that organization is appropriate.

b. *Issues concerning tracing provision.* Three of the petitioners for reconsideration, AAMA, AIAM, and the Kentucky Cabinet, raised concerns about the tracing provision. The agency will first discuss two issues raised by AIAM concerning whether NHTSA has the authority to specify such a provision.

AIAM argued in its petition that the requirement to trace back to raw materials is contrary to the language of the Labeling Act. AIAM also argued that the tracing provision was not included in the NPRM and was therefore imposed without notice and opportunity for comment.

In arguing that the requirement to trace back to raw materials is contrary to the language of the Labeling Act, AIAM stated that the Act expressly provides that for purposes of determining U.S./Canada value added for an equipment item, only incorporated foreign passenger motor vehicle equipment, not foreign raw material, is to be treated as foreign content. AIAM's explanation for this position is as follows. First, the term "value added in the United States and Canada" is defined in the Labeling Act to mean a percentage derived as follows: value added equals the total purchase price, minus total purchase price of *foreign content,* divided by the total purchase price. Second, "foreign content" is defined to mean *passenger motor vehicle equipment* not determined to be of U.S./Canadian origin. Third, "passenger motor vehicle equipment" is defined to mean any system, subcomponent or assembly and does not include materials or raw materials. Thus, according to AIAM, the term "foreign content" can only refer to passenger motor vehicle equipment and not raw materials.

NHTSA notes that since AIAM's argument cites the specific language of section 210, the agency will respond in the context of that language (while recognizing that language has since been superseded in form but not substance). While AIAM may appear at first glance to simply be applying the statutory definitions, the agency believes that there are several problems with AIAM's argument.

First, a more complete quotation of the definition of "passenger motor vehicle equipment" cited by AIAM reads as follows: The term "passenger motor vehicle equipment" means any system, subassembly, or component *received at the final assembly point* for installation on, or attachment to, such vehicle at the time of its initial shipment by the manufacturer to a dealer for sale to an ultimate purchaser. Since this definition is limited to items received at the final assembly point, neither it, nor a definition of "foreign content" incorporating it, can be directly applied to items being received by a supplier for purposes of producing equipment.

Second, the Labeling Act's primary section concerning the determination of the U.S./Canadian origin of equipment, section 210(f)(5), indicates that, in at least some instances, the foreign content of passenger motor vehicle equipment is determined by subtracting the value of the *foreign material* in that equipment. That section read as follows:

> The terms "originated in the United States and Canada," and "of U.S./Canadian origin," in referring to automobile equipment, means—
>
> (A) for outside suppliers, the purchase price of automotive equipment which contains at least 70 percent value added in the United States and Canada; and
>
> (B) for allied suppliers, the manufacturer shall determine the foreign content of any passenger motor vehicle equipment supplied by the allied supplier by adding up the purchase price of all foreign material purchased from outside suppliers that comprise the individual passenger motor vehicle equipment and subtracting such purchase price from the total purchase price of such equipment. Determination of foreign or U.S./Canadian origin from outside suppliers will be consistent with subparagraph (A).

This section's reference to determining the foreign content of passenger motor vehicle equipment by subtracting the value of the foreign material in that equipment applies to equipment supplied by allied suppliers rather than equipment supplied by outside suppliers, the focus of AIAM's comment. It is significant, however, that the section uses the term "foreign content" differently from AIAM's reading of section 210's definition of "foreign content."

Third, AIAM's argument begs the ultimate question of how suppliers are to determine the U.S./Canada value added for their equipment. That organization asserts that "only incorporated foreign passenger motor vehicle equipment, not foreign raw material, is to be treated as foreign content." However, first-tier suppliers rarely use raw materials in producing passenger motor vehicle equipment. AIAM's argument leaves unanswered the question of how a supplier determines whether, and the extent to which, the so-called "passenger motor vehicle equipment" which it uses to produce passenger motor vehicle equipment is foreign.

For the reasons discussed above, NHTSA does not accept AIAM's argument that tracing back to raw materials is contrary to the Labeling Act. The agency notes that Act's definition of "value added in the United States and Canada" makes it clear that, in making that calculation, the purchase price of "foreign content" is to be subtracted. As indicated above, the Labeling Act defines "foreign content" as meaning passenger motor vehicle equipment not determined to be U.S./Canadian origin. In applying this provision in the context of suppliers determining whether an item they receive to produce passenger

motor vehicle equipment is foreign, the agency believes that the best reading of the provision is that the cost of the item is considered foreign to whatever extent part or all of the cost is not determined to represent value added in the United States or Canada. Since value is added to items at many stages, it is appropriate, in determining the extent to which an item represents value added in the United States or Canada, to take into account the location where value is added in the various stages.

NHTSA also does not accept AIAM's argument that the tracing provision was outside the scope of notice of the NPRM. The NPRM clearly put at issue the subject of how suppliers are to make determinations of U.S./Canadian content. While the NPRM did not mention tracing as such, the inclusion of the provision in the final rule is a logical outgrowth of the proposal.

NHTSA now turns to the other issues raised by the petitioners concerning the tracing provision. These issues relate to the accuracy of the information that will result from that provision and the difficulties associated with tracing.

AAMA expressed concern that suppliers may avoid the costly process of tracing simply by defaulting U.S./Canadian content to zero, with the result that U.S./Canadian content will be understated. That organization added that even if a supplier chooses to trace, it will be difficult and costly for sub-suppliers to certify the actual U.S./Canadian value added. AAMA stated that sub-suppliers may not maintain the required financial inventory records, and that if actual data are not available, the rule would require these suppliers to default their material content to foreign.

AAMA also noted that the Labeling Act requires that a foreign country providing at least 15 percent of a vehicle's content must be identified. That organization stated that the final rule does not address how "default-to-foreign content" would be allocated to a foreign country or how that foreign country would be identified.

Based on the above arguments, AAMA expressed concern that, under the final rule, Labeling Act data may be subject to significant variability depending on the response and efforts of the manufacturer's suppliers. It recommended that first-tier suppliers be allowed to base the determination of value added in the U.S./Canada on the country-of-origin markings on the materials it purchases, the first-tier supplier's knowledge of the second-tier supplier's processes and the rule of substantial transformation, or if the material is identified as U.S. or Canadian using any other methodology that is used for customs purposes (U.S. or foreign), so long as a consistent methodology is employed for all items of equipment.

As indicated above, the FY 1995 Conference Report on DOT Appropriations stated that the tracing provision, among others, will not ensure that the most accurate, understandable, and cost-effective information is provided to consumers, and directed NHTSA to amend the final rule to permit first-tier suppliers to use other methods, such as country-of-origin marking, substantial transformation, or other customs data in their records, to determine the U.S./Canadian content of equipment.

In addition to the arguments AIAM made with respect to agency authority to specify a tracing provision, that organization also argued that the tracing provision is inconsistent with the Congressionally stated purpose to provide the best and most understandable information possible without imposing costly and unnecessary burdens on the manufacturers. The Kentucky Cabinet expressed concern that companies will be required to undergo expensive and time-consuming efforts to trace a part back to raw materials and that, in some cases, a second tier supplier may not want to divulge proprietary information.

NHTSA has carefully considered the arguments of all of the petitioners, as well as the Congressional report. The agency shares the concern about the possibility that suppliers may choose to avoid the costly process of tracing simply by defaulting the U.S./Canadian content of materials to zero, with the result that U.S./Canadian content will be understated. The agency also shares the concern that actual tracing may be overly burdensome in some instances.

As discussed below, in light of these concerns, NHTSA has decided to amend the clarifying procedures to (1) make it clear that, for materials used by suppliers in producing passenger motor vehicle equipment (other than for materials imported from third countries), suppliers must make a good faith estimate of the value added in the United States or Canada (to the extent necessary to make required determinations concerning the value added in the U.S./Canada of their passenger motor vehicle equipment), (2) provide suppliers greater flexibility in the information they can use in making these estimates, and (3) reduce the number of stages for which suppliers must consider where value was added, although not to the degree recommended by AAMA.

As indicated above, AAMA urged that first-tier suppl[illegible]rs be [illegible]ed to base the determin[illegible]n [illegible] added in the U.S./Canada o[illegible]try-of-origin markings on th[illegible]s it purchases, the first-tier supplier's knowledge of the second-tier supplier's processes and the rule of substantial transformation, or if the material is identified as U.S. or Canadian using any other methodology that is used for customs purposes (U.S. or foreign), so long as a consistent methodology is employed for all items of equipment. NHTSA believes that a methodology this broad for determining value added in the U.S./Canada would be inconsistent with the Labeling Act's requirement that determinations of U.S./Canadian origin be based on the value added in the U.S./Canada.

NHTSA notes that country of origin determinations for customs purposes do not connote value content. The substantial transformation test is a traditional means of making country of origin determinations for customs purposes. Under this test, an imported good becomes a product of the country where it emerges from a process with a new name, character and use different from that possessed by the good prior to processing. However, application of the test does not indicate any particular level of value content from that country of origin. Therefore, even though the product's country-of-origin might be the United States or Canada, it might have little U.S./Canadian content.

In enacting the Labeling Act, Congress decided, for purposes of making determinations about the U.S./Canada origin of motor vehicle equipment, to specify a value added test rather than substantial transformation. More specifically, Congress decided to require items supplied to vehicle manufacturers or their allied suppliers by outside suppliers to have at least 70 percent value added in the U.S./Canada in order to be considered U.S/Canadian.

NHTSA believes that permitting outside suppliers to use the substantial transformation test for purposes of determining the origin of the materials it uses to produce equipment could allow substantial amounts of foreign content to be converted into the U.S./Canadian content and counted toward the 70 percent threshold. This can be illustrated by a hypothetical situation where a first-tier outside supplier purchases casings from a second-tier supplier to use in producing transmissions. The second-tier supplier, located in the U.S., produces the casings by casting them from imported aluminum. Under AAMA's suggested approach, the entire value of the casings would be considered to be U.S./

MI

Canadian (since the second-tier supplier had performed a substantial transformation) and counted toward the 70 percent threshold, even though the casings were made of imported aluminum. NHTSA observes that just as it agrees with AAMA that $800 of U.S. engine parts should not be converted into foreign content as a result of a regulatory provision intended to provide simplicity, it is equally concerned about the possibility of such a regulatory provision permitting the conversion of a large amount of foreign content into U.S./Canadian content.

A comment on the NPRM signed by Senator Carl Levin and several House members also illustrates how methodologies that permit conversion of substantial foreign content into U.S./Canadian content, for purposes of making country-of-origin determinations for materials suppliers use to produce equipment, could substantially affect the information on the vehicle label.

The comment stated:

> We are writing to urge you to draft American Automobile Labeling Act implementing regulations that reflect the legislation's intent to provide an accurate means of measuring the parts value content of a vehicle.
>
> The trend has been for Japanese transplants to purchase parts assembled in the U.S. by Japanese affiliated parts makers, a high percentage of which are merely assembled here using subcomponents and materials imported from Japan. Nonetheless, they are erroneously counted as U.S. parts for the purposes of calculating U.S. content levels. The Labeling Act was an attempt by Congress to establish a tool to more accurately measure the "actual" U.S. and Canadian content of vehicles sold in the U.S. based on the origin of where the parts are made, not where the parts are purchased or assembled. It is our hope that the Labeling Act will achieve this objective by imposing a stringent definition of what is an "American or Canadian made" auto part.
>
> Currently, Japanese transplant auto makers claim high levels of U.S. content in their U.S. made vehicles. But they will not provide the necessary data to measure accurately the U.S. content levels of the auto parts used in these vehicles, and thus, it is impossible to verify their claims. After tracing the actual source of parts, a 1992 Economic Strategy Institute study found that the U.S. auto parts used in a 1991 Honda Accord contained ⅔ Japanese content and only ⅓ "actual" U.S. content. Even with these low levels of U.S. content, Honda took credit for these parts being totally U.S.-made.
>
> In order to adequately distinguish between parts assembled in the U.S. using imported materials and parts made in the U.S. using U.S. materials, the Labeling Act must include tracing requirements similar to the tracing requirements in the NAFTA rule of origin, with the exception that Mexican parts would not be included as U.S. or Canadian. Tracing should be used to determine if suppliers can be designated as North America (U.S. or Canadian)—if they achieve the 70% North American content value—as well as to determine the country of origin for the engine and transmission. For example, if tracing were required, an engine or transmission that contains 75% Japanese content but is assembled in the U.S. would be correctly found to be primarily of Japanese origin, not of U.S. origin.

NHTSA has also concluded that the concerns identified by the petitioners for reconsideration and the Congressional report can be adequately addressed by making other changes in the procedures for determining value added in the U.S./Canada.

First, the agency is specifying in the regulation that, for materials used by suppliers in producing passenger motor vehicle equipment (other than for materials imported from third countries), suppliers must make a good faith estimate of the value added in the United States or Canada (to the extent necessary to make required determinations concerning the value added in the U.S./Canada of their passenger motor vehicle equipment). Thus, suppliers are not permitted to simply default the U.S./Canadian value of the materials they use to zero, since that would not represent a good faith estimate.

Second, NHTSA is providing greater flexibility to suppliers concerning the information they may use to make their good-faith estimates. Rather than specifying tracing as such, the regulation will permit suppliers to base their estimate on all information that is available to the supplier, e.g., information in its records, information it can obtain from its suppliers, the supplier's knowledge of manufacturing processes, etc.

Third, NHTSA has concluded that it can reduce the number of stages for which suppliers must consider where value was added, although not to the degree recommended by AAMA. As indicated above, the basic problem with adopting AAMA's specific recommendation is that it would permit large amounts of foreign content to be transformed into U.S./Canadian content and counted toward the 70 percent threshold. The agency believes that this possibility can be substantially reduced or eliminated by adopting an approach that requires a supplier to consider, for materials it uses which were produced or assembled in the U.S. or Canada, where value was added at each stage back to and including the two closest stages which represented a substantial processing operation into a new and different product with a different name, character and use, rather than all the way back to raw materials.

NHTSA is adopting the following provision concerning how outside suppliers are to determine the U.S./Canadian content of materials used by the supplier which are produced or assembled in the U.S./Canada:

> (A)(*1*) For any material used by the supplier which was produced or assembled in the U.S. or Canada, the supplier will subtract from the total value of the material any value that was not added in the U.S. and/or Canada. The determination of the value that was not added in the U.S. and/or Canada shall be a good faith estimate based on information that is available to the supplier, e.g., information in its records, information it can obtain from its suppliers, the supplier's knowledge of manufacturing processes, etc.
>
> (*2*) The supplier shall consider the amount of value added and the location in which that value was added—
>
> (*i*) At each earlier stage, counting from the time of receipt of a material by the supplier, back to and including the two closest stages each of which represented a substantial transformation into a new and different product with a different name, character and use.
>
> (*ii*) The value of materials used to produce a product in the earliest of these two substantial transformation stages shall be treated as value added in the country in which that stage occurred.

This approach can be illustrated by returning to the hypothetical situation involving a first-tier supplier of transmissions which purchases aluminum casings from a second-tier supplier located in the United States. Under the July 1994 final rule, the first-tier supplier could count the full value of the aluminum in those casings as U.S./Canadian content only if it traced the aluminum back to raw materials, i.e., back to bauxite, and found the bauxite to be of U.S. or Canadian origin.

Under today's amendments, the first-tier supplier need only consider where value was added back through two stages, i.e., the casting of the casing and the production of the aluminum. The second-tier supplier, with which the first-tier supplier directly deals, will have information on both of these stages, i.e., it will know about its own casting operations and it will know the source of the aluminum it uses for the casting.

If the casing was cast in the U.S. using aluminum made in the U.S. or Canada, the full value of the casing would be counted as U.S./Canadian content for purposes of determining whether the 70 percent threshold were met. If the casing was cast in the U.S. using imported aluminum, the value of the imported aluminum would have to be subtracted from the value of the casing

in determining the amount that could be counted as U.S./Canadian content.

It would not be necessary, under those two circumstances, for the supplier to attempt to determine the origin of the bauxite used to produce the aluminum. For example, if the aluminum were produced in U.S. or Canada, the value of the materials used to make it would be treated as value added in the country where the aluminum was produced. The agency believes that the value of a material this many stages back is likely to be so small as not to affect labeling information. Moreover, it would be much more difficult to obtain information for a still earlier stage (before the aluminum production), since it would likely require contacting parties with which the first-tier supplier does not ordinarily have privity or any other connection.

NHTSA notes that this approach for the materials used by suppliers is similar to the double substantial transformation test specified by customs for determining foreign value content. As indicated above, country of origin determinations for customs purposes do not connote value content. However, there are a number of programs where certain determinations of value must be made. The full value of imported materials is counted toward the full value of the good for purposes of programs such as the Generalized Systems of Preferences, the Caribbean Basin Economic Recovery Act, etc., only when the imported materials undergo what is known in customs law as a "double substantial transformation." Under this standard, foreign materials can be considered "materials produced in the beneficiary country" when those materials are substantially transformed in that country into a new or different article of commerce which is then used in the production or manufacture of yet another new or different article (the final product). For a further discussion of this concept, see Treasury Decision 88–17, 53 FR 12143, April 13, 1988.

Particularly given the changes discussed in this section, NHTSA believes that the requirement for suppliers to make content determinations will not be burdensome. The agency notes again that the Labeling Act does not require outside suppliers to provide specific estimates of the U.S./Canada value added of their equipment, but instead only requires them to indicate whether the U.S./Canada value added is at least 70 percent.

NHTSA notes that AAMA indicated that a typical item of motor vehicle equipment represents 59 percent value added by the first-tier supplier and 41 percent purchased material. In order to determine in such an instance whether the 70 percent threshold is satisfied, a U.S./Canada outside first—tier supplier of transmissions would only need to determine whether enough of the 41 percent material cost (i.e., the cost of the casings and other transmission parts) represented value added in the U.S./Canada so as to raise the 59 percent figure for the transmissions to at least 70 percent. The agency notes that, assuming the same 59:41 ratio for value added to material cost for second-tier suppliers, about 83 percent (59 percent + (59 percent)(41 percent)) of the total value added of the transmissions would typically represent value added by the transmission supplier itself or the second-tier suppliers from which it purchases materials. Moreover, the second-tier suppliers will know the source of the materials they use.

As discussed above, the first-tier supplier is not limited to basing its estimates on actual tracing, but may instead consider all available information. To the extent that the value added in the U.S./Canada of motor vehicle equipment is well above or well below 70 percent, it will be easy for suppliers to make the required determination. The most difficult determinations will be for equipment whose value added in the U.S./Canada is close to 70 percent. To the extent that the reasonably available information to the supplier indicates that the U.S./Canada value added is near 70 percent, the supplier will simply have to make its best good-faith judgment whether it is "at least" 70 percent.

NHTSA believes that the revised clarifying procedures will, in addition to providing appropriate additional flexibility to suppliers, result in more accurate information being provided to consumers. Full tracing back to raw materials may often be impossible, and, for materials made in the U.S./Canada which are used by suppliers located in the U.S./Canada to make their motor vehicle equipment, the agency believes that good faith estimates by the suppliers of the U.S./Canada value added will be more accurate than a procedure which specifies that any untraced portions of the materials be considered foreign. The agency believes that the concerns expressed by Senator Levin and others in the Congressional comment on the NPRM will be adequately addressed by requiring the suppliers' estimates to reflect consideration of where value was added at each stage back to and including the two closest stages which represented a substantial processing operation into a new and different product with a different name, character and use.

2. Non-Responsive Suppliers

NHTSA included a provision in the final rule which specifies that if a manufacturer or allied supplier does not receive information from one or more of its suppliers concerning the U.S./Canadian content of particular equipment, the U.S./Canadian content of that equipment is considered zero. The agency stated that it does not believe that this situation will occur very often, and that the provision will ensure that U.S./Canadian content is not overstated as a result of the manufacturer or allied supplier simply assuming that equipment is of U.S./Canadian origin in the absence of information from the supplier.

AAMA argued that the agency's expectation that few suppliers will fail to report is unreasonable, especially within the first few years of implementation. That organization stated that, for a comparison, one of its members' requests for data from suppliers for NAFTA certificates of origin has yielded a response rate of 50 to 60 percent. (In later information provided to the agency, AAMA indicated that the percentage of suppliers reporting under NAFTA ranged from 60 to 65 percent for GM, Ford and Chrysler.)

AAMA argued that the content information ultimately provided to consumers will be more accurate if manufacturers are permitted to establish the U.S./Canadian content of components by other means when a supplier fails to respond. That organization recommended that if a manufacturer or allied supplier does not receive a response to its request for information, the manufacturer or allied supplier should be permitted to use the information in its records to determine the U.S. and Canadian content. The determination could be made by such means as examining the customs marking country, applying the substantial transformation test, or other methodologies used for customs purposes.

As indicated above, the FY 1995 Conference Report on DOT Appropriations stated that this provision of the final rule, among others, will not ensure that the most accurate, understandable, and cost-effective information is provided to consumers, and directed NHTSA to amend the final rule to permit manufacturers and allied suppliers to use other methods to determine U.S./Canadian content of equipment when suppliers fail to provide adequate information.

NHTSA has carefully considered AAMA's request and the Congressional report. As discussed below, the agency has concluded that it would be inappropriate under the statute to make the requested change. However, the agency believes that its one-year extension of the temporary alternative approach for data collection and calculations will provide appropriate flexibility in this area.

As discussed above, the Labeling Act provides that passenger motor vehicle equipment supplied by outside suppliers is considered U.S./Canadian if at least 70 percent of its value is added in the U.S./Canada. See 49 U.S.C. 32304(a)(9). The Labeling Act also provides that outside suppliers are required to certify, among other things, whether their equipment is of U.S./Canadian origin.

While it might appear at first glance to be reasonable to permit manufacturers and allied suppliers to make origin determinations concerning equipment provided by an outside supplier in the event that the outside supplier fails to do so, the problem is that the manufacturers and allied suppliers will not possess the information needed to make the required determination. The agency assumes that this is why AAMA suggests that manufacturers and allied suppliers be permitted to determine whether equipment is U.S./Canadian based on methods other than the value added approach specified in the statute. However, the results that would be obtained from those other methods would not necessarily be consistent with the value added approach.

NHTSA also notes that the most likely instance in which an outside supplier would not want to provide the required information is when the U.S./Canadian content was below 70 percent. In such an instance, it would be particularly inappropriate to permit the manufacturer to use alternative methods for determining whether the equipment was U.S./Canadian.

Moreover, the agency believes that vehicle manufacturers can obtain the required information from suppliers, assuming that the manufacturers and suppliers have the time to make any necessary arrangements. Apart from the fact that outside suppliers are required by Federal law to provide the information to manufacturers and allied suppliers, the outside suppliers are dependent on the auto manufacturers for their business. While NHTSA understands that there may be some confusion at the time a new program is first implemented, it does not believe that suppliers will deliberately refuse to provide the information in response to manufacturers' and allied suppliers' requests. The agency notes that the manufacturers can put specific provisions in their purchase agreements to ensure that they receive the required information.

In its March 1995 initial response to petitions, NHTSA extended by one year the temporary alternative approach for data collection and calculations which permits manufacturers and suppliers to use procedures that are expected to yield similar results. For a more complete discussion of this alternative, see 59 FR 37324–25, July 21, 1994.

The extension of this temporary alternative gives an extra year for manufacturers and suppliers to work out any arrangements that are necessary to ensure that suppliers provide the necessary information to manufacturers. The agency believes that this should provide appropriate flexibility in light of AAMA's concerns.

C. Procedure for Determining Major Foreign Sources of Passenger Motor Vehicle Equipment (Section 583.7)

As part of the procedure for determining major foreign sources of passenger motor vehicle equipment, NHTSA included a provision to prevent the possibility that the specified U.S./Canadian content and major foreign sources of foreign content for a carline will together exceed 100 percent. The agency was concerned that, due to differences in calculation methods for U.S./Canadian and foreign content, it would otherwise be possible for the sum of the U.S./Canadian and foreign label values of a carline to be over 100 percent, which could cause confusion for consumers. The agency decided to simply specify that if the U.S./Canada and major foreign source percentages add up to more than 100 percent, the foreign source percentages are proportionately reduced to the extent necessary to bring the percentages down to 100 percent.

AIAM stated that there are a number of serious problems raised by this provision, all involving the central question of the agency's authority to take this step. That organization made the following argument:

> As NHTSA implicitly acknowledges, the statute does not provide authority for such an arbitrary reduction, yet elsewhere in the preamble the Agency has argued that it is strictly bound by the language of the statute, (*see e.g.*, the Agency's discussion on the authority to exclude vehicles with low or high U.S./Canadian content . . .). The Agency has not identified what specific authority the statute affords NHTSA to reduce that number to 100 percent. The excuse the Agency relies upon—that "such a procedure would necessarily be very complicated, given certain aspects of the procedure for determining U.S./Canadian content" . . . has, in an analogous situation, been found wanting by NHTSA for giving relief to companies with little U.S. content and who for the sake of "simplicity" would agree to claim essentially all foreign content by merely indicating on the label that the U.S. content fell below a specified level. The Agency has refused to grant such a common sense exclusion because "NHTSA has concluded that it does not have the authority to provide exclusions." * * *
>
> A second problem is the absence of any basis in the statute for the Agency's assertion (or justification) that U.S./Canadian percentage "is the more important of the two items of information for consumers." . . . Again, we are unable to find in the language of the statute such a prioritization of the information. Accordingly, AIAM asks the Agency to amend the Rule by deleting § 583.7 to require the use of the percentages as calculated in accordance with the terms of the statute regardless of what the total might be.

NHTSA disagrees with the petitioner's suggestion that the agency lacks authority in this area. Section 32304(e) expressly provides that the agency is to prescribe regulations to carry out [the Labeling Act].

Moreover, AIAM draws an incorrect analogy in comparing this issue with that of whether the agency has authority to exclude vehicles with high or low U.S./Canadian content from certain statutory provisions. In the latter case, the relevant issue was whether the agency could create, by rule, exclusions from express statutory requirements. The provision concerning reducing foreign source percentages does not represent an exclusion from a statutory requirement but instead is simply part of the procedure for determining foreign source percentages.

Rather than representing a departure from the statutory requirements, the provision AIAM objects to was intended to ensure that the statutory provisions concerning determination of U.S./Canadian content are not effectively diluted. NHTSA explained in the final rule preamble that while the method for determining the U.S./Canada percentage is explicitly set forth in the statute, the methodology for determining major foreign source percentages is not in the statute. The agency also explained that since the statute provides a specific methodology for determining the U.S./Canada percentage, "the § 583.7 procedures have the limited purpose of providing a method for calculating the extent to which the *remaining* percentage is attributable to foreign countries which individually contribute at least 15 percent of the parts content, and the specific percentage attributable to each such foreign country."

In the absence of a specific statutory procedure, NHTSA decided to provide wide flexibility concerning how manufacturers are to determine country of origin for purposes of major foreign source percentages. This was for the purpose of minimizing regulatory burdens on manufacturers and suppliers. At the same time, the procedure must not be so flexible that it interferes with other aspects of the statutory scheme. Permitting manufacturers to identify the U.S./Canadian content and major sources of foreign content for a carline as exceeding 100 percent would both confuse consumers and dilute the meaning of U.S./Canadian content as determined under the more specific statutory procedures. NHTSA therefore believes that, far from being arbitrary or inconsistent with the statute, the provision at issue was a reasonable limitation on how major foreign source percentages are determined.

On reconsideration, however, NHTSA has considered whether there may be a better way of addressing this potential problem. The agency notes that the only significant way[4] that U.S./Canadian content and major sources of foreign content can exceed 100 percent is if there is double-counting, i.e., the same value is considered to be both U.S./Canadian *and* foreign. Such double-counting would be inconsistent with the statute, which specifies that foreign content means passenger motor vehicle equipment that is not of United States/Canadian origin.

The agency has considered the extent to which such double-counting might occur under Part 583, absent the provision about reducing foreign percentages.

Double-counting would not occur for equipment supplied by outside suppliers. Such equipment is considered 100 percent U.S./Canadian if 70 percent or more of its value is added in the U.S. and/or Canada and 0 percent U.S/Canadian if less than 70 percent of its value is added in the U.S. and/or Canada. Moreover, the outside supplier is only to provide a country of origin, for purposes of major sources of foreign content, for equipment which has less than 70 percent of its value added in the U.S. and/or Canada. See section 583.10(a)(5).

NHTSA believes that Part 583 is not so clear with respect to possible double-counting for equipment supplied by allied suppliers. Under section 583.11, allied suppliers are to provide a specific percentage U.S./Canadian content for their equipment, as well as a country of origin for purposes of major sources of foreign content. A manufacturer might believe that it should count the actual U.S./Canadian content of such equipment for purposes of determining U.S./Canadian parts content, and the total value of such equipment for purposes of determining major sources of foreign content. This would, of course, result in double-counting. The agency has decided to replace the provision about reducing foreign percentages with one that makes it clear that, in calculating major sources of foreign content, manufacturers are not to count any value that has been counted as U.S./Canadian content.

D. Alternative Procedures for Manufacturers

In the final rule preamble, NHTSA addressed comments by a number of manufacturers urging it to permit simplified procedures for estimating U.S./Canadian content. GM, for example, had recommended the use of a high volume configuration model as the basis for establishing the U.S./Canadian content value for a carline.

NHTSA stated that it does not disagree with the concept of permitting simplified procedures for estimating U.S./Canadian content, if such procedures would always ensure reliable results. The agency concluded, however, that the procedures which were suggested by the commenters, which were based on either a high volume configuration or best selling model, would not appear to always ensure meaningful results. By way of example, the agency cited a situation where the high volume configuration or best selling model of a carline was produced in the U.S./Canada and the rest of the carline was produced in a foreign country. NHTSA noted that content calculations based on the portion of the carline assembled in the U.S./Canada would likely not be representative of the carline as a whole.

In petitioning for reconsideration, GM noted the agency's concern that alternative procedures must always produce reliable results, and requested that alternative, simplified procedures be permitted if the Administrator determines that the procedures produce substantially equivalent results. That manufacturer also stated that an optional procedure can be designed to take care of the problem in the example cited by the agency.

GM noted the Labeling Act's provision stating that regulations are to provide the best and most understandable information possible without imposing costly and unnecessary burdens on manufacturers. That company argued that the agency has chosen as the only allowed method of determining U.S./Canadian content the most burdensome and costly procedure possible. GM explained an optional calculation procedure as follows:

> When attempting to average a very large number of values when all of the values themselves are not known, certain well accepted and reasonable approximation procedures can be employed to reduce the amount of data gathering required to calculate with an acceptable level of confidence. In other words, a great deal of the burden can be reduced while maintaining reliable and equivalent test results. Such procedures are accepted by the Commerce Department under North American Free Trade Agreement and by the Environmental Protection Agency in determining whether vehicles are in the manufacturer's domestic or foreign fleet for Corporate Average Fuel Economy (CAFE) purposes. Also such a procedure is used when determining a manufacturer's CAFE. * * * As with any volume-weighted calculation, only that data associated with high volumes will significantly impact the final calculation. Any further data collecting would add significant burden and provide diminishing returns on the accuracy of the calculated average.
>
> GM believes that NHTSA should accept optional calculation methods as an accurate measure of the average percent of U.S./Canadian content. This will dramatically reduce the content data gathering burden while still maintaining a level of accuracy and reliability required by the AALA in the average content value calculation for the carline.

The FY 1995 Conference Report on DOT Appropriations stated that to ensure that the final rule does not impose costly and unnecessary burdens on manufacturers, the conferees also direct NHTSA to amend the rule to allow manufacturers to propose alternative procedures for determining domestic content if such procedure produces reliable results.

After considering GM's petition and the Congressional report, NHTSA has decided to add a provision along the lines suggested by GM. The agency wishes to reduce manufacturer and supplier costs to the extent possible, and the agency believes that the process recommended by GM is consistent with the agency's concern that alternative procedures must always ensure meaningful results.

---

[4] The U.S./Canadian content and major sources of foreign content could also potentially exceed 100 percent as a result of the vehicle manufacturer rounding the percentages to the nearest five percent, as permitted by the statute. However, this result does not appear likely.

NHTSA notes that GM suggested adding a single sentence to the regulation indicating that manufacturers may use alternative procedures to determine U.S./Canadian parts content provided the Administrator has determined that the alternative procedure will produce substantially equivalent results. The agency believes that it is also necessary for the regulation to specify the type of alternative procedures that manufacturers can petition for, and a more detailed procedure for manufacturers to follow in submitting petitions.

NHTSA is specifying that manufacturers may petition for an alternative calculation procedure that is based on representative sampling and/or statistical sampling. The agency notes that GM's request to use an optional calculation procedure was in the context of a representative sampling approach, such as the one used by EPA for calculating CAFE.

EPA's procedures provide that a manufacturer's CAFE is calculated based on testing a limited number of vehicles. Because EPA's procedures ensure that the tested vehicles are representative, with respect to fuel economy, of the manufacturer's fleet, the procedures result in a calculated average representative of the manufacturer's actual fleet average. (A manufacturer's actual fleet average would be the average fuel economy that would be measured using the prescribed test procedures if every car produced were actually tested.)

NHTSA believes it is appropriate to similarly permit manufacturers to use a calculation procedure for the motor vehicle content labeling program that is based on vehicles that are representative, with respect to content, for the carline. The agency recognized in the preamble to the July 1994 final rule that a particular high volume configuration carline model might not be representative, with respect to content, of the overall carline. However, the agency believes that the petition process recommended by GM will ensure that manufacturers select vehicles that are representative.

The agency also believes it is appropriate to permit manufacturers to petition for alternative calculation procedures that are based on statistical sampling. NHTSA notes that EPA, in developing its calculation procedures, considered statistical sampling approaches as well as representative sampling. That agency decided not to adopt a statistical sampling approach because it would have been much more costly than representative sampling, due to a need to test more vehicles. The motor vehicle content labeling program does not, of course, involve costly testing. Moreover, a statistical sampling approach would likely be less costly than the main approach specified by Part 583 and might, in some cases, be easier for manufacturers to implement than a representative approach. Therefore, NHTSA believes that statistical sampling, as well as representative sampling, should be included as an option for which manufacturers may petition. (For a further discussion of EPA's consideration of representative and statistical sampling approaches, see 41 FR 38677–79, September 10, 1976.)

The procedures specified in today's amendments require manufacturers to provide analysis demonstrating that the alternative procedure will produce substantially equivalent results. If the Administrator determines that the petition contains adequate justification, he or she will grant the petition.

The procedures also provide that the agency will publish a notice of receipt of the petition and provide an opportunity for the public to submit comments on the petition. The Administrator will consider the public comments in deciding whether to grant the petition. While a manufacturer may submit confidential business information in support of a petition, the basic alternative procedure and supporting analysis must be public information.

NHTSA notes that it is possible that alternative procedures may raise issues which require complex analysis. The agency is therefore including a provision in the regulation which specifies that petitions must be submitted not later than 120 days before the manufacturer wishes to use the procedure.

While GM's petition requested that manufacturers be permitted to petition for alternative procedures for calculating carline U.S./Canadian content, the agency is also making this option available for calculating major sources of foreign parts content. The latter calculations are also made on a carline basis, and the same considerations relevant to this issue apply to calculations for both items.

E. Legal Issues

1. Federal Preemption

AIAM stated that NHTSA did not respond to the concerns it raised in its comment on the NPRM about the possibility of actions taken against automotive manufacturers by state or local authorities as a result of the differential treatment of suppliers or what AIAM termed "the misleading nature of the information required by the underlying statute or compliance with the final rule." That organization argued that the label could foster consumer confusion and requested that NHTSA provide an express statement of Federal preemption of any state or local action initiated as a result of providing the required information on the label in accordance with the rule.

NHTSA wishes to emphasize that, while it will respond to the issue of Federal preemption raised by AIAM, the agency is not accepting the petitioner's argument that the underlying statute or regulation results in misleading information or consumer confusion.

It is a basic principle of Constitutional law that Federal law, including agency regulations, can preempt state law. Section 32304(f) expressly provides that "(w)hen a label content requirement prescribed under this section is in effect, a State or a political subdivision of a State may not adopt or enforce a law or regulation related to the content of vehicles covered by a requirement under this section," although a state may prescribe requirements related to the content of passenger motor vehicles obtained for its own use. Moreover, Federal law impliedly preempts state law when, among other things, it is impossible to comply with both. In this context, "state law" includes the state's common law, as established through litigation.

Given these principles, and since manufacturers are required to comply with section 32304 and with Part 583, no person may bring an action under state or local law seeking to impose liability against a manufacturer on the basis that it provided information required by Federal law. This result follows from Constitutional law, and it is not necessary to put a specific provision to that effect in the regulation.

2. Due Process

AIADA submitted a very brief petition requesting that the agency "reconsider and vacate its final rule on Motor Vehicle Content Labeling." As grounds for its request, it stated that "(t)he rule is unconstitutionally vague and unequal and discriminatory in its application and therefore constitutes a denial of due process in violation of the Fifth Amendment to the United States Constitution and the Administrative Procedure Act." The petitioner also cited "(a)ll the reasons set forth in AIADA's letters * * * dated January 11, 1992 and January 18, 1994."

NHTSA cannot grant AIADA's request. The agency notes that it cannot

simply "vacate" the content labeling final rule, since the rule is required by section 32304. NHTSA also notes that AIADA's stated concern about "due process" is so vague that it is not possible to identify what specific concerns about the final rule it might relate to. While the petition cites that organization's earlier letters, NHTSA has already responded to those issues in previous **Federal Register** notices, including the final rule preamble. AIADA did not discuss why it is unsatisfied with the agency's responses or even acknowledge the responses. Therefore, there is no basis for the agency to give any further consideration to AIADA's petition.

3. Authority to Exclude Vehicles With Low U.S./Canadian Content

VW requested the agency to reconsider its determination that it lacks authority to permit manufacturers selling vehicles with low U.S./Canadian content, e.g., less than 35 percent, from stating such content as "minimal" or "less than 35 percent," instead of indicating an actual percentage, as specified in the statute. That company made the following argument:

> The NHTSA acknowledges that it has implied authority to create exclusions from the statutory requirements of the [Labeling Act] in cases of administrative need and where a literal application of the statutory language would lead to absurd or futile results or produces a gain of trivial value or of no value at all. The NHTSA concluded, however, that all manufacturers have the capability of implementing the statutory language literally and that disclosure on the label of the actual U.S./Canadian parts content percentage per carline offers a benefit to the consumer which is more than trivial. We disagree.
>
> While one may argue over whether or not disclosure of the actual percentage in the case of a carline with marginal U.S./Canadian parts content bestows more than trivial benefits on the public when compared with a disclosure of that content as "minimal," we note that the Federal Court of Appeals in the case of *Alabama Power Company* v. *Costle*, 636 F.2d 323 (1979) did not view the "trivial" standard to be relevant to a situation where the benefits are exceeded by the costs associated with providing those benefits. The court stated that in that event, the Agency should be guided by the aims of the statute it is implementing and the Congressional intent as expressed in the statute's legislative history.
>
> In the case before us there appears to be no need to explore the legislative history because the statute is plain on its face in providing in section 210(d) that "the regulations shall provide to the ultimate purchaser of a new passenger motor vehicle the best and most understandable information possible about the foreign and U.S./Canadian origin of equipment of such vehicles *without imposing costly and unnecessary burdens on the manufacturers*." (Emphasis supplied by VW)
>
> VW submits that the statute is clear in directing the NHTSA to strike a balance between communicating to the public "the best and most understandable information possible" and the "cost" and "necessity" of burdening the manufacturer. We believe that the NHTSA erred in striking the correct balance between these competing considerations as Congress directed it to do.

VW noted that it imports vehicles from both Germany and Mexico. It stated that the German vehicles are estimated to have a small fraction of U.S./Canadian parts content which could not reasonably be relevant to a U.S. consumer's purchasing decision. That company stated that while its Mexican vehicles are likely to have a greater U.S./Canadian parts content, that content is not sufficient to permit the conclusion that disclosure of the actual percentage would not be dictated by a correct balancing of the factors described in section 210(d). VW argued that its vehicles originating in Mexico are largely manufactured with equipment originating in Europe and Mexico, are marketed and perceived by the U.S. market as foreign made, and are purchased because they are unlike any other offerings to the market by the transplants or the domestic manufacturers.

VW also estimated that the assignment of a staff of five full time employees at a total cost of approximately $500,000 annually will be necessary at its various manufacturer locations to comply with the regulations as adopted, and that $150,000 of that amount is attributable to those portions of the regulation which require the calculation and disclosure of actual percentage figures rather than estimates designed to determine whether or not a particular carline has U.S./Canadian parts content below a range of about 20 percent to 35 percent.

VW argued that the Labeling Act is very specific in directing NHTSA to take costs into account in determining the form and content of the information which the manufacturer must disclose. That company argued that this directive is specific rather than general in nature and that it leaves no room for debate irrespective of whether or not the benefit to the public is trivial or non-trivial.

While NHTSA has carefully considered VW's arguments, it continues to believe that it lacks authority to provide exclusions, along the lines discussed above, for vehicles with low U.S./Canadian content. As discussed below, the agency believes that VW is incorrectly interpreting one sentence in section 210(d) (now replaced by 49 U.S.C. 32304(e)) as overriding more specific statutory provisions.

Since VW based its argument in part on the case of *Alabama Power Co.*, the agency will begin its analysis by quoting the relevant portion of that case:

> *Exemptions for De Minimis Circumstances.* Categorical exemptions may also be permissible as an exercise of agency power, inherent in most statutory schemes, to overlook circumstances that in context may fairly be considered *de minimis*. . . .
>
> Determination of when matters are truly *de minimis* naturally will turn on the assessment of particular circumstances, and the agency will bear the burden of making the required showing. But we think most regulatory statutes . . . permit such agency showings in appropriate cases.
>
> While the difference is one of degree, the difference of degree is an important one. Unless Congress has been extraordinarily rigid, there is likely a basis for an implication of *de minimis* authority to provide exemption when the burdens of regulation yield a gain of trivial or no value. That implied authority is not available for a situation where the regulatory function does provide benefits, in the sense of furthering the regulatory objectives, but the agency concludes that the acknowledged benefits are exceeded by the costs. For such a situation any implied authority to make cost-benefit decisions must be based not on a general doctrine but on a fair reading of the specific statute, its aims and legislative history. . . . 636 F.2d at 360–61.

In the final rule preamble, NHTSA explained that an exclusion cannot be justified on the *de minimis* theory if non-trivial benefits would otherwise be provided. The agency concluded that it does not have authority to provide the relevant exclusion for vehicles with low U.S./Canadian content because such an exclusion would permit the labels on a substantial portion of the vehicles sold to provide the consumer with significantly less information than Congress intended, thereby eliminating much of the benefit that the Labeling Act was intended to provide.

The agency added:

> For example, a "low-end" exclusion would permit a large percentage of foreign vehicles to be labeled with the words "minimal" or less than 35 percent (or some other specified percentage) U.S./Canadian content, instead of being labeled with a specific percentage. Consumers would not know whether vehicles bearing such labels contained (on a carline basis) 0 percent, about 15 percent, or possibly even nearly 35 percent U.S./Canadian content. A consumer wishing to make a purchase decision among vehicles bearing such labels would not be able to compare their U.S./Canadian content. . . .

NHTSA notes that section 210(b)(2) allows rounding of the percentages, but limits the rounding "to the nearest *five percent.*" This indicates that specific percentages must be listed (since general percentages aren't amenable to rounding) and that any rounding to a greater degree is prohibited. In this regard, it is particularly important to note that the degree of permissible rounding permitted by the enacted version of § 210 is significantly less than the degree that would have been permitted in the introduced version. In the introduced version, rounding would have been permitted to the nearest 10 percent. The enacted version permits rounding only to the nearest 5 percent. Thus, Congress focused particular attention on the issue of rounding and decided to adopt strict limits. Moreover, implicit in the enacted rounding provision is a judgment by Congress that differences in content of as little as five percentage points are significant enough to be considered by the consumer.

The agency continues to believe that the Labeling Act and its legislative history make it clear that requirements which enable consumers to distinguish vehicles with 0 percent, 5 percent, 10 percent, 15 percent, 20 percent, 25 percent, 30 percent, and 35 percent U.S./Canadian content provide non-trivial benefits. While such information may not make a difference to consumers who wish to purchase a vehicle that is primarily of U.S./Canadian origin, the information may be relevant for consumers in making a purchase decision between vehicles with relatively low U.S./Canadian content, e.g., for a consumer who may be deciding between a vehicle with 0 percent U.S./Canadian content and one which has 20 percent U.S./Canadian content.

VW's primary argument on reconsideration is that "NHTSA did not properly balance the statutory considerations requiring the parts content label to contain 'the best and most understandable information' to the consumer with the cost and administrative burdens imposed upon a manufacturer such as VW, as Congress expressly directed it to do in the form of a clear and precise mandate." However, VW is incorrectly reading a general statutory provision as overriding most of the rest of the statute.

Section 32304(e) reads in relevant part as follows:

> (e) REGULATIONS.— . . . The Secretary of Transportation shall prescribe regulations necessary to carry out this section, including regulations establishing a procedure to verify the label information required under subsection (b)(1) of this section. Those regulations shall provide the ultimate purchaser of a new passenger motor vehicle with the best and most understandable information possible about the foreign content and United States/Canadian origin of the equipment of the vehicles without imposing costly and unnecessary burdens on the manufacturers. . . .

VW is reading the second sentence of section 32304(e) outside of context. The first sentence makes it clear that the required regulations are "to carry out this section." The term "this section" refers to section 32304, which includes numerous very specific requirements concerning the content information which manufacturers are required to provide. The second sentence is not an invitation for NHTSA to second-guess Congress on all of the specific requirements in section 32304 concerning content information, e.g., whether the information Congress decided to require manufacturers to provide is "best," whether that information is "most understandable," etc. The sentence instead indicates the factors NHTSA must consider in exercising its limited discretion in developing the required regulation. The agency observes that VW's reading of this sentence would reduce virtually all of the specific requirements of section 32304 to suggestions for NHTSA's consideration.

VW argued that the sentence at issue is specific rather than general in nature. That argument was apparently made in response to the agency's statement in the final rule preamble that, as a matter of statutory construction, general provisions cannot be construed as overriding specific ones. NHTSA isn't arguing that it need not follow that sentence. What is significant is that the second sentence of 49 U.S.C. 32304(e) is general as compared to other relevant provisions of the statute.

Of particular significance, section 32304(b) reads as follows:

> (b) MANUFACTURER REQUIREMENT.—(1) Each manufacturer of a new passenger motor vehicle * * * shall establish each year for each model year and cause to be attached in a prominent place on each of those vehicles, at least one label. The label shall contain the following information:
>
> (A) the *percentage* (by value) of passenger motor vehicle equipment of United States/Canadian origin installed on vehicles in the carline to which that vehicle belongs, identified by the words "U.S./Canadian content." (Emphasis added.)

This subsection expressly and specifically requires manufacturers to provide certain information, on the label, including the percentage U.S./Canadian parts content. Following accepted principles of statutory construction, the agency cannot interpret a more general provision as overriding this specific provision.

F. Clarifying Amendments

NHTSA is making several amendments suggested by AAMA for purposes of clarity. The amendments help clarify when the U.S. and Canada are treated together and when they are treated separately in making country of origin determinations. The amendments also help clarify requirements concerning optional information for carlines assembled in the U.S./Canada and in one or more other countries.

G. Letter From Ford

Ford submitted a letter requesting NHTSA's concurrence on a procedure for determining the U.S./Canadian content and country of origin for foreign-sourced allied and outside supplier components. That company explained its request as follows:

> [Part 583] assigns zero domestic content to all passenger motor vehicle equipment which is imported into the territorial boundaries of the United States or Canada from a third country, even if part of its material originated in the United States or Canada. 49 CFR 583.7 allows the supplier to use methodologies that are used for customs purposes to determine the country of origin. Ford expects that for any imported component, both allied and outside, suppliers would report that the domestic content is zero and the country of origin is the country of manufacture, based on the rules of substantial transformation.
>
> Ford can obtain the same information (zero domestic content, country of manufacture, purchase price) expected to be received from our foreign suppliers from our present purchasing systems. Since the process of soliciting the supplier is costly, Ford plans to assign the domestic content and country of origin of the foreign sourced components without soliciting the data from our foreign suppliers. We are concerned that even if Ford did submit the request to foreign suppliers, that suppliers would have to expend additional resources creating a document which Ford already knows the answer. Even if the foreign supplier does not respond, the domestic content and country of origin will not be any different than if they did respond. Ford believes that requiring these suppliers to respond will impose costly and unnecessary burdens on our foreign suppliers.

NHTSA notes that it decided to address Ford's request in this notice, since it was related to some of the issues raised by the petitions for reconsideration.

After carefully considering Ford's request in light of the Labeling Act and Part 583, NHTSA has decided that, for equipment supplied by foreign suppliers and imported into the U.S. or Canada, manufacturers may use any available information to make determinations of zero U.S./Canadian content, country of manufacture, and purchase price, as an alternative to relying on supplier certifications. The agency notes that this represents a change in position from the final rule preamble. The reasons for the agency's new position are set forth below.

In the final rule preamble, NHTSA noted that Toyota had commented that "blanket certifications" should be authorized for use where a supplier's parts contain no U.S./Canadian content and where the country of origin of the equipment is indicated in ordinary business records. In responding to this comment, the agency noted that the Labeling Act provides that the agency's "regulations shall include provisions applicable to outside suppliers and allied suppliers to require those suppliers to certify whether passenger motor vehicle equipment provided by those suppliers is of United States origin, of United States/Canadian origin, or of foreign content and to provide other information * * * necessary to allow each manufacturer to comply reasonably with this section and to rely on that certification and information." 49 U.S.C. 32304(e). NHTSA concluded that, given this statutory provision, it cannot permit the use of ordinary business records instead of specific certifications. See 59 FR 37319. (The agency did note that a certification can cover multiple items of equipment and be incorporated into business records that contain other information.)

On further consideration, NHTSA has concluded that the above-quoted sentence of section 32304(e) should not be read to require manufacturers to obtain information from suppliers that the manufacturer can determine on its own. The agency believes that statutory requirement is met literally by section 583's requirement for suppliers to provide manufacturers and allied suppliers, upon their request, a certificate providing the relevant information. The agency also believes that there is no reason to require manufacturers to request information for which they already know the answer.

With respect to whether manufacturers can make the relevant content determinations, NHTSA believes that it is important to distinguish between passenger motor vehicle equipment that is assembled or produced in the U.S. or Canada, and equipment imported into the U.S. or Canada that was produced in third countries. For reasons discussed in the section on "non-responsive suppliers," manufacturers and allied suppliers will not possess the information needed to determine whether equipment produced in the U.S. or Canada is of U.S./Canadian origin, i.e., whether the equipment has at least 70 percent U.S./Canadian content.

However, manufacturers may possess the information necessary to make content determinations for equipment imported into the U.S. or Canada that was produced in third countries. Under section 583.6(c), the U.S./Canadian content of such equipment is presumed to be zero. Moreover, section 583.7 provides considerable flexibility in making country-of-origin determinations for such equipment. Therefore, for equipment supplied by foreign suppliers which is imported into the U.S. or Canada, the agency believes it is reasonable to permit manufacturers to use any available information to make determinations of zero U.S./Canadian content, country of manufacture, and purchase price, as an alternative to relying on supplier certifications. Manufacturers can, of course, request the information of foreign suppliers instead of making their own determinations.

NHTSA does not believe that there is a need to change the regulation to reflect this new position. The agency notes that section 583.5(h) requires manufacturers and allied suppliers to request their suppliers to provide directly to them the information and certifications "which are necessary for the manufacturer/allied supplier to carry out its responsibilities under [Part 583]." Thus, manufacturers and allied suppliers are not required to request information which is unnecessary for them to carry out their responsibilities.

VI. Rulemaking Analyses and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

NHTSA has considered the impacts of this rulemaking action under Executive Order 12866 and the Department of Transportation's regulatory policies and procedures. This rulemaking document was reviewed under Executive Order 12866. The July 1994 final rule was determined to be "significant" under the Department's regulatory policies and procedures, given the degree of public interest and the relationship to other Federal programs and agencies, particularly those related to international trade. This final rule is sufficiently related to that final rule to also be considered significant.

NHTSA discussed the costs associated with the July 1994 rule in a Final Regulatory Evaluation which was placed in the docket for this rulemaking. Today's amendments should slightly reduce manufacturer and supplier costs by simplifying the process for making content determinations.

B. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, the agency has considered the impact this rulemaking will have on small entities. I certify that this action will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis is not required for this action. Although certain small businesses, such as parts suppliers and some vehicle manufacturers, are affected by the regulation, the effect on them is minor since the requirements are informational.

C. National Environmental Policy Act

The agency has analyzed the environmental impacts of the regulation in accordance with the National Environmental Policy Act, 42 U.S.C. 4321 *et seq.*, and has concluded that it will not have a significant effect on the quality of the human environment.

D. Executive Order 12612 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

E. Paperwork Reduction Act

The reporting and recordkeeping requirements associated with this final rule are being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35.

F. Executive Order 12778 (Civil Justice Reform)

This rule does not have any retroactive effect. States are preempted from promulgating laws and regulations contrary to the provisions of the rule. The rule does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

List of Subjects in 49 CFR Part 583

Motor vehicles, Imports, Labeling, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR part 583 is amended as follows:

PART 583—AUTOMOBILE PARTS CONTENT LABELING

1. The authority citation for part 583 continues to read as follows:

Authority: 49 U.S.C. 32304, 49 CFR 1.50, 501.2(f).

2. Section 583.5 is amended by revising paragraph (e)(3) to read as follows:

§ 583.5 Label requirements.

* * * * *

(e) * * *

(3) A manufacturer selecting this option for a particular carline shall

provide the specified additional information on the labels of all vehicles within the carline, providing the U.S./Canadian content that corresponds to the U.S./Canadian content of the manufacturing location shown as the final assembly point (with all U.S. and Canadian locations considered as a single assembly point) on the label.

* * * * *

3. Section 583.6 is revised to read as follows:

§ 583.6 Procedure for determining U.S./Canadian parts content.

(a) Each manufacturer, except as specified in § 583.5(f) and (g), shall determine the percentage U.S./Canadian Parts Content for each carline on a model year basis, before the beginning of each model year. Items of equipment produced at the final assembly point (but not as part of final assembly) are treated in the same manner as if they were supplied by an allied supplier. All value otherwise added at the final assembly point and beyond, including all final assembly costs, are excluded from the calculation of U.S./Canadian parts content.

(b) *Determining the value of items of equipment.*

(1) For items of equipment received at the final assembly point, the value is the price paid by the manufacturer for the equipment as delivered to the final assembly point.

(2) For items of equipment produced at the final assembly point (but not as part of final assembly), the value is the fair market price that a manufacturer of similar size and location would pay a supplier for such equipment.

(3) For items of equipment received at the factory or plant of an allied supplier, the value is the price paid by the allied supplier for the equipment as delivered to its factory or plant.

(c) *Determining the U.S./Canadian percentage of the value of items of equipment.*

(1) Equipment supplied by an outside supplier to a manufacturer or allied supplier is considered:

(i) 100 percent U.S./Canadian, if 70 percent or more of its value is added in the United States and/or Canada; and

(ii) 0 percent U.S./Canadian, if less than 70 percent of its value is added in the United States and/or Canada.

(2) The extent to which an item of equipment supplied by an allied supplier is considered U.S./Canadian is determined by dividing the value added in the United States and/or Canada by the total value of the equipment. The resulting number is multiplied by 100 to determine the percentage U.S./Canadian content of the equipment.

(3) In determining the value added in the United States and/or Canada of equipment supplied by an allied supplier, any equipment that is delivered to the allied supplier by an outside supplier and is incorporated into the allied supplier's equipment, is considered:

(i) 100 percent U.S./Canadian, if at least 70 percent of its value is added in the United States and/or Canada; and

(ii) 0 percent U.S./Canadian, if less than 70 percent of its value is added in the United States and/or Canada.

(4)(i) Value added in the United States and/or Canada by an allied supplier or outside supplier includes—

(A) The value added in the U.S. and/or Canada for materials used by the supplier, determined according to (4)(ii) for outside suppliers and (4)(iii) for allied suppliers, plus,

(B) For passenger motor vehicle equipment assembled or produced in the U.S. or Canada, the value of the difference between the price paid by the manufacturer or allied supplier for the equipment, as delivered to its factory or plant, and the total value of the materials in the equipment.

(ii) Outside suppliers of passenger motor vehicle equipment will determine the value added in the U.S. and/or Canada for materials in the equipment as specified in paragraphs (A) and (B).

(A)(*1*) For any material used by the supplier which was produced or assembled in the U.S. or Canada, the supplier will subtract from the total value of the material any value that was not added in the U.S. and/or Canada. The determination of the value that was not added in the U.S. and/or Canada shall be a good faith estimate based on information that is available to the supplier, e.g., information in its records, information it can obtain from its suppliers, the supplier's knowledge of manufacturing processes, etc.

(*2*) The supplier shall consider the amount of value added and the location in which that value was added—

(*i*) At each earlier stage, counting from the time of receipt of a material by the supplier, back to and including the two closest stages each of which represented a substantial transformation into a new and different product with a different name, character and use.

(*ii*) The value of materials used to produce a product in the earliest of these two substantial transformation stages shall be treated as value added in the country in which that stage occurred.

(B) For any material used by the supplier which was imported into the United States or Canada from a third country, the value added in the United States and/or Canada is presumed to be zero. However, if documentation is available to the supplier which identifies value added in the United States and/or Canada for that material (determined according to the principles set forth in (A), such value added in the United States and/or Canada is counted.

(iii) Allied suppliers of passenger motor vehicle equipment shall determine the value that is added in the U.S. and/or Canada for materials in the equipment in accordance with (c)(3).

(iv) For the minor items listed in the § 583.4 definition of "passenger motor vehicle equipment" as being excluded from that term, outside and allied suppliers may, to the extent that they incorporate such items into their equipment, treat the cost of the minor items as value added in the country of assembly.

(v) For passenger motor vehicle equipment which is imported into the territorial boundaries of the United States or Canada from a third country, the value added in the United States and/or Canada is presumed to be zero. However, if documentation is available to the supplier which identifies value added in the United States and/or Canada for that equipment (determined according to the principles set forth in the rest of (c)(4)), such value added in the United States and/or Canada is counted.

(vi) The payment of duty does not result in value added in the United States and/or Canada.

(5) If a manufacturer or allied supplier does not receive information from one or more of its suppliers concerning the U.S./Canadian content of particular equipment, the U.S./Canadian content of that equipment is considered zero. This provision does not affect the obligation of manufacturers and allied suppliers to request this information from their suppliers or the obligation of the suppliers to provide the information.

(d) *Determination of the U.S./Canadian percentage of the total value of a carline's passenger motor vehicle equipment.* The percentage of the value of a carline's passenger motor vehicle equipment that is U.S./Canadian is determined by—

(1) Adding the total value of all of the equipment (regardless of country of origin) expected to be installed in that carline during the next model year;

(2) Dividing the value of the U.S./Canadian content of such equipment by the amount calculated in paragraph (d)(1) of this section, and

(3) Multiplying the resulting number by 100.

(e) *Alternative calculation procedures.*

(1) A manufacturer may submit a petition to use calculation procedures based on representative or statistical sampling, as an alternative to the calculation procedures specified in this section to determine U.S./Canadian parts content and major sources of foreign parts content.

(2) Each petition must—

(i) Be submitted at least 120 days before the manufacturer would use the alternative procedure;

(ii) Be written in the English language;

(iii) Be submitted in three copies to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590;

(iv) State the full name and address of the manufacturer;

(v) Set forth in full the data, views and arguments of the manufacturer that would support granting the petition, including—

(A) the alternative procedure, and

(B) analysis demonstrating that the alternative procedure will produce substantially equivalent results to the procedure set forth in this section;

(vi) Specify and segregate any part of the information and data submitted in the petition that is requested to be withheld from public disclosure in accordance with part 512 of this chapter (the basic alternative procedure and basic supporting analysis must be provided as public information, but confidential business information may also be used in support of the petition).

(3) The NHTSA publishes in the **Federal Register**, affording opportunity for comment, a notice of each petition containing the information required by this part. A copy of the petition is placed in the public docket. However, if NHTSA finds that a petition does not contain the information required by this part, it so informs the petitioner, pointing out the areas of insufficiency and stating that the petition will not receive further consideration until the required information is submitted.

(4) If the Administrator determines that the petition does not contain adequate justification, he or she denies it and notifies the petitioner in writing, explaining the reasons for the denial. A copy of the letter is placed in the public docket.

(5) If the Administrator determines that the petition contains adequate justification, he or she grants it, and notifies the petitioner in writing. A copy of the letter is placed in the public docket.

(6) The Administrator may attach such conditions as he or she deems appropriate to a grant of a petition, which the manufacturer must follow in order to use the alternative procedure.

4. Section 583.7 is amended by revising paragraphs (c)(1) and (f) to read as follows:

§ 583.7 Procedure for determining major foreign sources of passenger motor vehicle equipment.

* * * * *

(c) * * *

(1) Except as provided in (c)(2), the country of origin of each item is the country which contributes the greatest amount of value added to that item (treating the U.S. and Canada together).

* * * * *

(f) In determining the percentage of the total value of a carline's passenger motor vehicle equipment which is attributable to individual countries other than the U.S. and Canada, no value which is counted as U.S./Canadian parts content is also counted as being value which originated in a country other than the U.S. or Canada.

5. Section 583.8 is amended by revising paragraphs (c)(1) and (e) to read as follows:

§ 583.8 Procedure for determining country of origin for engines and transmissions for purposes of determining the information specified by §§ 583.5(a)(4) and 583.5(a)(5) only.

* * * * *

(c) * * *

(1) Except as provided in (c)(2), the country of origin of each item of equipment is the country which contributes the greatest amount of value added to that item (the U.S. and Canada are treated separately).

* * * * *

(e) The country of origin of each engine and the country of origin of each transmission is the country which contributes the greatest amount of value added to that item of equipment (the U.S. and Canada are treated separately).

Issued on: September 11, 1995.

Ricardo Martinez,

Administrator.

Proposed Rules

Federal Register

Vol. 60, No. 179

Friday, September 15, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94–NM–179–AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking; reopening of comment period.

SUMMARY: This document revises an earlier proposed airworthiness directive (AD), which would have superseded an existing AD that is applicable to certain Boeing Model 727 series airplanes. The existing AD currently requires inspections to detect cracks of the elevator rear spar, and repair, if necessary; and provides for a terminating action for the inspections. The previously proposed action would have added a one-time inspection to verify that proper clearance exists between the shear plate and the radii of the elevator rear spar on airplanes on which the terminating action had been accomplished. This action revises the proposed rule by adding new inspections to detect cracks and loose brackets of the elevator rear spar; adding a new terminating modification for the inspections; and expanding the applicability of the rule to include additional airplanes. Additionally, it would supersede two previously issued AD's. The proposed actions are intended to prevent cracking in elements of the elevator rear spar assembly, which could result in excessive free play of the elevator control tab and possible tab flutter.

DATES: Comments must be received by October 12, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–179–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Walter Sippel, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2774; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–179–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–179–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to add an airworthiness directive (AD), applicable to certain Model 727 series airplanes, was published as a notice of proposed rulemaking (NPRM) in the **Federal Register** on December 29, 1994 (59 FR 67238). That NPRM published as Docket 94–NM–179–AD, would have superseded AD 84–22–02, amendment 39–4951 (49 FR 45743, November 20, 1984) to continue to require repetitive visual inspections to detect cracks of the elevator rear spar, and repair, if necessary. That NPRM would have added a one-time inspection to verify that proper clearance exists between the shear plate and the radii of the elevator rear spar on airplanes on which the terminating action specified in AD 84–22–02 has been accomplished. That NPRM would have also provided for an improved modification or repair of the elevator rear spar, which, if accomplished, would have constituted terminating action for the repetitive visual inspection requirements. The proposed action was prompted by reports of cracking in the spar radii at the tab hinge location of the elevator rear spar on certain airplanes. Cracking in this area, if not corrected, could result in excessive free play of the elevator control tab and possible tab flutter.

The FAA issued another proposal, Docket No. 94–NM–197–AD, applicable to certain Boeing Model 727 series airplanes, which was published as a NPRM in the **Federal Register** on January 4, 1995 (60 FR 386). That NPRM proposed to supersede AD 87–24–03, amendment 39–5769 (52 FR 43742, November 16, 1987), and require actions essentially identical to those previously proposed in Docket No. 94–NM–179–AD. The only relevant differences are the specific affected airplanes and certain compliance times.

Since the issuance of those two NPRM's, the FAA has received several reports of cracking found in the elevator

rear spar on a number of Model 727 series airplanes. Investigation has revealed that this cracking occurred on these airplanes following accomplishment of inspections to ensure that proper clearance exists between the shear plate and the rear spar radii. Those inspections of this area would have been required by the two previously-issued NPRM's. The inspection procedure is described in Boeing Service Bulletin 727–55–0085 (which was referenced in Docket No. 94–NM–179–AD as the appropriate source of service information), and Boeing Service Bulletin 727–55–0087 (which was referenced in Docket No. 94–NM–197–AD as the appropriate source of service information). In light of this new cracking, the FAA has determined that these inspections to verify clearance, as proposed in Docket 94–NM–179–AD and Docket 94–NM–197–AD, do not adequately preclude fatigue cracking in the elevator rear spar; this condition could result in excessive free play of the elevator control tab and possible tab flutter.

The FAA has reviewed and approved Boeing Service Bulletin 727–55–0089, dated June 29, 1995. The service bulletin describes procedures for repetitive visual inspections to detect cracks and loose brackets of the elevator rear spar in the area along the upper and lower edges at the shear plate. This service bulletin also describes procedures for various follow-on actions, such as stop drilling and modification. The modification involves replacing the elevator rear spar with a one piece spar assembly and the tee fittings with two support fittings per tab hinge bracket. This modification will prevent fatigue cracks in the elevator rear spar. Accomplishment of the modification eliminates the need for the repetitive visual inspections.

Additionally, this service bulletin expands the effectivity listing to include additional airplanes, which were not previously addressed in Boeing Service Bulletins 727–55–0085 and 727–44–0087, but are subject to the addressed unsafe condition. (Operators should note that Boeing Service Bulletin 727–55–0089 supersedes Boeing Service Bulletins 727–55–0085 and 727–55–0087.)

Since this condition is likely to exist or develop on other products of this same type design, this supplemental NPRM would supersede AD's 84–22–02 and 87–24–03, and would require repetitive visual inspections to detect cracks and loose brackets of the elevator rear spar, and various follow-on actions. The supplemental NPRM would also require installation of a modification that would constitute terminating action for the repetitive inspections. Additionally, the supplemental NPRM would expand the applicability of the existing proposed rule to include additional airplanes. These actions would be required to be accomplished in accordance with Boeing Service Bulletin 727–55–0089, described previously.

The FAA has determined that, in order to adequately address the unsafe condition presented by the problems associated with fatigue cracking in the subject areas, and to facilitate recordkeeping by affected operators, this proposed action (Docket 94–NM–179–AD) will combine the requirements (and applicability) that were previously proposed in two separate rulemaking actions. The FAA intends to withdraw Docket 94–NM–197–AD at a later time by means of a separate rulemaking action.

Since these changes expand the scope of the originally proposed rule, the FAA has determined that it is necessary to reopen the comment period to provide additional opportunity for public comment.

There are approximately 1,631 Model 727 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,166 airplanes of U.S. registry would be affected by this proposed AD.

The inspections would take approximately 17 work hours per airplane to accomplish (this includes the time required to gain access, remove parts, inspect, install, and perform functional testing), at an average labor rate of $60 per work hour. Based on these figures, the total cost impact of the proposed inspections requirements on U.S. operators is estimated to be $1,189,320, or $1,020 per airplane, per inspection cycle.

The modification would take approximately 430 work hours per airplane to accomplish, at an average labor rate of $60 per work hours. Required parts would cost approximately $8,580 per airplane. Based on these figures, the total cost impact of the proposed modification requirements on U.S. operators is estimated to be $40,087,080, or $34,380 per airplane.

The total cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The FAA recognizes that the obligation to maintain aircraft in an airworthy condition is vital, but sometimes expensive. Because AD's require specific actions to address specific unsafe conditions, they appear to impose costs that would not otherwise be borne by operators. However, because of the general obligation of operators to maintain aircraft in an airworthy condition, this appearance is deceptive. Attributing those costs solely to the issuance of this AD is unrealistic because, in the interest of maintaining safe aircraft, prudent operators would accomplish the required actions even if they were not required to do so by the AD.

A full cost-benefit analysis has not been accomplished for this proposed AD. As a matter of law, in order to be airworthy, an aircraft must conform to its type design and be in a condition for safe operation. The type design is approved only after the FAA makes a determination that it complies with all applicable airworthiness requirements. In adopting and maintaining those requirements, the FAA has already made the determination that they establish a level of safety that is cost-beneficial. When the FAA, as in this proposed AD, makes a finding of an unsafe condition, this means that the original cost-beneficial level of safety is no longer being achieved and that the proposed actions are necessary to restore that level of safety. Because this level of safety has already been determined to be cost-beneficial, a full cost-benefit analysis for this proposed AD would be redundant and unnecessary.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendments 39–4951 (49 FR 45743, November 20, 1984) and 39–5769 (52 FR 43742, November 16, 1987), and by adding the following new airworthiness directive:

Boeing: Docket 94–NM–179–AD. Supersedes AD 84–22–02, amendment 39–4951; and AD 87–24–03, amendment 39–5769.

Applicability: Model 727 series airplanes, line numbers 1 through 1832 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (j) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent excessive free play of the elevator control tab and possible tab flutter, accomplish the following:

(a) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–0085, dated August 31, 1984 (specified as terminating action in AD 84–22–02, amendment 39–4951), has not been accomplished and the repetitive inspections required by AD 84–22–02 have not been initiated: Prior to the accumulation of 8,000 total flight hours since date of manufacture, or within 300 flight hours after the effective date of this AD, whichever occurs later, accomplish paragraph (g) of this AD.

Note 2: AD 84–22–02 pertains to the one-piece elevator rear spar.

(b) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–0085, dated August 31, 1984 (specified as terminating action in AD 84–22–02, amendment 39–4951), has not been accomplished and the repetitive inspections required by AD 84–22–02 have been initiated: Accomplish either paragraph (b)(1) or (b)(2) of this AD, as applicable.

(1) If any crack has been stop drilled in accordance with AD 84–22–02, accomplish paragraphs (b)(1)(i) and (b)(1)(ii) of this AD, in accordance with Boeing Service Bulletin 727–55–0089, dated June 29, 1995.

(i) Within 1,600 flight hours after stop drilling, accomplish paragraph (g) of this AD.

(ii) Notwithstanding paragraph (h) of this AD, within 3,200 flight hours after stop drilling, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of the service bulletin.

(2) If no crack has been detected as a result of inspections required by AD 84–22–02, within 1,600 flight hours after the last inspection required by that AD, perform a visual inspection to detect cracks and loose brackets of the elevator rear spar in the area along the upper and lower edges at the shear plate, and accomplish follow-on actions (i.e., stop drill, modify), in accordance with the Boeing Service Bulletin 727–44–0089, dated June 29, 1995. Repeat the inspection thereafter at intervals not to exceed 1,600 flight hours or 18 months, whichever occurs first. If any crack growth is detected after stop drilling, prior to further flight, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of Boeing Service Bulletin 727–44–0089, dated June 29, 1995.

(c) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–0085, dated August 31, 1984 (specified as terminating action in AD 84–22–02, amendment 39–4951), has been accomplished: Within 4,000 flight hours after the effective date of this AD, accomplish paragraph (g) of this AD.

(d) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–087, dated June 20, 1986 (specified as terminating action in AD 87–24–03, amendment 39–5769), has not been accomplished and the repetitive inspections required by AD 87–24–03 have not been initiated: Accomplish paragraph (g) of this AD, at the earliest of times specified in paragraph (d)(1), (d)(2), or (d)(3):

Note 3: AD 87–24–03 pertains to the two-piece elevator rear spar.

(1) Prior to the accumulation of 27,000 total flight hours since date of manufacture, or within 4,000 flight hours after December 24, 1987 (the effective date of 87–24–03, amendment 39–5769), whichever occurs later; or

(2) Prior to the accumulation of 12,000 total flight hours since date of manufacture, or within 4,000 flight hours after the effective date of this AD, whichever occurs later; or

(3) Prior to the accumulation of 27,300 total flight hours since date of manufacture, or within 300 flight hours after the effective date of this AD, whichever occurs later.

(e) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–087, dated June 20, 1986 (specified as terminating action in AD 87–24–03, amendment 39–5769), has not been accomplished and the repetitive inspections required by AD 87–24–03 have been initiated: Accomplish either paragraph (e)(1) or (e)(2) of this AD, as applicable.

(1) If any crack has been stop drilled in accordance with AD 87–24–03, accomplish paragraphs (e)(1)(i) and (e)(1)(ii) of this AD, in accordance with Boeing Service Bulletin 727–55–0089, dated June 29, 1995.

(i) Within 1,600 flight hours after stop drilling, accomplish paragraph (g) of this AD.

(ii) Notwithstanding paragraph (h) of this AD, within 3,200 flight hours after stop drilling, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of the service bulletin.

(2) If no crack has been detected as a result of inspections required by AD 87–24–03, within 4,000 flight hours after the last inspection required by that AD, perform a visual inspection to detect cracks and loose brackets of the elevator rear spar in the area along the upper and lower edges at the shear plate, and accomplish follow-on actions (i.e., stop drill, modify), in accordance with Boeing Service Bulletin 727–44–0089, dated June 29, 1995. Repeat the inspection thereafter at intervals not to exceed 1,600 flight hours or 18 months, whichever occurs first. If any crack growth is detected after stop drilling, prior to further flight, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of Boeing Service Bulletin 727–44–0089, dated June 29, 1995.

(f) For airplanes on which the modification or repair described in Boeing Service Bulletin 727–55–087, dated June 20, 1986 (specified as terminating action in AD 87–24–03, amendment 39–5769), has been accomplished: Within 4,000 flight hours after the effective date of this AD, accomplish paragraph (g) of this AD.

(g) At the time specified in paragraphs (a), (b)(1)(i), (c), (d), (e)(1)(i), and (f), as applicable, perform a visual inspection to detect cracks and loose hinge brackets of the elevator rear spar in the area along the upper and lower edges at the shear plate, and accomplish follow-on actions (i.e., re-inspect, stop drill, modify) in accordance with Boeing Service Bulletin 727–55–0089, dated June 29, 1995, at the time specified in the service bulletin. If any crack growth is detected after stop drilling, prior to further flight, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of Boeing Service Bulletin 727–55–0089, dated June 29, 1995. Accomplishment of the modification constitutes terminating action for the repetitive inspection requirements of this AD.

(h) Within 5 years after accomplishing the initial inspection required by this AD, modify the elevator rear spar in accordance with Part II of the Accomplishment Instructions of Boeing Service Bulletin 727–55–0089, dated June 29, 1995. Accomplishment of the modification constitutes terminating action for the repetitive inspection requirements of this AD.

(i) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(j) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Issued in Renton, Washington, on September 11, 1995.

D.L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 93–CE–02–AD]

Airworthiness Directives; Glasflugel, Model Mosquito Sailplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to Glasflugel, model Mosquito sailplanes. The proposed action would require modifying the mounting studs on the lifting/tilting frame of the canopy system, repetitively inspecting the mounting stud, and incorporating flight manual revisions that specify a warning on emergency canopy deployment failure. Canopy system problems discovered during routine checks and periodic inspections of these sailplanes prompted the proposed action. The actions specified in this proposed AD are intended to prevent canopy system failure, which could result in loss of control of the sailplane.

DATES: Comments must be received on or before November 17, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 93–CE–02–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Glasflugel, c/o Hansjorg Streifeneder, Glasfer-Flugzeug Service, Hofener Weg, D 72582 Grabenstetten, Germany, telephone number 49.73.82.10.32. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Herman C. Belderok, Project Officer, Gliders, Small Airplane Directorate, Aircraft Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone (816) 426–6932; facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 93–CE–02–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 93–CE–02–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority for Germany, recently notified the FAA that an unsafe condition may exist on certain Glasflugel mode Mosquito sailplanes. The LBA reports: (1) considerable wear to the mounting studs on the canopy lifting/tilting frame caused by the guide bracket on either side of the fuselage; and (2) possible emergency deployment failure of the canopy caused by the "Pip" pin not being engaged.

Glasflugel has issued the following Technical Note (TN) 303–18, dated March 1, 1991, which specifies repetitively inspecting the mounting studs on the canopy lifting/tilting frame for wear caused by the guide bracket on either side of the fuselage and modifying the mounting studs if they are less than a specified diameter.

Glasflugel also issued Technical Note 303–9, dated June 22, 1979, which specifies incorporating a flight manual revision to include a warning regarding the emergency canopy deployment system.

In order to assure the continued airworthiness of these sailplanes in Germany, the LBA classified the above-referenced technical notes as mandatory, and also issued LBA AD 91–111. The LBA classifying a technical note as mandatory is the same for sailplanes registered in Germany as the FAA issuing an AD for sailplanes registered in the United States.

This sailplane model is manufactured in Germany and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement between Germany and the United States. Pursuant to this bilateral airworthiness agreement, the LBA has kept the FAA informed of the situation described above. The FAA has examined the findings of the LBA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop in other Glasflugel Mosquito sailplanes of the same type design, the proposed AD would require the following:

- Within the next 30 calendar days, after the effective date of this AD, inspect the mounting studs on the canopy lifting/tilting frame for wear, repetitively inspecting the mounting

SE
15
995
MI

stud every 100 hours time-in-service (TIS) thereafter,

- Measure the diameter of the mounting stud and if it is less than 5 mm (0.2 inch) increase the diameter to 6 mm (0.24 inch) in accordance with the procedure described in Glasflugel Technical Note (TN) 303–18, dated March 1, 1991,
- Incorporate a change to the Mosquito flight manual on page 19, paragraph 3.3 by inserting the following language in accordance with Glasflugal TN 303–9, dated June 22, 1979:

> Whenever the canopy emergency jettison knob is pulled and prior to each flight, if no locking thread is used, it should be ensured that the Pip pines are fully pushed home, so that the locking balls are clear of and behind their fittings.

Initially, the compliance time of the proposed AD is in calendar time instead of hours time-in-service (TIS). The average monthly usage of the affected sailplanes ranges throughout the fleet. For example, one owner may operate the sailplane 25 hours in one week, while another operator may operate the sailplane 25 hours in one year. For this reason, the FAA has determined that, in order to ensure that all of the owners/operators of the affected sailplanes initially inspect the canopy system and incorporate the flight manual revisions within a reasonable amount of time, a calendar compliance time is proposed.

The FAA estimates that 40 sailplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 2 workhours per sailplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $10 per sailplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $5,200. This figure is based on the assumption that no affected owner/operator of the affected sailplanes has incorporated the proposed modification or accomplished the proposed inspection.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40101, 40113, 44701.

§39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Glasflugel: Docket No. 93–CE–02–AD.

Applicability; Model Mosquito Sailplanes (all serial numbers).

Note 1: This AD applies to each sailplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For sailplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (e) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any sailplane from the applicability of this AD.

Compliance: Required initially within the next 30 calendar days after the effective date of this AD, unless already accomplished, and repetitively inspect thereafter as indicated in the body of this AD.

To prevent canopy frame failure and emergency canopy deployment failure, which could result in loss of control of the sailplane, accomplish the following:

(a) Inspect the mounting studs on the canopy lifting/tilting frame for evidence of wear and diameter specifications in accordance with the recommendation in Glasflugel TN 303–18, dated March 1, 1991.

(1) If the mounting stud is worn or the diameter measures less than 5 mm (0.2 inch), prior to further flight, increase the diameter to 6 mm (0.24 inch) in accordance with the procedure described in Glasflugel Technical Note (TN) 303–18, dated March 1, 1991.

(2) Repeat the inspection specified in paragraph (a) of this AD and increase the diameter as necessary at intervals not to exceed 100 hours time-in-service (TIS).

(b) Incorporate the following language on page 19, paragraph 3.3 of the Mosquito flight manual in accordance with Glasflugel TN 303–9, dated June 22, 1979:

> Whenever the canopy emergency jettison knob is pulled and prior to each flight, if no locking thread is used, it should be ensured that the Pip pins are fully pushed home; so that the locking balls are clear of and behind their fittings.

(c) Incorporating the flight manual revision as required by paragraph (b) of this AD may be performed by the owner/operator holding at least a private pilot certificate as authorized by section 43.7 of the Federal Aviation Regulations (14 CFR 43.7), and must be entered into the sailplane's records showing compliance with this AD in accordance with section 43.11 of the Federal Aviation Regulations (14 CFR 43.11).

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the sailplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(f) All persons affected by this directive may obtain copies of the documents referred to herein upon request to Glasflugel, c/o Hansjorg Streifeneder, Glasfaser-Flugzeug Service, Hofener Weg, D 72582 Grabenstetten, Germany, or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on September 7, 1995.

Gerald W. Pierce,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 95–NM–131–AD]

Airworthiness Directives; McDonnell Douglas Models DC–9, DC–9–80, and MD–90–30 Series Airplanes, and Model MD–88 Airplanes, and C–9 (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an exiting airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–9–80 series airplanes and Model MD–88 airplanes, that currently requires an inspection to detect chafing of or damage to the wire bundle in the overhead switch panel of the cockpit, application of spiral wrap to the wire bundle, and corrective actions, if necessary. That AD was prompted by reports of chafed and shorted wires that resulted in smoke emanating from the overhead switch panel of the cockpit. This action would expand the applicability of the rule to include certain Model DC–9, C–9 (military), and MD–90–30 series airplanes. This action also proposes to add a requirement to reroute the wire bundle to preclude chafing and damage. The actions specified by the proposed AD are intended to prevent the potential for fire and uncontrolled smoke throughout the cockpit as a result of chafing and shorting in the electrical wire bundles.

DATES: Comments must be received by November 13, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–131–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712.

FOR FURTHER INFORMATION CONTACT: J. Kirk Baker, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627–5345; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–NM–131–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–131–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On April 25, 1995, the FAA issued AD 95–09–10, amendment 39–9213 (60 FR 21977, May 4, 1995), applicable to certain McDonnell Douglas Model DC–9–80 series airplanes and Model MD–88 airplanes. That AD requires a one-time visual inspection to detect chafing of or damage to the wire bundle in the overhead switch panel of the cockpit, application of spiral wrap to the wire bundle, repair of chafed wire insulation, and splicing of damaged wires. That action was prompted by reports of chafed and shorted wires that resulted in smoke emanating from the overhead switch panel of the cockpit. The requirements of that AD are intended to prevent the potential for fire and uncontrolled smoke throughout the cockpit as a result of chafing and shorting in the electrical wire bundles.

In the preamble to AD 95–09–10, the FAA indicated that the required actions were considered to be interim action, and that additional rulemaking action was being considered to require modification (rerouting) of the wire bundles. The FAA also indicated that subsequent rulemaking action may be proposed to require the same actions that are required by AD 95–09–10 be applicable to certain Model DC–9, C–9 (military), and MD–90–30 series airplanes.

The FAA now has determined that certain Model DC–9, C–9 (military), and MD–90–30 series airplanes are subject to the same unsafe condition as Model DC–9–80 series airplanes and Model MD–88 airplanes that were identified in the applicability of AD–95–09–10, The wire bundle in the overhead switch panel of the cockpit is routed similarly in all of these airplanes and, therefore, the same potential for wire chafing and damage exists on all of these airplanes. Further, the FAA has determined the rerouting the wire bundles in the overhead switch panel of the cockpit on these airplanes will preclude the potential for fire and uncontrolled smoke throughout the cockpit .

Based on these determinations, the FAA finds that additional rulemaking is indeed necessary, and this proposed rule follows from these determinations.

Additionally, the FAA has reviewed and approved McDonnell Douglass MD–90 Alert Service Bullletin MD90–24A001, dated April 11, 1995, which describes procedures for a one-time visual inspection to detect chafing of the wire bundle in the overhead switch panel of the cockpit, application of spiral wrap, repair of chafed wire insulation, and splicing of damaged wires. This service bulletin pertains only to certain Model MD–90 series airplanes.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 95–09–10 to continue to require a one-time visual inspection to detect chafing of or damage to the wire bundle in the overhead switch panel of the cockpit, application of spiral wrap to the wire bundle, repair of chafed wire insulation, and splicing of damaged wires. For certain Model MD–90–30 series airplanes, the actions would be

VOL
60
SS
1
7
9
SE
15
995
MI

required to be accomplished in accordance with the alert service bulletin described previously. For certain Model DC–9, C–9 (military), DC–9–80 series airplanes, and Model MD–88 airplanes, the actions would continue to be required to be accomplished in accordance with McDonnell Douglas DC–9 Alert Service Bulletin DC9–24A157, dated April 11, 1995 (which was referenced in AD 95–09–10 as the appropriate source of service information).

Additionally, the proposed AD would add a requirement to reroute the wire bundle in accordance with a method approved by the FAA.

As a result of recent communications with the Air Transport Association (ATA) of America, the FAA has learned that, in general, some operators may misunderstand the legal effect of AD's on airplanes that are identified in the applicability provision of the AD, but that have been altered or repaired in the area addressed by the AD. The FAA points out that all airplanes identified in the applicability provision of an AD are legally subject to the AD. If an airplane has been altered or repaired in the affected area in such a way as to affect compliance with the AD, the owner or operator is required to obtain FAA approval for an alternative method of compliance with the AD, in accordance with the paragraph of each AD that provides for such approvals. A note has been included in this notice to clarify this long-standing requirement.

There are approximately 2,012 Model DC–9, C–9 (military, DC–9–80, and MD–90–30 series airplanes, and Model MD–88 airplanes of the affected design in the worldwide fleet. The FAA estimates that 816 airplanes of U.S. registry would be affected by this proposed AD. The proposed requirement to inspect and spiral wrap the wire bundle would take approximately 3 work hours per airplane to accomplish, and the average labor rate is $60 per work hour. Required parts would cost approximately $5 per airplane. Based on these figures that total cost impact of these proposed actions on U.S. operators is estimated to be $185 per airplane.

The requirement to inspect and spiral wrap the wire bundle, specified in this proposed rule, was previously required by AD 95–09–10, which was applicable to 614 Model DC–9–80 series airplanes and Model MD–88 airplanes of U.S. registry. Based on the figures discussed above, the total cost impact of the current requirements of that AD on U.S. operators of Model DC–9–80 series airplanes and Model MD–88 airplanes is estimated to be $113,590. In consideration of the compliance time and effective date of AD 95–09–10, the FAA assumes that U.S. operators of airplanes that are subject to the requirements of that AD have already initiated the required actions. Therefore, the proposed action to inspect and spiral wrap the wire bundle would add no new costs associated with those airplanes.

However, this proposed action would also be applicable to approximately 202 Model DC–9, C–9 (military), and Model MD–9–30 series airplanes of U.S. registry. Based on the figures discussed above, the total new costs imposed by this proposal on U.S. operators of these airplanes are estimated to be $37,370. This figure is based on assumptions that no operator of these additional airplanes has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The newly proposed requirements of this AD action to reroute the wire bundle would be applicable to 816 Model DC–9, C–9 (military), DC–9–80, and Model MD–90–30 series airplanes, and Model MD–88 airplanes of U.S. registry. The proposed requirement to reroute the wire bundle would take approximately 0.5 work hour per airplane to accomplish, and the average labor rate is $60 per work hour. Required parts would cost approximately $5 per airplane. Based on these figures the total cost impact of this proposed action on U.S. operators is estimated to be $28,560, or $35 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–9213 (60 FR 21977, May 4, 1995), and by adding a new airworthiness directive (AD), to read as follows:

McDonnell Douglas: Docket 95–NM–131–AD. Supersedes AD 95–09–10, Amendment 39–9213.

Applicability: Models DC–9, C–9 (military), and DC–9–80 series airplanes, and Model MD–88 airplanes, as listed in McDonnell Douglas DC–9 Alert Service Bulletin DC9–24A157, dated April 11, 1995; and Model MD–90–30 series airplanes, as listed in McDonnell Douglas Alert Service Bulletin MD90–24A001, dated April 11, 1995; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent the potential for fire and uncontrolled smoke throughout the cockpit, accomplish the follows:

(a) For Model DC–9–80 series airplanes and Model MD–88 airplanes: Within 90 days after May 19, 1995 (the effective date of AD 95–09–10, amendment 39–9213), perform a

visual inspection to detect chafing of or damage to the wire bundle in the overhead switch panel of the cockpit, in accordance with McDonnell Douglas Alert Service Bulletin DC9–24A157, dated April 11, 1995.

(1) If no chafing or damage is detected, prior to further flight, apply spiral wrap to the wire bundle in accordance with the alert service bulletin.

(2) If the wire insulation is chafed, prior to further flight, repair it and then apply spiral wrap to the wire bundle, in accordance with the alert service bulletin.

(3) If the wire conductor is damaged, prior to further flight, splice the wires and then apply spiral wrap to the wire bundle, in accordance with the alert service bulletin.

(b) For Model DC–9 and C–9 (military), and MD–90–30 series airplanes: Within 6 months after the effective date of this AD, perform a visual inspection to detect chafing of or damage to the wire bundle in the overhead switch panel of the cockpit, in accordance with McDonnell Douglas CD–9 Alert Service Bulletin DC9–24A157, dated April 11, 1995 [for Model DC–9 and C–9 (military) series airplanes], or McDonnell Douglas MD–90 Alert Service Bulletin MD90–24A001, dated April 11, 1995 (for Model MD–90–30 series airplanes), as applicable.

(1) If no chafing or damage is detected, prior to further flight, apply spiral wrap to the wire bundle in accordance with the applicable alert service bulletin.

(2) If the wire insulation is chafed, prior to further flight, repair it and then apply spiral wrap to the wire bundle, in accordance with the alert service bulletin.

(3) If the wire conductor is damaged, prior to further flight, splice the wires and them apply spiral wrap to the wire bundle, in accordance with the applicable alert service bulletin.

(c) Within 6 months after the effective date of this AD, reroute the wire bundle in the overhead switch panel of the cockpit in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Note 3: Alternative methods of compliance previously granted for amendment 39–9213, AD 95–09–10, continue to be considered as acceptable alternative methods of compliance with this amendment.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 11, 1995.

D.L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 95–NM–43–AD]

Airworthiness Directives; Raytheon Corporate Jets Model BAe 125–800A and –1000A and Model Hawker 800 and 1000 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Raytheon Corporate Jets Model BAe 125–800A and –1000A and Model Hawker 800 and 1000 series airplanes. This proposal would require an inspection to determine if the diode soldered connections are clean and functionally sound. This proposal would also require remake of the soldered connection and replacement of the diode with a new diode, if necessary. This proposal is prompted by reports of imperfect soldered connections in the engine starting and battery emergency control circuit. The actions specified by the proposed AD are intended to prevent incorrect fault displays in the cockpit and intermittent fault symptoms in the engine starting and battery emergency control circuits, as a result of imperfect soldered connections.

DATES: Comments must be received by October 27, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–43–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Raytheon Corporate Jets, Inc., Customer Support Department, Adams Field, P.O. Box 3356, Little Rock, Arkansas 72203. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Tim Backman, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2797; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–NM–43–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–43–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain Raytheon Corporate Jets Model BAe 125–800A and –1000A and Model Hawker 800 and 1000 series airplanes. The CAA advises that it has received reports of imperfect soldered connections in the engine starting and battery emergency control circuit. Such connections have led to fault symptoms of an intermittent nature in these circuits. This condition, if not corrected, could lead to incorrect fault displays in the cockpit and intermittent fault symptoms in the engine starting and battery emergency control circuits.

Raytheon Corporate Jets has issued Hawker Service Bulletin SB 24–317, dated December 22, 1994, which describes procedures for an inspection to determine if diode soldered connections are clean and functionally sound. This service bulletin also describes procedures for remake of the soldered connection or replacement of the diode with a new diode, if necessary. The CAA classified this service bulletin as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require an inspection to determine if the diode soldered connections are clean and functionally sound. The proposed AD would also require remake of the soldered connection or replacement of the diode with a new diode, if necessary. The actions would be required to be accomplished in accordance with the service bulletin described previously.

As a result of recent communications with the Air Transport Association (ATA) of America, the FAA has learned that, in general, some operators may misunderstand the legal effect of AD's on airplanes that are identified in the applicability provision of the AD, but that have been altered or repaired in the area addressed by the AD. The FAA points out that all airplanes identified in the applicability provision of an AD are legally subject to the AD. If an airplane has been altered or repaired in the affected area in such a way as to affect compliance with the AD, the owner or operator is required to obtain FAA approval for an alternative method of compliance with the AD, in accordance with the paragraph of each AD that provides for such approvals. A note has been included in this notice to clarify this long-standing requirement.

The FAA estimates that 19 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $1,140, or $60 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Raytheon Corporate Jets, Inc. (Formerly DeHavilland, Hawker Siddeley, British Aerospace PLC): Docket 95–NM–43–AD.

Applicability: Model BAe 125–800A and –1000A, and Model Hawker 800 and 1000 series airplanes, as listed in Raytheon Corporate Jets Hawker Service Bulletin SB 24–317, dated December 22, 1994; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent incorrect fault displays in the cockpit and intermittent fault symptoms in the engine starting and battery emergency control circuits, as a result of imperfect soldered connections, accomplish the following:

(a) Within 6 months after the effective date of this AD, perform an inspection to determine if each diode soldered connection is clean and functionally sound, in accordance with Hawker Service Bulletin SB 24–317, dated December 22, 1994. If any diode soldered connection is not clean or not functionally sound, prior to further flight, remake the soldered connection or replace the diode with a new diode, in accordance with the service bulletin.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 11, 1995.

D.L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 95–22968 Filed 9–14–95; 8:45 am]

BILLING CODE 4910–13–U

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 311

OSD Privacy Program

AGENCY: Office of the Secretary of Defense, DOD.

ACTION: Proposed rule.

SUMMARY: In accordance with the Privacy Act of 1974, the Office of the Joint Staff proposes to exempt the system of records JS004SECDIV, entitled Joint Staff Security Clearance Files. The exemption is needed to comply with prohibitions against disclosure of information provided the government under a promise of confidentiality and to protect privacy rights of individuals identified in the system of records.

DATES: Comments must be received no later than November 14, 1995, to be considered by this agency.

ADDRESSES: Send comments to OSD Privacy Act Officer, Directives and Records Division, Washington Headquarters Services, Correspondence and Directives, 1155 Defense Pentagon, Washington, DC 20301–1155.

FOR FURTHER INFORMATION CONTACT: Mr. Dan Cragg at (703) 695–0970.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

The Director, Administration and Management, Office of the Secretary of Defense has determined that this proposed Privacy Act rule for the Department of Defense does not constitute "significant regulatory action." Analysis of the rule indicates that it does not have an annual effect on the economy of $100 million or more; does not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; does not materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; does not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866 (1993).

Regulatory Flexibility Act of 1980

The Director, Administration and Management, Office of the Secretary of Defense certifies that this Privacy Act rule for the Department of Defense does not have significant economic impact on a substantial number of small entities because it is concerned only with the administration of Privacy Act systems of records within the Department of Defense.

Paperwork Reduction Act

The Director, Administration and Management, Office of the Secretary of Defense certifies that this Privacy Act proposed rule for the Department of Defense imposes no information requirements beyond the Department of Defense and that the information collected within the Department of Defense is necessary and consistent with 5 U.S.C. 552a, known as the Privacy Act of 1974.

Investigative and other records needed to make the judgment of approval or denial of a security clearance may require that certain records in the system be protected using the specific exemption (k)(5), to insure that a source who furnished information to the Government under an express promise of confidentiality be held in confidence, or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence will be afforded such protection.

List of Subjects in 32 CFR Part 311

Privacy.

Accordingly, 32 CFR part 311 is amended as follows:

1. The authority citation for 32 CFR part 311 continues to read as follows:

Authority: Pub. Law 93-579, 88 Stat 1896 (5 U.S.C. 552a).

2. Section 311.7 is amended by adding paragraph (c)(9) as follows:

§ 311.7 Procedures for exemptions.

* * * * *

(c) *Specific exemptions.* * * *

(9) *System identifier and name*--JS004SECDIV, Joint Staff Security Clearance Files.

Exemption. Portions of this system of records are exempt pursuant to the provisions of 5 U.S.C. 552a(k)(5) from subsections 5 U.S.C. 552a(d)(1) through (d)(5).

Authority. 5 U.S.C. 552a(k)(5).

Reasons. From subsections (d)(1) through (d)(5) because the agency is required to protect the confidentiality of sources who furnished information to the government under an expressed promise of confidentiality or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. This confidentiality is needed to maintain the Government's continued access to information from persons who otherwise might refuse to give it. This exemption is limited to disclosures that would reveal the identity of a confidential source. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

* * * * *

Dated: September 8, 1995.

Linda L. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 95–22978 Filed 9–14–95; 8:45 am]

BILLING CODE 5000–04–F

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 162

[CGD–94–026]

RIN 2115–AE78

Inland Waterways Navigation Regulations: Wrangell Narrows, Alaska

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to allow single barge tows of up to 100 feet in width overall to transit Wrangell Narrows, Alaska. The current size restriction for single barge tows in Wrangell Narrows is 80 feet in width overall. An increase in the maximum barge width in Wrangell Narrows will allow barge operators to carry more cargo on each barge to meet the increasing needs of their Alaskan consumers. Increasing the restriction to 100 feet in width overall will have no adverse effects on navigation and marine safety in Wrangell Narrows.

DATES: Comments must be received on or before November 14, 1995.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 94–026), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to Room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

FOR FURTHER INFORMATION CONTACT: Diane Schneider Appleby, Project Manager, (202) 267–0352.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their name and address, identify this rulemaking (CGD 94–026) and the specific section of this proposal to which each comment applies, and give the reason for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at Room 3406, U.S. Coast Guard Headquarters. The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under **ADDRESSES**. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

This principal persons involved in drafting this document are Diane Schneider Appleby, Project Manager, and C.G. Green, Project Counsel.

Background and Purpose

Wrangell Narrows is a navigable waterway of the United States located in Southeast Alaska. It connects Frederick Sound on the north end to Sumner Strait on the south. It is approximately 24 miles long and narrows to 300 feet in five places. The longest of the 300 foot wide sections is approximately 5.5 nautical miles in length. The other four sections vary from approximately 600 yards to approximately 1.3 nautical miles in length.

The primary users of Wrangell Narrows are passenger ferries, log carriers, pleasure craft and container barges. Container barges are used to transport consumer goods throughout South East Alaska which is vital to the every day life of Alaskan citizens.

The increased demand for consumer goods in Southeast Alaska has created a greater demand on providers of these goods. The current regulations limit the width of single barge tows allowed to transit Wrangell Narrows to no more than 80 feet in width overall. Increasing the maximum barge width which can transit Wrangell Narrows from 80 to 100 feet would allow barge operators to carry more containers per transit and enable them to more efficiently meet the needs of their Alaskan customers.

Approximately 95,000 containers are shipped through Southeast Alaska each year on approximately 200 transits of Wrangell Narrows. Consumer goods are the primary cargo.

Barges larger than 80 feet in width overall, cannot transit Wrangell Narrows without a waiver of the size restriction. If they cannot use Wrangell Narrows, they must transit through Chatham Strait around Cape Decision which increases the transit distance to the Gulf of Alaska by over 170 miles. Inclement weather, common in Southeast Alaska, often causes delays of as many as two or three days while barge operators wait for better weather to make the passage around Cape Decision. The risk of a marine casualty increases when transporting cargo in severe weather.

Wrangell Narrows is wide enough, even in its narrowest sections, to allow for the safe transit of 100 foot wide barges. Alaska Marine Lines has been safely operating 100 foot wide single barge tows on Wrangell Narrows with a Coast Guard waiver since May 1994, after expressing a written need for an increase in the maximum width of single barge tows. Southeast Alaska relies heavily upon container barges to deliver consumer goods essential to the every day life of its residents. Allowing 100 foot wide single barge tows in Wrangell Narrows would eliminate all current requests for waivers from the width restriction and would reduce unnecessary weather-related delays of consumer good shipments to Alaskan residents. It would also allow most single barge tows to operate in the protected waters of Wrangell Narrows during inclement weather.

Regulatory Evaluation

This proposal is not a significant regulatory action under Executive Order 12866 and is not significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The Coast Guard has determined that a Regulatory Evaluation is unnecessary because of the minimal impact expected.

Small Entities

Because it expects the impact of the proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will have a significant economic impact on your business, please submit a comment (see **ADDRESSES**) explaining why you think your business qualifies and in what way and to what degree this proposal will economically affect your business.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*)

Federalism

This proposed rule has been analyzed in accordance with Executive Order No. 12612 on Federalism (October 26, 1987), which requires Executive departments and agencies to be guided by certain fundamental federalism principles in formulating and implementing policies. These policies have been fully considered in the development of the proposed regulation. This proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has considered the environmental impact of this proposal and concluded that this action is Categorically Excluded in accordance with section 2.B.2.e(34)(g) of the NEPA Implementing Procedures, COMDTINST M16475.2B. A copy of the categorical exclusion determination is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 162

Navigation (water), Waterways.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR Part 162 as follows:

PART 162—INLAND WATERWAYS NAVIGATION REGULATIONS

1. The authority citation for part 162 continues to read as follows:

Authority: 3 U.S.C. 1231; 49 CFR 1.46.

2. In section 162.255, paragraph (e)(2) is revised to read as follows:

§ 162.255 Wrangell Narrows, Alaska; use, administration, and navigation.

* * * * *

(e) * * *

(2) Raft and barge tows of more than one unit shall not exceed 65 feet in width overall. Single barge tows shall not exceed 100 feet in width overall.

* * * * *

Dated: September 7, 1995.

J.A. Creech,

Captain, U.S. Coast Guard, Acting Chief, Office of Navigation Safety and Waterway Services.

33 CFR Part 165

[CGD01–95–123]

RIN 2115–AA97

Safety Zone: Grande Fiesta Italiana Fireworks, Hempstead Harbor, New York

AGENCY: Coast Guard, DOT.

ACTION: Notice of withdrawal.

SUMMARY: This rulemaking project was initiated to establish a temporary safety zone in Hempstead Harbor, New York, for the Grande Fiesta Italiana Fireworks Program. On August 14, 1995, the Coast Guard was notified that the location of the fireworks program was changed to a point on land. Due to the change in location, a safety zone is no longer required. Therefore, the Coast Guard is terminating further rulemaking under docket number CGD01–95–123.

FOR FURTHER INFORMATION CONTACT: Lieutenant (Junior Grade) K. Messenger, Maritime Planning Staff Chief, Coast Guard Group New York (212) 668–7934.

SUPPLEMENTARY INFORMATION:

Background and Purpose

On August 9, 1995, the Coast Guard published a Notice of proposed rulemaking (NPRM) in the **Federal Register** (60 FR 40543). The proposal was to establish a temporary safety zone in all waters of Hempstead Harbor, shore to shore, within a 300 yard radius of a fireworks barge anchored approximately 300 yards north of Bar Beach, Port Washington, New York, at or near 40°49′52″ N Latitude, 073°39′10″ W longitude (NAD 1983). The safety zone was to be in effect from 9 p.m. until 10:15 p.m. on September 10, 1995, unless extended or terminated sooner by the Captain of the Port New York. No comments were received in response to the NPRM.

On August 14, 1995, Fireworks by Grucci, Inc. informed the Coast Guard that the location of the fireworks program was changed from Hempstead Harbor to a point on land in the vicinity of Bar Beach, Port Washington, New York. The fireworks program will no longer require a safety zone. Therefore, this rulemaking is no longer necessary and the Coast Guard is terminating further rulemaking under docket number CGD01–95–123.

Dated: September 6, 1995.

T.H. Gilmour,

Captain, U.S. Coast Guard, Captain of the Port New York.

40 CFR Part 52

[CT26–1–7196; A–1–FRL–5296–4]

Approval and Promulgation of Air Quality Implementation Plans; Approval of the Carbon Monoxide Implementation Plan Submitted by the State of Connecticut Pursuant to Sections 186–187 and 211(m)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: The EPA proposes approval of the State implementation plans (SIP) submitted by the State of Connecticut for the purpose of bringing about the attainment of the national ambient air quality standard (NAAQS) for carbon monoxide (CO). The implementation plans were submitted by the State to satisfy the requirements of Sections 187(a)(2)(A), 187(a)(3), 187(a)(7) and 211(m) of the Clean Air Act for an approvable nonattainment area CO SIP for Connecticut's portion of the New York-New Jersey-Connecticut CO nonattainment area. This action is being taken under Section 110 of the Act. The rationale for the approval is set in this document, additional information is available at the address indicated below.

DATES: Comments on this proposed action must be received in writing by October 16, 1995.

ADDRESSES: Comments may be mailed to Susan S. Studlien, Director, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Bldg. (AAA), Boston, MA 02203. Copies of the state's submittal and EPA's technical support document are available for inspection during normal business hours, by appointment at the U.S. Environmental Protection Agency, Jerry Kurtzweg, ANR–443, 401 M Street, SW, Washington, D.C. 20460; the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th floor, Boston, MA 02203; and the Bureau of Air Management, Department of Environmental Protection, 79 Elm Street, Hartford, CT 06106.

FOR FURTHER INFORMATION CONTACT: Damien F. Houlihan, (617) 565–3266, of the U.S. Environmental Protection Agency in Boston, MA.

SUPPLEMENTARY INFORMATION: On January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995, the Connecticut Department of Environmental Protection (DEP) submitted a revision to its State Implementation Plan (SIP) for air quality. The revision is designed to satisfy the requirements of Sections 187(a)(2)(A), 187(a)(3), 187(a)(7) and 211(m) of the Clean Air Act, as amended in 1990 (CAA).

I. Background

The air quality planning requirements for moderate CO nonattainment areas are set out in Sections 186–187 and Section 211(m) of the Clean Air Act (Act) Amendments of 1990 (CAAA). These requirements pertain to the classification of CO nonattainment areas and to the submission requirements of the SIP's for these areas, respectively. The EPA has issued a "General Preamble" describing EPA's preliminary views on how EPA intends to review SIP's and SIP revisions submitted under Title I of the Act. See generally 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992). Because EPA is describing its interpretations here only in broad terms, the reader should refer to the General Preamble for a more detailed discussion of the interpretations of Title I advanced in today's proposal and the supporting rationale. In today's rulemaking action on the Connecticut CO SIP, EPA is proposing to apply its interpretations taking into consideration the specific factual issues presented. Thus, EPA will consider any timely submitted comments before taking final action on today's proposal.

Those States containing CO nonattainment areas with design values greater than 12.7 parts per million (ppm) were required to submit, among other things, a State Implementation Plan revision, by November 15, 1992, that contains a forecast of VMT in the nonattainment area for each year before the year in which the SIP projects the NAAQS for CO to be attained and an attainment demonstration such that the plan will provide for attainment by December 31, 1995 for moderate CO nonattainment areas. The SIP revision is also required to provide for annual updates of the VMT forecasts along with annual reports regarding the extent to which the forecasts proved to be accurate. In addition, these annual reports must contain estimates of actual VMT in each year for which a forecast was required. The attainment demonstration must include a SIP control strategy, which is also due by November 15, 1992. The SIP control strategy for a given nonattainment area must be designed to ensure that the area meets the specific annual emissions reductions necessary for reaching attainment by the deadline. In addition, section 187(a)(3) requires these areas to implement contingency measures if any estimate of actual vehicle miles travelled (VMT) or any updated VMT forecast for the area contained in an annual report for any year prior to attainment exceeds the number predicted in the most recent VMT forecast. Contingency measures are also triggered by failure to attain the NAAQS for CO by the attainment deadline. Contingency measures must be submitted with the CO SIP by November 15, 1992. In addition, Section 211(m) of the Act requires a SIP revision containing a provision to require that after November 1, 1992, any gasoline sold, or dispensed, to the ultimate consumer in the CO nonattainment area be blended to contain not less than 2.7 percent oxygen by weight during the portion of the year in which the area is prone to high ambient CO levels.

Section 187(a)(2)(A) of the Clean Air Act Amendments of 1990 required EPA, in consultation with the U.S. Department of Transportation (DOT), to develop guidance for states to use in complying with the VMT forecasting and tracking provisions of Section 187. A Notice of Availability for the resulting *Section 187 VMT Forecasting and Tracking Guidance* was published in the **Federal Register** on March 19, 1992.

The Section 187 Guidance identifies the Federal Highway Administration's Highway Performance Monitoring System (HPMS) as the foundation for VMT estimates and forecasts. To develop growth factors for forecasting VMT, the Section 187 Guidance offers as one alternative the use of network-based travel demand models. If these models are properly updated and validated, and if they use an equilibrium approach to allocating trips, they are considered to be the best predictor of growth factors for VMT forecasts.

When determining that actual annual VMT or a VMT forecast has exceeded the most recent prior forecast and, therefore, that contingency measures should be implemented, EPA believes that it is appropriate to take into account the statistical variability in the estimates of VMT generated through HPMS. Consequently, EPA has identified a margin of error to be applied when making VMT comparisons. With the expectation that HPMS sampling procedures will improve over the next few years in response to recent FHWA guidance, the margin of error starts at 5.0 percent for VMT comparisons made in 1994, becomes 4.0 percent for VMT comparisons made in 1995, and is reduced to 3.0 percent for VMT comparisons made in 1996 and thereafter. However, since each revised VMT forecast becomes the VMT baseline for triggering contingency measures, the application of a margin of error every year could allow the forecasts to increase without bound, without ever triggering contingencies. To prevent this occurrence, EPA believes it is appropriate to allow the application of the margin of error only as long as, cumulatively, neither an estimate of actual VMT nor a VMT forecast ever exceed by more than 5.0 percent the VMT forecast relied upon in the area's attainment demonstration.

EPA interprets the requirement for contingency measures to "take effect without further action by the State or the Administrator" to mean that no further rulemaking activities by the State or EPA would be needed to implement the measures. The General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990, published in the **Federal Register** on April 16, 1992, offers guidance on the type and size of contingencies to be included in the SIP revision. This guidance is advisory in nature and is non-binding. (See the **Federal Register**, April 16, 1992, Volume 57, Number 74, pages 13532 and 13533.)

Section 110(k) of the Act sets out provisions governing EPA's review of SIP submittals (*see* 57 FR 13565–66). The State of Connecticut submitted SIP revisions to EPA on January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995 in order to satisfy the requirements of Sections 186–187 and 211(m) of the Act. In order to gain approval, the State submittals must provide for each of the following mandatory elements: (1) a forecast of VMT in the non-attainment area for each year prior to the attainment year; (2) a provision for annual updates of the forecasts along with a provision for annual reports describing the extent to which the forecasts proved to be accurate; these reports shall provide estimates of actual VMT in each year for which a forecast was required; (3) adopted and enforceable contingency measures to be implemented without further action by the State or the Administrator if actual annual VMT or an updated forecast exceeds the most recent prior forecast or if the area fails to attain the CO NAAQS by the attainment date; (4) Attainment Demonstration with Control Strategies and (5) a provision to require that any gasoline sold, or dispensed, to the ultimate consumer in the CO nonattainment area be blended to contain not less than 2.7 percent oxygen by weight during the portion of the year in which the area is prone to high ambient CO levels.

II. Analysis

In today's action EPA proposes to approve Connecticut's CO SIP submittal for the Connecticut portion of the NY-NJ-CT CO nonattainment area and invites public comment on the action. The following items are the basis for approval of the SIP revision. Connecticut has met the requirements of Section 186–187 and 211(m) of the Act by submitting SIP revisions that implement all required elements as discussed below. The state implementation plans submitted by Connecticut on January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995, collectively meet the requirements for those particular revisions to the SIP for the Connecticut portion of the NY-NJ-CT Moderate (greater than 12.7 ppm) CO nonattainment area as set forth in Sections 187(a)(2)(A), 187(a)(3), 187(a)(7) and 211(m) of the Act.

1. VMT Forecasts

Section 187(a)(2)(A) requires that the State include in its SIP submittal a forecast of VMT in the nonattainment area for each year before the year in which the SIP projects the National Ambient Air Quality Standard for CO to be attained. The forecasts are to be based on guidance developed by EPA in consultation with DOT, i.e., the *Section 187 VMT Forecasting and Tracking Guidance*. Connecticut has satisfied this requirement with their January 12, 1993 and April 7, 1994 SIP submittals which include VMT forecasts beginning with the year 1993 and including all subsequent years up to the year of attainment (1995). The forecasts were projected using an annual growth factor of two percent as determined from Connecticut's network-based travel demand model. This model is properly updated and validated and uses an equilibrium approach to allocating trips, therefore, it is considered to be the best predictor of growth factors for VMT forecasts in Connecticut and was used appropriately as set forth in the Section 187 VMT Forecasting and Tracking Guidance.

2. Annual VMT Updates/Reports

Section 187(a)(2)(A) specifies that the SIP revision provide for annual updates of the VMT forecasts and annual reports that describe the accuracy of the forecasts and that provide estimates of actual VMT in each year for which a forecast was required. The Section 187 VMT Forecasting and Tracking Guidance specifies that annual reports should be submitted to EPA by September 30 of the year following the year for which the VMT estimate is made. Connecticut satisfied this requirement with their January 12, 1993 and April 7, 1994 SIP submittals.

3. Contingency Measures

Section 187(a)(3) specifies that the State, in its SIP revision, adopt specific, enforceable contingency measures to be implemented if the annual estimate of actual VMT or a subsequent VMT forecast exceeds the most recent prior forecast of VMT or if the area fails to attain the CO NAAQS by the attainment date. Implementation of the identified contingency measures must not require further rulemaking activities by the State or EPA. Certain actions, such as notification of sources, would probably be needed before a measure could be implemented effectively. Connecticut has satisfied this requirement with their January 12, 1993 and April 7, 1994 SIP submittals which include contingency measures to be implemented if the annual estimate of actual VMT or a subsequent VMT forecast exceeds the most recent prior forecast of VMT or if the area fails to attain the CO NAAQS by the attainment date. Connecticut has demonstrated that expanded implementation of an enhanced inspection and maintenance program, beyond what is required in 57 CFR 52950, will provide CO emission reductions to counteract the effect of one years growth in VMT.

Although implementation of an enhanced I/M program is required in the urbanized area of Connecticut's portion of the NY-NJ-CT CO nonattainment area, Connecticut has demonstrated that requiring vehicles traveling within the nonattainment area, but originating outside the urbanized area, to meet the CO performance standard of the enhanced I/M program, will result in CO emission reductions which offset the CO emissions attributable to a two percent growth (one years growth) of the projected 1995 VMT in the area. The legal authority for the implementation of the enhanced I/M program was passed by the General Assembly of the State of Connecticut in Public Act 90–312 which took effect on July 1, 1993. Connecticut further demonstrated that if the area does not attain the CO standard by the December 31, 1995 attainment date, the state is committed to implementing the Employee Commute Option in the nonattainment area, which will provide reductions in VMT to offset the anticipated growth in VMT from 1994 to the attainment year of 1995. The Connecticut Legislature has effectively authorized implementation of the ECO program through the promulgation Public Act 93–334 which has been codified it into the Connecticut General Statutes.

4. Attainment Demonstration

As noted, CO nonattainment areas with design values greater than 12.7 parts per million (ppm) were required to submit a demonstration by November 15, 1992; the plan must provide for attainment by December 31, 1995 for moderate CO nonattainment areas and December 31, 2000 for serious CO nonattainment areas.

To demonstrate attainment, the 1-hour and 8-hour and National Ambient Air Quality Standards (NAAQS) for CO are not to be exceeded more than once per year. The 1-hour CO NAAQS is 35 ppm (40 mg/m^3) and the 8-hour CO NAAQS is 9 ppm (10 mg/m^3). Connecticut has satisfied this requirement with its April 7, 1994 SIP submittal in which Connecticut conducted an attainment demonstration using intersection modeling for a representative set of the most congested intersections with high traffic volumes and the greatest potential to generate high CO concentrations in the Connecticut portion of the NY-NJ-CT CO nonattainment area. This analysis also demonstrated that the two CO monitors in downtown Bridgeport and downtown Stamford are in fact sited where the local conditions result in the highest CO levels in Connecticut's portion of the nonattainment area. The design value for the entire NY-NJ-CT CO nonattainment area was 13.5 ppm in 1988, based on monitoring data from site in Manhattan, New York. Connecticut's SIP revision indicated that based solely on the two monitors located in the Connecticut portion of the nonattainment area, the design value for the Connecticut portion of the area would have been 6.9 ppm, and these CO monitors have not monitored a violation of the NAAQS since 1984. Therefore, Connecticut demonstrates that the existing CO levels in the Connecticut portion of the NY-NJ-CT nonattainment area are in attainment of the NAAQS and CO emissions will continue to decrease throughout the attainment year of 1995 demonstrating continued attainment through the December 31, 1995 attainment date.

The Act requires that the CO nonattainment area plan revisions demonstrating attainment must contain measures which demonstrate reasonable further progress through specific annual emission reductions as are necessary to attain the standard by December 1995. EPA has reviewed the attainment demonstration and control strategy for the area to determine whether annual incremental reductions different from those provided in the SIP should be required in order to ensure attainment of the CO NAAQS by the applicable attainment date (see section 171(1)). Connecticut has demonstrated that the Connecticut portion of the NY-NJ-CT nonattainment area is currently in attainment and although further reduction in CO emissions will result from the implementation of oxygenated fuels, enhanced inspection and maintenance and the Federal Motor Vehicle Control Program, specific emission reductions are not necessary to attain the standard by the attainment date. EPA believes the implementation of these measures will assure that the area CO emissions continue to decrease and therefore ensuring attainment of the area in December 1995.

5. Oxygenated Fuels Program

Motor vehicles are significant contributors of CO emissions. An important measure toward reducing these emissions is the use of cleaner-burning oxygenated gasoline. Extra oxygen, contained within the fuel, enhances fuel combustion and helps to offset fuel-rich operating conditions, particularly during vehicle starting. Section 211(m) of the CAAA requires that States with CO nonattainment areas classified as moderate or above, submit state implementation plan revisions to implement oxygenated gasoline programs by no later than November 1, 1992. The oxygenated gasoline program must require gasoline sold or dispensed in the specified control area to contain not less than 2.7 percent oxygen by weight during that portion of the year in which the area is prone to high ambient concentrations of CO (the control period). EPA announced guidance on the establishment of control periods, by area, in the **Federal Register** on October 20, 1992 which also announced the availability of oxygenated gasoline credit program guidelines. Under a credit program, marketable oxygen credits may be generated from the sale of gasoline with a higher oxygen content than is required (i.e., an oxygen content greater than 2.7 percent by weight). These oxygen credits may be used to offset the sale of gasoline with a lower oxygen content than is required. As an alternate to the credit program, the State may elect a program in which a minimum of 2.7 percent by weight oxygen must be present in every gallon of gasoline sold. The EPA also issued labeling regulations under section 211(m)(4) of the CAA. These labeling regulations were also published in the **Federal Register** on October 20, 1992.

Connecticut has satisfied the requirements of Section 211(m) with their January 14, 1993, April 7, 1994, and August 1, 1995 SIP submittals which contain adopted amendments and revisions to the Regulation of Connecticut State Agencies (RCSA), to add Section 22a–174–28, which establishes an Oxygenated Fuel Program. EPA is approving, in a separate direct final rulemaking notice, the oxygenated fuel program, except as it applies to the Southwestern Control Area, as defined in 22a–174–28. In this notice, EPA is proposing approval of the definition for the Southwestern Control Area and that portion of the definition of "control period" that applies to the Southwestern Control Area. The program is one in which all oxygenated gasoline must contain a minimum oxygen content of 2.7 percent by weight of oxygen. Connecticut has adopted labeling regulations, enforcement procedures, and oxygenate test methods in accordance with Section 211(m) of the Act.

On August 1, 1995, the State of Connecticut submitted a revision to the control period for the Connecticut portion of the New Jersey/New York/Connecticut CO nonattainment area changing the oxygenated fuels control period to November 1 through the last day of February of each year. Previously, the control period had been October 1 through April 30 of each year. Under Section 211(m) of the CAA, a control period must be that portion of the year in which the control area is prone to high ambient concentrations of CO, but no less than four months in length.

Section 211(m)(2) requires this control period to be based on air quality monitoring data and established by the EPA Administrator. EPA is proposing to approve Connecticut's four-month control period for the Southwestern Control Area because it is consistent with section 211(m)(2) and the EPA 1992 guidance.

EPA is publishing concurrently with this notice a Notice of Proposed Rulemaking to approve New York's oxygenated gasoline SIP submission. That notice proposes to establish a four-month control period for the New York portion of the New York-New Jersey-Connecticut CO nonattainment area. Connecticut's establishment of a four-month control period will be consistent with New York's four-month control period.

The setting of a four-month control period for the nonattainment area is consistent with established Agency guidance (announced for availability at 57 FR 47853, October 20, 1992) regarding oxygenated gasoline control periods to determine the proper control period length for the New York-New Jersey-Connecticut CO nonattainment area. As part of the 1992 guidance document, based on air quality data from 1990 and 1991, EPA suggested that the proper control period for the New York-New Jersey-Connecticut CO nonattainment area was October 1 through April 30. However, the 1992 guidance does not establish a binding norm regarding control periods and provides that the determination of the control period will be an issue to be finally decided by EPA as part of the review of individual state SIP revisions for oxygenated gasoline programs. EPA has set forth the reasons for its proposed approval of the four-month control period for the New York-New Jersey-Connecticut CO nonattainment area in the above-mentioned notice regarding New York's oxygenated gasoline SIP revision published concurrently with this notice. In that notice, EPA explains the rationale for determining that the appropriate control period is from November 1 through the last day of February for the entire nonattainment area. EPA believes sale of gasoline oxygenated to 2.7 percent by weight during the months of October, March and April is no longer necessary for adequate carbon monoxide control in the entire nonattainment area. EPA will not repeat the rationale provided in that notice, but rather incorporates by reference the same rationale into this notice.

Proposed Action

The EPA is proposing to approve collectively the plan revisions submitted to EPA for the Connecticut portion of the NY-NJ-CT CO nonattainment area on January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995. Among other things, Connecticut has demonstrated that the Connecticut portion of the NY-NJ-CT CO nonattainment area will continue to attain the CO NAAQS through December 31, 1995, the applicable attainment date.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from review under Executive Order 12866.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

The CAA does not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410 (a)(2).

As noted, additional submittals for the CO nonattainment areas are required under Section 186 and 187 of the Act. The EPA will determine the adequacy of any such submittal as appropriate. Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

The Administrator's decision to approve or disapprove the SIP revision will be based on whether it meets the requirements of Section 110(a)(2)(A)–(K) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR Part 51.

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 25, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under section 175A and section 187(a)(1) of the Clean Air Act. The rules and commitments approved in this action may bind State, local and tribal governments to perform certain actions and also may ultimately lead to the private sector being required to certain duties. To the extent that the imposition of any mandate upon the State, local or tribal governments either as the owner or operator of a source or as mandate upon the private sector, EPA's action will impose no new requirements under State law; such sources are already subject to these requirements under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, results from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

Approval and Promulgation of Implementation Plans; Carbon Monoxide State Implementation Plan Revision State of New York and Revision of Oxygenated Gasoline Control Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing the approval of portions of a request from New York to revise its State Implementation Plan (SIP) related to the control of carbon monoxide. EPA is proposing approval of New York's vehicle miles travelled forecast, contingency measures, carbon monoxide emission inventory, multi-state coordination letter, and Downtown Brooklyn Master Plan. In addition, EPA is proposing approval of the oxygenated gasoline program in the New York City consolidated metropolitan statistical area during the four months when the area is prone to high ambient concentrations of carbon monoxide. New York's oxygenated fuels program also includes a provision for oxygenated fuels to serve as a contingency measure in the Syracuse metropolitan statistical area.

New York has recently updated its enhanced inspection and maintenance submittal which EPA is currently reviewing. Therefore, action on that program, along with the attainment demonstration, which relies on the enhanced inspection and maintenance program, will be taken in a separate **Federal Register** notice. These revisions have been submitted in response to requirements established in the Clean Air Act as amended in 1990 that the states develop a plan to attain the carbon monoxide standard.

DATES: Comments must be received on or before October 16, 1995

ADDRESSES: Written comments should be addressed to:

William S. Baker, Chief, Air Program Branch, Environmental Protection Agency, Region II Office, 290 Broadway, New York, New York 10007–1866

Copies of the state submittals are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region II Office, Air Programs Branch, 290 Broadway, New York, New York 10007–1866.

New York Department of Environmental Conservation, Division of Air Resources, 50 Wolf Road, Albany, New York 12233.

FOR FURTHER INFORMATION CONTACT: Henry Feingersh, Air Programs Branch, Environmental Protection Agency, 290 Broadway, New York, New York 10007–1866, (212) 637–4249.

SUPPLEMENTARY INFORMATION:

Background

The Clean Air Act, as amended in 1990, sets forth a number of requirements that states designated as moderate nonattainment for carbon monoxide had to submit as revisions to their SIPs by November 15, 1992. Since the New York portion of the "New York-Northern New Jersey-Long Island" carbon monoxide nonattainment area is classified as a moderate 2 area (an area that has a design value of 12.8–16.4 ppm.), New York was required to make this submission. These requirements are: an attainment demonstration, an enhanced vehicle inspection and maintenance program, an oxygenated fuels rule, a vehicle miles traveled forecast, contingency measures, a carbon monoxide emission inventory, a revised new source review program, and multi-state coordination letter.

EPA has issued a "General Preamble" describing its preliminary views on how it intends to review SIPs and SIP revisions submitted in order to meet Title I requirements [see generally 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992)]. The reader should refer to the General Preamble for a more detailed discussion of the Title I requirements and what EPA views as necessary to adequately comply with Title I provisions.

On November 13, 1992, New York submitted to EPA proposed revisions to its carbon monoxide SIP that addressed each of the above requirements for its moderate carbon monoxide nonattainment area. In addition, in a submittal dated March 21, 1994, New York submitted to EPA additional information pertaining to its carbon monoxide SIP.

As part of Federal Environmental Impact Statement work, certain projects in Brooklyn were identified as causing violations of the carbon monoxide standard. The State said that they would revise the carbon monoxide SIP to mitigate these problems. On September 21, 1990, New York submitted a revision to the New York SIP to attain the carbon monoxide air quality standard in the Brooklyn portion of the New York City metropolitan area.

These three submittals are the subject of this **Federal Register**. The following summarizes EPA's evaluation of New York's SIP submittals and EPA's proposed actions. The details of EPA's review are contained in the Technical Support Document available at EPA's Region II office.

Attainment Demonstration

Section 187(a)(7) of the Clean Air Act requires each state that contains all or part of a moderate 2 area to submit to the Administrator an attainment demonstration by November 15, 1992. This attainment demonstration documents how the State will attain the 8-hour carbon monoxide NAAQS of 9 ppm by December 31, 1995.

New York, using emissions from the EPA-approved MOBILE4.1 model, demonstrated attainment of the carbon monoxide standard with the EPA-approved CAL3QHC air quality dispersion model. New York took emission reductions credit from enhanced I/M, oxygenated fuels, and the federal motor vehicle control program (vehicle turnover) as control measures to attain the standard. A detailed explanation of this modeling is contained in the Technical Support Document.

New York's analysis demonstrated that all of the modeled intersections attained the 8-hour carbon monoxide standard of 9 ppm. The highest value obtained was 9.0 ppm which occurred at two intersections. Since air quality values at the most congested intersections was determined to not exceed the standard, New York has demonstrated that the entire area will be in attainment for carbon monoxide by December 31, 1995.

New York used appropriate modeling techniques and modeling inputs in this demonstration, however one of the control measures used to demonstrate attainment, the enhanced inspection and maintenance program, submitted on November 15, 1993 had not been fully adopted in accordance with State requirements. On July 31, 1995, New York submitted an updated enhanced inspection and maintenance program which EPA determined to be complete on August 2, 1995. EPA will take action on the enhanced inspection and maintenance program and the attainment demonstration in a separate **Federal Register** notice.

Enhanced Inspection and Maintenance Program

Section 187(a)(6) of the Clean Air Act requires implementation of enhanced inspection and maintenance programs in moderate 2 carbon monoxide nonattainment areas and includes provisions as required under section 182(c)(3) concerning serious ozone nonattainment areas. Such provisions require implementation of an enhanced inspection and maintenance program in urbanized areas with a population greater than 200,000.

On November 15, 1993 New York submitted draft regulations and other information pertaining to the enhanced inspection and maintenance program. Since New York did not submit a fully adopted enhanced inspection and maintenance program, on February 2, 1994 EPA notified the State that this submittal was incomplete and a sanctions process was begun. New York then made an updated submittal on July 31, 1995 which EPA will be taking action on in a separate **Federal Register** notice.

Oxygenated Fuels Rule

I. Introduction

Section 211(m) of the Clean Air Act requires that various states submit revisions to their SIPs, and implement oxygenated gasoline programs by no later than November 1, 1992. This requirement applies to all states with carbon monoxide nonattainment areas with design values of 9.5 parts per million or more based generally on 1988 and 1989 data. Each state's oxygenated gasoline program must require gasoline for the specified control area(s) to contain not less than 2.7 percent oxygen by weight during that portion of the year in which the areas are prone to high ambient concentrations of carbon monoxide. Under section 211(m)(2), the oxygenated gasoline requirements are to generally cover all gasoline sold or dispensed in the larger of the consolidated metropolitan statistical area or the metropolitan statistical area in which the nonattainment area is located. Under section 211(m)(2), the length of the control period, to be established by the EPA Administrator, shall not be less than four months in length unless a state can demonstrate that, because of meteorological conditions, a reduced control period will assure that there will be no carbon monoxide exceedances outside of such reduced period. EPA announced guidance on the establishment of control periods by area in the **Federal Register** on October 20, 1992.[1]

State Submittal

In order to fulfill the Clean Air Act requirement, on September 27, 1993 New York submitted a request to revise its State Implementation Plan to incorporate adopted revisions to Title 6 Subpart 225–3 of the New York Code of Rules and Regulations, entitled "Fuel Composition and Use—Volatile Motor Fuel," effective on September 2, 1993.

Applicability and Program Scope

Section 211(m)(2) requires oxygenated gasoline to be sold during a control period based on air quality monitoring data and established by the EPA Administrator. New York has established control periods for the New York City consolidated metropolitan statistical area and the Syracuse metropolitan statistical areas which are consistent with the 1992 EPA guidance.

New York's oxygenated gasoline regulations require oxygenated gasoline to be sold in the larger of the consolidated metropolitan statistical area (CMSA) or metropolitan statistical area (MSA) in which the nonattainment area is located, consistent with the requirements of section 211(m)(2) of the Act. The New York City CMSA consists of the following counties: Bronx, Kings, Queens, New York, Richmond, Orange, Rockland, Putnam, Westchester, Nassau and Suffolk. New York's current regulation requires oxygenated gasoline to be sold in this area from October 1 through April 30. While this control period had been appropriate in previous carbon monoxide control seasons in the New York City CMSA, EPA is proposing to determine, based on more recent ambient air monitoring data, that the appropriate oxygenated gasoline control period for the area should be shorter in length. Four months is the minimum program length allowed by the Clean Air Act, except as indicated in section 211(m)(B) which, at the request of a state with respect to any carbon monoxide nonattainment area, allows the EPA Administrator to reduce the period below four months. Such a determination can only occur if the State can demonstrate that due to meteorological conditions a shorter period will assure that no carbon monoxide exceedances will occur outside of that shorter period.

New York also requires the sale of oxygenated gasoline in any area of the State which had been designated as nonattainment for carbon monoxide but was redesignated as attainment, if it is required to maintain the standard in that area.

In the case of the Syracuse metropolitan statistical area, which has been officially redesignated as attainment for carbon monoxide (See 58 FR 50851), the oxygenated gasoline program is no longer required in that area since the attainment demonstration did not depend on the program. The oxygenated gasoline program constitutes the State's contingency measure for the Syracuse metropolitan statistical area, in the event that the carbon monoxide standard is violated in this area. If this program should need to be re-instituted in this area, the period of sale would be November 1 through the last day of February.

In this notice EPA is applying established Agency guidance (announced for availability at 57 FR 47853, October 20, 1992) regarding oxygenated gasoline control periods to determine the proper control period length for the New York City CMSA. As part of the 1992 guidance document, based on air quality data from 1990 and 1991, EPA suggested that the proper control period for the New York City CMSA was October 1 through April 30. However, the 1992 guidance does not establish a binding norm regarding control periods and provides that the determination of the control period will be an issue to be finally decided by EPA as part of the review of individual state SIP revisions for oxygenated gasoline programs. For the reasons set forth below, EPA is now proposing to determine that the appropriate control period is from November 1 through the last day of February; EPA believes sale of gasoline oxygenated to 2.7 percent by weight during the months of October, March and April is no longer necessary for adequate carbon monoxide control in the New York City CMSA.

Section 211(m), cited in the 1992 EPA guidance, requires control period length to be decided by the EPA Administrator based on the period an area is prone to high carbon monoxide concentrations. The three-state New York City CMSA has not recorded an exceedance of the carbon monoxide national ambient air quality standard (NAAQS) in the three months proposed to be dropped since October of 1991. Furthermore, since 1992 the CMSA has not been prone to high ambient concentrations of carbon monoxide, during those three months. Under the approach used in EPA's guidance, "prone to high ambient concentrations of carbon monoxide" is a criterion more stringent than the NAAQS.

While the successful reduction in ambient carbon monoxide levels during October, March and April in the New York City CMSA can in part be attributed to the sale of oxygenated gasoline, EPA believes that implementation of new programs under the Clean Air Act in the New York City CMSA will adequately ensure continued observance of reduced levels of carbon monoxide during the months of October, March and April. Reformulated gasoline, a year round clean gasoline program, which was implemented on January 1, 1995 in the New York City CMSA [see 59 FR 7716, February 16, 1994.] provides gasoline oxygenated to 2.0 percent. EPA believes that implementation of enhanced inspection and maintenance programs [40 CFR Part 51, Subpart S] and the turnover of the New York City CMSA fleet, to newer, cleaner vehicles combined with the use of reformulated gasoline will ensure continued lower carbon monoxide emissions from motor vehicles for the CMSA during October, March and April.

While the established guidance bases the determination of control period only on air quality monitoring data (which exists for the entire New York City CMSA for 1992 to 1995), EPA believes that it is prudent also to provide a technical analysis further supporting the reduction of oxygen content during the shoulder months in the area. To support the contention that in future years, starting with 1996, without sales of gasoline oxygenated to 2.7 percent, but with implementation of federal reformulated gasoline (RFG) and enhanced I/M combined with vehicle turnover carbon monoxide emissions will continue to be lower during October, March and April in the area, EPA performed a series of computer model runs. Since the first observance after the implementation of the oxygenated fuels program of low CO levels during those months was in 1993, average vehicle emissions from that year were used as an upper limit in determining the adequacy of removal of the higher oxygen content in October, March and April.

The comparison was performed utilizing the most current version of EPA's emission factor model for mobile sources, MOBILE5a. All modeling assumed implementation of RFG (with 2.0 percent oxygen content) for 1995 and later, and for 1996 and future years, the effect of an enhanced I/M program are included. MOBILE5a variables such as vehicle speeds and a vehicle miles traveled growth rate were supplied by the New York State Department of Environmental Conservation. For further details regarding the MOBILE5a runs and the subsequent comparisons, the reader is referred to the technical support document. Modeling shows that removing oxygenated gasoline (to 2.7 percent) but accounting for the effects of RFG, enhanced I/M and vehicle turnover, vehicle emissions of CO, through calendar year 2020 (based on an average day in the CO season in each of those years), will still be at least 22.74 percent less than vehicle emissions of CO in 1993 with 2.7 percent oxygenated gasoline. Thus elimination of oxygenated gasoline program requirements in the shoulder months in the area appears to be technically sound.

Based on the proposed determination that the appropriate control period runs from November through February, EPA is proposing to approve New York's oxygenated gasoline requirement only for that four month period. This EPA action on New York's SIP revision takes into account the interaction of the current New York regulation and the RFG regulation promulgated by EPA on February 16, 1994. During the entire seven month period of October through April, the current New York standard for oxygen content in the New York portion of the New York City CMSA is a minimum of 2.7 percent oxygen by weight. The same New York portion of the New York City CMSA is also subject to RFG requirements, which include a year-round oxygenate standard of 2.0 percent. 40 CFR section 80 subpart D. As discussed below, the RFG requirements act to preempt an extension of the state oxygenated gasoline provisions beyond the four month period prone to high ambient concentrations of CO.

EPA's authority to regulate fuels and fuel additives is found in section 211 of the Clean Air Act. Under section 211(c)(1), the Administrator has the authority to control or prohibit the manufacture and sale of fuels and fuel additives on the grounds of danger to public health or impairment of emissions control devices. Section 211(c)(4) provides that where the Administrator has set such a control or prohibition under section 211(c)(1) applicable to a characteristic or component of a fuel or fuel additive, no state may set a control or prohibition respecting that characteristic or component, unless the state control or prohibition is identical to the federal control or prohibition. This provision preempts state fuel controls that are nonidentical to federal section 211(c)(1) controls on the same characteristic or component.

EPA promulgated the RFG program under the authority of sections 211(k) and 211(c)(1) [59 FR 7716, February 16, 1994]. RFG must contain 2.0% oxygen content by weight, and it is required year-round in the New York City CMSA. In the absence of section 211(m), section 211(c)(4) would preempt states from establishing their own minimum oxygen content requirements different from the RFG requirements in RFG areas. Because section 211(m) is a specific, more stringent requirement, it overrides the general preemption provision, and states are not preempted from complying with section 211(m) in RFG areas. However, states are preempted from setting nonidentical controls or prohibitions on oxygen content in RFG areas to the extent that such controls or prohibitions are not mandated by section 211(m).

---

[1] *See* "Guidelines for Oxygenated Gasoline Credit Programs and Guidelines on Establishment of Control Periods under Section 211(m) of the Clean Air Act as Amended—Notice of Availability," 57 FR 47849 (October 20, 1992).

In this notice, EPA is proposing to determine that the New York City CMSA is prone to high ambient concentrations of carbon monoxide during the four month period of November through February. Section 211(m) only requires states to adopt 2.7% oxygenated gasoline requirements for the period prone to high ambient concentrations of carbon monoxide, as determined by the Administrator. Thus, upon finalization of EPA's proposed determination, section 211(m) would only require New York to adopt a 2.7% minimum oxygen content standard for four months. The RFG oxygen content requirement preempts any state from prescribing or enforcing oxygen content requirements in this area that go beyond what is mandated by section 211(m). Because New York would be preempted from enforcing the additional months of October, March and April, EPA is only proposing to approve New York's oxygenated fuel requirements for the months of November through February in the counties of Bronx, Kings, Queens, New York, Richmond, Orange, Rockland, Putnam, Westchester, Nassau and Suffolk. EPA is publishing concurrently with this notice a Notice of Proposed Rulemaking to approve Connecticut's oxygenated gasoline SIP submission. That notice proposes to establish the same four-month control period for the Connecticut portion of the New York-New Jersey-Connecticut CO nonattainment area. New York's four-month control period will be consistent with Connecticut's four-month control period.

Through a letter dated August 11, 1995 from New York State Department of Environmental Conservation Deputy Commissioner David Sterman to EPA Regional Administrator Jeanne Fox, the State of New York has communicated to EPA their intent to revise Subpart 225–3 to reflect the shorter control period, identical to the control period EPA is proposing to approve. In the same letter, New York requests EPA to revise its control period guidance to shorten the period to four months. Rather than revising the guidance, in this proposal EPA is applying the guidance to make a determination that the appropriate control period for this area is four months. EPA believes it is appropriate to approve New York's oxygenated fuel requirement for only four of the seven months provided in New York's submission because this approval would not increase the stringency of the State submission and conforms with the State's intended revisions to the regulation. Also, section 110(a)(2)(A) requires SIPs to include "enforceable * * * control measures." EPA only has authority to approve the enforceable portion of the State submission, which, upon finalization of EPA's proposed determination, would correspond to a four month control period.

Transfer Documents

New York has included requirements related to transfer documentation in its regulation. These transfer document requirements enhance the enforcement of the oxygenated gasoline regulation, by providing a traceable record for each gasoline sample taken by state enforcement personnel.

Enforcement and Penalty Schedules

State oxygenated gasoline regulations must be enforceable by the state oversight agency. EPA recommends that states visit regulated parties during a given control period. Inspections should consist of product sampling and record review. In addition, each state should devise a comprehensive penalty schedule. Penalties should reflect the severity of a party's violation, the compliance history of the party, as well as the potential environmental harm associated with the violation. New York has provided for a comprehensive penalty schedule in accordance with EPA guidance. In addition to having authority to assess a civil administrative penalty, the State has authority to use further measures such as issuance of abatement orders.

Waiver Provisions

EPA is proposing to not approve sections 225–3.8 and 225–3.9(a), which would allow the Commissioner of the Department of Environmental Conservation, upon application, to grant waivers from the State's minimum oxygen content requirement, and the minimum Reid vapor pressure (RVP) requirement, respectively, due to a shortage of gasoline which meets those requirements.

In its revision to section 225–3.8, the State revised the RVP waiver provision originally approved by EPA at 54 FR 26030 on June 21, 1989. At the time, New York had adopted its own summertime RVP standards, more stringent than national standards, as part of an initiative on the parts of northeastern states to make progress toward achieving the National Ambient Air Quality Standard for ozone. Since that time, the national RVP standards have been lowered to the same levels as were initiated by New York in 1989. Because the State's RVP standards are again equal to EPA's national standards and because gasoline RVP is regulated on the Federal level, New York can no longer effectively grant waivers for RVP. To avoid confusion that EPA's approval of the New York RVP requirement might mean that State waivers would waive the Federal requirements, EPA is not approving the State's waiver provision (section 225–3.8).

EPA is also proposing to not approve section 225–3.9(a), which allows the State to grant waivers of the minimum oxygen content requirement. Generally, EPA does not approve state variance or waiver provisions in SIP submissions that would allow the state to grant waivers without EPA approval. To the extent that a waiver provision would allow a state to exempt a source from compliance required by the statute, such a waiver could be inconsistent with the applicable statutory requirements. However, in guidance for oxygenated fuels programs, EPA has identified circumstances under which the Agency may approve a very narrow state variance provision authorizing the state to allow supply of nonconforming gasoline due to extraordinary circumstances. See Guidelines for Oxygenated Gasoline Credit Programs under section 211(m) of the Clean Air Act as Amended. The guidance establishes five conditions to be included in an approvable variance provision. One of these conditions is that the "refiner agrees to make up the air quality detriment associated with the nonconforming gasoline, where practicable." The New York variance provision does not include this requirement. This is a key condition because it reduces the likelihood that granting of a variance would detrimentally affect the environment. Given this deviation from the conditions specified in the guidance, EPA believes that the New York variance provision is not approvable because the limits of the discretion do not clearly meet EPA policy for approving such an exercise of discretion, EPA is not approving this waiver provision. Such waivers would need to be approved by EPA as SIP revisions consistent with EPA policy on such waivers.

Test Methods and Laboratory Review

EPA's sampling procedures are detailed in Appendix D of 40 CFR Part 80. EPA has recommended, in its credit program guidelines, that states adopt these sampling procedures. New York has incorporated by reference EPA sampling methods.

Labeling

EPA requires the labeling of gasoline pumps and has strongly recommended that states adopt their own labeling regulations, consistent with the federal regulation. New York has adopted labeling regulations consistent with the federal regulation.

Credit Program

EPA guidance announced the availability of an optional oxygenated gasoline credit program (57 FR 47849, October 20, 1992), where marketable oxygen credits may be generated from the sale of gasoline with a higher oxygen content than is required. New York has opted not to implement such a credit program and requires a per-gallon minimum oxygen content of 2.7% during the control period.

II. Proposed Action

EPA's review of Subpart 225–3 indicates that the State has adopted an oxygenated gasoline regulation in accordance with the requirements of the Clean Air Act. Therefore, EPA is proposing to approve New York's Subpart 225–3 oxygenated gasoline program as a revision to the State's SIP. EPA is proposing not to approve sections 225–3.8 and 225–3.9(a), which unduly allow the State's Commissioner to grant waivers from the minimum oxygen content and minimum RVP requirement, respectively.

Vehicle Miles Travelled Forecast

Section 187(a)(2)(A) of the Clean Air Act requires moderate carbon monoxide nonattainment areas, such as that portion of New York included in the "New York-Northern New Jersey-Long Island" carbon monoxide nonattainment area, to submit a SIP revision that forecasts vehicle miles travelled through the year 1995. In addition, annual reports and annual updates are required by the State.

The vehicle miles travelled forecast must meet several requirements. It must estimate the vehicle miles travelled from 1990 through 1995 using a method acceptable to EPA, must be conducted in the appropriate geographic area and must provide for annual updates of the forecasts and annual reports on the extent to which the forecasts were accurate, as well as estimates of actual vehicle miles travelled in each year for which a forecast was required (57 FR 13532, April 16, 1992). Moreover, the state should develop the vehicle miles travelled forecast based on EPA guidance.

Contingency measures are to be implemented in a case where the actual annual vehicle miles travelled or the updated forecast contained in an annual report exceeds the most recent prior vehicle miles travelled forecast by an acceptable margin of error (5.0 percent in 1994, 4.0 percent in 1995, and 3.0 percent thereafter) and/or if estimated actual vehicle miles travelled or forecasted vehicle miles travelled exceeds a cumulative 5 percent cap above the attainment demonstration.

The estimated vehicle miles travelled for 1990 and 1991 are 130.7 and 134.6 million miles per day, respectively. In addition, the future forecasts were (in million miles per day) 138.5 for 1992, 142.5 for 1993, 146.4 for 1994, and 150.3 for 1995.

On November 15, 1994, New York submitted a vehicle miles travelled tracking report for the State's 1992 New York City Metropolitan area Carbon Monoxide SIP. This report showed that for 1990, the actual vehicle miles travelled was 130.8. The actual vehicle miles travelled for 1991 to 1993 were below the original forecast: 131.8 for 1991; 135.8 for 1992 and 137.1 for 1993.

New York has submitted documentation satisfying these requirements and EPA, therefore, proposes approval of New York's vehicle miles travelled forecast SIP revision.

Contingency Measures

Section 187(a)(3) of the Clean Air Act requires that states adopt contingency measures to take effect without further action by the Administrator or the state if the state fails to attain the NAAQS by the required date or if any estimate of actual vehicle miles travelled in the nonattainment area or any updated forecast of vehicle miles travelled contained in an annual report for any year prior to attainment is exceeded beyond the allowable limit as discussed in the vehicle miles travelled forecast section. Contingency measures should be capable of reducing vehicle miles travelled or resultant emissions by an amount equal to the projected annual growth rate for vehicle miles travelled (57 FR 13532, April 16, 1992). New York identified two contingency measures, the employee commute option program and winter gasoline volatility reductions, to fulfill this requirement. These programs would both act as contingency measures for failure to attain the carbon monoxide standard or for exceeding the vehicle miles travelled forecast.

1. Employee Commute Option Program

New York is required by section 182(d)(1)(B) of the Clean Air Act to submit its Employee Commute Option program as part of its ozone nonattainment SIP. New York's program applies to employers with 100 or more employees who arrive at the workplace between the hours of 6 and 10 a.m. The goal of this program is to increase the average passenger occupancies by 25% above the average for all vehicles arriving to all workplaces within the zone. This would decrease the amount of automobiles arriving at the workplace, and therefore, decrease the vehicle miles travelled.

New York enacted enabling legislation on August 9, 1993 and the New York State Department of Transportation adopted regulations on April 6, 1994 to implement the program. New York then submitted a SIP revision on June 6, 1994 that contained an adopted employee commute option program. EPA will be taking action on the employee commute option program submittal as a requirement of the ozone SIP in a separate **Federal Register** notice since there are specific requirements an employee commute option program must meet for an ozone SIP but not for contingency measures in a carbon monoxide SIP.

2. Winter Time Gasoline Volatility

New York identified Winter Time Gasoline Volatility as an additional contingency measure. New York State's Subpart 225–3 "Fuel Composition and Use—Volatile Motor Fuel" permits the commissioner to set a winter RVP level for gasoline if such a level is necessary for air quality purposes. This regulation was adopted on June 30, 1993.

EPA is proposing to approve the State's use of the winter time gasoline volatility program as a carbon monoxide contingency measure because it is an adopted measure that will serve to reduce emissions of carbon monoxide. Also, section 211(c)(4) does not preempt the State from adopting a limit on gasoline RVP in the winter time. Under section 211(c)(4), states are preempted from prescribing any control or prohibition respecting any characteristic or component of a fuel, where there is a nonidentical Federal control or prohibition applicable to such characteristic or component. There are two sources of Federal controls on RVP, the Phase II Federal RVP controls promulgated under section 211(h) and section 211(c)(1), and the Federal RVP controls for reformulated gasoline promulgated under section 211(k) and section 211(c)(1). Both of these Federal RVP controls apply only in the summer months. There is no Federal RVP control applicable to gasoline in the winter time, and thus no Federal preemption of the New York winter time RVP control.

Although New York identified two acceptable contingency measures, only one is approvable by EPA at this time. Therefore, EPA proposes to approve the winter time gasoline volatility program as an adequate contingency measure should New York fail to attain the carbon monoxide standard or exceed the vehicle miles travelled forecast. Action on the employee commute option program will be taken in a separate **Federal Register** notice.

Carbon Monoxide Emission Inventory

New York submitted a carbon monoxide emission inventory on November 15, 1992 as required by section 187(a)(1) and as described in section 172(c)(3) of the Clean Air Act. Additional inventory information was submitted in January and March of 1993.

The emission inventory is for a typical carbon monoxide season weekday occurring during December, January, and February and represents a comprehensive, actual inventory of all carbon monoxide emission sources in the New York Metropolitan area. It includes emissions from point, area, and mobile sources (see 1990 base year carbon monoxide emissions summary in Table 1).

TABLE 1.—SUMMARY OF 1990 BASE YEAR CARBON MONOXIDE EMISSIONS BY SOURCE CATEGORY FOR NEW YORK

Source category	CO emissions (tons/day)
Point	31.26
Area	380.16
Non-Road Mobile	577.71
On-Road Mobile	4138.02
Total	5127.15

The inventory was developed according to EPA guidance and has been quality assured. Sources that emit in excess of 100 tons per year of carbon monoxide are defined as point sources. Stationary sources that emit below this threshold are too small to be considered point source and are, therefore, considered to be area sources. The area and off-highway mobile sources include such categories as stationary source fuel combustion, aircraft, marine vessels, and railroads. Highway mobile source emissions were calculated using an updated version of EPA's MOBILE 4.1 model (MOBILE5). Input parameters to this model included vehicle miles travelled, speed, temperature, and registration distribution.

EPA proposes to approve New York's 1990 base year emission inventory for carbon monoxide.

New Source Review Regulation

Section 173 of the Clean Air Act requires states to submit new source review (NSR) revisions that, among other things, incorporate new offset ratios and applicability limits in new source review permitting regulations by November 15, 1992.

EPA will address New York's NSR regulation in a separate **Federal Register** notice.

Multi-State Coordination Letter

Section 187(e) of the Clean Air Act establishes the requirements for "multi-state carbon monoxide nonattainment areas," which are defined as single carbon monoxide nonattainment areas that cover more than one state. To satisfy this requirement, states must develop and submit to EPA a joint workplan to demonstrate early cooperation and integration. This workplan can be in the form of a letter co-signed by all states in the nonattainment area, or, EPA has decided, it can consist of signed individual letters from each of the states. New York submitted its letter, containing a detailed schedule of milestones and a commitment to coordinate with EPA and each of the states involved, on September 16, 1992.

Therefore, EPA proposes to find that New York has fulfilled this requirement and proposes approval of this SIP revision.

Downtown Brooklyn Master Plan

On September 21, 1990, New York submitted a revision to the New York SIP to attain the carbon monoxide air quality standard in the Brooklyn portion of the New York City metropolitan area. This submittal consisted of a plan that was developed in 1987 by the Commissioners of the New York City Departments of Transportation and Environmental Protection called the Downtown Brooklyn Master Plan (DBMP). The DBMP committed the City to implement 13 capital projects in order to reduce high levels of carbon monoxide at intersections in Downtown Brooklyn. The submittal was found to be administratively complete on November 19, 1990.

The 13 projects that made up the DBMP were devised to alleviate predicted violations of the carbon monoxide standard that resulted from several development projects in Downtown Brooklyn. The effects of the individual projects that made up the DBMP were evaluated as a package as part of EPA's review of the Environmental Impact Statement for the Metrotech project. EPA has determined that, taken together, the projects would eliminate the predicted violations.

In its submittal of November 15, 1992 the State included a status report on the DBMP. This status report was updated in a July 14, 1994 letter from Thomas Allen, Department of Environmental Conservation. The status of the DBMP as of July 1994 is displayed in the following table. It shows that, of the 13 capital projects that made up the original plan, five have been completed, one has been partially completed, and two were found to be unnecessary. Of the six projects yet to be completed, two were expected to be completed prior to December 31, 1995. The remaining four projects are unlikely to be completed by that date.

The State is free to revise this element of the SIP, either by demonstrating that the entire DBMP is no longer necessary or by submitting another program of measures equivalent to those it wants to remove.

EPA proposes to approve the DBMP as a revision to the SIP.

TABLE 2.—DOWNTOWN BROOKLYN MASTER PLAN

Downtown Brooklyn master plan status as of July 1994	Original completion date	ISOPIA region II 27–Jul-94
Project		Status
Capital Project Hwk 197A2, Flatbush Ave: 4th Ave to Nassau St, Jay St: Fulton St to Sands St, Willoughby St: Flatbush Ave to Gold St.	31–Dec-91	Completed 12/91.
Capital Porject Hwk 565, Jay St: Fulton St to Sands St	31–Dec-91	Completed 12/91.
Capital Project Hwk 739, Willoughby St: Flatbush Ave to Gold St	31–Dec-91	Completed 12/91.
Capital Project Hwy 197A3R, Flatbush Ave: Atlantic Ave to 4th Ave, Atlantic Ave: Flatbush Ave to 4th Ave, 4th Ave: Pacific St to Flatbush Ave[1].	30–Jun-95	Delayed due to MTA station reconstruction. Estimated bid date Spring 1995.

[1] Projects not yet completed.

Summary

EPA is proposing approval of New York's vehicle miles travelled forecast, contingency measures, carbon monoxide emission inventory, multi-state coordination letter, and Downtown Brooklyn Master Plan as revisions to its carbon monoxide SIP. EPA also proposes approval of New York's winter time gasoline volatility program as a contingency measure. The employee commute option program will be acted upon in a separate **Federal Register** notice. In addition, with the exception of sections 225–3.8 and 225.3.9(a), EPA is proposing to approve the oxygenated gasoline program in the New York City consolidated metropolitan statistical area. This program also includes a provision for oxygenated fuels to serve as a contingency measure in the Syracuse metropolitan statistical area. New York has recently updated their enhanced inspection and maintenance submittal which EPA is currently reviewing. Therefore, action on that program, along with the attainment demonstration, which relies on the enhanced inspection and maintenance program, will be taken in a separate **Federal Register** document.

EPA will address the new source review regulation and transportation and conformity rules in separate **Federal Register** documents.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, Part D of the Clean Air Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moveover, due to the nature of the federal-state relationship under the Clean Air Act, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v *US EPA,* 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

Under sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a federal mandate that may result in estimated annual costs of $100 million or more to the private sector, or to state, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the state and any affected local or tribal governments have elected to adopt the program provided for under section 187 of the Clean Air Act. These rules may bind state, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. To the extent that the rules being proposed for approval by this action would impose any mandate upon the state, loc[illegible] tribal governments e[illegible] the owner or operator [illegible] or as a regulator, or would imp[illegible] mandate upon the private sector, EPA's action would impose no new requirements; such sources are already subject to these regulations under state law. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this proposed action does not include a mandate that may result in estimated annual costs of $100 million or more to state, local, or tribal governments in the aggregate or to the private sector.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of Intent to Delete the Clothier Disposal site from the National Priorities List: Request for Comments.

SUMMARY: The Environmental Protection Agency (EPA) Region II announces its intent to delete the Clothier Disposal site from the National Priorities List (NPL) and requests public comment on this action. The NPL is Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan ((NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended. EPA and the State of New York have determined that no further cleanup by responsible parties is appropriate under CERCLA. Moreover, EPA and the State have determined that CERCLA activities conducted at the Clothier Disposal site to date have been protective of public health, welfare, and the environment.

DATES: Comments concerning the deletion of the Clothier Disposal site from the NPL may be submitted on or before October 15, 1995.

ADDRESSES: Comments concerning the deletion of the Clothier Disposal site from the NPL may be submitted to: Herbert H. King, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, 290 Broadway, 20th floor; New York, NY 10007–1866.

Comprehensive information on the Clothier Disposal site is contained in the EPA Region II public docket, which is located at EPA's Region II office (the 18th floor), and is available for viewing, by appointment only, from 9:00 a.m. to 5:00 p.m., Monday through Friday, excluding holidays. For further information, or to request an appointment to review the public docket, please contact Mr. King at (212) 637–4268.

Background information from the Regional public docket is also available for viewing at the Clothier Disposal site's Administrative Record repository located at: Fulton Library, 160 South First Street, Fulton, NY 13069.

FOR FURTHER INFORMATION CONTACT: Mr. Herbert H. King, (212) 637–4268.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

EPA Region II announces its intent to delete the Clothier Disposal site from the NPL and requests public comment on this action. The NPL is Appendix B to the NCP, which EPA promulgated pursuant to Section 105 of CERCLA, as amended. EPA identifies sites that appear to present a significant risk to public health, welfare, or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of remedial actions (RAs) financed by the Hazardous Substances Superfund Response Trust Fund (the "Fund"). Pursuant to § 300.425(e)(3) of the NCP, any site deleted from the NPL remains eligible for Fund-financed RAs, if conditions at such site warrant action.

EPA will accept comments concerning the Clothier Disposal site for thirty (30) days after publication of this notice in the **Federal Register** (until October 15, 1995).

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses the procedures that EPA is using for this action. Section IV discusses how the Clothier Disposal site meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the Agency uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making this determination, EPA, in consultation with the State, will consider whether any of the following criteria have been met:

1. That responsible or other persons have implemented all appropriate response actions required; or
2. All appropriate Fund-financed responses under CERCLA have been implemented, and no further cleanup by responsible parties is appropriate; or
3. The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking remedial measures is not appropriate.

III. Deletion Procedures

The NCP provides that EPA shall not delete a site from the NPL until the State in which the release was located has concurred, and the public has been afforded an opportunity to comment on the proposed deletion. Deletion of a site from the NPL does not affect responsible party liability or impede agency efforts to recover costs associated with response efforts. The NPL is designed primarily for informational purposes and to assist agency management.

The following procedures were used for the intended deletion of the Clothier Disposal site:

1. EPA Region II has recommended deletion and has prepared the relevant documents.
2. The State of New York has concurred with the deletion decision.
3. Concurrent with this Notice of Intent to Delete, a notice has been published in local newspapers and has been distributed to appropriate federal, state and local officials, and other interested parties. This notice announces a thirty (30)-day public comment period on the deletion package starting on September 15, 1995 and concluding on October 15, 1995.
4. The Region has made all relevant documents available in the regional office and the local site information repository.

EPA Region II will accept and evaluate public comments and prepare a Responsiveness Summary which will address the comments received, before a final decision is made. The Agency believes that deletion procedures should focus on notice and comment at the local level. Comments from the local community may be most pertinent to deletion decisions. If, after consideration of these comments, EPA decides to proceed with deletion, the EPA Regional Administrator will place a Notice of Deletion in the **Federal Register**. The NPL will reflect any deletions in the next update. Public notices and copies of the Responsiveness Summary will be made available to the public by EPA Region II.

IV. Basis for Intended Site Deletion

Site History and Background

The Clothier Disposal site, located in the Town of Granby, Oswego County, New York, is a fifteen-acre, privately-owned parcel of land, of which six acres were used for waste disposal. Ox Creek flows through the site in a northerly direction, feeding into the Oswego River.

In 1973, the Oswego County Health Department found approximately 2,200 drums of chemical waste dumped on the site and requested an investigation by the New York State Department of Environmental Conservation (NYSDEC). In 1976, NYSDEC brought suit against the owner of the property of operating an illegal dump. Subsequently, a temporary permit was granted for a period of one year to clean up the site. In 1977, the owner made an attempt to bury or cover the waste materials dumped on the site. In doing so, drums were broken open and drained. Between early 1978 and 1980, additional efforts were made by the owner to clean up the property. Again these efforts largely entailed burying or covering previously exposed wastes.

In 1983, Engineering-Service, Inc. performed a Phase I Engineering Investigation and Evaluation of the site for NYSDEC, for the purpose of computing a Hazard Ranking System score needed to evaluate whether or not the site should be placed on the NPL. The site was proposed for listing on the NPL on October 15, 1984 (49 FR 40320); it was included on the NPL on June 10, 1986 (51 FR 21504).

In 1985, NYSDEC, through its contractor, URS Company, Inc. undertook a geophysical survey of the site, and staged and sampled on-site drums as part of the remedial investigation/feasibility study (RI/FS) designed to determine the nature and extent of the contamination at the site, to assess the threat that the site posed to public health and the environment, and to develop and evaluate various alternatives to remediate the site.

Performed concurrently with the RI/FS, a number of potentially responsible parties (PRPs), operating under an Administrative Order, removed and disposed of 1,858 drums and stockpiled visibly-contaminated soil in1986. The remaining drums, as well as the visibly-contaminated surficial soils, were removed by EPA during 1987 and 1988.

A number of data quality problems complicated the completion of the RI/FS, which led to EPA tasking Ebasco Services, Inc. (Ebasco) to perform a supplemental RI/FS.

The supplemental RI/FS report, issued in August 1988, concluded that, as a result of the removal actions taken at the site, only low-level residual soil contamination remained on-site. The RI/FS also concluded that the risk levels associated with this residual contamination were within the acceptable range of 10^{-4} to 10^{-6} (representing a one in ten thousand and a one in a million incremental individual lifetime cancer risk, respectively). The risk assessment indicated that the major route of human exposure at the site was through direct contact with on-site soil residually contaminated with polychlorinated biphenyls (PCBs) and carcinogenic polyaromatic hydrocarbons (CPAHs). The highest PCB concentration observed in the soil was 2.5 parts per million (ppm). In order to develop a full range of remedial alternatives, any concentration above 1 ppm PCBs in the soil was considered to require remediation. This level was based on the Toxic Substances Control Act definition of "clean" soil and is associated with a risk below 4×10^{-7} for current use and 7×10^{-6} for plausible maximum exposure during future site use. For CPAHs (benzo(a)anthrance, benzo(b)fluoranthene, benzo(k)fluoranthene, Benzo(a)pyrene and chrysene), the highest total concentration at any location was observed to be 0.9 ppm. For these compounds, a total concentration of 0.33 ppm was set as the limit above which remediation was required. This level was based on the CPAH detection limit for the EPA contract laboratory program and is associated with a risk for 2×10^{-7} for current use or 3×10^{-6} for plausible maximum exposure during future site use.

The U.S. Fish and Wildlife (USFWS) conducted an investigation of Ox Creek, and in August 1988, issued a report of its findings, entitled, Effects of Contaminants from the Clothier Disposal Site on Fish and Wildlife Resources of Ox Creek, Oswego County, New York. This report stated that there was no evidence of either environmental damage in the area around the site or contamination of Ox Creek at levels likely to be associated with risks to wildlife.

On December 28, 1988, a Record of Decision (ROD) was signed, selecting as the remedy for the site:

- Placement of a one-foot clean soil cover over the residually-contaminated areas;
- Regarding and revegetating of the site to prevent soil erosion and to minimize surface water runoff,
- Installation of rip-rap, as needed, on the embankment sloping towards the adjacent Ox Creek to prevent soil erosion;
- Performance of long-term monitoring of the groundwater and soil, and Ox Creek sediments and surface water; and
- Application of institutional controls to prevent the utilization of the underlying groundwater and the future development of the site for residential use.

The ROD also noted that the maximum contaminant concentrations (although not the geometric mean concentrations) in some of the groundwater sample collected during the RI/FS marginally exceeded a number of Applicable or Relevant and Appropriate Requirements (the maximum concentrations of tetrachloroethene and trichloroethene of 24 parts per billion (ppb) and 18 ppb, respectively, exceeded the New York State standard of 5 ppb of each; and antimony, barium, beryllium, chromium, lead, magnesium, and manganese exceeded New York State inorganic groundwater standards or guidances). Thus, further evaluation to determine whether remediation of the groundwater was necessary was called for in the ROD.

A local citizen's group, after reviewing the USFWS report, expressed concern that the USFWS investigation did not include an eleven-acre wetland located adjacent to the site.

To determine whether remediation of the groundwater was necessary and to evaluate the threat to the wetland located adjacent to the site, EPA tasked Ebasco to perform a post-RI/FS investigation, specifically to collect and evaluate samples of the groundwater and the surface water and sediment in the wetland. The results of this investigation, which were presented in January 1990 in the Post RI/FS Evaluation of Groundwater and Wetlands Report, indicated that a significant threat to human health and the environment did not exist at that time, and RAs for the groundwater and wetlands were not warranted.

In September 1989, a Consent Decree was entered by the Northern District of New York with the Settling Defendants to undertake the design and construction of the remedy selected for the site and to perform the long-term monitoring and maintenance of the site upon completion of the construction. The Settling Defendant's contractor, Canonie Environmental Services Corporation (Canonie), performed pre-design sampling to more precisely determine the area extent of the residual, low-level contamination on-site. Based upon these results, Canonie prepared the remedial design (RD) plans and specifications. As part of the RD, calculations were performed, based on a 100-year storm event, that determined that the erosive forces due to the overland flow velocities would be minimal, and that rip-rap protection on the slopes to the wetland (called for the ROD) would not be required. EPA approved the RD in June 1991.

The Settling Defendants awarded a contract to Sevenson Environmental Services, Inc. to implement the remedy in July 1991. During the course of regrading the areas to be covered with clean soil, it was discovered that an above-grade mound of soil contained parts of four drums. Further, while regrading the slope to the wetland, parts of three other buried drums were uncovered. The drum parts and the surrounding soil were excavated and were subsequently disposed of at an EPA-approved hazardous waste facility. The results of analyses of the soil in the areas where the drum parts were discovered indicated that the contaminants and their concentrations were comparable to those found during the RI and, therefore, the remedy selected in the ROD remained appropriate.

In May 1992, a representative of NYSDEC, during an inspection of the site, observed three seeps located at the foot of the west slope to the wetlands. After an analysis of the seeps and the soil surrounding the seeps, it was concluded that the seeps were caused by the discharge of groundwater at the wetland margin. The results of the analyses of the seeps indicated low concentrations of PCBs. Since the samples were not filtered prior to analysis, the PCBs were believed to be a result of PCBs adsorbed to sediment suspended in the liquid while collecting the samples (this premise has been confirmed, in that no PCBs have been identified in five rounds of ground water testing.) The results of the analyses of the soil associated with these seeps indicated contaminant concentrations that are consistent with those detected during the RI. Considering these results, EPA directed the Settling Defendants to continue with the implementation of the remedy. The installation of the soil cap and revegetation was completed in September 1992.

Following EPA's approval of the Settling Defendants' operation and maintenance and long-term monitoring plan, a Superfund Site Close-Out Report was approved on December 29, 1993.

During the first post-RA inspection/monitoring in April 1994, a small area of black, odorous soil was observed on the western portion of the soil cover. Three buried drums that were subsequently discovered in this area were excavated and overpacked. A geophysical investigation, performed to determine whether other buried drums were present in this area, followed by the installation of two trenches in areas of concern, revealed one crushed drum, metallic debris, and some stained soil. The drum, debris, and soil were excavated and, along with the overpacked drums mentioned above, were disposed of at approved disposal facilities.

Summary of Operation and Maintenance and Five-Year Review Requirements

Since the remedy involved the installation of a soil cover, there are no operational requirements.

The Settling Defendants are to monitor the site for five years, commencing with the first inspection/monitoring event that occurred on April 26, 1994.

The long-term monitoring program consists of monitoring the groundwater, soil, and Ox Creek sediments and surface water quarterly the first year, semi-annually the second year, and annually thereafter.

Site inspections, which will be conducted quarterly for the first year and semi-annually thereafter, are to be coincident with the monitoring events. Additional inspections will be conducted after any major flooding (100-year) or rainfall events in the Ox Creek area. The inspections will include visual observations of the soil cover, erosion controls and silt fencing, groundwater monitoring wells, site security, and general site conditions. Maintenance, if required, will consist of correcting observed deficiencies (e.g., restoring the soil cover and its vegetation to its original condition, repair of fencing, etc.) The six groundwater monitoring wells (four located within the limits of the soil cover, one just adjacent to it, and one up-gradient) that comprise the groundwater monitoring program will be inspected to ensure their integrity. They will be repaired should they become damaged, or replaced should they become non-functional.

So that EPA can evaluate the remedy's effectiveness, following each inspection/sampling event, the Settling Defendants are to submit to EPA a monitoring and inspection program report, summarizing the inspection and sampling results, and describing any corrective maintenance actions that were taken. In addition, a review of the long-term monitoring and inspection program reports will be performed five years after the initiation of the RA to assure that the remedy remains effective in protecting human health and the environment.

Summary of How the Deletion Criteria Has Been Met

Based upon the results of RA sample analyses, survey results, and site inspections, the site meets the requirements set forth in the ROD, in that a one-foot clean-soil cover has been installed over those residually-contaminated locations at which concentrations above 1 ppm PCBs and 0.33 ppmm CPAHs were detected, the site has been regraded and revegetated to prevent soil erosion and to minimize surface water runoff, and institutional controls (an easement) have been put into place to prevent the utilization of the underlying groundwater and the future development of the site for residential use.

EPA and the State have determined that the response actions undertaken at the Clothier Disposal site are protective of human health and the environment.

In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. EPA, in consultation with the State, has determined that all appropriate responses under CERCLA have been implemented and that no further cleanup by responsible parties is appropriate. Having met the deletion criteria, EPA proposes to delete the Clothier Disposal site from the NPL.

Dated: August 21, 1995.

William J. Muszynski,

Acting Regional Administrator.

BILLING CODE [illegible]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 3170

[ES–930–05–1310–01–241A]

RIN 1004–AC27

Coalbed Methane

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule would add a new part to the oil and gas leasing regulations. This regulation is intended to encourage the production of coalbed methane in States where production has been impeded by conflicts in ownership. These regulations are a requirement of section 1339 of the Energy Policy Act of 1992, Ownership of Coalbed Methane.

DATES: Comments should be submitted by November 14, 1995. Comments received or postmarked after the above date may not be considered in the decision making process on the final rule.

ADDRESSES: Comments should be sent to: Director (120), Bureau of Land Management, Room 5558, Main Interior Building, 1849 C Street, NW., Washington, DC 20240. Comments can also be sent to internet!WO140@attmail.com. Please include "attn: AC27" and your name and address in your internet message. Comments will be available for review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: David R. Stewart, Bureau of Land Management, Eastern States at (703) 440–1728.

SUPPLEMENTARY INFORMATION: This proposed rule is intended to implement section 1339 of the Energy Policy Act of 1992 (hereinafter "the Act"), Ownership of Coalbed Methane (Pub. L. 102–486 Section 1339; 106 Stat. 2986; 42 U.S.C. 13368). The Act requires promulgation of regulations by October 24, 1995 to carry out the requirements of the Act. This rule is needed to promote the orderly development of coalbed methane by removing the impediment that conflicting ownership poses to the development of that resource in affected States. The legislative history of the Energy Policy Act indicates that Congress intended Section 1339 to apply to all lands within affected States, and not just Federal lands. *See* H.R. Rep. 102–474(I) at 147–48 and 214–16 (*reprinted in* 1992 U.S. Code Cong. & Admin. News at 1954); Cong. Rec., Feb. 6, 1992 at E 232 (Remark of Rep. Rahall that predecessor bill to section 1339 was offered "with the hopes that the entire Appalachian region will experience the benefits of coalbed methane development." (see also 58 FR 21589).

This regulation essentially force-pools conflicting owners of coalbed methane. It does this by requiring conflicting owners to enter into the development of a drilling unit. The regulation provides that any proceeds from a well, where there is a conflict in ownership, will be placed in an escrow account until the ownership issue is resolved by a State entity of competent jurisdiction. The mechanism of forced pooling, coupled with the escrow account requirements, is intended to remove the impediment that conflicts in ownership of coalbed methane poses to development.

These regulations will affect the development of coalbed methane in five States (Illinois, Indiana, Kentucky, Pennsylvania, and Tennessee). The list of affected States was originally published in the **Federal Register** on April 22, 1993 (58 FR 21589). West Virginia and Ohio were on the original list of affected States but have complied with the requirements of the Act and therefore have been removed from the list. West Virginia was removed from the list of affected States because it implemented a State program that promoted the production of coalbed methane gas within the State. Ohio was removed from the list of affected States as a result of a resolution passed by both houses of the Ohio Legislature requesting removal from the list. West Virginia was removed from the list of affected States on December 8, 1994, (59 FR 63376), and Ohio was removed from the list of affected States on February 8, 1995 (60 FR 7576).

The principal author of this rule is David R. Stewart of the Bureau of Land Management (BLM), Eastern States, assisted by Ian Senio of the Regulatory Management Team of BLM. The staff, Fuels Resources Management Division, U.S. Department of Energy, Morgantown Energy Technology Center, also assisted BLM in drafting this proposed rule. BLM interprets Section 1339 of the Act as giving it the primary responsibility for making day-to-day decisions necessary to carry out the regulations, while also requiring it to consult with and consider the view of the Department of Energy regarding the administration of this program.

We have determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. The BLM has determined that this proposed rule is categorically excluded from further environmental review pursuant to 516 Departmental Manual (DM), Chapter 2, Appendix 1, Item 1.10, and that the proposal would not meet any of the 10 criteria for exceptions listed in 516 DM 2, Appendix 2. Pursuant to the Council on Environmental Quality regulations (40 CFR 1508.4) and environmental policies and procedures of the Department of the Interior, "categorical exclusion" means a category of actions that do not individually or cumulatively have a significant effect on the human environment and that have been found to have no such effect in procedures adopted by a Federal agency and for which neither an environmental assessment nor an environmental impact statement is required.

This rule was not subject to review by the Office of Management and Budget under Executive Order 12866. This rule will not have a significant economic effect on the coalbed methane industry. The rule will not adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal communities. The rule applies to five States not all of which have substantial quantities of economically recoverable coalbed methane. Furthermore, BLM anticipates that several more States will qualify for removal from the list of affected States, further diminishing the already minor economic impact of these regulations.

The regulations regarding the location and spacing of wells will have little or no economic impact as all of the States on the list of affected States already utilize some method of spacing for gas wells. The regulations pertaining to pooling of interests are reasonable and reflect standard, good management practices for gas wells and will have little economic impact. The section of the regulations that deals with the establishment of an escrow account in cases where it is not clear who owns the coalbed methane gas will also have little economic impact. The escrow account will hold the funds from producing wells while the ownership of the coalbed methane is being determined.

There will be little or no cost increase imposed on the coalbed methane industry and therefore there will be no substantial effects on government agencies or competition. Further, for the same reasons, the Department has determined that under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the rule will not have a significant economic impact on a substantial number of small entities. The rule does not distinguish between entities based on their size.

The BLM has determined that this regulation is not significant under the Unfunded Mandates Reform Act of 1995 since it will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. This regulation will not significantly or uniquely affect small governments.

The Department certifies that this proposed rule does not represent a government action capable of interference with constitutionally protected property rights. There will be no private property rights impaired as a result of this rule. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget for approval as required by 44 U.S.C. 3501 *et seq*. The collection of this information will not be required until it has been approved by the Office of Management and Budget.

The Regulatory Management Team of BLM wrote these regulations in plain English. We used plain English in an attempt to effectively communicate the information and legal requirements of these regulations. In addition to comments on the substance and content of these regulations, please comment on the use of plain English in these regulations.

List of Subjects for 43 CFR Part 3170

Public lands—Mineral resources, Reporting and record keeping requirements, Coalbed methane.

For the reasons set out in the preamble, part 3170, Group 3100, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations is added to read as follows:

States Affected by These Regulations

3171.1 Which States are affected States?
3171.2–1 How does BLM add a State to the list of affected States?
3171.2–2 How does BLM remove a State from the list of affected States?

How To Establish a Spacing Unit

3172.1 What distance requirements apply to a spacing unit?
3172.2–1 Who may apply for a spacing unit?
3172.2–2 What must my application for spacing contain?
3172.2–3 What must be in my notice to interest owners required by § 3172.2–2(g)?
3172.2–4 As a notified interest owner under § 3172.2–2(f) how do I object to spacing?
3172.2–5 What does BLM consider when reviewing my application for spacing?
3172.2–6 How does BLM tell me that the spacing unit has been approved?

How To Get a Pooling Order

3172.3–1 What is a pooling order?
3172.3–2 Is a pooling order required if there is a voluntary agreement between ownership interests in the coalbed methane?
3172.3–3 Who may apply for a pooling order?
3172.3–4 What must my application for pooling order contain?
3172.3–5 Will there be a hearing on my application for pooling?
3172.3–6 How will I know about the pooling order hearing?
3172.3–7 What will the pooling order establish?
3172.3–8 What options do I have in participating in the pooling order?
3172.3–9 What if I make no election?

Escrow Accounts

3172.4–1 What is the purpose of the escrow account BLM establishes?
3172.4–2 What funds must I deposit into the escrow account?
3172.4–3 When will I receive my share of the funds paid into the escrow account?
3172.4–4 How will the funds from the escrow account be allocated?

Getting Authorization To Drill and Stimulate Coalbed Methane Wells

3172.5–1 After the pooling order is issued may I begin to drill and stimulate the coalbed methane well(s)?
3172.5–2 What must I include when applying for authorization to drill a coalbed methane well or stimulate a coal seam?
3172.5–3 What if I can't get signed consent from a party identified in § 3172.5–2(c)(2)?

Notice and Objection

3172.6–1 As the unit operator whom must I notify before I drill a coalbed methane well?
3172.6–2 How do I prove that I notified all appropriate parties?
3172.6–3 If I am notified of the application to drill a coalbed methane well, may I object to the drilling of the well?
3172.6–4 What must I include in my objections to the application to drill a coalbed methane well?
3172.6–5 Under what circumstances may BLM refuse to approve the drilling of a well?
3172.6–6 Under what circumstances is BLM required to deny approval for the drilling of a well?
3172.6–7 If my application to drill a well is unacceptable because a notified party objects, may I modify my proposal to mitigate the objection?

Hearing and Decision on Objections to Drilling and Stimulation of Coalbed Methane Wells

3172.7–1 If I have been notified of the proposal to drill or stimulate a coalbed methane well and I object, am I entitled to a formal hearing?
3172.7–2 May parties other than notified parties participate in these proceedings?
3172.7–3 How will I find out about the informal hearing on objections to the drilling and stimulation of the well?
3172.7–4 What if BLM decides not to have a hearing on objections to the drilling and stimulation of the well?
3172.7–5 When does BLM decide on my request for approval to drill and stimulate the coal seam?
3172.7–6 Do I need only BLM's approval to start operations?

Plugging of Coalbed Methane Wells

3172.8–1 When must I plug a coalbed methane well?

Venting for Safety

3172.9 May I vent coalbed methane for safety reasons?

Appeals

3172.10 What if I have been adversely affected by a decision made by BLM under these regulations?

Authority: 42 U.S.C. 1336; 43 U.S.C. 174.0.

General Provisions

§ 3170.0–1 Purpose of these regulations.

The regulations in this part govern operations associated with the development of coalbed methane in those States listed as affected States. They seek to promote the orderly and efficient development of coalbed methane and preserve the ability to mine coal seams in the affected States.

§ 3170.0–3 Authority for these regulations

Section 1339 of the Energy Policy Act of October 24, 1992 (106 Stat. 2776, 2986; 42 U.S.C. 13368).

§ 3170.0–5 Definitions.

(a) *Affected State* means a State listed by the Secretary of the Interior, with the participation of the Secretary of Energy, as published in the **Federal Register** on April 22, 1993, 58 FR 21589 (1993), and as subsequently amended.

(b) *Coalbed methane* means natural gas that is produced, or may be produced, from coalbeds and rock strata associated with the coalbed.

(c) *Coal operator* means any person who has the right to operate or does operate a coal mine.

(d) *Coal owner* means any person who owns or leases a coal seam.

(e) *Coal seam* means any layer of coal 20 inches or more in thickness. The term also applies to a stratum of less thickness that is being commercially worked, or in the Bureau of Land Management's judgment can foreseeably be commercially worked and will require protection if wells are being drilled through it.

(f) *Nonparticipating working-interest owner* means a coalbed methane owner who relinquishes his working interest in a well to participating working-interest owners until the proceeds allocable to his share equal 300 percent of his share of the costs of drilling and equipping the well. Afterwards, the nonparticipating working-interest owner becomes a participating working-interest owner. Here, proceeds equal gross revenue less operating costs.

(g) *Participating working-interest owner* means a coalbed methane owner who elects to share the risks and costs of drilling, completing, equipping, gathering, operating (including any and all disposal costs), plugging, and abandoning a well(s) under a pooling order and to receive a share of the well's production.

(h) *Pooling* means joining of interests for common development within an approved spacing unit.

(i) *Spacing unit* means an area that may contain one or more coalbed methane wells for the purpose of orderly development of coalbed methane.

(j) *Stimulate* means any action taken to increase the inherent productivity of a coalbed methane well such as hydraulic fracturing.

(k) *Unit operator* means the party designated in a pooling order to develop a spacing unit by the drilling of one or more coalbed methane wells.

(l) *Vent* means release of coalbed methane into the atmosphere.

§ 3170.0–7 Applicability of these regulations.

The regulations apply to any deposit of coal capable of producing coalbed methane in an affected State and are in addition to State permitting requirements for individual wells. These regulations don't apply to coalbed methane development where there is a voluntary agreement between all ownership interests.

States Affected by These Regulations

§ 3171.1 Which States are affected States?

The five affected States are Pennsylvania, Kentucky, Tennessee, Indiana, and Illinois. Excluded by statute from any extension or revision of the list of affected States are the States of Colorado, Montana, New Mexico, Wyoming, Utah, Virginia, Washington, Mississippi, Louisiana, and Alabama.

§ 3171.2–1 How does BLM add a State to the list of affected States?

BLM may add to the list of affected States when BLM determines that all three of the following conditions apply—

(a) Development of significant deposits of coalbed methane is being impeded by disputes, uncertainty or litigation regarding ownership of coalbed methane;

(b) No statutory or regulatory procedure or existing case law permits and encourages the development of coalbed methane within that State; and

(c) No extensive development of coalbed methane exists within that State, but the potential for coalbed methane development exists.

§ 3171.2–2 How does BLM remove a State from the list of affected States?

BLM will remove a State from the list of affected States when any of the following events occurs:

(a) The Governor of the State petitions the Secretary of the Interior for removal, and the State's legislature doesn't object. The Governor first must notify the legislature of the petition during a legislative session and allow six months for consideration. If, in that time, the legislature enacts no law or resolution disapproving the petition, the Governor may petition the Secretary to delete the State from the list of affected States. The petition must include a copy of the Governor's notice to the State legislature and a statement that the legislature hasn't disapproved removal of the State from the list of affected States;

(b) The State's legislature passes a law or resolution requesting removal from the list of affected States. A representative of the legislature must send BLM a copy of the law or resolution; or

(c) BLM determines that the State no longer meets all of the criteria for an affected State listed in § 3171.2–1.

How To Establish a Spacing Unit

§ 3172.1 What distance requirements apply to a spacing unit?

If the State has distance requirements for coalbed methane wells those distance requirements apply. Otherwise, a coalbed methane well must be both—

(a) 1,000 feet or more from any other coalbed methane well; and

(b) 200 feet or more from the boundary of the spacing unit.

Coalbed methane wells in the gob will be spaced by BLM on an individual basis. Gob means an area in an underground mine where mining activity has occurred that may be packed with waste rock and in which there is a reasonable likelihood of buildup of coalbed methane. Exceptions to paragraphs (a) and (b) of this section require BLM's prior approval.

§ 3172.2–1 Who may apply for a spacing unit?

You may file an application to establish spacing units for drilling and operating coalbed methane wells if you claim a coalbed methane ownership interest within a proposed spacing unit.

§ 3172.2–2 What must my application for a spacing unit contain?

You must file with BLM an original and two copies of an application to establish or modify spacing. In it—

(a) Give your name and address and those of any counsel or representative;

(b) If you are applying to vacate or amend an order, identify the order you want vacated or amended and state the relief you seek;

(c) Justify the size and shape of the proposed spacing unit based on geologic characteristics of the subject coalbed(s) and the engineering and economic characteristics of well(s) within the unit;

(d) Give a legal description of the area to be spaced relative to a known survey point and the total acreage to be included in the order;

(e) Give a map depicting the boundary of the area to be spaced;

(f) List the names and addresses of each owner of the surface estate, and any oil, gas, coal or other mineral interest underlying the land which is the subject of your request; and

(g) Certify by affidavit that you used due diligence to locate and serve notice of the request for spacing to each of the owners identified under § 3172.2–2(f).

§ 3172.2–3 What must be in my notice to interest owners required by § 3172.2–2(g)?

Your notice must—

(a) Briefly describe the proposed action;

(b) Give the address of the BLM office where your application is filed;

(c) Invite interest owners to send written comments to that BLM office within 30 calendar days of receiving your notice; and

(d) Give a general-location map of the area.

§ 3172.2–4 As a notified interest owner under § 3172.2–2(f) how do I object to the spacing?

Provide BLM with written objections within 30 calendar days of your notification.

§ 3172.2–5 What does BLM consider when reviewing my application for spacing?

(a) Besides the information you submitted in your application for spacing, BLM considers—

(1) Proposed mine development plans;

(2) Existing mine operations;

(3) Drilling of multiple coalbed methane wells on each spacing unit;

(4) Existing spacing laws or orders; and

(5) Objections received under § 3172.2–4.

(b) If you don't send enough information for BLM to determine spacing unit size or shape, BLM may enter a temporary order establishing provisional spacing units for the orderly development of the area. The provisional spacing stays in effect until BLM receives the information it needs to determine the ultimate spacing for the wells.

§ 3172.2–6 How does BLM tell me that the spacing unit has been approved?

After reviewing your application for spacing, BLM issues a spacing order that establishes the following:

(a) The size and shape of the spacing units;

(b) The formations to which the order applies;

(c) The acreage included in the order; and

(d) Well locations on each unit.

BLM will send you and any parties that request it, a copy of the spacing order.

How To Get a Pooling Order

§ 3172.3–1 What is a pooling order?

The pooling order is an order that joins conflicting interests in one or more spacing units and spreads their costs and revenues.

§ 3172.3–2 Is a pooling order required if there is a voluntary agreement between ownership interests in the coalbed methane?

No pooling order is required if the parties claiming an ownership interest in the coalbed methane voluntarily agreed to drill and operate the well.

§ 3172.3–3 Who may apply for a pooling order?

You may apply for a pooling order if you are claiming a coalbed methane ownership interest and are proposing to drill a coalbed methane well.

§ 3172.3–4 What must my application for a pooling order contain?

You must file an original and two copies of your application. In it—

(a) Give your name and address and those of any counsel or representative;

(b) If you are applying to vacate or amend an order, identify the order you want vacated or amended and state the relief you seek. If you are seeking to amend an order, you may reference information already on file with BLM and don't need to send it again;

(c) Justify the proposed action which may include citing statutes, rules, orders, and decided cases;

(d) Give a legal description of the area to be pooled;

(e) Include a map that shows the proposed pooling unit boundary and the boundaries of individual tracts of ownership in the unit, certified by a registered land surveyor or engineer;

(f) For each tract in the unit, give—

(1) The acreage and its percentage to the total acreage of the pooling area;

(2) The names, addresses and ownership percentages for all owners of the surface, coal, oil and gas. If any owner's name and address is unknown, say so;

(g) Describe the coalbed methane ownership interests to be pooled;

(h) Give your percentage of the total interest in the proposed unit;

(i) Describe the conflicting claims to ownership of the coalbed methane;

(j) Give the percentages of coalbed methane ownership interests to be escrowed and a plan for escrowing the costs of drilling and operating the well(s) and the proceeds from the well(s).

(k) Describe the geology of any coalbeds and adjacent strata from which coalbed methane is to be produced;

(l) Describe the proposed development, including at least—

(1) The number, location, and depths of proposed wells (with maps as appropriate);

(2) The anticipated drilling schedule;

(3) A description of production measurement and allocation; and

(4) Any other unique aspect of the operation;

(m) Estimate production over the life of well(s) and the total reserves of the unit;

(n) Estimate the allocable costs, providing sufficient detail of the types of direct and indirect costs; and

(o) Certify by affidavit that you used due diligence to locate and identify all interest owners.

§ 3172.3–5 Will there be a hearing on my application for pooling?

Yes. BLM holds a hearing 45 calendar days or more after receiving an application for pooling.

§ 3172.3–6 How will I know about the pooling order hearing?

BLM provides notice of the hearing by certified mail (return receipt requested) or makes a reasonable and diligent effort to provide notice to each party claiming an ownership interest in the coalbed methane within the proposed pooling area. The notice—

(a) Will describe the purpose of the hearing;

(b) Invites each party to submit written objections;

(c) Invites each party to appear before BLM at the pooling hearing; and

(d) States the anticipated date, time, and place of the hearing.

§ 3172.3–7 What will the pooling order establish?

After reviewing your application for pooling and holding the hearing BLM issues a pooling order which, among other things, establishes—

(a) The boundary of the order;

(b) The coalbed methane ownership interests and formations to be pooled;

(c) The unit operator;

(d) Escrow provisions as provided in 3172.4; and

(e) Election options.

§ 3172.3–8 What options do I have in participating in the pooling order?

After BLM issues the pooling order, if you are an owner or claim ownership of the coalbed methane, you must choose a participation option. You must give written notice of your election to BLM and the designated unit operator within 30 calendar days after the effective date of the pooling order. The participation options are—

(a) You elect to sell or lease your coalbed methane ownership interest to the unit operator at a royalty rate determined by BLM in the pooling order;

(b) You elect to become a participating working-interest owner; or

(c) You elect to become a nonparticipating working-interest owner.

§ 3172.3–9 What if I make no election?

No election means you have agreed to lease your coalbed methane interest to the unit operator under the terms and conditions in the pooling order. The pooling order must clearly state that this is what no election means.

Escrow Accounts

§ 3172.4–1 What is the purpose of the escrow account BLM establishes?

BLM establishes an escrow account to maintain custody of the costs and proceeds for the interests described in the pooling order. The costs for administering the escrow account come out of the funds deposited as proceeds in the escrow account. The escrow account will be established at a federally insured bank.

§ 3172.4–2 What funds must I deposit into the escrow account?

(a) If you are a participating working-interest owner but not the unit operator, you must deposit into the escrow account your share of drilling, equipping, and abandonment costs, as set out in the pooling order;

(b) If you are the unit operator, you must deposit into the escrow account all royalties attributable to the conflicting interests of the lessees plus all proceeds that exceed ongoing operational expenses (including reasonable overhead costs) attributable to conflicting working interests.

§ 3172.4–3 When will I receive my share of the funds paid into the escrow account?

BLM orders payment of principal and accrued interest from the escrow account within 30 calendar days in one of two ways:

(a) To all legally entitled parties after BLM receives notification of the final legal determination of entitlement. Notification consists of certified copies of the order issued by a court or other body of competent legal jurisdiction.

(b) To all parties who claim an ownership in the coalbed methane when they voluntarily agree on the ownership of the coalbed methane. You must send BLM a copy of the voluntary agreement. This agreement must consist of a notarized writing, signed by all parties claiming an interest in the coalbed methane, which at a minimum clarifies ownership interests in the coalbed methane.

§ 3172.4–4 How will the funds from the escrow account be allocated?

You must give BLM either a certified copy of the order issued by a court or other body of competent legal jurisdiction or a copy of the agreement between parties claiming ownership in the coalbed methane. Then—

(a) If you are a legally entitled participating working-interest owner, you receive a proportionate share of the proceeds attributable to your conflicting ownership interest;

(b) If you are a legally entitled nonparticipating working-interest owner, you receive a proportionate share of the proceeds attributable to your conflicting ownership interest, less your proportionate share of 300 percent of the cost of drilling, equipping and abandoning the well;

(c) If you lease (or are considered to have leased under § 3172.3–9) your coalbed methane ownership interest to the unit operator, you receive a share of the royalty proceeds attributable to the conflicting interests of lessees, as set out in the pooling order; or

(d) If you are the unit operator, you receive the costs each legally entitled participating working-interest owner contributed to the escrow account.

Getting Authorization To Drill and Stimulate Coalbed Methane Wells

§ 3172.5–1 After the pooling order is issued may I begin to drill and stimulate the coalbed methane well(s)?

No. You must send to BLM an application for each well. Each coalbed methane well drilled within the area covered by the order must conform with approved well spacing. Drilling operations, stimulation of a coal seam, or surface disturbance preliminary to drilling may begin only after BLM approves the application.

§ 3172.5–2 What must I include when applying for authorization to drill a coalbed methane well or stimulate a coal seam?

You must send to BLM an original and two copies of your application. Include in it—

(a) A cover sheet containing the information specified in applicable notices or orders, including at least—

(1) The operator's name, address and telephone number;

(2) The name of the individual responsible for on-the-ground operations;

(3) The well name, number, location, and the total acreage committed to the well;

(4) The serial number assigned to the pooling order; and

(5) A statement certifying that you have the right to conduct the operations.

(b) A drilling plan containing the information specified in applicable notices or orders, including at least—

(1) A copy of an approved State permit to drill the well(s);

(2) A description of the drilling and casing program;

(3) A general discussion of the local geology;

(4) A discussion of how you will conform to any mine development plan near the proposed coalbed methane well; and

(5) An explanation of procedures you will follow to protect the safety of persons working in underground coal mines near the coalbed methane well.

(c) When proposed, a stimulation plan containing the information specified in applicable notices or orders. In it—

(1) Describe the stimulation procedure;

(2) Identify all parties who either are operating a coal mine or have by virtue of their property rights in the coal the ability to operate a coal mine within 750 horizontal feet and 100 vertical feet above and below the coal bearing stratum which you propose to stimulate;

(3) Certify that each party identified in § 3172.5–2(c)(2) received a stimulation plan and that the plan—

(i) Tells each notified party that it may witness stimulation activity;

(ii) Explains how you and the notified party will share information on the results of stimulation; and

(iii) States the notified party's right to ask for a hearing before BLM;

(4) Include a signed consent from each party identified in § 3172.5–2(c)(2) agreeing to the proposed stimulation plan. The required consent to stimulate a coal seam in no way impairs, abridges, or affects any rights or obligations arising out of a coalbed methane contract or coalbed methane lease in existence as of October 24, 1992, between a coalbed methane operator or interest owner and a coal operator or interest owner. BLM considers a lease or contractual agreement allowing for coalbed methane development and any extensions or renewals of a lease or agreement as fully meeting consent requirements; and

(d) Provide any other data BLM may request.

§ 3172.5–3 What if I can't get signed consent from a party identified in § 3172.5–2(c)(2)?

(a) If all parties identified above haven't given signed consent, you must file a request with BLM for a determination whether to approve or deny the proposed stimulation of the coal seam(s) described in § 3172.5–2(c)(1). In your request—

(1) Say you lack written consent from a party from whom consent is required;

(2) Detail your efforts to obtain written consent;

(3) Offer any reasons you know for the lack of consent; and

(4) Give prima facie evidence that the method of stimulation proposed by the coalbed methane operator won't cause unreasonable loss or damage to the coal seam. For this section, prima facie evidence is evidence that proves a particular fact but might be overcome by other evidence that proves a contradictory fact. This evidence should consider all factors, including the possibility that coal seams for which no actual or proposed mining plans exists may be mined at some future date. This evidence should also take into consideration the economics of the coal industry and mine safety requirements.

(b) If a coal operator denies consent for reasons of safety, BLM seeks the views and recommendations of the appropriate State and Federal coal mine safety agencies. BLM then makes a determination which is in accordance with Federal and State coal mine safety laws and recommendations of Federal and State coal mine safety agencies.

Notice and Objection

§ 3172.6–1 As the unit operator, whom must I notify before I drill a coalbed methane well?

You must notify—

(a) All parties who either are operating a coal mine or have, by virtue of their property rights in the coal, the ability to operate a coal mine within 750 horizontal feet and 100 vertical feet above and below the coal-bearing stratum which you propose to stimulate; and

(b) All parties claiming an interest in the coalbed methane in the spacing unit.

§ 3172.6–2 How do I prove that I notified all appropriate parties?

You must send BLM a copy of—

(a) A signed receipt of delivery of notice by certified mail;

(b) A signed receipt acknowledging personal delivery of the notice; or

(c) The mailing log or other proof of the date you sent the notice by certified mail, return receipt requested, if all receipts of delivery of notice by certified mail haven't been signed and returned to you within 15 calendar days of mailing.

§ 3172.6–3 If I am notified of the application to drill a coalbed methane well, may I object to the drilling of the well?

Yes. You may submit to the BLM office where the application was filed your written objections about drilling the well within 30 calendar days after you receive a notice from the unit operator of the coalbed methane well.

§ 3172.6–4 What must I include in my objections to the application to drill a coalbed methane well?

Your objections to an application must contain—

(a) Your name, address and telephone number;

(b) The date you received notice of the application to drill;

(c) A description of the proposed activity you object to;

(d) A statement of the specific reason(s) you object;

(e) Conditions under which the permit would be acceptable; and

(f) Any other information you wish to provide including but not limited to mine maps, structural maps, mine plans, and stratigraphic information.

§ 3172.6–5 Under what circumstances may BLM refuse to approve the drilling of the well?

BLM may refuse to approve the drilling of the well if BLM determines that the proposed activity would—

(a) Cause unreasonable loss or damage to any operating, inactive or abandoned coal mine, including any coal mine already projected but not yet being operated, due to its proximity to any coal mine opening, shaft, underground workings, or to any proposed extension of the coal mine;

(b) Not conform with a coal operator's development plan for an existing or proposed operation;

(c) Interfere unreasonably with present or future coal mining operations, including the ability to comply with other applicable laws and regulations;

(d) Possibly be unsafe, considering the dangers of creeps, squeezes or other disturbances because of the extraction of coal;

(e) Interfere unreasonably with the safe recovery of coal, oil, and gas; or

(f) Impinge directly upon the notified parties' coalbed methane interest.

§ 3172.6–6 Under what circumstances is BLM required to deny approval for the drilling of a well?

BLM must deny approval for the drilling of a well if BLM determines that—

(a) The well would not comply with applicable spacing or other requirements;

(b) The unit operator hasn't notified, or hasn't made a diligent effort to notify, all entities that claim ownership of coalbed methane to be drained by the well;

(c) The unit operator hasn't provided entities that claim ownership of coalbed methane to be drained by the well an opportunity to object in accordance with these rules; or

(d) Conflicting interests exist that haven't been resolved by voluntary agreement or by final determination by a court or other body of competent legal jurisdiction and BLM has not issued a pooling order.

§ 3172.6–7 If my application to drill a well is unacceptable because a notified party objects, may I modify my proposal to mitigate the objection?

Yes. BLM considers whether drilling is acceptable if you modify the proposed activity so that—

(a) You can reasonably drill through an existing or planned pillar of coal, or are close to an existing well, taking into consideration surface topography;

(b) You can instead move the drilling to a mined-out area, or to some other feasible area;

(c) You can agree to a drilling moratorium of not more than two years to complete coal mining operations in the subject area; or

(d) You can locate the spacing unit or well in a uniform pattern with other spacing units or wells.

Hearing and Decision on Objections to Drilling and Stimulation of Coalbed Methane Wells

§ 3172.7–1 If I have been notified of the proposal to drill or stimulate a coalbed methane well and I object, am I entitled to a formal hearing?

No. However, BLM may decide to hold an informal fact-finding hearing on any objection filed about an application for drilling or stimulation, or both, of a coalbed methane well. In determining whether to have an informal hearing, BLM takes into account at least—

(a) Whether the party objecting to the application has standing to object. Only parties entitled to notice under § 3172.6–1 have standing;

(b) Whether the objection was filed on time; and

(c) Whether the objection contains all of the information required under § 3172.6–4.

§ 3172.7–2 May parties other than notified parties participate in these proceedings?

Yes. Other interested parties may comment on the stimulation plan only. You must submit comments in writing to the BLM office where the proposed plan was filed before the close of the objection period.

§ 3172.7–3 How will I find out about the informal hearing on objections to the drilling and/or stimulation of the well?

If BLM determines that a hearing is warranted, the hearing takes place within 30 calendar days after the close of the objection period. BLM notifies the applicant and each party with standing to object within ten calendar days after the objection period closes. The notice states the time and place of the hearing, all objections, and who made them.

§ 3172.7–4 What if BLM decides not to have a hearing on objections to the drilling and/or stimulation of the well?

If BLM decides not to hold a hearing on any objections filed with BLM, we explain why we are not holding a hearing in writing to the party who objects and the permit applicant and advise the objecting party of the right to appeal the decision.

§ 3172.7–5 When does BLM decide on my request for approval to drill and/or stimulate the coal seam?

Not later than 45 calendar days after receiving your request for approval to drill and/or stimulate, BLM—

(a) Approves your request as submitted or with appropriate modifications or conditions;

(b) Denies your request and advises you of the reasons for disapproval; or

(c) Advises you, either in writing or orally with later written confirmation, of the reasons why final action will be delayed along with the date you can expect the final action.

§ 3172.7–6 Do I need only BLM's approval to start operations?

No. Approval of drilling locations by BLM doesn't relieve you of obtaining the necessary permits from other appropriate State or Federal regulatory

authorities and surface managing agencies.

Plugging of Coalbed Methane Wells

§ 3172.8–1 When must I plug a coalbed methane well?

You must promptly plug and abandon each coalbed methane well that isn't commercially producible and not otherwise required for any other use. If the well you are abandoning—

(a) Penetrates a minable coal seam with remaining reserves, you must provide for safe mining later. When you abandon and plug a well, you must consult with BLM and any Federal or State agencies with authority over coal mine safety; or

(b) Is associated with mined-out or unminable coal seams, you must consult with any Federal or State agencies with authority over coal mine safety.

Venting for Safety

§ 3172.9 May I vent coalbed methane for safety reasons?

Yes. Nothing in this section prevents or inhibits a party who has the right to develop and mine coal from venting coalbed methane to ensure safe mine operations in accordance with any applicable Federal and State requirements.

Appeals

§ 3172.10 What if I have been adversely affected by a decision made by BLM under these regulations?

You may appeal that decision to the Interior Board of Land Appeals under the regulations in part 4 of this title.

Dated: July 17, 1995.

Sylvia V. Baca,

Acting Assistant Secretary of the Interior.

Notices

Federal Register
Vol. 60, No. 179
Friday, September 15, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Revised Arapaho and Roosevelt National Forest and Pawnee National Grassland Land and Resource Management Plan (Forest Plan) Arapaho and Roosevelt National Forest and Pawnee National Grassland; Boulder, Clear Creek, Gilpin, Grand, Jefferson, Larimer, Park, and Weld Counties, Colorado

AGENCY: Forest Service, USDA.

ACTION: Revised Notice; intent to prepare an environmental impact statement.

SUMMARY: The Forest Supervisor of the Arapaho and Roosevelt National Forest and the Pawnee National Grassland gives notice of the agency's intent to prepare an environmental impact statement on the revision of the Arapaho and Roosevelt National Forests and Pawnee National Grassland Land and Resource Management Plan (Forest Plan).

The original Notice of Intent to Prepare an Environmental Impact Statement for this Forest Plan Revision was published July 10, 1990. Due to the delay in publishing a Draft EIS, this Notice serves to revise the Notice of July 1990.

FOR FURTHER INFORMATION CONTACT: Howard Sargent, Forest Planner, (970) 498–1201, 240 West Prospect Road, Fort Collins, CO 80526.

SUPPLEMENTARY INFORMATION: A Forest Plan shall ordinarily be revised on a 10-year cycle or at least every 15 years. A plan may also be revised whenever the Forest Supervisor determines that conditions or demands in the area covered by the plan have changed significantly. The current Arapaho and Roosevelt National Forest Land and Resource Management Plan was approved on May 4, 1984. The Forest is scheduled to complete its revision of the Forest Plan and FEIS in Fall, 1996.

Through evaluation of the Forest Plan, documented in the "Five Year Evaluation: Forest Plan Monitoring and Evaluation Report" (1990) and further refined in 1993 in the "Analysis of the Management Situation," the Forest Supervisor of the Arapaho and Roosevelt National Forest and the Pawnee National Grassland has determined that the following topics should be the primary focus of the Forest Plan Revision:

1. Biological diversity including old growth;
2. National Forest-residential intermix areas;
3. Oil and gas leasing;
4. Recreation-related items such as recreation settings, scenic resources and wild and scenic rivers;
5. Roadless areas and additions to the Wilderness Preservation System;
6. Timber management, including suitable lands, allowable sale quantity, silvicultural practices;
7. Travel management; and
8. Water yield and management.

Public involvement in the Plan Revision process has been extensive since the original Notice of Intent was published, utilizing a variety of scoping techniques. These included mailings to individuals and organizations known to be interested in the Plan Revision, newspaper articles, newsletters, public meetings, and open houses. After release of the Draft Environmental Impact Statement, more open houses will be held and will be announced in local news media and in newsletters.

Revision of the Forest Plan began in 1990; the draft environmental impact statement and Proposed Revised Forest Plan should be available for public review in November, 1995. The final environmental impact statement, Record of Decision, and Revised Forest Plan are scheduled to be completed by Fall, 1996.

The comment period on the draft environmental impact statement will be a minimum of 90 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 U.S. 519, 553 1978*). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

The official responsible for approving the revised Forest Plan is the Regional Forester, Rocky Mountain Region, USDA Forest Service, 11177 West 8th Avenue, P.O. Box 25127, Lakewood, Colorado 80225. The Forest Supervisor, Arapaho and Roosevelt National Forests and Pawnee National Grassland, is delegated responsibility for preparing the revision.

Dated: August 29, 1995.

William P. Lisowsky,

Acting Forest Supervisor.

[FR Doc. 95–22938 Filed 9–14–95; 8:45 am]

BILLING CODE 3410–11–M

Oil and Gas Leasing Analysis; Los Padres National Forest, Los Angeles, Kern, Monterey, San Luis Obispo, Santa Barbara and Ventura Counties, California; Notice of Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service (FS) and the Bureau of Land Management (BLM) are conducting an analysis to identify lands within Los Padres National Forest that should or should not be made available for oil and gas leasing. The analysis will be documented in an environmental impact statement (EIS). The Forest Service is the Federal lead agency. The Bureau of Land Management is participating in the analysis as a cooperating agency.

The purpose of the EIS is to implement the authority and responsibility granted to the FS by the Federal Onshore Oil and Gas Leasing Reform Act of 1987 (P.L. 100–203) and to meet the regulatory requirements of 36 CFR 228 Subpart E. This Act gives the FS authority to approve or disapprove the leasing of National Forest System lands for development of oil and gas resources. The Act also authorizes the FS to identify appropriate stipulations to be applied to a lease to protect the surface resources. The BLM issues the leases and administers operations connected with the extraction of the mineral resources. The FS approves all surface disturbing activities and administers all surface operations.

The FS and BLM, Federal agencies with separate responsibilities for administration of oil and gas leasing on lands within Los Padres National Forest, propose the following specific actions:

(1) The Forest Supervisor will decide, within Los Padres National Forest, which National Forest System (NFS) lands and non-Federal lands with Federal mineral ownership (split-estate lands) are administratively available for oil and gas leasing and under what conditions. A significant part of the leasing decision is to determine stipulations to become part of any lands offered for lease. There are numerous possible varieties and combinations of these lease stipulations but each can be placed into one of the following categories: no lease; no surface occupancy; timing limitations; controlled surface use; and, lease with standard BLM lease terms.

(2) The Forest Supervisor will decide which specific NFS lands the BLM is authorized to offer for lease, subject to the FS ensuring that correct stipulations will be attached to leases issued by the BLM.

(3) The FS proposes to amend Los Padres National Forest Land and Resource Management Plan to incorporate the leasing decision in place of guidelines for oil and gas leasing contained in the Forest Plan.

(4) The BLM conducts public offerings to lease the specific lands authorized by the Forest Service.

The decisions made as a result of this analysis will not result in on-the-ground activities. Ground disturbing projects such as exploration, drilling or field development would require further environmental analysis and separate site specific decisions prior to approval.

Since the Forest Plan was completed prior to the passage of the Federal Onshore Oil and Gas Leasing Reform Act of 1987, the current Forest Plan did not determine the availability of NFS lands for oil and gas leasing. The Plan directs that later analyses and decisions to lease, or not lease, specific lands would be documented in an EIS.

The area involved in this leasing analysis includes all Federal lands within the boundary of Los Padres National Forest except for lands which have been legislatively withdrawn from mineral entry—wilderness, the Santa Ynez municipal watershed and the Big Sur coastal zone. The study area encompasses approximately 743,000 acres or 42 percent of the total area within the Forest boundary.

Possible oil and gas exploration and development that could result from leasing Federal lands within Los Padres National Forest could affect the lands and resources of the Forest in several ways. The FS and BLM have identified the following as tentative issues and resources to be addressed during the analysis process: wildlife and wildlife habitat; threatened, endangered and sensitive animals and plants; soils and water; riparian, wetlands and floodplains; and, visual and recreation resources. In addition, the possible effects of leasing on opportunities to explore for and develop oil and gas resources within the analysis area and possible effects on local communities and socioeconomic values will be analyzed.

The range of alternatives for this analysis is being developed. The following alternatives are proposed at this time. This list will be changed/supplemented as needed as a result of scoping.

(1) No leasing.
(2) Current Forest Plan direction.
(3) Emphasize biodiversity and watershed protection.
(4) Emphasize visual and recreational resources.
(5) Balanced resources emphasis.
(6) Emphasize oil and gas development.

Federal, State and local agencies, organizations, and individuals who may be interested in or affected by the decision will be invited to participate in the scoping process. Scoping will include mailings, media announcements, and public meetings. The scoping process will identify potential issues, identify those issues to be analyzed in depth, and eliminate insignificant issues. Scoping will also determine the extent of the analysis necessary for an informed decision including identification of alternatives.

The FS will hold public meetings at the following locations:

Frazier Park, CA—Saturday, Sept. 30, 1995, 10:00 A.M., Chuchupate Ranger Station, Lockwood Valley Road.

King City, CA—Monday, Oct. 2, 1995, 7:30 P.M., Orradre Building, Salinas Valley Fairgrounds, 625 Division Street.

Arroyo Grande, CA—Tuesday, Oct. 3, 1995, 7:30 P.M., South County Regional Center, 800 West Branch Street.

Goleta, CA—Wednesday, Oct. 4, 1995, 7:30 P.M., Goleta Community Center, 5679 Hollister Avenue.

Ventura, CA—Thursday, Oct. 5, 1995, 7:30 P.M., De Anza Middle School, 2060 Cameron.

David W. Dahl, Forest Supervisor, Los Padres National Forest, Goleta, California, is the responsible official.

Written comments and suggestions concerning the analysis should be sent to Los Padres National Forest, Att'n: Oil & Gas EIS, 6144 Calle Real, Goleta, CA 93117, by October 20, 1995.

The environmental analysis is expected to take about 18 months to complete. The draft environmental impact statement should be available for public review in August, 1996. The final environmental impact statement is scheduled to be completed by April, 1997.

The comment period on the draft environmental impact statement will be 60 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The FS believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC, 435 U.S. 519, 553 (1978).* Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir, 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 60-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningful consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Questions about the proposed action and environmental impact statement should be directed to Al Hess, Oil and Gas EIS Project Leader, Los Padres National Forest, phone (805) 681–2794.

Dated: September 6, 1995.

David W. Dahl,

Forest Supervisor.

BILLING CODE 3410–11–M

Taneum/Peaches Road Access, Wenatchee National Forest, Kittitas County, Washington

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent.

SUMMARY: On May 19, 1994, a Notice of Intent to prepare an environmental impact statement (EIS) for the Taneum/Peaches road access project was published in the **Federal Register** (59 FR 26201). This notice listed the date of the availability of the draft EIS as January 31, 1995, with the final EIS scheduled to be completed by May 1, 1995. The revised date of availability of the draft EIS is December 1995 and the final EIS is May 1996.

FOR FURTHER INFORMATION CONTACT: Questions concerning this revision should be directed to Douglas Campbell, Lands Specialist, Cle Elum Ranger District, 803 West Second, Cle Elum, Washington 98922; phone (509) 674–4411.

Dated: September 6, 1995.

Sonny J. O'Neal,

Forest Supervisor.

[FR Doc. 95–22970 Filed 9–14–95; 8:45 am]

BILLING CODE 3410–11–M

Delegation of Authority to Forest Supervisors, Intermountain Region

AGENCY: Forest Service, USDA.

ACTION: Notice of delegation of authority.

SUMMARY: The Intermountain Region of the Forest Service hereby gives notice of the delegation of authority by the Regional Forester to Forest Supervisors to perform certain transactions related to the granting and terminating of easements on National Forest System lands under authority of the Federal Land Policy and Management Act of October 21, 1976, and the National Forest Roads and Trails Act of October 13, 1964.

EFFECTIVE DATE: October 16, 1995.

FOR FURTHER INFORMATION CONTACT: Randall Karstaedt, Special Uses Officer, Intermountain Region, 324 25th Street, Ogden, UT 84401, (801) 625–5150.

SUPPLEMENTARY INFORMATION: Pursuant to 36 CFR 251.52 and the delegation of authority from the Chief of the Forest Service set forth in Forest Service Manual section 2732.04c and section 2733.04b, the Regional Forester of the Intermountain Region has delegated the authority to all Intermountain Region Forest Supervisors to 1) issue easements under authority of the Forest Road and Trail Act (FRTA) of October 12, 1964 (Pub. L. 88–657, 78 Stat. 1089, as amended) and to terminate such easements with the consent of the grantee, and 2) issue easements and reservations under authority of the Federal Land Policy and Management Act (FLPMA) of October 21, 1976 (Pub. L. 94–579, 90 Stat. 2743, as amended) and to terminate such easements with the consent of the grantee or on the occurrence of a fixed or agreed upon condition, event, or time when the easement, by its terms, provides for such termination.

This delegation has been issued as a Regional Supplement to Forest Service Manual Chapter 2730, Road and Trail Rights-of-Way Grants, and Chapter 2704, Responsibility.

Jack A. Blackwell,

Deputy Regional Forester, Resources, Intermountain Region.

[FR Doc. 95–22937 Filed 9–14–95; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews.

SUMMARY: The Department of Commerce (the Department) has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings with August anniversary dates. In accordance with the Department's regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: September 15, 1995.

FOR FURTHER INFORMATION CONTACT: Holly A. Kuga, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 482–4737.

SUPPLEMENTARY INFORMATION:

Background

The Department has received timely requests, in accordance with 19 CFR 353.22(a) and 355.22(a) (1994), for administrative reviews of various antidumping and countervailing duty orders and findings with August anniversary dates.

Initiation of Reviews

In accordance with sections 19 CFR 353.22(c) and 355.22(c), we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. The Department is not initiating an administrative review of any exporters and/or producers who were not named in a review request because such exporters and/or producers were not specified as required under section 353.22(a) (19 CFR 353.22(a)). We intend to issue the final results of these reviews not later than August 31, 1996.

[1] The period of review shown in the August 16, 1995 (60 FR 42500) initiation notice covering sebacic acid from the PRC should have read as stated above.

[2] The Department has determined that it is not practicable to conduct company-specific reviews of the order on Live Swine from Canada because a large number of exporters and producers requested the review. Therefore, pursuant to section 777A(e)(2)(B) of the Tariff Act of 1930, as amended, the Department will conduct a country-wide review on the basis of aggregate data. We note the investigation and all prior reviews of this order have been conducted on an aggregate basis and that the companies requesting review, except for Pryme Pork Ltd., and the Government of Canada requested a review on a country-wide basis.

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 353.34(b) and 355.34(b).

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)), and 19 CFR 353.22(c)(1) and 355.22(c)(1).

Dated: September 13, 1995.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Notice of Intent To Adjust the Boundary of the South Slough National Estuarine Research Reserve

AGENCY: Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Public notice.

SUMMARY: Notice is hereby given that the Division of State Lands, of the State of Oregon, intends to make minor adjustments to the boundary of the South Slough National Estuarine Research (SSNERR) in Coos Bay, Oregon. The need for the boundary adjustments stems from the July, 1991 discovery that a landowner adjacent to the SSNERR had encroached on approximately three and one half acres owned by the Reserve. The landowner has agreed to transfer to SSNERR property adjacent to the Reserve. In exchange, the SSNERR will grant to the landowner the encroached-upon land. In addition, The Division of State Lands is also granting tidelands to the SSNERR to ensure that there is no net loss of property within the SSNERR, either in terms of market or ecological value of lands. These actions were designed to resolve the encroachment issue in a manner that will protect the natural integrity of the Reserve, while enabling the landowner to retain access to, and use of, the roads, structures, and utilities he developed on Reserve property.

The delineation of the property that will be removed from the boundary of the SSNERR and granted to the encroaching land owner is identified as follows:

Beginning at a ¾″ iron pipe which marks the center ¼ corner of Section 13, Township 26 South, Range 14 West of the Willamette Meridian, Coos County, Oregon:

Thence South 69°53′22″ East for a distance of 85.23 feet;
Thence South 02°25′33″ East for a distance of 498.92 feet;
Thence South 88°03′51″ East for a distance of 299.89 feet;
Thence North 24°46′16″ East for a distance of 351.55 feet;
Thence West for a distance of 360.17 feet;
Thence North for a distance of 218.7 feet to the North line of the Southeast ¼ of said Section 13;
Thence West along said North line for a distance of 188.0 feet back to the point of beginning. Said parcel containing 3.3 acres more or less.

The delineation of the tidelands proposed to be added to the SSNERR by the Division of State Lands is as follows:

All submerged lands in the South Slough arm of Coos Bay, Township 26 South, Range 14, West 14, Willamette Meridan, more particularly described as follows:

Beginning at a point which is the intersection of Township 26 South, Range 14 West, Sections 14, 15, and 23; thence East 1,283 feet to a point; thence North 2°, 36′ East, 1279.60 feet to the Southwest one-sixteen point on Section 14; thence East 1,313.36 feet to a meander corner of the mean high tide line of the South Slough arms of Coos Bay; thence South 73°34′48″ West 1,808.62 feet to the True Point of Beginning.

Thence South 73°34′48″ West, 250 feet more or less, thence North 16°25′12″ West, 696.96 feet more or less, thence North 73°34′48″ East 250 feet more or less; thence South 16°25′12″ East; 696.96 feet more or less to the True Point of Beginning, containing 4.0 acres more or less.

The delineation of the property added by the landowner who encroached into SSNERR in the upland portion of the SSNERR is as follows:

Beginning at ¾″ iron pipe which marks the center ¼ corner of Section 13, Township 26 South, Range 14 West of the Willamette Meridian, Coos County, Oregon:

Thence East along the North line of the Southeast ¼ of said Section 13 for a distance of 649.09 feet to the True Point of Beginning;
Thence continuing East along said North line for a distance of 60.66 feet;
Thence South for a distance of 218.7 feet;
Thence West for a distance of 161.58;
Thence North 24°46′16″ East for a distance of 240.86 feet back to the True Point of Beginning.

Any person wishing to comment on the proposed boundary change may forward written statements to the Oregon Division of State Lands, South Slough National Estuarine Research, P.O. Box 5417, Charleston, OR. 97420. Comments must be received by the Division of State Lands no later than close of business (30) thirty days from the date of this notice.

FOR FURTHER INFORMATION CONTACT: Nina Garfield, NOAA/NOS/OCRM/SRD, 1305 East-West Highway, SSMC4 12th Floor, Silver Spring, MD. 20910; Phone: (301) 713–3141, ext. 171.

Dated: September 8, 1995.

David L. Evans,

Acting Deputy Assistant Administrator for Ocean Services and Coastal Zone Management.

(Federal Domestic Assistance Catalog Number 11.420 (Coastal Zone Management) Estuarine Sanctuaries)

BILLING CODE 3510-08-M

Patent and Trademark Office

[Docket No. 950829221–5221–01]

RIN 0651–XX03

Request for Comments Concerning the Right of Priority (35 U.S.C. 119) and Electronic Exchange of Priority Documents

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice; Request for Comments.

SUMMARY: The Patent and Trademark Office (PTO) requests written public comment on various aspects of existing statutory and regulatory requirements for obtaining the right of priority of an earlier filed foreign application. The PTO also requests written public comment on issues associated with the electronic exchange of priority documents between the PTO, the European Patent Office (EPO), and the Japanese Patent Office (JPO).

DATES: Written comments on the topics presented in the supplementary section of this notice, or any related topics, will be accepted by the PTO until November 13, 1995.

ADDRESSES: Those interested in presenting written comments on the topics presented in the supplementary information, or any related topics, may mail their comments to the Assistant Commissioner for Patents, Washington, D.C. 20231, marked to the attention of Box DAC. In addition, comments may also be sent by facsimile transmission to (703) 308–6916, with a confirmation copy mailed to the above address, or by electronic mail messages over the Internet to priority@uspto.gov.

FOR FURTHER INFORMATION CONTACT: Jeffrey V. Nase by telephone at (703) 305–9285, or by mail marked to the attention of Box DAC, addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION:

I. Issues for Public Comment

The PTO is inviting written public comments on the administration and relevance of the existing statutory and regulatory requirements for obtaining the right of priority of an earlier filed foreign application and/or issues associated with the electronic exchange of priority documents between the Trilateral Offices (PTO, EPO, and JPO). Questions included at the end of this section are intended to illustrate the types of issues upon which the PTO is particularly interested in obtaining public comment. This notice has been determined to be not significant for the purposes of Executive Order 12866.

A. The Requirement for a Certified Copy of the Foreign Application Unless Deemed Necessary

Currently, the Trilateral Offices are reconsidering the need that a certified copy of the foreign application be submitted in all cases. 35 U.S.C. 119 requires that a certified copy of a foreign application be submitted in all cases in order to obtain the right of priority. Specifically, 35 U.S.C. 119(b) requires that the applicant file a claim for the right of priority and a certified copy of the original foreign application before the grant of the patent, or at any time during the pendency of the application as required by the Commissioner, but not earlier than six months after the filing of the application in this country. The Commissioner may currently require a translation of the papers filed if not in the English language.

37 CFR 1.55, which implements 35 U.S.C. 119(b), requires that the claim for priority and the certified copy of the foreign application must be filed in all cases before the grant of the patent in order to be entitled to the right of priority, and requires a claim for priority or certified copy of the foreign application filed after payment of the issue fee to be accompanied by a petition (and fee under 37 CFR 1.17(i)) requesting entry. However, the certified copy of the foreign application may be required earlier during the pendency of the application in the case of an interference, when necessary to overcome the date of a reference relied upon by the examiner, or when specifically required by the examiner. If the certified copy of the foreign application is not in the English language, a translation will not be required except in the case of an interference, when necessary to overcome the date of a reference relied upon by the examiner, or when specifically required by the examiner.

Consequently, by statute and regulation, the certified copy of the foreign application must be filed in all cases during the pendency of the application even though it may be unnecessary to the examination of the application. Unless a substantive review of the certified copy of the foreign application, or a translation of such, is necessary to the examination of the application, *e.g.*, during an interference or when necessary to overcome an intervening reference, the claim to priority and the certified copy of the foreign application are merely reviewed to determine whether the certified copy of the foreign application corresponds in number, date, and country to the application identified in the oath or declaration and that there are no obvious formal defects. There is generally no examination of the certified copy of the foreign application to determine whether the applicant is entitled to the benefit of the foreign filing date on the basis of the disclosure of the document. Thus, an unnecessary burden is placed upon applicants to obtain certified copies of the priority documents from the appropriate office and then submit them to the PTO in instances in which the PTO does not substantively examine such documents, especially in view of the fact that such documents do not qualify as prior art in the United States. Further, an unnecessary burden is placed upon the PTO in the processing of such documents.

This right of priority originated in a multilateral treaty of 1883, *i.e.*, the Paris Convention for the Protection of Industrial Property (Paris Convention), to which the United States adhered in 1887. The Paris Convention, however, merely requires that a person who wishes to take advantage of a previous filing make a declaration indicating the date of such filing and the country in which it was filed. The Paris Convention permits, but does not require, the countries of the Union to require a certified copy of the foreign application of the application as previously filed. Under the Paris Convention, the countries may also require that a translation accompany the certified copy of the foreign application. See Questions #1, 2, and 3.

B. Electronic Exchange of Priority Documents

The PTO also requests written public comment on issues associated with the electronic exchange of priority documents between the PTO, EPO, and JPO. Currently, the Trilateral Offices are considering the implementation of procedures that would allow for the direct exchange of priority documents in electronic form between the office of first filing and the offices of subsequent filings. See Question #4. The PTO is interested in how the public views such electronic exchanges of priority documents, including the evidentiary effect of an electronic document constituting the official PTO record of the priority document. See Questions #5 and 6.

It is anticipated that it will be some time before the PTO will have an electronic data base containing the content of applications-as-filed in a word-recognizable format, *e.g.*, applications captured by optical character recognition (OCR). As such, any electronic exchange, at least initially, would be in the form of digital images of the applications-as-filed.

It is contemplated that under a system authorizing the exchange of priority documents, an applicant would have to request that an office forward the priority document directly to another office in electronic form, rather than having the certified copy go to the applicant, who in turn would forward it to the other office. The PTO is also considering providing a return receipt to indicate to the applicant that the request to forward the priority document was received by the PTO and that the PTO has forwarded the priority document to the office(s) designated by the applicant.

The cost to the PTO of processing requests and forwarding priority documents to the designated office(s), and of generating and mailing return receipts, would be recovered through service fees. See Questions #7 and 8. Nevertheless, such a direct exchange of priority documents for a service fee should result in an overall reduction in costs and administrative work for applicants, as well as cost reductions in the conversion from paper to electronic form.

II. Questions

1. (a) Does the requirement that a certified copy of the foreign application be submitted in all cases before the grant of a patent in order to be entitled to the right of priority serve any useful purpose? If yes, please provide those useful purposes.

(b) Is your answer affected by the fact that such documents may qualify as novelty defeating prior art in other countries?

2. (a) Notwithstanding the existing requirements, when should an applicant be required to submit a certified copy of the foreign application?

(b) Would you continue to submit a certified copy of the foreign application even if not specifically required?

(c) Should any action taken by the U.S. Government be contingent on action in the other Trilateral countries?

3. When the foreign application is not in the English language and an English translation is deemed necessary, should both a certified copy of the foreign application and an English language translation accompanied by a verified statement that the translation is an accurate translation of the certified copy of the foreign application be required, or should only an English language translation of the foreign application accompanied by a verified statement that the translation is accurate be required?

4. What significant problems, either legal or technical, would need to be solved to permit the offices of subsequent filing to receive the priority documents directly from the office of first filing rather than from the applicant?

5. Should the PTO, EPO, and JPO electronically exchange priority documents at the request of applicant? Would most applicants take advantage of this service? What disadvantages, if any, are there in the electronic transmission of priority documents among the PTO, EPO, and JPO?

6. Will the filing of a priority document in electronic form by the office of first filing, rather than in paper form by the applicant, affect the legal admissibility of the priority document?

7. If there was a service fee for the direct exchange of priority documents among the PTO, EPO, and JPO, which was higher than the current fee charged for a certified copy of the application, would most applicants still take advantage of this service? At what fee amount would most applicants choose to request the direct exchange of priority documents?

8. If providing a return receipt resulted in an increase in the service fee for the direct exchange of priority documents among the PTO, EPO, and JPO, would a return receipt be desirable? Against the background that increasing the information provided on such a return receipt would increase the cost of generating such return receipt, and thus increase the service fee, what information should be included on the return receipt?

Dated: September 8, 1995.

Bruce A. Lehman,

Assistant Secretary of Commerce and Commissioner of Patents and Trademarks.

BILLING CODE 3510–16–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to the Procurement List.

SUMMARY: This action adds to the Procurement List a distress marker light to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 16, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On June 2, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 F.R. 28781) of proposed addition to the Procurement List. Comments were received from two producers of the distress marker light, one of which is a current contractor with the Government for the light. The contractor stated that the light is a large percentage of its sales, and that losing these sales would have a severe impact on the company and its employees. The contractor claimed that addition of this light to the Procurement List would unreasonably foreclose the contractor from the Government market for strobe marker distress lights, as the Committee has already added the other version the Government buys to the Procurement List. The contractor asked that the Committee not add the light to the Procurement List at least until the current commercial procurement is completed, to allow the contractor to develop a commercial item which would replace the loss of Government sales of the light.

The figures the contractor initially provided to show how the addition would deprive it of a large part of its sales made the assumption that the contractor would receive the contract for the entire requirement for which the Government currently has a solicitation outstanding if the Committee were not to add the light to the Procurement List. The Committee does not consider this assumption to be realistic, because the contractor received less than half of the Government requirements under the most recent procurements, and the contractor has not received a substantial contract for this light since 1992, so it should not be unusually dependent on Government sales of the light.

The contractor subsequently provided other sales information, which indicated that, while the contractor's total sales are considerably less than the forecast the Committee used to estimate impact, the percentage represented by sales of the light to the Government is small enough that its loss is unlikely to have a severe adverse impact on the contractor. Additionally, the contracting activity which buys the light for the Government has indicated that it will complete its current buy before the addition of the light to the Procurement List becomes legally effective. Consequently, the contractor will receive the opportunity it seeks to sell the light to the Government long enough to develop its commercial item.

The other strobe marker distress light was added to the Procurement List in 1973. The commenting contractor was not the contractor for that light at the time; it did not even exist at the time. Consequently, it did not lose sales as a result of the Committee's action.

The other producer of the light is a new company which claimed that it was in line for a contract award for the light earlier this year when the contracting activity cancelled the solicitation, on the basis that the light had been added to the Procurement List, before the producer could obtain a certificate of competency from the Small Business Administration to qualify for the contract award. The producer also objected to the loss of the opportunity to recoup its investment in producing the light.

While the basis for the cancellation of the solicitation was erroneous, as the light was not then on the Procurement List, the contracting activity has informed the Committee that it has subsequently rescinded the cancellation. The contracting activity also informed the Committee that it found the producer nonresponsible, and the producer failed to apply for its certificate of competency within the required period, so it is not eligible for a contract award. These events occurred before the solicitation was erroneously cancelled. Accordingly, the producer's loss of the contract cannot be attributed to the Committee's action in adding the light to the Procurement List.

Similarly, the producer's loss of the opportunity to recoup its investment was caused by its failure to take an action needed to receive a contract award, not by the Committee's action. While the producer will lose further opportunities to recoup its investment once the light is on the Procurement List, it should be noted that it would risk losing these opportunities even if the light had not been added to the Procurement List because no one is guaranteed a contract under the competitive bidding system.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Light, Marker, Distress
6230–01–143–4778

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

Executive Director.

[FR Doc. 95–22975 Filed 9–14–95; 8:45 am]

BILLING CODE 6820–33–P

Procurement List; Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to the procurement list.

SUMMARY: This action adds to the Procurement List an animal trap to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 16, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On July 14, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 FR 36266) of proposed addition to the Procurement List.

Comments were received from the current contractor in response to a Committee request for information. The contractor claimed a common-law patent right in the distinctive features of its trap and threatened to sue anyone who manufactures its trap without its permission.

It is the Committee's understanding that the patent laws of the United States do not recognize a common-law patent right. See 35 U.S.C. 102. The features the contractor claimed—a spring loaded door and wire trap walls—appear in similar traps made by at least two other commercial trap manufacturers. The nonprofit agency which will produce the trap based its design on a Government item description and examination of a trap which was not made by the contractor. Consequently, the Committee believes that the contractor's objections are without foundation, and will not impede the nonprofit agency in furnishing the trap to the Government.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Trap, Animal
3740–00–531–3905

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820–33–P

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the procurement list.

SUMMARY: This action adds to the Procurement List commodities, military resale commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 16, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On July 21 and 28, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (60 F.R. 37631 and 38794) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodities, military resale commodity and services, fair market price, and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities, military resale commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities, military resale commodity and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities, military resale commodity and services.

3. The action will result in authorizing small entities to furnish the commodities, military resale commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities, military resale commodity and services proposed for addition to the Procurement List.

Accordingly, the following commodities, military resale commodity and services are hereby added to the Procurement List:

Commodities

Compound, Cleaning and Degreasing

BILLING CODE 6820–33–P

Procurement List Proposed Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed addition to procurement list.

SUMMARY: The Committee has received a proposal to add to the Procurement List a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 16, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the service to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the service.

3. The action will result in authorizing small entities to furnish the service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following service has been proposed for addition to the Procurement List for production by the nonprofit agency listed: Administrative Services, Naval Air Warfare Center Training Systems Division, 12350 Research Parkway, Orlando, Florida.

NPA: Goodwill Industries of Central Florida Orlando, Florida

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820–33–P

Procurement List; Addition

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Addition to the procurement list.

SUMMARY: This action adds to the Procurement List a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 16, 1995.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On June 30, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 F.R. 34235) of proposed addition to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the service, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the service to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the service.

3. The action will result in authorizing small entities to furnish the service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the service proposed for addition to the Procurement List.

Accordingly, the following service is hereby added to the Procurement List:
Food Service, U.S. Coast Guard Support Center, Alameda, California

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820–33–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Meeting of the DOD Advisory Group on Electron Devices

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: Working Group C (Electro-Optics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 0900, Wednesday, 27 September 1995.

ADDRESS: The meeting will be held at Palisades Institute for Research Services, Inc., 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia

FOR FURTHER INFORMATION CONTACT: Elise Rabin, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director of Defense Research and Engineering (DDR&E), and through the DDR&E to the Director, Advanced Research Projects Agency and the Military Departments in planning and managing an effective and economical research and development program in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This opto-electronic device area includes such programs as imaging device, infrared detectors and lasers. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. II§ 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. § 552(c)(1)(1988), and that accordingly, this meeting will be closed to the public.

Dated: September 12, 1995.

Patricia L. Toppings,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 95–22979 Filed 9–14–95; 8:45 am]

Meeting of the DOD Advisory Group on Electron Devices

AGENCY: Department of Defense.

ACTION: Notice.

SUMMARY: Working Group B (Microelectronics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Thursday, 19 October 1995.

ADDRESS: The meeting will be held at Palisades Institute for Research Services, 1745 Jefferson Davis Highway, Suite 500, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Warner Kramer, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, Suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director Defense Research and Engineering (DDR&E), and through the DDR&E, to the Director Advanced Research Projects Agency and the Military Departments in planning and managing an effective research and development program in the field of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the military proposes to initiate with industry, universities or in their laboratories. The microelectronics area includes such programs on semiconductor materials, integrated circuits, charge coupled devices and memories. The review will include classified program details throughout.

In accordance with Section 10(d) of Pub. L. 92–463, as amended, (5 U.S.C. App. II § 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. § 552b(c)(1)(1988), and that accordingly, this meeting will be closed to the public.

Dated: September 12, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000-04-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Notice of Availability of Record of Decision for Direct Service Industrial Customer General (Integration of Resources) Transmission Agreement 15-Year Extension

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of Availability of Record of Decision (ROD).

SUMMARY: This notice announces the availability of the ROD to extend the length of the Direct Service Industrial Customer General (Integration of Resources (IR)) Transmission Agreement an additional 15 years. The Business Plan Environmental Impact Statement (BP EIS) (DOE/EIS–0183) of June 1995 supports this decision and was previously provided.

In response to a need for sound policy to guide its business direction under changing market conditions, BPA explored six alternative plans of action in its BP EIS. In the subsequent BP EIS Record of Decision (August 15, 1995), the BPA Administrator selected the Market-Driven alternative as the best course of action. The EIS and ROD were also intended to guide BPA in a series of related decisions on specific issues and actions. The subject of this ROD is one of those actions.

Consistent with the Business Plan, the BP EIS, and the BP EIS ROD, BPA is offering to extend the Direct Service Industries' (DSIs) existing 5-year General Transmission Agreement (IR Agreement) for an additional 15 years. BPA has decided to make this offer in order to continue to provide open and equitable access to the DSIs, allow the DSIs to diversify their power supply to reduce risk, and because BPA recognizes that the DSIs likely have the ability to access the wholesale power market indirectly through their local utilities.

This decision, as well as others to follow, are tiered to the BP EIS ROD. The specific information on the IR Agreement extension and a summary of the environmental impacts associated with selecting this particular alternative are available upon request.

ADDRESSES: Copies of the ROD and BP EIS may be obtained by calling BPA's toll-free document request line: 1–800–622–4520.

FOR FURTHER INFORMATION, CONTACT: Allan F. Paschke—MPC, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208–3621, phone number 503–230–5850, fax number 503–230–7568.

PUBLIC AVAILABILITY: This ROD will be distributed to all interested and affected persons and agencies.

Issued in Portland, Oregon, on August 31, 1995.

Walter E. Pollock,

Acting Administrator.

[FR Doc. 95–22953 Filed 9–14–95; 8:45 am]

BILLING CODE 6450-01-P

Federal Energy Regulatory Commission

[Docket No. ER94–1099–005, et al.]

Eclipse Energy, Inc., et al.; Electric Rate and Corporate Regulation Filings

September 8, 1995.

Take notice that the following filings have been made with the Commission:

1. Eclipse Energy, Inc.

[Docket No. ER94–1099–005]

Take notice that on August 28, 1995, Eclipse Energy, Inc. tendered for filing certain information as required by the Commission's letter order dated June 15, 1994. Copies of the informational filing are on file with the Commission and are available for public inspection.

2. Gulfstream Energy, LLC.

[Docket No. ER94–1597–003]

Take notice that on August 17, 1995, Gulfstream Energy, LLC (Gulfstream) filed certain information as required by the Commission's November 21, 1994 letter order in Docket No. ER94–1597–000. Copies of Gulfstream's informational filing are on file with the Commission and are available for public inspection.

3. Williams Energy Services Company

[Docket No. ER95–305–002]

Take notice that on August 23, 1995, Williams Energy Services Company (Williams Energy) filed certain information as required by the Commission's March 10, 1995 letter order in Docket No. ER95–305–000. Copies of Williams Energy's informational filing are on file with the Commission and are available for public inspection.

4. SouthEastern Energy Resources, Inc.

[Docket No. ER95–385–002]

Take notice that on August 21, 1995, SouthEastern Energy Resources, Inc. tendered for filing certain information as required by the Commission's letter order dated March 7, 1995. Copies of the informational filing are on file with the Commission and are available for public inspection.

5. K N Marketing, Inc.

[Docket No. ER95–869–001]

Take notice that on August 1, 1995, K N Marketing, Inc. tendered for filing certain information as required by the Commission's letter order dated May 26, 1995 in Docket No. ER95–869–000. Copies of K N Marketing, Inc.'s informational filing are on file with the Commission and are available for public inspection.

6. Public Service Company of Oklahoma Southwestern Electric Power Company and West Texas Utilities Company

[Docket No. ER95–1076–001]

Take notice that on August 23, 1995, West Texas Utilities Company (WTU) tendered for filing a tariff sheet which was inadvertently omitted from its July 14, 1995 amended filing concerning its Coordination Sales Tariff (CST–1). The missing sheet contained no changes in tariff language.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. Indiana Michigan Power Company

[Docket No. ER95–1590–000]

Take notice that on August 17, 1995, American Electric Power Service Corporation tendered for filing on behalf of the Indiana Michigan Power Company (Indiana Michigan) a proposed Addendum to Service Schedule D (AEP System Delivery of Third Party Purchases) to the Interconnection Agreement between Indiana Michigan and Commonwealth Edison Company (CE) dated August 1, 1991 (Indiana Michigan FERC Rate Schedule No. 78).

The Addendum is in the form of an agreement between Indiana Michigan and CE settling a complaint filed by CE in Docket No. EL95–4–000 on November 2, 1994. The parties to the agreement request an effective date of August 17, 1995.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. Pennsylvania Electric Company

[Docket No. ER95–1622–000]

Take notice that on August 24, 1995, Pennsylvania Electric Company tendered for filing Supplement No. 9 (Revised July 21, 1995) Exhibit A—Delivery Points to Pennsylvania Electric Company (Penelec) FERC Rate Schedule FERC No. 90.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. Wickland Power Services

[Docket No. ER95–1623–000]

Take notice that on August 24, 1995, Wickland Power Services tendered for filing a letter requesting to become a member of the Western Systems Power Pool.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

10. Central Hudson Gas and Electric Corporation

[Docket No. ER95–1627–000]

Take notice that on August 25, 1995, Central Hudson Gas and Electric Corporation (CHG&E), tendered for filing pursuant to § 35.12 of the Federal Energy Regulatory Commission's (Commission) Regulations in 18 CFR, a Service Agreement between CHG&E and National Gas & Electric L.P. The terms and conditions of service under this Agreement are made pursuant to CHG&E's FERC Electric Rate Schedule, Original Volume 1 (Power Sales Tariff) accepted by the Commission in Docket No. ER94–1662. CHG&E also has requested waiver of the 60-day notice provision pursuant to 18 CFR 35.11.

A copy of this filing has been served on the Public Service Commission of the State of New York.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

11. Central Hudson Gas and Electric Corporation

[Docket No. ER95–1628–000]

Take notice that on August 25, 1995, Central Hudson Gas and Electric Corporation (CHG&E), tendered for filing pursuant to § 35.12 of the Federal Energy Regulatory Commission's (Commission) Regulations in 18 CFR, a Service Agreement between CHG&E and Rainbow Energy Marketing. The terms and conditions of service under this Agreement are made pursuant to CHG&E's FERC Electric Rate Schedule, Original Volume 1 (Power Sales Tariff) accepted by the Commission in Docket No. ER94–1662. CHG&E also has requested waiver of the 60-day notice provision pursuant to 18 CFR 35.11.

A copy of this filing has been served on the Public Service Commission of the State of New York.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

12. Central Illinois Light Company

[Docket No. ER95–1629–000]

Take notice that on August 25, 1995, Central Illinois Light Company (CILCO), 300 Liberty Street, Peoria, Illinois 61202, and Central Illinois Public Service Company, tendered for filing with the Commission an Index of Customers and four signed Service Agreements under the Coordination Sales Tariff approved on April 25, 1995.

Copies of the filing were served on the applicable customers and the Illinois Commerce Commission.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

13. Southern Indiana Gas and Electric Company

[Docket No. ER95–1636–000]

Take notice that on August 28, 1995, Southern Indiana Gas and Electric Company (SIGECO), tendered for filing to a proposed Interchange Agreement with Intercoast Power Marketing Co. (IPM).

The proposed revised Interchange Agreement will provide for the purchase, sales, and transmission of capacity and energy by either party under the following Service Schedules: (a) SIGECO Power Sales, (b) IPM Power Sales, and (c) Transmission Service.

Waiver of the Commission's Notice Requirements is requested to allow for an effective date of August 25, 1995.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

14. Southern Indiana Gas and Electric Company

[Docket No. ER95–1637–000]

Take notice that on August 28, 1995, Southern Indiana Gas and Electric Company (SIGECO), tendered for filing to a proposed Interchange Agreement with Heartland Energy Services Inc. (Heartland).

The proposed revised Interchange Agreement will provide for the purchase, sale, and transmission of capacity and energy by either party under the following Service Schedules: (a) SIGECO Power Sales, (b) Heartland Power Sales, and (c) Transmission Service.

Waiver of the Commission's Notice Requirements is requested to allow for an effective date of August 25, 1995.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

15. PacifiCorp

[Docket No. ER95–1661–000]

Take notice that on August 31, 1995, PacifiCorp, tendered for filing in accordance with 18 CFR Part 35 of the Commission's Rules and Regulations, a Power Sales Agreement dated June 21, 1995 (Agreement) between PacifiCorp and Cheyenne Light, Fuel and Power Company (Cheyenne).

PacifiCorp requests that a waiver of prior notice be granted and that an effective date of January 1, 1997 be assigned to the agreement.

Copies of this filing were supplied to Cheyenne, the Public Utility Commission of Oregon and the Washington Utilities and Transportation Commission.

A copy of this filing may be obtained from PacifiCorp's Regulatory Administration Department's Bulletin Board System through a personal computer by calling (503) 464–6122 (9600 baud, 8 bits, no parity, 1 stop bit).

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

16. New York State Electric & Gas Corporation

[Docket No. ER95–1678–000]

Take notice that New York State Electric & Gas Corporation (NYSEG) on

August 31, 1995, tendered for filing an amendment to the following rate schedules (the "Rate Schedules"):

104—GPU Service Corporation
119—Consolidated Edison Company of New York, Inc.
120—Niagara Mohawk Power Corporation
122—Baltimore Gas & Electric Company
123—Allegheny Electric Cooperative, Inc.
124—Enron Power Marketing, Inc.
128—Catex Vitol Electric, Inc.
129—LG&E Power Marketing, Inc.
130—AES Power, Inc.
132—InterCoast Power Marketing Company
133—Louis Dreyfus Electric Power, Inc.
134—Citizens Power and Light Corporation
135—Vermont Public Power Supply Authority
136—Green Mountain Power Corporation
137—Electric Clearinghouse, Inc.
138—Burlington Electric Department
139—Atlantic Electric Company
140—Heartland Energy Service, Inc.
141—Rainbow Energy Marketing Corporation
142—CNG Power Services Corporation
143—Engelhard Power Marketing, Inc.
144—Central Hudson Gas & Electric Corporation
[1]—Rochester Gas and Electric Corporation

The amendment modifies the rate ceiling applicable to buy-sell transactions to allow NYSEG to charge mutually agreeable rates up to a ceiling rate that includes a transmission component based on NYSEG's embedded cost of transmission. The Rate Schedules allow NYSEG and the customers to enter into mutually agreeable capacity and/or energy transactions ("Transactions). The Amendment will not apply to any Transactions that commenced on or before August 31, 1995. The Amendment will not change the requirement that NYSEG and the Purchaser reach mutual agreement as to the rates and terms of each Transaction in advance of each Transaction.

NYSEG requests that the agreement become effective on September 1, 1995. NYSEG has requested waiver of the notice requirements for good cause shown.

NYSEG served copies of the filing upon the New York State Public Service Commission and each customer listed above.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

17. North Atlantic Energy Corporation

[Docket No. ER95–1679–000]

Pursuant to Section 205 of the Federal Power Act, North Atlantic Energy Corporation (North Atlantic) filed on August 31, 1995, proposed changes to charges for decommissioning Seabrook Unit 1 to be collected under North Atlantic Federal Energy Regulatory Commission Rate Schedule Nos. 1 and 3. These charges are recovered under a formula rate that is not changed by the filing. The proposed adjustment in charges is necessitated by a ruling of the New Hampshire Nuclear Decommissioning Finance Committee adjusting the funding requirements for decommissioning Seabrook Unit 1.

North Atlantic has requested an effective date of November 1, 1995 for the adjusted charges.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

18. Washington Water Power Company

[Docket No. ER95–1681–000]

Take notice that on September 1, 1995, the Washington Water Power Company (WWP) tendered for filing with the Federal Energy Regulatory Commission a Notice of Termination concerning Rate Schedule FERC N. 168 and Supplement No. 1 to Rate Schedule 168, a replacement energy sales agreement between WWP and the City of Seattle which was expired by its own terms effective June 30, 1995.

WWP requests that the requirement for 60 days notice between filing date and termination date be waived. If the 60 days notice is waived, there will be no effect upon purchases under other rate schedules.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

19. Idaho Power Company

[Docket No. ER95–1682–000]

Take notice that on September 1, 1995, Idaho Power Company (IPC) tendered for filing with the Federal Energy Regulatory Commission its draft Second Amendment to the Power Sales Agreement Between Idaho Power Company and the Cities of Azusa, Banning and Colton, California.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

20. Delmarva Power & Light Company

[Docket No. ER95–1684–000]

Take notice that on September 1, 1995, Delmarva Power & Light Company (Delmarva) tendered for filing an agreement between Delmarva and the Delaware Municipal Electric Corporation (DEMEC) under which Delmarva offers to sell up to 20 MW to DEMEC each month that the Agreement is effective. DEMEC has the right to purchase all, some or none of the 20 MW subject to the condition that each kilowatt which DEMEC does determine to purchase shall be purchased under a 100% load factor basis. In addition, charges under the Agreement have an upper and a lower bound. The Agreement provides that the price shall not be less than Delmarva's forecasted system incremental cost to supply and shall not exceed 3.698 cents per kilowatt hour, which is derived from the Settlement in Docket Nos. ER93–96–000 and EL93–11–000, which was approved by the Commission on December 7, 1994.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

21. Vastar Power Marketing, Inc.

[Docket No. ER95–1685–000]

Take notice that on September 1, 1995, Vastar Power Marketing, Inc. (Vastar) tendered for filing an application for waivers and blanket approvals under various regulations of the Commission, and an order accepting its Rate Schedule No. 1. Vastar intends to engage in electric power and energy transactions as a marketer and a broker.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

22. Otter Tail Power Company

[Docket No. ER95–1687–000]

Take notice that on September 5, 1995, Otter Tail Power Company (OTP) tendered for filing a Coordination Sales Tariff. The Tariff provides for the sales of Negotiated Capacity and/or Energy and General Purpose Energy. OTP states that sales under the Tariff will be made at negotiated prices no lower than system incremental energy costs and no higher than the Company's fully allocated cost of capacity plus 100% of incremental energy costs. OTP states service will be provided under the Tariff only to customers who sign Service Agreements.

OTP states that copies of this filing have been served on the Minnesota Public Utilities Commission, the North Dakota Public Service Commission and the South Dakota Public Service Commission.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

23. Illinois Power Company

[Docket No. ER95–1688–000]

Take notice that on September 5, 1995, Illinois Power Company (IPC) tendered for filing an Interchange Agreement between IPC and Stand

---

[1] The rate schedule for the agreement with Rochester Gas and Electric Corporation has been submitted to the FERC, docket No. ER94–892–000, and is pending FERC's acceptance and designation of a schedule number.

Energy Corporation (SEC). IPC states that the purpose of this agreement is to provide for the buying and selling of capacity and energy between IPC and SEC.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

24. Central Hudson Gas and Electric Corporation

[Docket No. ER95–1689–000]

Take notice that Central Hudson Gas and Electric on September 5, 1995, tendered for filing a Service Agreement between CHG&E and Phibro Inc. The terms and conditions of service under this Agreement are made pursuant to CHG&E's FERC Electric Rate Schedule, Original Volume 1 ("Power Sales Tariff") accepted by the Commission in docket No. ER94–1662. CHG&E also has requested waiver of the 60-day notice provision.

A copy of this filing has been served on the Public Service Commission of the State of New York.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

25. Virginia Electric and Power Company

[Docket No. ER95–1690–000]

Take notice that on September 5, 1995, Virginia Electric and Power Company (Virginia Power) tendered for filing a Service Agreement between Dayton Power and Light Company and Virginia Power, dated August 11, 1995, under the Power Sales Tariff to Eligible Purchasers dated May 27, 1994. Under the tendered Service Agreement Virginia Power agrees to provide services to Dayton Power and Light Company under the rates, terms and conditions of the Power Sales Tariff as agreed by the parties pursuant to the terms of the applicable Service Schedules included in the Power Sales Tariff.

Copies of the filing were served upon the Ohio State Corporation Commission, Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice.

26. PECO Energy Company

[Docket No. ER95–1691–000]

Take notice that on September 5, 1995, PECO Energy Company (PECO) filed a Service Agreement dated August 31, 1995, with Engelhard Power Marketing, Inc. (Engelhard) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds Engelhard as a customer under the Tariff.

PECO requests an effective date of August 31, 1995, for the Service Agreement.

PECO states that copies of this filing have been supplied to Engelhard and to the Pennsylvania Public Utility Commission.

Comment date: September 22, 1995, in accordance with Standard Peragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.
[FR Doc. 95–22972 Filed 9–14–95; 8:45 am]
BILLING CODE 6717–01–P

[Docket No. CP95–606–001]

Western Gas Interstate Co.; Notice of Intent To Prepare an Environmental Assessment for the Proposed Seaboard Pipeline Project and Request for Comments on Environmental Issues

September 11, 1995.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction and operation of the facilities proposed in the Seaboard Pipeline Project.[1] This EA will be used by the Commission in its decision-making process to determine whether an environmental impact statement is necessary and whether to approve the project.

Summary of the Proposed Project

Western Gas Interstate Company (Western) wants to install a new delivery point to transport up to 3,000 million British thermal units per day of natural gas to Seaboard Farms, Inc. in Texas County, Oklahoma. Western requests Commission authorization, in Docket No. CP95–606–000, to construct and operate the following facilities needed to transport those volumes:

- construct about 15.5 miles of 8-inch-diameter pipeline from the Buffalo Tap to Seaboard Farms;
- install a meter station consisting of a meter, filter, three regulators, and valves. This site would be a 20-foot by 80-foot-fenced area following construction; and
- remove 7 miles of an existing 4-inch-diameter pipeline which would be replaced by the proposed 8-inch-diameter pipeline.

The general location of the project facilities and specific locations for facilities on new sites are shown in appendix 1.[2]

Land Requirements for Construction

Construction of the proposed facilities would require about 136 acres of land. Following construction, about 47 acres would be maintained as new aboveground facility sites and right-of-way. The remaining 89 acres of land would be restored and allowed to revert to its former use.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

---

[1] Western Gas Interstate Company's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available from the Commission's Public Reference and Files Maintenance Branch, Room 3104, 941 North Capitol Street NE., Washington, DC 20426, or call (202) 208–1371. Copies of the appendices were sent to all those receiving this notice in the mail.

The EA will discuss impacts (if applicable) that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils.
- Water resources, fisheries, and wetlands.[3]
- Vegetation and wildlife.
- Land use.
- Cultural resources.
- Air quality and noise.
- Endangered and threatened species.
- Public safety.
- Hazardous waste.

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we recommend that the Commission approve or not approve the project.

Currently Identified Environmental Issues

Due to limited information concerning the proposed project, we are unable to determine which environmental issues should be evaluated in the EA. Therefore, all of the general headings listed above will be evaluated.

Public Participation

You can make a difference by sending a letter addressing your specific comments or concerns about the project. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please follow the instructions below to ensure that your comments are received and properly recorded:

- Address your letter to: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, DC 20426;
- Reference Docket No. CP95–606–000;
- Send a *copy* of your letter to: Ms. Amy Olson, EA Project Manager, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Room 7312, Washington, DC 20426; and
- Mail your comments so that they will be received in Washington, DC on or before October 11, 1995.

If you wish to receive a copy of the EA, you should request one from Ms. Olson at the above address.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding or become an "intervenor". Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 2).

The date for filing of timely motions to intervene in this proceeding is October 10, 1995. Parties seeking to file interventions must show good cause, as required by section 385.214(b)(3). You do not need intervenor status to have your scoping comments considered.

Additional information about the proposed project is available from Ms. Amy Olson, EA Project Manager, at (202) 208–1199.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. MG94–4–004]

Alabama-Tennessee Natural Gas Co.; Filing

September 11, 1995.

Take notice that on August 31, 1995, Alabama-Tennessee Natural Gas Company (Alabama) filed revised standards of conduct in response to the Commission's August 2, 1995 order.[1]

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions to intervene or protest should be filed on or before September 26, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP95–734–000]

Columbia Gas Transmission Corp.; Request Under Blanket Authorization

September 11, 1995.

Take notice that on September 6, 1995, Columbia Gas Transmission Corporation (Columbia), P.O. Box 1273, Charleston, West Virginia, 25325–1273, filed in Docket No. CP95–734–000 a request pursuant to Sections 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, and 157.211) for approval to construct and operate a new delivery point to Columbia Gas of Ohio, Inc. (COH), an affiliate, in Belmont County, Ohio for interruptible transportation to Wheeling Pittsburgh Steel Corporation Tin Mill, under the blanket certificate issued in Docket No. CP86–240–000, pursuant to Section 7(c) of the Natural Gas Act (NGA), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Columbia indicates that the quantity of natural gas it will deliver through the proposed delivery point is 720 Dth/day, and 155,000 Dth annually, respectively. Columbia further indicates that the new delivery point will provide interruptible service under Columbia's ITS Rate Schedule. Columbia states that the estimated cost to establish this point of delivery will be approximately $12,000 which will be reimbursed 100% by COH. Columbia further states that there is no impact on its existing design day and annual obligations to its customers as a result of the construction and operation of the new point of delivery.

Any person or the Commission's Staff may, within 45 days of the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Rules of Practice and

---

[3] According to the applicant, the project will not affect any waters of the United States. We will report any potential impacts, or their absence, under this heading.

[1] 72 FERC ¶ 61,140 (1995).

Procedure (18 CFR 385.214), a motion to intervene and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefor, the proposed activities shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22932 Filed 9–14–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP95–746–000]

Transcontinental Gas Pipe Line Corp.; Request Under Blanket Authorization

September 11, 1995.

Take notice that on September 8, 1995, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP95–746–000 a request pursuant to Sections 157.205(b) and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR §§ 157.205(b) and 157.212) and Transco's blanket certificate issued in Docket No. CP82–426–000, for authorization to expand an existing delivery point to New Jersey Natural Gas Company (NJNG), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Transco states that NJNG is a transportation and storage customer of Transco under Transco's Rate Schedules IT, FT, SS–2 and X–288. Pursuant to NJNG's request, Transco proposes to expand the Morgan Meter Station, a delivery point to NJNG located on Transco's main line system in Middlesex County, New Jersey. This point of delivery is used by NJNG to receive gas into its distribution system. Transco states that the proposed expansion would be accomplished by Transco replacing two existing four-inch meter tubes with three new eight-inch meter tubes and replacing two existing two-inch regulators with three four-inch regulators at the existing station.

Transco states that it currently delivers up to 30,000 dekatherms of gas per day (dt/d) to NJNG at the Morgan Meter Station. As a result of the expansion proposed herein, the capacity of the Morgan Meter Station will be increased to 100,000 dt/d. Transco states that the addition deliveries to the Morgan Meter Station would be made on an interruptible basis. Transco states that it has sufficient system delivery flexibility to accomplish such additional deliveries without detriment or disadvantage to Transco's other customers.

Transco states that it is not proposing to alter the total volumes authorized for delivery to NJNG on a firm basis or to otherwise change in any way NJNG's firm capacity entitlement on Transco's system. Transco further states that the expansion of this delivery point will have no impact on Transco's peak day deliveries and little or no impact on Transco's annual deliveries and is not prohibited by Transco's FERC Gas Tariff.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22933 Filed 9–14–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP95–733–000]

Williams Natural Gas Co.; Request Under Blanket Authorization

September 11, 1995.

Take notice that on September 5, 1995, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP95–733–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to establish a new delivery point, by reversing existing receipt facilities, under its blanket certificate issued in Docket No. CP82–479–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

WNG proposes to use an existing receipt point, located in Garfield County, Oklahoma, for the delivery of transportation natural gas to Trident NGL, Inc. (Trident), a subsidiary of NGC Corp. WNG states that the cost to reverse the existing facilities is estimated to be $2,000 and would be reimbursed by Trident. WNG mentions that the quantities of gas to be delivered are approximately 191,625 Dth per year with a maximum of 650 Dth per day. WNG asserts that this change is not prohibited by an existing tariff and it has sufficient capacity to accomplish this delivery without detriment or disadvantage to its other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5295–8]

Clean Water Act; Contractor Access to Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intended transfer of confidential business information to contractors.

SUMMARY: The Environmental Protection Agency (EPA) intends to transfer to EPA contractors and subcontractors, technical and financial confidential business information (CBI) collected from several metals forming, finishing, and fabricating industries including the metal products and machinery manufacturing, maintenance and rebuilding industry. Transfer of the information will allow the contractors and subcontractors to assist EPA in

developing effluent limitations guidelines and standards under the Clean Water Act (CWA) for the metal products and machinery industry. The information being transferred was collected under the authority of Section 308 of the Clean Water Act. Interested persons may submit comments on this intended transfer of information to the address noted below.

DATES: Comments on the transfer of data are due September 25, 1995.

ADDRESSES: Comments may be sent to Mark Ingle, Engineering and Analysis Division (4303), Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Mark Ingle at the above address or at (202) 260–7191.

SUPPLEMENTARY INFORMATION: EPA has previously transferred to its contractor Radian Corporation of Herndon, Virginia (and subcontractors) information, including confidential business information (CBI), concerning the metal products and machinery industry collected under the authority of the Clean Water Act, Section 308.

The information transferred included: Questionnaire data collected during a two phase survey of the metal products industry; the first phase consisted of the screener questionnaire or the Mini-Data Collection Portfolio (MDCP) which was conducted in 1990 (OMB No. 2040–0148); the second phase was a more detailed questionnaire or Data Collection Portfolio (DCP) that was sent in 1991 to a randomly selected sample identified through the responses to the (OMB No. 2040–0148). EPA also transferred site visit and field sampling data collected during 1990 through 1993. In addition, Radian has received similar records and data developed in support of the following effluent guidelines regulations:

- Porcelain Enameling (data collection 1977 through 1979),
- Coil Coating (data collection 1977 through 1979),
- Aluminum Forming (data collection 1978 through 1981),
- Battery Manufacturing (data collection 1978 through 1983),
- Copper Forming (data collection 1978 through 1979),
- Electroplating (data collection 1974 through 1979),
- Metal Finishing (data collection 1974 through 1979),
- Metal Molding and Casting (data collection 1977 through 1983),
- Nonferrous Metals Forming and Metal Powders (data collection 1983 through 1985),
- Nonferrous Metals Manufacturing, Phases I and II (data collection 1978 through 1985),
- Plastics Molding and Forming (data collection 1980 through 1987), and
- Hot Dip Coating Subcategory of the Iron and Steel regulation (data collection 1986).

Radian has also received files gathered during studies of the beryllium copper forming industry (data collection during 1986), the platemaking industry (data collection during 1984), and the printing and publishing industry (data collection 1977 through 1979). EPA determined that this transfer was necessary to enable the contractor and subcontractors to perform their work under EPA Contract No. 68–C4–0024 and related subcontracts by assisting EPA in developing effluent limitations guidelines and standards for the metal products and machinery industry. Notice to this effect was provided to the affected companies at the time the data was collected or through **Federal Register** notice.

Today, EPA is giving notice that it has entered into a new contract, Contract No. 68–C5–0005 with Radian Corporation of Herndon, VA and Radian Corp. has entered into additional contracts with its subcontractors: Westat, Inc. of Rockville, MD; CAI Engineering of Oakton, VA; GeoLogics Corp. of Bethesda, MD; TN Associates of Milwaukee, WI; Tetra Tech of Fairfax, VA; and VIGYAN Corp. of Vienna, VA. to develop effluent limitations guidelines and standards for the metal products and machinery phase II industry. The effective date of the new contract was June 5, 1995. Radian Corp. will provide technical support such as completion of the public docket for the proposed rulemaking and completion of the work on the draft proposed technical development document. The contractor shall also provide support on post proposal efforts, including assisting with public meetings, responding to comments, filling data gaps that arise through comments on the proposed rule, and assisting with the assembly of the rulemaking record for the final rule.

The subcontractors will assist the prime by providing specific expertise. Westat, Inc. will assist with any surveys that may be required in future work, data management and statistical analysis. CAI Engineering provides metal products industrial wastewater and hazardous waste engineering expertise, surface treatment process design and pollution prevention expertise, and wastewater treatment system design expertise. GeoLogics Corp. provides data entry and clerical services. TN Associates provides experience in the design and management of wastewater treatment systems. Tetra Tech provides capabilities in risk management and public outreach. VIGYAN Corp. provides services related to database development and management.

In accordance with 40 CFR part 2, subpart B, the previously collected information described above (including confidential business information) will be transferred to Radian Corp. EPA has determined that this transfer is necessary to enable the contractor to perform their work under EPA Contract No. 68–C5–0005.

The metal products and machinery manufacturing, rebuilding and maintenance industry financial and economic data that were collected through the DCP survey in 1991 (OMB No. 2040–0148) will be transferred to Abt Associates under Contract No. 68–C4–0060. In accordance with 40 CFR part 2, subpart B, the previously collected information described above (including confidential business information) will be transferred to ERG, Contract No. 68–C3–0302. ERG has subcontracted with Abt Associates to conduct the economic analysis for the metal products and machinery industry. EPA has determined that this transfer is necessary to enable the contractor to perform their work under EPA contract No. 68–C3–0302.

Anyone wishing to comment on the above matters must submit comments to the address given above by September 25, 1995.

Dated: September 6, 1995.

Tudor T. Davies,

Director, Office of Science and Technology.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared August 28, 1995 Through September 01, 1995 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 14, 1995 (60 FR 19047).

Draft EISs

ERP No. D–AFS–J65238–MT Rating EC2, Bull Sweats Vegetation Manipulation Project, Implementation, Helena National Forest, Helena Ranger District, Lewis and Clark Counties, MT.

SUMMARY: EPA expressed environmental concerns regarding potential air quality impacts of proposed prescribed burning, and believes additional information on air quality impacts, timber harvest prescriptions, and water quality/wetlands impacts are needed to fully assess and mitigate all potential impacts of the management actions.

ERP No. D–AFS–J65239–MT Rating EC2, South Fork Yaak Salvage Project, Implementation, Kootenai National Forest, Three Rivers Ranger District, Lincoln County, MT.

Summary: EPA expressed environmental concerns about the existing condition, sensitivity to disturbance, and slow recovery of Fowler and Can Creeks, and potential air quality impacts of proposed activities. The EPA also believes additional information is needed to fully assess and mitigate all potential environmental impacts of the management actions.

ERP No. D–AFS–L65172–ID Rating EC2, Idaho Panhandle National Forests Noxious Weed Management Projects, Implementation, Bonners Ferry Ranger District, Boundary County, ID.

Summary: EPA expressed environmental concerns and believes that information is required to effectively address risks associated with the proposed herbicide treatments related to specific management objectives. Potential impacts to ground and surface water should be expanded.

ERP No. D–BLM–J01073–WY Rating EC2, Jackpot Underground Uranium Mine Project, Construction and Operation, Plan of Operation Approval, NPDES Permit and COE Section 404 Permit, Fremont and Sweetwater Counties, WY.

Summary: EPA expressed environmental concerns and believes that air dispersion modeling in a screening mode should be performed to estimate impacts to NAAQS. The final EIS should address procedures when PM–10 has been trigged and include a contingency plan for the permit.

ERP No. D–BLM–L65243–OR Rating EC2, Lake Abert Area Designation as an Area of Critical Environmental Concerns (ACEC), High Desert Management Framework Amendment Plan, Right-of-Way Grant and Drilling Permit, Valley Falls, Lake County, OR.

Summary: EPA expressed environmental concerns and recommends that a grazing-prohibition alternative be considered, and that potential noise impacts should be addressed in the final EIS.

ERP No. D–NOA–A29004–00 Rating LO, Programmatic EIS—Coastal Nonpoint Pollution Control Program, Implementation, Approval for 29 States and Territories Coastal Nonpoint Program.

Summary: EPA rated the draft EIS as "LO" (lack of objections). As a cooperating agency on the EIS EPA provided some suggestions to strengthen the document in providing a thorough explanation of the program and the problems it is designed to address.

ERP No. D–NPS–K65171–CA Rating EC2, Cabrillo National Monument, General Management Plan/Development Concept Plans, Implementation, San Diego County, CA.

Summary: EPA expressed environmental concerns in these the major areas: air quality, National Pollution Discharge Elimination System permitting, and Coastal Zone Management Act requirements. The draft EIS lacked discussion of air impacts and EPA provided extensive comments and guidance for conformity determinations and analyzing air impacts to be included in the final EIS.

ERP No. DR–DOE–L91009–WA Rating EC2, Yakima River Basin Fisheries Project, Updated and Additional Information, Construction, Operation and Maintenance, Funding, COE Section 10/404 Permits and NPDES Permit, Yakima Indian Nation, Yakima County, WA.

Summary: EPA expressed environmental concerns based on the potential impacts to fisheries resources and the need to ensure that the BPA and other responsible parties are evaluating opportunities to complement their respective management actions/objectives within the Yakima River Basin. EPA has requested additional information on fish habitat conditions, and clarification on the relationship of the proposed action with the Bureau of Reclamation's water enhancement project.

ERP No. DS–NPS–L65229–AK Rating EC2, Brooks River Area, Katmai National Park and Preserve Development Concept Plan, Updated Information Concerning a New Proposal Alternative for Beaver Pond Terrace, Implementation, AK.

Summary: EPA expressed environmental concerns about wetlands, water quality and mitigation.

Final EISs

ERP No. F–BLM–K60026–CA, Mesquite Regional Landfill Project, Implementation, Federal Land Exchange, Right-of-Way Approval, Conditional-Use-Permit and General Plan Amendment, Imperial County, CA.

Summary: The final EIS satisfactorily addressed issues raised in EPA's comments on the draft EIS. EPA believed it may be possible to further reduce air quality impacts by implementing EPA's proposed New Source Performance Standard for MSW landfills (56 FR 24476, May 30, 1991).

ERP No. F–NPS–D61036–DC, Rock Creek Park Tennis Center and Associated Recreation Fields, Implementation, Northwest Quadrant of Washington, DC.

Summary: EPA believes the documentation and range of alternatives discussed are sufficient and no further comments are warranted. EPA had no objections to the preferred alternative described in the FEIS.

ERP No. F–NPS–K61133–CA, Joshua Tree National Monument General Management Plan and Development Concept Plan, Implementation, Riverside and San Bernardino Counties, CA.

Summary: The final EIS has been responsive to concerns expressed in EPA's comments on the draft EIS.

ERP No. F–NPS–K61135–AZ, Grand Canyon National Park General Management Plan, Implementation, Coconino and Mohave Counties, AZ.

Summary: EPA had environmental concerns with the potential adverse impacts with road realignment on the east rim, development of area services on the south rim and compliance with drinking water standards.

ERP No. F–NPS–L61197–OR, Fort Clatsop National Memorial General Management and Development Concept Plans, Implementation, Astoria, Clatsop County, OR.

Summary: Review of the final EIS has been completed and the project found to be satisfactory. EPA provided no formal written comments. EPA had no objection to the preferred alternative as described in the FEIS.

ERP No. F–USN–E11035–SC, Charleston Naval Base Disposal and Reuse, Implementation, Charleston and Dorchester Counties, SC.

Summary: EPA environmental concerns with the DEIS were addressed. However, EPA expressed environmental concerns with water quality and radiological issues in the FEIS.

ERP No. FS–AFS–J65183–UT, East Fork Blacks Fork Multiple Use Management Project, Implementation, Additional Information, Wasatch-Cache National Forest, Evanston Ranger District, Summit County, UT.

Summary: EPA expressed lack of objections to the proposed action.

Regulations

ERP No. R–AFS–A65162–00, Forest Service Handbook for Review of FERC Hydropower Authorizations on National Forest Service Lands—RIN 0596–AA47.

Summary: EPA agrees that the USFS and FERC should streamline their process and interactions concerning hydropower projects, however it is critical that the USFS maintain sufficient, independent authority to ensure that its environmental responsibilities with regard to National Forest Lands are met.

Dated: September 12, 1995.

Underground Injection Control Program; Nonhazardous Waste Disposal Injection Restriction; Petition for Exemption—Class I Nonhazardous Waste Injection Air Products, Wichita, Kansas

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision.

SUMMARY: Notice is hereby given that an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Air Products Manufacturing Corporation for their Class I Nonhazardous Waste injection well located in Wichita, Kansas. As required by title 40, Code of Federal Regulations part 148, the company has adequately demonstrated to the satisfaction of the United States Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of the restricted, formerly ignitable, greater than 10 percent high total organic carbon (TOC) constituents from the injection zone. This final decision allows the underground injection by Air Products of the specific restricted waste, identified in the petition, into the Class I waste injection well at the Wichita, Kansas facility, for as long as the basis for granting an approval of the petition remains valid, under provisions of title 40, Code of Federal Regulations part 124. A public notice was issued on July 10, 1995. A public comment period, requesting written comments ended on August 10, 1995, and further, a public hearing was held on August 24, 1995. No comments were received during the comment period. This decision constitutes final Agency action and there is no administrative appeal process that can be applied to a final petition decision.

EFFECTIVE DATE: This action is effective as of September 7, 1995.

ADDRESSES: Copies of the petition and all pertinent information relating thereto, including the Agency's response to comments, are on file at the following location: Environmental Protection Agency, Region 7, Water and Pesticides Division, Drinking Water Branch, 726 Minnesota Avenue, Kansas City, Kansas, 66101.

FOR FURTHER INFORMATION CONTACT: Ralph N. Langemeier, Chief, Drinking Water Branch, Environmental Protection Agency, Region 7. Telephone (913) 551–7032.

Dated: September 11, 1995.

Diane K. Callier,

Acting Regional Administrator.

BILLING CODE 6560-50-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in section 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 217–011472–001

Title: KL/HMM Space Charter Agreement in the Far East-U.S. Pacific Northwest Trades

Parties: Hyundai Merchant Marine Co., Ltd. Kawasaki Kisen Kaisha, Ltd.

Synopsis: The proposed amendment extends the term of the Agreement until December 31, 1995. The parties have requested a shortened review period.

Agreement No.: 217–011512

Title: Hyundai/MSC Agreement

Parties: Hyundai Merchant Marine Co., Ltd. ("Hyundai") Mediterranean Shipping Co., S.A. ("MSC")

Synopsis: The proposed Agreement authorizes Hyundai to charter space on MSC's vessels in the trade between U.S. Atlantic and Gulf Coast ports and ports in North Europe.

Dated: September 11, 1995.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

David Crockett Jones, Jr., et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 29, 1995.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *David Crockett Jones, Jr.*, Naples, Florida; to retain a total of 11.68 percent of the voting shares of South Florida Banking Corporation, Bonita Springs, Florida, and thereby indirectly acquire First National Bank of Florida, Bonita Springs, Florida.

2. *Myer Feldman*, Potomac, Maryland; to acquire an additional 86.55 percent, for a total of 86.80 percent of the voting shares of Totalbank Corporation of Florida, Miami, Florida, and thereby indirectly acquire Totalbank, Miami, Florida, and Trade National Bank, Miami, Florida.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Martin Alan Grusin (as Trustee of U.A.B. Holding Trust, Memphis, Tennessee)*, Memphis Tennessee; to retain a total of 100 percent of the voting shares of W.B.T. Holding Company, Memphis, Tennessee, and thereby indirectly acquire United American Bank, Memphis, Tennessee.

Board of Governors of the Federal Reserve System, September 11, 1995.

William W. Wiles,

Secretary of the Board.

[FR Doc. 95–22924 Filed 9–14–95; 8:45 am]

BILLING CODE 6210-01-F

SunTrust Banks, Inc.; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 29, 1995.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *SunTrust Banks, Inc.*, Atlanta, Georgia, and Trust Company of Georgia, Atlanta, Georgia; to acquire and Stephens Diversified Leasing, Inc., Reno, Nevada, and thereby engage in leasing personal or real property or acting as agent, broker, or adviser; and in making, acquiring, or servicing loans or other extensions of credit, pursuant to §§ 225.25(b)(5) and 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 11, 1995.

MI

(ATSDR), Public Health Service (PHS), Department of Health and Human Services (DHHS).

ACTION: Notice.

SUMMARY: This notice announces the CDC[1] policy on the inclusion of women and racial and ethnic minorities in externally awarded research. On April 10, 1995, CDC published a notice for comments (60 FR 18130) on the Policy on the Inclusion of Women and Minorities in Externally Awarded Research. During the 60 day public comment period that ended June 9, 1995, CDC received only a few minor comments. Therefore, after some small revisions, the notice is being re-published and will become policy as of October 1, 1995. This policy is intended to ensure that individuals of both sexes and the various racial and ethnic groups will be included in CDC-supported studies involving human subjects, whenever feasible and appropriate. Furthermore, it is CDC policy to identify significant gaps in knowledge about health problems that affect women and racial and ethnic minority populations and to encourage studies which address these problems. (Note: This policy is consistent with requirements for CDC intra-agency research.)

EFFECTIVE DATE: Applicable for all CDC externally awarded research projects submitted in response to CDC Program Announcements (Requests for Assistance) and solicitations (Requests for Proposals) announced on or after October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Dixie E. Snider, Jr., M.D., M.P.H., telephone (404) 639–3701 or Barbara W. Kilbourne, R.N., M.P.H., telephone (404) 639–1242.

SUPPLEMENTARY INFORMATION:

CDC and ATSDR Policy on the Inclusion of Women and Racial and Ethnic Minorities in Externally Awarded Research

I. Introduction

The Centers for Disease Control and Prevention (CDC) is committed to protecting the health of all people regardless of their sex, race, ethnicity, national origin, religion, sexual orientation, socioeconomic status, or other characteristics. To the extent that participation in research offers direct benefits to the participants, underrepresentation of certain population subgroups denies them the opportunity to benefit. Moreover, for purposes of generalizing study results, investigators must include the widest possible range of population groups.

A growing body of evidence indicates that the health conditions and needs of women are different from those of men. Some health conditions are unique to women and others are more prevalent in women. For some illnesses, there are marked distinctions, not only in onset and progression of disease, but also in the preventive, treatment and educational approaches necessary to combat them in women. Furthermore, initial entry into the health care system may be different for some subgroups of women, such as low-income and uninsured women. Lesbians may also enter the health care system differently because they may be less likely to access prevention services, like cancer screening, because they may not utilize family planning services. The Public Health Service Task Force on Women's Health Issues published a report in 1987 stating that it is becoming more important to note the environmental, economic, social, and demographic characteristics that influence a woman's health status. The Task Force focused on the direct and indirect effects these factors could have on the status of a woman's health and noted that when a woman is "outside the normal range of societal expectations," that is, she is of a racial, ethnic or cultural minority or if she is physically or mentally disabled, her health status is potentially at greater risk. These basic observations are not always recognized or reflected in study protocols and proposals.

The disparity in health outcomes between majority and some racial and ethnic minority groups is now well documented. Although some minority populations, e.g., some Asian groups, have better overall health status than non-Hispanic whites, many racial and ethnic minority populations have dramatically shorter life expectancy, higher morbidity rates and inadequate access to quality health care. The Secretary for the Department of Health and Human Services' Task Force on Black and Minority Health issued a report in 1985 noting the underrepresentation of racial and ethnic minorities in research. This underrepresentation has resulted in significant gaps in knowledge about the health of racial and ethnic minority populations and their responses to interventions.

II. Definitions

A. Human Subjects

Under this policy, the definition of human subjects in title 45 CFR part 46, the Department of Health and Human Services regulations for the protection of human subjects, applies: "Human subject means a living individual about whom an investigator conducting research obtains (1) data through intervention or interaction with the individual or (2) identifiable private information."

B. Research

Under this policy, the definition of research in title 45 CFR part 46, the Department of Health and Human Services regulations for the protection of human subjects, applies: "Research means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge." All proposed research involving human subjects and conducted using CDC funding will be evaluated for compliance with this policy, including those projects that are exempt from Institutional Review Board (IRB) review (as specified in title 45 CFR part 46). However, nothing in this policy is intended to require IRB review of protocols which otherwise would be exempt. This policy applies to all CDC externally awarded research regardless of the mechanism of financial support (e.g., grant, cooperative agreement, contract, purchase order, etc.). This policy does not apply to those projects in which the investigator has no control over the composition of the study population (e.g., cohort studies in which the population has been previously selected, or research to follow-up outbreak investigations.)

---

[1] References to CDC also apply to the Agency for Toxic Substances and Disease Registry (ATSDR).

C. Racial and Ethnic Categories

1. Minority Groups

This policy shall comply with the Office of Management and Budget (OMB) Directive No. 15, and any subsequent revisions to the Directive. OMB Directive No. 15 defines the minimum standard of basic racial and ethnic categories. Despite limitations (as outlined in the Public Health Reports "Papers from the CDC/ATSDR Workshop on the Use of Race and Ethnicity in Public Health Surveillance"), these categories are useful because they allow comparisons among many national data bases, especially Bureau of the Census and national health data bases. Therefore, the racial and ethnic categories described below should be used as basic minimum guidance, cognizant of their limitations.

American Indian or Alaskan Native: A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander: A person having origins in any of the original peoples of Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Black, not of Hispanic Origin: A person having origins in any of the black racial groups of Africa.

Hispanic: A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

2. Majority Group

White, not of Hispanic Origin: A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

While investigators should focus primary attention on the above categories, CDC recognizes the diversity of the population. For example, Blacks describe themselves in several different ways, including African-American, Caribbean (Haitian, Jamaican, West Indian, Trinidadian), etc. Native Hawaiians have expressed the desire to be considered a separate racial/ethnic category exclusive of the current Asian/Pacific Islander designation. Therefore, investigators are encouraged to investigate national or geographic origin or other cultural factors (e.g., customs, beliefs, religious practices) in studies of race and ethnicity, and their relationship to health problems. Furthermore, since race, ethnicity, and cultural heritage may serve as markers for other important characteristics or conditions associated with a health problem or outcome, investigators should actively seek to identify these other characteristics or conditions.

III. Policy

Research Involving Human Subjects

Applicant institutions must ensure that women and racial and ethnic minority populations are appropriately represented in their proposals for research.

Women and members of racial and ethnic minority groups should be adequately represented in all CDC-supported studies involving human subjects, unless a clear and compelling rationale and justification establishes to the satisfaction of CDC that inclusion is inappropriate or clearly not feasible. Although this policy does not apply to studies when the investigator cannot control the race, ethnicity, and sex of subjects, women and racial and ethnic minority populations must not be routinely and/or arbitrarily excluded from such investigations.

In addition, women of childbearing potential should also not be routinely and/or arbitrarily excluded from participation even though there are ethical/risk issues to consider for inclusion and exclusion. Information on adverse differences in outcome or risk profiles for pregnant women may be reason for exclusion. Therefore, pregnancy status may need to be determined prior to enrollment for some studies and, if necessary, during an intervention to safeguard the participants' health.

IV. Guidance for Applicant Institution Investigators and Decision Makers in Complying with this Policy

A. General

In determining whether special efforts should be made to set specific enrollment goals for women and members of racial and ethnic minority groups, or whether to design special studies to specifically address health problems in such populations, principal investigators should consider the following points:

- Is the disease or condition under study unique to, or is it relatively rare in men, women or one or more racial and/or ethnic minority populations?
- What are the characteristics of the population to which the protocol results will be applied? Does it include both men and women? Does it include specific racial and ethnic minority populations?
- Are there scientific reasons to anticipate significant differences between men and women and among racial and ethnic minority populations with regard to the hypothesis under investigation?
- Are there study design or recruitment limitations in the protocol that could result, unnecessarily, in underrepresentation of one sex or certain racial and ethnic minority populations?
- Could such underrepresentation cause an adverse impact on the generalizability and application of results?
- Is the underrepresentation correctable?
- Does racial and ethnic characterization of study subjects serve a bona fide purpose or might it serve only to stigmatize a group?

Inclusion of women and/or racial and ethnic minority groups in research can be addressed either by including all appropriate groups in one single study or by conducting multiple studies. In general, protocols and proposals for support of studies involving human subjects should employ a design with sex and/or minority representation appropriate to the scientific objectives. It is not an automatic requirement that the study design provide sufficient statistical power to answer the questions posed for men and women and racial and ethnic groups separately; however, whenever there are scientific reasons to anticipate differences between men and women and/or racial and ethnic groups, with regard to the hypothesis under investigation, investigators should include an evaluation of these sex and minority group differences in the study proposal. If adequate inclusion of one sex and/or minority group is impossible or inappropriate with respect to the purpose of the proposed study, or if in the only study population available, there is a disproportionate representation of one sex or minority/majority group, the rationale for the study population must be well explained and justified. The cost of inclusion of women and/or racial and ethnic minority groups shall not be a permissible consideration for exclusion from a given study unless data regarding women and/or racial and ethnic minority groups have been or will be obtained through other means that provide data of comparable quality. Acceptable reasons for exclusion are as follows:

(1) Inclusion is inappropriate with respect to the health of the subjects;

(2) Inclusion is inappropriate with respect to the purpose of the study;

(3) Substantial scientific evidence indicates there is no significant difference between the effects that the

variables to be studied have on women and/or racial and ethnic minority groups;

(4) Substantial scientific data already exist on the effects that variables have on the excluded population;

(5) Inclusion is inappropriate under other circumstances as determined by CDC.

In each protocol or proposal, the composition and rationale for inclusion of the proposed study population must be described in terms of sex and racial and ethnic group. Sex and racial and ethnic characteristics, conditions, and other relevant issues should be addressed in developing a study design and sample size appropriate for the scientific objectives of the investigation. The proposal should contain a description of proposed outreach programs, if necessary, for recruiting women and racial and ethnic minorities as participants. Investigators must facilitate the informed consent process by promoting open and free communication with the study participants. Investigators must seek to understand cultural and linguistic variables inherent in the population to be enrolled, and procedures must be established to ensure appropriate translation of the consent document whenever necessary.

B. Studies of Public Health Interventions

Investigators must consider the following when planning an intervention trial or a clinical trial:

- If the data from prior studies strongly indicate the existence of significant differences of clinical or public health importance in intervention effect between the sexes or among racial and ethnic populations, the primary question(s) to be addressed by the scientific investigation and the design of that study must specifically accommodate the difference(s). For example, if men, women, and racial and ethnic minority groups are thought to respond differently to an intervention, then the study should be designed to answer separate primary questions that apply to men, women, and/or specific racial and ethnic groups with adequate sample size for each.
- If the data from prior studies strongly support no significant differences of clinical or public health importance in intervention effect between subgroups, then sex and race and ethnicity are not required as subject selection criteria; however, the inclusion of sex and racial and ethnic subgroups is still strongly encouraged.
- If the data from prior studies neither support nor negate the existence of significant differences of clinical or public health importance in intervention effect, then the study should include sufficient and appropriate male and female and racial and ethnic minority populations so that valid analysis of the intervention effect in each subgroup can be performed.
- If women of childbearing potential are to be included and if there is reason to suspect that adverse events may occur in pregnant women, pregnancy status should be determined prior to enrollment.

V. Implementation

A. Date of Implementation

This policy applies for all CDC externally awarded research projects submitted in response to CDC Program Announcements (Requests for Assistance) and solicitations (Requests for Proposals) announced on or after October 1, 1995.

B. Roles and Responsibilities

Certain individuals and groups have special roles and responsibilities with regard to the implementation of these guidelines.

1. Applicant Institution Investigators

Applicant institution investigators should assess the theoretical and/or scientific linkages between sex, race and ethnicity and their topic of study. Following this assessment, the applicant institution investigator will address the policy in each protocol, application and proposal, providing the required information on inclusion of women and minorities, and any required justifications for exclusions of any groups.

2. CDC Technical/Peer Review Groups

In conducting technical/peer review of contract, grant, or cooperative agreement applications for scientific and technical merit, CDC Center/Institute/Office (C/I/O) Directors will ensure that CDC technical/peer review groups, to the extent possible, include women and racial and ethnic minorities, and will do the following: *

- Evaluate the proposed plan for the inclusion of both sexes and racial and ethnic minority populations for appropriate representation.
- Evaluate the appropriateness of the proposed justification when representation is limited or absent.
- Determine whether the design of the study is adequate to measure differences when warranted.
- Evaluate the plans for recruitment and outreach for study participants including whether the process of establishing partnerships with community(ies) and recognition of mutual benefits will be documented.
- Include these criteria as part of the technical assessment and assign a score.

3. CDC Center/Institute/Office Directors

CDC C/I/O Directors are responsible for ensuring that CDC externally awarded research involving human subjects meets the requirements of these guidelines. CDC C/I/O Directors will also inform externally awarded investigators concerning this policy and monitor its implementation during the development, review, award, and conduct of research.

4. CDC Institutional Review Boards (IRBs)

CDC IRBs are expected to consider whether CDC investigators have adequately addressed the inclusion of women and racial and ethnic minorities, in research protocols that require CDC IRB approval, as an additional criterion for IRB approval.

C. External Award Consideration

CDC project officers shall design their Requests for Contracts and Requests for Assistance in compliance with this policy. CDC C/I/O Directors shall ensure this policy is fully considered and implemented prior to the release of the Request for Contract and Request for Assistance to the CDC Procurement and Grants Office. CDC funding components will not award any grant, cooperative agreement, or contract for external research projects announced on or after October 1, 1995, and thereafter which does not comply with this policy.

D. Recruitment Outreach by Externally Awarded Investigators

Externally awarded investigators and their staff(s) are urged to develop appropriate and culturally sensitive outreach programs and activities commensurate with the goals of the research. The purpose should be to establish a relationship between the investigator(s), populations, and community(ies) of interest so that mutual benefit is achieved by all groups participating in the study. Investigators should document the process for establishing a partnership with the community(ies) and the mutual benefits of the study and ensure that any factors (e.g., educational level, nonproficiency in English, low socioeconomic status) are accounted for and handled appropriately. In addition, investigator(s) and staff should ensure that ethical concerns are clearly noted and enforced, such that there is minimal

possibility of coercion or undue influence in the incentives or rewards offered in recruiting into or retaining participants in scientific studies.

E. Dissemination of Research Results

Externally awarded investigators are urged to make special efforts to disseminate relevant research results to the communities who participated in the studies and to the affected populations, especially racial and ethnic minority populations that may have cultural, language, and socioeconomic barriers to the easy receipt of such information.

VI. Evaluation

CDC Inclusion Review Committee Responsibility and Members

A CDC Inclusion Review Committee (IRC) with representatives from the CDC Office of the Associate Director for Science, the CDC Office of the Associate Director for Minority Health, and the CDC Office of the Associate Director for Women's Health will review any questions, issues, or comments pertaining to this policy and recommend necessary changes or modifications to the Director, CDC. This committee will meet regularly to review compliance with this policy and evaluate the impact of this policy on research activities at CDC. The CDC IRC may periodically conduct random audits of research protocols to assess compliance with this policy.

Dated: September 8, 1995.

Claire V. Broome,

Deputy Director, Centers for Disease Control and Prevention (CDC) and Deputy Administrator, Agency for Toxic Substances and Disease Registry (ATSDR).

BILLING CODE 4163–18–P

National Institutes of Health

National Center for Research Resources; Notice of Meetings

Pursuant to Pub. L. 92–363, notice is hereby given of the meetings of the National Center for Research Resources (NCRR) for October 1995. These meetings will be open to the public as indicated below, to discuss program planning; program accomplishments; and special reports or other issues relating to committee business. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Maureen Mylander, Public Affairs Officer, NCRR, National Institutes of Health, 1 Rockledge Center, Room 5146, 6705 Rockledge Drive, MSC 7965, Bethesda, Maryland 20892–7965, (301) 435–0888, will provide summaries of meetings and rosters of committee members. Other information pertaining to the meetings can be obtained from the Executive Secretary or the Scientific Review Administrator indicated. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Scientific Review Administrator listed below, in advance of the meeting.

Name of Committee: Comparative Medicine Review Committee.

Scientific Review Administrator: Dr. Raymond O'Neill, National Institutes of Health, 1 Rockledge Center, Room 6110, 6705 Rockledge Drive, MSC 7965, Bethesda, MD 20892–7965, Telephone: (301) 435–0814.

Date of Meeting: October 22–24, 1995.

Place of Meeting: Latham Hotel, 3000 M Street, N.W., Washington, DC 20007.

Closed: October 22, 6:30 p.m.–until recess.

Open: October 23, 8:30 a.m.–10:00 a.m.

Closed: October 23, 10:00 a.m.–until adjournment.

Name of Committee: General Clinical Research Centers Committee.

Scientific Review Administrator: Dr. Bela J. Gulyas, National Institutes of Health, 1 Rockledge Center, Room 6116, 6705 Rockledge Drive, MSC 7965, Bethesda, MD 20892–7965, Telephone: (301) 435–0806.

Date of Meeting: October 18–19, 1995.

Place of Meeting: Holiday Inn, Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

Open: October 18, 8:00 a.m.–9:30 a.m.

Closed; October 18, 9:30 a.m.–until adjournment.

(Calalog of Federal Domestic Assistance Program No. 93.306, Laboratory Animal, and 93.333 Clinical Research, National Institutes of Health, HHS)

Dated: September 11, 1995.

National Institute of General Medical Sciences; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings:

Purpose: To review grant applications.

Committee Name: Genetic Basis of Disease Review Committee.

Date: November 6–7.

Time: 8:30 a.m.–5 p.m.

---

* C/I/O Directors may waive this requirement if it is clearly inappropriate or clearly not feasible.

Place of Meeting: National Institutes of Health, 45 Center Drive, Natcher Building, Room F2, Bethesda, MD 20892.

Contact Person: Dr. Arthur Zachary, 45 Center Drive, Room 1AS–13, Bethesda, MD 20892.

Committee Name: National Institute of General Medical Sciences Special Emphasis Panel—Biotechnology, Chemistry/Biology Interface and Molecular Biophysics.

Date: November 9–10.

Time: November 9, 1 p.m.–8 p.m.; November 10, 8:30 a.m.–5 p.m.

Place: Holiday Inn Hotel, 8520 Wisconsin Avenue, Chevy Chase, MD 20815.

Contact Person: Dr. Irene Glowinski, Scientific Review Administrator, NIGMS, 45 Center Drive, Room 1AS–13J, Bethesda, MD 20892.

These meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. The discussions of these applications could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

BILLING CODE 4140–01–M

National Institute of Deafness and Other Communication Disorders; Meeting of the Board of Scientific Counselors

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Board of Scientific Counselors, NIDCD, on October 16 and 17, 1995. The meeting will be held in Conference Room H, the Natcher Conference Center, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The meeting will be open to the public from 8:30 to 10:30 am on October 16 to present reports and discuss issues related to business of the Board. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting of the Board of Scientific Counselors will be closed to the public from 10:45 am October 16 until adjournment at approximately 3:00 p.m. on October 17. The closed portion of the meeting will be for the review, discussion and evaluation of the program of the Voice and Speech Section of the Division of Intramural Research, National Institute on Deafness and Other Communication Disorders, including consideration of personnel qualifications and performance, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

A summary of the meeting and a roster of committee members may be obtained from James F. Battey, M.D., Ph.D., Executive Secretary of the Board of Scientific Counselors, NIDCD, 5 Research Ct., Room 2B–28, Rockville, Maryland 20850, (301) 402–2829.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Dr. Battey at least two weeks prior to the meeting.

Biochemical Sciences Initial Review Group			
Biochemistry, Dr. Chhanda Ganguly, 301–435–1739	Oct. 18–20	8:30 a.m	Holiday Inn, Silver Spring, MD.
Medical Biochemistry, Dr. Alexander Liacouras, 301–435–1740.	Oct. 16–17	8:30 a.m	Hyatt Arlington, at Washington Key Bridge, Arlington, VA.
Pathobiochemistry, Dr. Zakir Bengali, 301–435–1742	Oct. 12–13	8:30 a.m	Holiday Inn, Georgetown, DC.
Physiological Chemistry, Dr. Jerry Critz, 301–435–1741.	Oct. 26–28	8:30 a.m	Holiday Inn, Calverton, MD.
Biophysical and Chemical Sciences Initial Review Group			
Bio-Organic & Natural Products Chemistry, Dr. Harold Radtke, 301–435–1728.	Oct. 19–21	9:00 a.m	Holiday Inn, Chevy Chase, MD.
Biophysical Chemistry, Dr. John Beisler, 301–435–1727.	Oct. 12–14	8:30 a.m	Ramada Inn, Bethesda, MD.
Medicinal Chemistry, Dr. Ronald Dubois, 301–435–1722.	Oct. 11–13	8:30 a.m	Holiday Inn, Bethesda, MD.
Metallobiochemistry, Dr. Edward Zapolski, 301–435–1725.	Oct. 26–28	8:30 a.m	The Georgetown Inn, Washington, DC.
Molecular & Cellular Biophysics, Dr. Nancy Lamontagne, 301–435–1726.	Oct. 26–28	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Physical Biochemistry, Dr. Gopa Rakhit, 301–435–1721.	Oct. 16–18	8:30 a.m	Doubletree Hotel, Rockville, MD.
Cardiovascular Sciences Initial Review Group			
Cardiovascular, Dr. Gordon Johnson, 301–435–1212	Oct. 11–13	8:00 a.m	Doubletree Hotel, Rockville, MD.
Cardiovascular & Renal, Dr. Anthony Chung, 301–435–1213.	Oct. 16–17	8:30 a.m	Mariott Hotel, Pooks Hill, Bethesda, MD.
Experimental Cardiovascular Sciences, Dr. Anshumali Chaudhardi, 301–435–1210.	Oct. 11–13	8:00 a.m	Holiday Inn, Chevy Chase, MD.
Hematology-1, Dr. Clark Lum, 301–435–1195	Oct. 19–21	8:00 a.m	Hyatt Regency Hotel, Bethesda, MD.
Hematology-2, Dr. Jerrold Fried, 301–435–1777	Oct. 18–20	8:30 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Pharmacology, Dr. Joseph Kaiser, 301–435–1211	Oct. 18–19	8:30 a.m	American Inn, Bethesda, MD.
Cell Development and Function Initial Review Group			
Biological Sciences-2, Dr. Camilla Day, 301–435–1024	Nov. 6–8	8:30 a.m	Holiday Inn, Governor's House, Washington, DC.
Cellular Biology and Physiology-1, Dr. Gerald Greenhouse, 301–435–1023.	Oct. 12–13	8:30 a.m	Sheraton Reston Hotel, Reston, VA.
Cellular Biology and Physiology-2, Dr. Gerhard Ehrenspeck, 301–435–1022.	Oct. 11–13	8:30 a.m	Holiday Inn, Bethesda, MD.
Human Embryology & Development-2, Dr. Sherry Dupere, 301–435–1021.	Oct. 16–17	8:00 a.m	Holiday Inn, Chevy Chase, MD.
International & Cooperative Projects, Dr. G.B. Warren, 301–435–1019.	Oct. 25–27	8:00 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Molecular Biology, Dr. Robert Su, 301–435–1025	Oct. 12–14	8:00 a.m	Holiday Inn, Georgetown, DC.
Molecular Cytology, Dr. Ramesh Nayak, 301–435–1026.	Oct. 11–12	8:00 a.m	Holiday Inn, Bethesda, MD.
Endocrinology and Reproductive Sciences Initial Review Group			
Biochemical Endocrinology, Dr. Michael Knecht, 301–435–1046.	Oct. 11–13	8:30 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Endocrinology, Dr. Syed Amir, 301–435–1043	Oct. 11–13	8:30 a.m	Holiday Inn, Bethesda, MD.
Human Embryology & Development-1, Dr. Michael Knecht, 301–435–1046.	Oct. 19–20	8:00 a.m	Doubletree Hotel, Rockville, MD.
Reproductive Biology, Dr. Dennis Leszczynski, 301–435–1044.	Oct. 16–17	8:00 a.m	Ramada Inn, Rockville, MD.
Reproductive Endocrinology, Dr. Abubakar Shaikh, 301–435–1042.	Sept. 28–29	8:00 a.m	Holiday Inn, Bethesda, MD.

Study section/contact person	September–November 1995 meetings	Time	Location
Genetic Sciences Initial Review Group			
Biological Sciences-1, Dr. Nancy Pearson, 301–435–1047.	Nov. 6–8	8:30 a.m	The Georgetown Inn, Washington, DC.
Genetics, Dr. David Remondini, 301–435–1038	Oct. 12–14	9:00 a.m	Holiday Inn, Bethesda, MD.
Genome, Dr. Cheryl Corsaro, 301–435–1045	Oct. 18–20	9:00 a.m	The Georgetown Inn, Washington, DC.
Mammalian Genetics, Dr. Jerry Roberts, 301–435–1037.	Nov. 8–9	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Health Promotion and Disease Prevention Initial Review Group			
Epidemiology & Disease Control-1, Dr. Scott Osborne, 301–435–1782.	Oct. 11–13	8:30 a.m	Marriott Residence Inn, Bethesda, MD.
Epidemiology & Disease Control-2, Dr. Jeanne Ketley, 301–435–1788.	Oct. 18–20	8:30 a.m	Holiday Inn, Alexandria, VA.
Nursing Research, Dr. Gertrude McFarland, 301–435–1784.	Oct. 11–13	8:00 a.m	Doubletree Hotel, Rockville, MD.
Toxicology-1, Dr. Jeanne Ketley, 301–435–1788	Oct. 25–27	8:00 a.m	American Inn, Bethesda, MD.
Toxicology-2, Dr. Jeanne Ketley, 301–435–1788	Oct. 11–13	8:00 a.m	American Inn, Bethesda, MD.
Immunological Sciences Initial Review Group			
Allergy & Immunology, Mr. Howard Berman, 301–435–1220.	Oct. 16–17	8:30 a.m	Doubletree Hotel, Rockville, MD.
Experimental Immunology, Dr. Calbert Laing, 301–435–1221.	Oct. 23–24	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Immunobiology, Dr. Betty Hayden, 301–435–1223	Oct. 18–20	8:00 a.m	Holiday Inn, Chevy Chase, MD.
Immunological Sciences, Dr. Anita Corman Weinblatt, 301–435–1224.	Oct. 18–20	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Immunology, Virology & Pathology, Dr. Lynwood Jones, 301–435–1153.	Oct. 18–20	8:30 a.m	Holiday Inn, Georgetown, DC.
Infectious Diseases and Microbiology Initial Review Group			
Bacteriology & Mycology-1, Dr. Timothy Henry, 301–435–1147.	Oct. 19–20	8:30 a.m	Marriott Residence Inn, Bethesda, MD.
Bacteriology & Mycology-2, Dr. William Branche, Jr., 301–435–1148.	Oct. 11–13	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Experimental Virology, Dr. Garrett Keefer, 301–435–1152.	Oct. 16–18	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Microbial Physiology & Genetics-1, Dr. Martin Slater, 301–435–1149.	Oct. 25–27	8:30 a.m	Holiday Inn, Governor's House, Washington, DC.
Microbial Physiology & Genetics-2, Dr. Gerald Liddel, 301–435–1150.	Oct. 18–20	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Tropical Medicine & Parasitology, Dr. Jean Hickman, 301–435–1146.	Oct. 12–13	8:00 a.m	Holiday Inn, Bethesda, MD.
Virology, Dr. Rita Anand, 301–435–1151	Oct. 11–13	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Musculoskeletal and Dental Sciences Initial Review Group			
General Medicine A–1, Dr. Harold Davidson, 301–435–1776.	Oct. 15–17	7:30 p.m	Marriott Hotel, Pooks Hill, Bethesda, MD.
General Medicine B, Dr. Shirley Hilden, 301–435–1198	Oct. 9–11	8:00 a.m	Holiday Inn, Bethesda, MD.
Oral Biology & Medicine-1, Dr. Priscilla Chen, 301–435–1787.	Oct. 23–24	8:30 a.m	Holiday Inn Old Town, Alexandria, VA.
Oral Biology & Medicine-2, Dr. Priscilla Chen, 301–435–1787.	Oct. 16–17	8:30 a.m	Holiday Inn Old Town, Alexandria, VA.
Orthopedics & Musculoskeletal, Dr. Daniel McDonald, 301–435–1215.	Oct. 18–20	8:00 a.m	Holiday Inn, Bethesda, MD.
Neurological Sciences Initial Review Group			
Neurological Sciences-1, Dr. Carl Banner, 301–435–1251.	Oct. 18–20	8:30 a.m	Holiday Inn, Governor's House, Washington, DC.
Neurological Sciences-2, Dr. Stephen Gobel, 301–435–1250.	Oct. 10–12	8:00 a.m	Holiday Inn, Chevy Chase, MD.
Neurology A, Dr. Joe Marwah, 301–435–1253	Nov. 7–9	8:30 a.m	Empress Inn, LaJolla-San Diego, CA.
Neurology B–1, Dr. Lillian Pubols, 301–435–1255	Oct. 10–12	8:30 a.m	Capitol Holiday Inn, Washington, DC.

Study section/contact person	September–November 1995 meetings	Time	Location
Neurology B-2, Dr. Herman Teitelbaum, 301–435–1254.	Oct. 24–26	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Neurology C, Dr. Kenneth Newrock, 301–435–1252	Oct. 11–13	8:30 a.m	Radisson Barcelo Hotel, Washington, DC.
Nutritional and Metabolic Sciences Initial Review Group			
General Medicine A–2, Dr. Mushtaq Khan, 301–435–1778.	Oct. 24–25	8:30 a.m	NIH, Natcher Building, Conf. Ctr, Rm E1, Bethesda, MD.
Metabolism, Dr. Krish Krishnan, 301–435–1779	Oct. 24–25	8:30 a.m	NIH, Natcher Building, Conf. Ctr, Rm G1&2, Bethesda, MD.
Nutrition, Dr. Sooja Kim, 301–435–1780	Oct. 24–25	8:30 a.m	NIH, Natcher Building, Conf. Ctr, Rm E2, Bethesda, MD.
Oncological Sciences Initial Review Group			
Chemical Pathology, Dr. Edmund Copeland, 301–435–1715.	Oct. 25–27	8:30 a.m	Holiday Inn, Bethesda, MD.
Experimental Therapeutics-1, Dr. Philip Perkins, 301–435–1718.	Oct. 11–13	8:30 a.m	Hyatt Hotel, Arlington, VA.
Experimental Therapeutics-2, Dr. Marcia Litwack, 301–435–1719.	Nov. 1–3	8:30 a.m	Holiday Inn, Chevy Chase, MD.
Metabolic Pathology, Dr. Marcelina Powers, 301–435–1720.	Oct. 17–19	8:30 a.m	Ramada Inn, Bethesda, MD.
Pathology A, Dr. Larry Pinkus, 301–434–1214	Oct. 10–12	7:00 p.m	Marriott Hotel, Pooks Hill, Bethesde, MD.
Pathology B, Dr. Martin Padarathsingh, 301–435–1717	Oct. 11–13	8: a.m	Holiday Inn, Georgetown, DC.
Radiation, Dr. Paul Strudler, 301–435–1716	Oct. 16–18	8:30 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Pathophsiological Sciences Initial Review Group			
Lung Biology & Pathology, Dr. Anne Clark, 301–435–1017.	Oct. 11–13	8:00 a.m	Holday Inn, Chevey Chase, MD.
Physiology, Dr. Michael Lang, 301–435–1015	Oct. 11–13	8:30 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Respiratory & Applied Physiology, Dr. Everett Sinnett, 301–435–1016.	Oct. 23–25	8:30 a.m	Holiday Inn, Chevey Chase, MD.
Sensory Sciences Initial Review Group			
Hearing Research, Dr. Joseph Kimm, 301–435–1249	Oct. 16–18	8:30 a.m	The Grand Hotel, Washington, DC.
Sensory Disorders & Language, Dr. Jane Hu, 301–435–1245.	Oct. 16–18	8:30 a.m	Capitol Holiday Inn, Washington, DC.
Visual Sciences A, Dr. Luigi Giacometti, 301–435–1246.	Oct. 25–27	8:30 a.m	Doubletree Hotel, Rockville, MD.
Visual Sciences B, Dr. Leonard Jakubczak, 301–435–1247.	Oct. 11–13	8:30 a.m	Radisson Hotel, Alexandria, VA.
Visual Sciences C, Dr. Carole Jelsema, 301–435–1248.	Oct. 10–11	8:00 a.m	The Georgetown, Inn, Washington, DC.
Surgery, Radiology and Bioengineering Initial Review Group			
Diagnostic Radiology, Dr. Eileen Bradley, 301–435–1178.	Oct. 16–17	8:00 a.m	Embassy Suites Hotel, Chevy Chase Pavilion, Washington, DC.
Suregery & Bioengineering, Dr. Paul Parakkal, 301–435–1172.	Sept. 29–30	8:00 a.m	Holiday Inn, Georgetown, DC.
Suregery, Anesthesiology & Trauma, Dr. Gerald Becker, 301–435–1750.	Oct. 19–20	8:00 a.m	Holiday Inn, Bethesda, MD.

The meetings will be closed in accordance with the provisions set forth in sec. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than 15 days prior to the meetings due to the urgent need to meet timing limitations imposed by the grant review cycle.

(Catalog of Federal Domestic Assistance Program Nos. 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: September 11, 1995.

Susan K. Feldman,

Committee Management Officer, NIH.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Division of Research Grants; Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following Division of Research Grants Special Emphasis Panel (SEP) meetings:

Purpose/Agenda: To review individual grant applications.

Name of SEP: Biological and Physiological Sciences.

Date: September 28, 1995.

Time: 5:00 p.m.

Place: NIH, Rockledge II, Room 6170, Telephone Conference.

Contact Person: Dr. Dennis E. Leszczynski, Scientific Review Administrator, 6701 Rockledge Drive, Room 6170, Bethesda, MD 20892, (301) 435–1044.

Name of SEP: Biological and Physiological Sciences.

Date: September 29, 1995.

Time: 4:00 p.m.

Place: NIH, Rockledge II, Room 6170, Telephone Conference.

Contact Person: Dr. Dennis E. Leszczynski, Scientific Review Administrator, 6701 Rockledge Drive, Room 6170, Bethesda, MD 20892, (301) 435–1044.

Name of SEP: Clinical Sciences.

Date: October 5, 1995.

Time: 1:00 p.m.

Place: NIH, Rockledge II, Room 4128, Telephone Conference.

Contact Person: Dr. Anshumali Chaudhari, Scientific Review Administrator, 6701 Rockledge Drive, Room 4128, Bethesda, MD 20892, (301) 435–1210.

Name of SEP: Multidisciplinary Sciences.

Date: October 29–31, 1995.

Time: 6:00 p.m.

Place: New Haven, CT.

Contact Person: Dr. Nadarajen Vydelingum, Scientific Review Administrator, 6701 Rockledge Drive, Room 4128, Bethesda, MD 20892, (301) 435–1176.

Name of SEP: Multidisciplinary Sciences.

Date: October 29–30, 1995.

Time: 7:00 p.m.

Place: Holiday Inn, Chevy Chase, MD.

Contact Person: Dr. Lee Rosen, Scientific Review Administrator, 6701 Rockledge Drive, Room 5116, Bethesda, MD 20892, (301) 435–1171.

Name of SEP: Multidisciplinary Sciences.

Date: November 5–7, 1995.

Time: 7:00 p.m.

Place: Marriott LA Airport Hotel, Los Angeles, CA.

Contact Person: Dr. Nabeeh Mourad, Scientific Review Administrator, 6701 Rockledge Drive, Room 5110, Bethesda, MD 20892, (301) 435–1168.

Name of SEP: Multidisciplinary Sciences.

Date: November 8–10, 1995.

Time: 6:00 p.m.

Place: Sheraton Metrodome Hotel, Minneapolis, MN.

Contact Person: Dr. Bill Bunnag, Scientific Review Administrator, 6701 Rockledge Drive, Room 5112, Bethesda, MD 20892, (301) 435–1177.

Name of SEP: Multidisciplinary Sciences.

Date: November 15–17, 1995.

Time: 6:00 p.m.

Place: St. Louis, Missouri.

Contact Person: Dr. Bill Bunnag, Scientific Review Administrator, 6701 Rockledge Drive, Room 5212, Bethesda, MD 20892, (301) 435–1177.

Name of SEP: Multidisciplinary Sciences.

Date: November 19–21, 1995.

Time: 7:00 p.m.

Place: Woods Hole, Massachusetts.

Contact Person: Dr. Nadarajen Vydelingum, Scientific Review Administrator, 6701 Rockledge Drive, Room 5210, Bethesda, Maryland 20892, (301) 435–1176.

Purpose/Agenda: To review Small Business Innovation Research.

Name of SEP: Multidisciplinary Sciences.

Date: October 22–24, 1995.

Time: 7:00 p.m.

Place: La Guardia Marriott Hotel, New York, NY.

Contact Person: Dr. Nabeeh Mourad, Scientific Review Administrator, 6701 Rockledge Drive, Room 5110, Bethesda, Maryland 20892, (301) 435–1168.

Name of SEP: Multidisciplinary Sciences.

Date: October 30–November 1, 1995.

Time: 7:00 a.m.

Place: Bethesda Marriott Hotel, Bethesda, Maryland.

Contact Person: Dr. Nabeeh Mourad, Scientific Review Administrator, 6701 Rockledge Drive, Room 5110, Bethesda, Maryland 20892, (301) 435–1168.

Name of SEP: Multidisciplinary Sciences.

Date: November 5–7, 1995.

Time: 4:00 p.m.

Place: Holiday Inn, Chevy Chase, Maryland.

Contact Person: Dr. Nadarajen Vydelingum, Scientific Review Administrator, 6701 Rockledge Drive, Room 5210, Bethesda, Maryland 20892, (301) 435–1176.

Name of SEP: Multidisciplinary Sciences.

Date: November 6–7, 1995.

Time: 8:00 a.m.

Place: Doubletree Hotel, Rockville, Maryland.

Contact Person: Dr. Nancy Shinowara, Scientific Review Administrator, 6701 Rockledge Drive, Room 5216, Bethesda, Maryland 20892, (301) 435–1173.

The meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than 15 days prior to the meeting due to the urgent need to meet timing limitations imposed by the grant review cycle.

(Catalog of Federal Domestic Assistance Program Nos. 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: September 11, 1995.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

[Docket No.]

Prospective Grant of Exclusive License: Veterinary Vaccine and Therapeutic Uses of Bartonella Henselae (Formerly Rochalimaea Henselae) Organisms

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: This is notice in accordance with 15 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of a worldwide, limited field of use, exclusive license to practice the inventions embodied in the patents and patent applications referred to below to Paravax, Inc., having a place of business in Fort Collins, Colorado. The patent rights in these inventions have been assigned to the government of the United States of America. The patents and patent applications to be licensed are: "Methods and Compositions for Diagnosing Cat Scratch Disease and Bacillary Angiomatosis Caused by Rochalimaea henselae," U.S. Patent Application Serial No. 07/822,539 filed 17 Jan 92 (U.S. Patent No. 5,399,485 issued 21 Mar 95) and related cases, which include all continuation applications, divisional applications, continuation-in-part applications, and foreign counterpart applications.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty (60) days from the date of this published notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Bartonella henselae (formerly *Rochalimaea henselae*) causes no currently known clinical disease in cats, but it has been identified as the cause of Cat Scratch Disease (CDS) in humans. Cats infected with *Bartonella henselae* have been identified as the source or reservoir of these infections in humans where a mild to severe lymphadenopathy can result. Further manifestations of *Bartonella henselae* may include Parinaud oculoglandular syndrome, prolonged fever associated with relapsing bacteremia, bacillary angiomatosis, and endocarditis and bacillary peliosis. The sick and elderly, especially immunocompromised susceptible to infection.

Centers for Disease Control and Prevention (CDC) scientists have discovered a method of diagnosing cat scratch disease and a method of diagnosing bacillary angiomatosis in a subject by detecting the presence of *Bartonella henselae* or an immunogenically specific determinant thereof in the subject, as well as vaccines comprising *Bartonella henselae* or fragments thereof.

ADDRESSES: Requests for a copy of these patent applications, inquiries, comments, and other materials relating to the contemplated license should be directed to: Carol C. Lavrich, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852. Telephone: (301) 496–7735, ext. 287; Facsimile: (301) 402–9220. Applications for a license filed in response to this notice will be treated as objections to the grant of the contemplated license. Only written comments and/or applications for a license which are received by NIH on or before November 14, 1995, will be considered. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552. A signed Confidential Disclosure Agreement will be required to receive a copy of any pending application.

Dated: August 23, 1995.

Barbara M. McGarey,

Deputy Director, Office of Technology Transfer.

[FR Doc. 95–22992 Filed 9–14–95; 8:45 am]

BILLING CODE 4140–01–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. FR–3778–N–54]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708–1226; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brain Rooney, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable /available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: Dept. of Transportation: Ronald D. Keefer, Director, Administrative Services & Property Management, DOT, 400 Seventh St. SW, room 10319, Washington, DC 20590; (202) 366–4246; U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real

Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332–2300; (703) 325–0474; (These are not toll–free numbers).

Dated: September 8, 1995.

Jacquie M. Lawing,

Deputy Assistant Secretary for Economic Development.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–962–1410–00–P; AA–14015]

Alaska; Notice for Publication; Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(h)(8) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(h)(8), will be issued to Sealaska Corporation for approximately 664 acres. The lands involved are in the Tongass National Forest in southeast Alaska.

Copper River Meridian, Alaska

Lots 3, 4 and 5, U.S. Survey No. 2439.

T. 43 S., R. 60 E.,
  Sec. 34.
T. 44 S., R. 60 E.,
  Sec. 12.
T. 44 S., R. 61 E.,
  Secs. 6 and 7.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the *Juneau Empire*. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until October 16, 1995, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart

E, shall be deemed to have waived their rights.

BILLING CODE 4310–JA–P

[CO–934–03–1310–04]

Notice of Public Comment Period for the Southern Ute Oil and Gas Environmental Impact Statement

AGENCIES: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Bureau of Land Management (BLM) is proposing to prepare an Environmental Impact Statement (EIS) for oil and gas leasing and operations on Southern Ute Indian Tribal lands and to hold a public scoping meeting and comment period in accordance with the National Environmental Policy Act (NEPA) and Title 40 CFR Part 1500.

ADDRESSES: Mail all comments to the Area Manager, San Juan Resource Area, 701 Camino del Rio, Durango, Colorado 81301.

A mailing list for interested public and agencies is being maintained in the San Juan Resource Area office. The list will be used to provide information about opportunities for public input and for distribution of the draft and final EIS.

DATES: The scoping period opens September 26, 1995, and comments must be received by the close of business, October 26, 1995.

SUMMARY: In accordance with Section 102 of NEPA, an EIS for oil and gas leasing and operations on lands of the Southern Ute Indian Tribe will be prepared by the Southern Ute Indian Tribe (SUIT) Energy and Minerals Division (project lead), the U.S. Bureau of Land Management (lead federal agency), and the U.S. Bureau of Indian Affairs (BIA).

SUPPLEMENTARY INFORMATION: In accordance with Title 40, CFR, Part 1506.3(c), the SUIT, the BLM and the BIA are preparing the EIS for the purposes of evaluating impacts associated with federal approval of tribally issued oil and gas leases and approving exploration and production operations on lands subject to federal jurisdiction within the boundaries of the Southern Ute Indian Tribal lands.

Comments and concerns of the Southern Ute people, the public and interested federal, state, and local agencies will be solicited as part of the EIS scoping process. The 30-day scoping period will begin September 26, 1995, with a public meeting in Ignacio, Colorado, from 7 to 9 p.m. in Rolling Thunder Hall at the Southern Ute Casino. The comment period will be open for 30 days thereafter, through October 26, 1995.

Comments may be presented verbally at the meeting or by telephone to the contacts provided below. Comments may also be submitted in written form at the scoping meeting, to the contacts shown below, and by telefax.

Preliminary Issues

How best can oil and gas development revenues continue to be received and maximized for benefiting the Southern Ute Indian Tribe while at the same time protecting Tribal lands and the environment from injurious impacts.

Preliminary Alternatives

At least two alternatives present themselves before scoping takes place.

No-Action Alternative—Continuation of current oil and gas management actions and conditions of approval in line with the existing BIA Environmental Analysis (EA), BLM field and site development EAs, and existing policies and practices. This alternative would maintain the status quo and is used as the baseline for comparison of impacts from additional proposed actions,.

Enhanced Development—This alternative would modify existing development to allow for new injection technologies and down-spacing based on reasonably foreseeable development.

FOR FURTHER INFORMATION CONTACT:

Jim Rhett, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215, Telephone: (303) 239–3752; Telefax: (303) 239–3799; TDD*: (303) 239–3933

Don Englishman, San Juan Resource Area, 701 Camino del Rio, Durango, Colorado 81301, Telephone: (970) 247–4082; Telefax: (970) 385–4818; TDD*: (970) 385–5121. *(Telephone Device for the Deaf)

Documents pertinent to this proposal may be examined at the San Juan Resource Area Office during the business hours from 7:45 a.m. to 4:30 p.m. MST, Monday through Friday.

Dated: September 5, 1995.

Donald R. Glaser,

State Director, Colorado.

BILLING CODE 4310–JB–M

Resource Advisory Councils, Meetings

AGENCY: Bureau of Land Management, Interior.

ACTION: Resource Advisory Councils—Notice of Meeting Locations and Times.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA), 5 U.S.C. Appendix, the Department of the Interior, Bureau of Land Management (BLM), has established Resource Advisory Councils for the States of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Wyoming.

The Councils are: Alaska, Alaska Resource Advisory Council; Arizona, Arizona Resource Advisory Council; California, Bakersfield Resource Advisory Council, Susanville Resource Advisory Council, and Ukiah Resource Advisory Council; Colorado, Front Range Resource Advisory Council, Northwest Resource Advisory Council, and Southwest Resource Advisory Council; Idaho, Lower Snake River Resource Advisory Council, Upper Columbia-Salmon/Clearwater Resource Advisory Council, and Upper Snake River Resource Advisory Council; Montana/North and South Dakota, Butte Resource Advisory Council, Lewistown Resource Advisory Council, Miles City Resource Advisory Council, and Dakotas Resource Advisory Council; Nevada, Mojave-Southern Great Basin Resource Advisory Council, Northeastern Great Basin Resource Advisory Council, and Sierra Front-Northwestern Great Basin Resource Advisory Council; New Mexico, New Mexico Resource Advisory Council; Oregon/Washington, John Day-Snake Resource Advisory Council, Southeast Oregon Resource Advisory Council, and Eastern Washington Resource Advisory Council; Utah, Utah Resource Advisory Council; and Wyoming, Wyoming Resource Advisory Council.

These Councils will provide representative counsel and advice to BLM on the planning and management of the public lands. Members of these Councils are appointed by the Secretary of the Interior.

Concurrent meetings of the Councils will be held on September 21–22, 1995. The agenda for each meeting includes Council orientation, prioritization of new business for consideration by each Council, election of Council officers and decisions on other operational issues, discussion of new business, and a meeting evaluation.

All meetings are open to the public. The public may present written

comments to any Council. Each Council meeting will also have time allocated for hearing public comments. The public comment period for each meeting is also listed below. Depending on the number of persons wishing to comment and the time available, the time for individual comments may be limited. Individuals who plan to attend and need further information about the meetings, or need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the External Affairs Office of the appropriate BLM State Office listed below. Seating at meetings will be on a first-come basis.

The times and locations of the meetings are as follows:

Alaska

Alaska Resource Advisory Council, Anchorage Hilton Hotel, 500 West 3rd Avenue, Anchorage, AK; 9/21 start time 8 a.m.; 9/22 start time 9 a.m.; public comments 9/22 at 1:30 p.m.

For additional information, contact the Alaska State Office, 222 W. 7th Avenue, #13, Anchorage, Alaska 99513–7599, telephone 907–271–5555.

Arizona

Arizona Resource Advisory Council, National Training Center, 9828 North 31st Avenue, Phoenix, AZ; 9/21 start time 8 a.m.; 9/22 start time 8 a.m.; public comments 9/22 at 1 p.m.

For additional information, contact the Arizona State Office, 3707 North 7th Street, Phoenix, Arizona 85014–6563, telephone 602–650–0504.

California

Bakersfield District Resource Advisory Council, Holiday Inn Select, 801 Truxtun Avenue, Bakersfield, CA; 9/21 start time 8 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 1 p.m.

California Desert District Resource Advisory Council, BLM California Desert District Office, 6221 Box Springs Boulevard, Riverside, CA; 9/21 start time 8 a.m. (NOTE—this is a 1-day meeting); public comments 9/21 at 11:30 a.m.

Susanville District Resource Advisory Council, Lassen County Office of Education, 472–013 Johnstonville Road, Susanville, CA; 9/21 start time 8 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 1 p.m.

Ukiah District Resource Advisory Council, BLM Ukiah District Office, 2550 North State Street, Ukiah, CA; 9/21 start time 8 a.m.; 9/22 start time 8:30 a.m.; public comments 9/21 at 1 p.m.

For additional information, contact the California State Office, 2800 Cottage Way, E–2841, Sacramento, California 95825–1889, telephone 916–979–2835.

Colorado

Northwest Colorado Resource Advisory Council, Howard Johnson's 750 Horizon Drive, Grand Junction, CO; 9/21 start time 9 a.m.; 9/22 start time 8 a.m.; public comments 9/21 at 4 p.m., 9/22 at 2 p.m.

Southwest Colorado Resource Advisory Council, BLM Montrose District Office, 2465 South Townsend, Montrose, CO; 9/21 start time 9:30 a.m.; 9.22 start time 9 a.m.; public comments 9/21 at 3:30 p.m.

Front Range Resource Advisory Council, Pikes Peak Community College, Corporate Workforce and Economic Development Center, 100 W. Pikes Peak Avenue, Colorado Springs, CO; 9/21 start time 9 a.m.; 9/22 start time 8:30 a.m.; public comments 9/21 at 4 p.m.

For additional information, contact the Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215–7076, telephone 303–239–3671.

Idaho

Lower Snake River Resource Advisory Council, 9/21 at Boise State University, Micron Technology Center, 1910 University Drive, Boise, ID, until the Noon break; beginning at 2 p.m., 9/21, and for the remainder of the meeting, the Council will convene at the National Interagency Fire Center, 3833 S. Development Avenue, Boise, ID; 9/21 start time 9 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 1 p.m.

Upper Columbia-Salmon/Clearwater Resource Advisory Council, 9/21 at Idaho Panhandle National Forest Supervisor's Office, 3815 Schreiber Way, Coeur d'Alene, ID, until the Noon break; beginning at 1 p.m., 9/21, and for the remainder of the meeting, the Council will convene at the BLM Coeur d'Alene District Office, 1808 N. Third Street, Coeur d'Alene, ID; 9/21 start time 8 a.m.; 9/22 start time 8 a.m.; public comment 9/22 at 10:30 a.m.

Upper Snake River Resource Advisory Council, BLM Idaho Falls District Office, 1405 Hollipark Drive, Idaho Falls, ID; 9/21 start time 9 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 2:15 p.m.

For additional information, contact the Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, telephone 208–384–3013.

Montana

Lewiston District Resource Advisory Council, Lewistown Elks Club, Country Club Road, Lewistown, MT; 9/21 start time 8 a.m.; 9/22 start time 8 a.m.; public comments 9/22 at 3 p.m.

Miles City District Resource Advisory Council, 9/21 at Miles Community College, 2600 Dickinson, Miles City, MT, until the Noon break; beginning after lunch 9/21 and for the remainder of the meeting, the Council will convene at the BLM Miles City District Office, Garryowen Road, west of Miles City, MT; 9/21 start time 9:30 a.m.; 9/22 start time 8 a.m.; public comments 9/22 at 2 p.m.

Butte District Resource Advisory Council, Montana Tech of the University of Montana, Big Butte/Highlands Rooms, Student Union Building, 1300 W. Park Street, Butte, MT; 9/21 start time 9 a.m.; 9/22 start time 9 a.m.; public comments 9/22 at 1 p.m.

For additional information, contact the Montana State Office, 222 N. 32nd Street, P.O. Box 36800, Billings, Montana 59107–6800, telephone 406–255–2913.

North Dakota

Dakotas District Resource Advisory Council, 9/21 at Consolidated Telephone Cooperative, 507 South Main Street, Dickinson, ND, until the Noon break; beginning at 1:30 p.m., 9/21, and for the remainder of the meeting, the Council will convene at the Gate City Federal Savings Bank, 204 Sims Street, Dickinson, ND, 9/21 start time 8 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 2 p.m.

Nevada

Sierra front/Northwestern Great Basin Resource Advisory Council, BLM Nevada State Office, 850 Harvard Way, Reno, NV; 9/21 start time 8:30 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 2 p.m.

For additional information, contact the Nevada State Office, 850 Harvard Way, P.O. Box 12000, Reno, Nevada 89520–0006, telephone 702–785–6586.

New Mexico

New Mexico Resource Advisory Council, USDA Resource Conservation Building, 6200 Jefferson Street, N.E., Albuquerque, NM; 9/21 start time 8:30 a.m.; 9/22 start time 8:30 a.m.; public comments 9/22 at 9:30 a.m.

For additional information, contact the New Mexico State Office, 1474 Rodeo Drive, P.O. Box 27115, Santa Fe,

New Mexico 87502–0115, telephone 505–438–7514.

Oregon

Eastern Washington Resource Advisory Council, Southeastern Oregon Resource Advisory Council, and John Day-Snake Resource Advisory Council, Eastern Oregon State College, 1410 L Avenue, LaGrande, OR; 9/21 start time 8 a.m.; 9/22 start time 8 a.m.; public comments 9/21 at 3:30 p.m.

For additional information, contact the Oregon State Office, 1515 S.W. 5th Avenue, P.O. Box 2965, Portland, Oregon 97208–2965, telephone 503–952–6031.

Utah

Utah Resource Advisory Council, Salt Lake Community College, Calvin Hampton Technology Building, Room 325, 4600 South Redwood Road, Salt Lake City, UT; 9/21 start time 9 a.m.; 9/22 start time 8 a.m.; public comments 9/22 at 11 a.m.

For additional information, contact the Utah State Office, 324 South State Street, Suite 301, Salt Lake City, Utah 84111–2303, telephone 801–539–4021.

Wyoming

Wyoming Resource Advisory Council, Conference Complex of the Laramie County Community College, 1400 East College Drive, Cheyenne, WY; 9/21 start time 9 a.m. (NOTE—this is a 1-day meeting); public comments 9/21 at 4:30 p.m.

For additional information, contact the Wyoming State Office, 2515 Warren Avenue, Cheyenne Wyoming 82003, telephone 307–775–6011.

FOR FURTHER INFORMATION CONTACT: Chris Wood, Policy Analyst, Office of the Assistant Director for Resource Assessment and Planning, Bureau of Land Management, Room 5558, U.S. Department of the Interior, Washington, DC 20240, telephone (202) 208–7013, or Beverly Davis, Regulatory Management Team, Bureau of Land Management, Room 5617, U.S. Department of the Interior, Washington, DC 20240, telephone (202) 208–4864.

SUPPLEMENTARY INFORMATION: The purpose of the Councils is to advise the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with the management of the public lands. The Councils' responsibilities include providing advice to BLM regarding the preparation, amendment, and implementation of land use plans; providing advice on long-range planning and establishing resource management priorities; and assisting the BLM to identify State or regional standards for ecological health and guidelines for grazing.

Council members represent various industries and interests concerned with the management, protection, and utilization of the public lands. These include (a) holders of Federal grazing permits and representatives of energy and mining development, the timber industry, rights-of-way interests, off-road vehicle use, and developed recreation; (b) representatives of environmental and resource conservation organizations, archaeological and historic interests, and wild horse and burro groups; and (c) representatives of State and local government, Native American tribes, academia involved in the natural sciences, and the public at large.

Membership includes individuals who have expertise, education, training, or practical experience in the planning and management of public lands and their resources and who have a knowledge of the geographical jurisdiction of the respective Councils.

Dated signed: September 12, 1995.

Bruce Babbit,

Secretary of the Interior

BILLING CODE 4310–84–M

[NV–930–1430–01; N–42773]

Termination of Segregative Effect and Opening Order for Relinquishment of Airport Lease, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates the segregative effect of Airport Lease N–42773 in its entirety, and opens the land to appropriation under the public land laws, including mineral leasing laws, material disposal laws, and general mining laws, subject to valid existing rights.

EFFECTIVE DATE: September 15, 1995.

FOR FURTHER INFORMATION CONTACT: Mary Figarelle, Realty Specialist, Bureau of Land Management, Winnemucca District Office, 705 E. 4th St., Winnemucca, NV 89445 (702) 623–1500.

SUPPLEMENTARY INFORMATION: On October 29, 1985, the public lands described below were segregated from all other forms of appropriation pursuant to the Act of May 24, 1928 (49 U.S.C. 211–214) as amended by the Act of August 16, 1941 (55 Stat. 621).

Mount Diablo Meridian, Nevada

T. 44 N., R. 34 E.,

Sec. 18, E½W½.

The area described contains 20.66 acres more or less in Humboldt County.

On June 11, 1986, the subject lands were leased to the Humboldt Hunting Club in Kings River Valley for a period of 20 years. On March 28, 1994, the Humboldt Hunting Club submitted a notice of their intent to relinquish lease N–42773. On July 11, 1995 their relinquishment of Airport Lease N–42773, was accepted by the Bureau of Land Management. The segregation no longer serves any purpose.

At 7:30 a.m. on September 15, 1995 the above described land will become open to the operation of the general public land laws, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws, rules and regulations. The above described lands will become open to the mineral leasing laws, material disposal laws, and location under the United States mining laws. Appropriation of the land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: September 8, 1995.

Ron Wenker,

District Manager, Winnemucca.

BILLING CODE 4310–33–P

(NM–010–1430–01; NMNM 93823)

Notice of Proposed Withdrawal and Opportunity for Public Meeting; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes to withdraw 2,937.67 acres of public and non-public lands in Taos and Rio Arriba Counties to protect the riparian, scenic, and recreational values of the Embudo Canyon ACEC. This notice closes the land for up to 2 years from surface entry and mining.

DATES: Comments and requests for a public meeting must be received by December 14, 1995.

ADDRESS: Comments and meeting requests should be sent to the Albuquerque District Manager, BLM, 435 Montano Road N.E., Albuquerque, New Mexico 87107.

FOR FURTHER INFORMATION CONTACT: Lora Yonemoto, BLM, Taos Resource Area Office, (505) 758–8851.

SUPPLEMENTARY INFORMATION: On August 17, 1995, a petition was approved allowing the Bureau of Land Management to file an application to withdraw the following described public land and non-public land from settlement, sale, location, or entry under the general land laws, including the mining laws, subject to valid existing rights:

New Mexico Principal Meridian

T. 22 N., R. 10 E.,
  Sec. 1, NE¼.
T. 22 N., R. 11 E.,
  Sec. 5, lots 2 to 4, inclusive, NW¼, and N½SW¼;
  Sec. 6, N½.
T. 23 N., R. 10 E.,
  Sec. 36, S½NE¼ and SE¼.
T. 23 N., R. 11 E.,
  Sec. 27, lots 7 and 8, and SW¼;
  Sec. 28, S½S½;
  Sec. 29, S½SE¼;
  Sec. 31, S½;
  Sec. 32;
  Sec. 33, N½ and NW¼SW¼;
  Sec. 34, lot 5 and NW¼.

The area described, including both public and nonpublic lands, aggregate 2,937.67 acres in Taos and Rio Arriba Counties.

The purpose of the proposed withdrawal is to protect the riparian, scenic, and recreational values of the Embudo Canyon Area of Critical Environmental Concern.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Albuquerque District Manager of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Albuquerque District Manager within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meetings.

The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are licenses, permits, cooperative agreements, or discretionary land use authorizations of a temporary nature but only with the approval of an authorized officer of the Bureau of Land Management.

Dated: August 30, 1995.

Sue E. Richardson,

Acting District Manager.

BILLING CODE 4310–FB–P

Bureau of Reclamation

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms may be obtained by contacting Reclamation's clearance officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to Reclamation's clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1006–****), Washington, DC 20503, telephone 202–395–7340.

Title: Power Management Laboratory's Voluntary Customer Satisfaction Surveys: Implementation of Executive Order 12862.

OMB approval number: 1006–****.

Abstract: The Department of the Interior selected the Bureau of Reclamation to conduct a Power Management Laboratory, as a part of the National Performance Review, to provide ways to improve Reclamation's power program. One component will be voluntary customer satisfaction surveys conducted to obtain customer opinions, concerns, expectations, and evaluations specific to its power program.

Bureau form number: None.

Frequency: One time.

Description of respondents: Power Marketing Administrations (e.g., Bonneville Power Administration and Western Area Power Administration), preference power customers, environmental community, electric utility systems, reliability councils, project use power users, Federal and State agencies, and the general public.

Estimated completion time: 15 minutes.

Annual responses: 1,200.

Annual burden hours: 300.

Reclamation clearance officer: Marilyn Rehfeld, 303–236–0305, extension 459.

Dated: July 27, 1995.

Larry Schulz,

Acting Leader, Property and Office Services.

BILLING CODE 4310–94–M

Fish and Wildlife Service

Notice of Availability of a Draft Recovery Plan for the Cave Crayfish (Cambarus aculabrum) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for the Cave crayfish (*Cambarus aculabrum*). The cave crayfish is only known from two cave streams in Benton County, northwest Arkansas. One of the caves (Logan) is federally owned as part of the National Wildlife Refuge System while the other cave (Bear Hollow) is privately owned. The surrounding watershed and recharge area of both caves is in private ownership. This species is listed as endangered without critical habitat. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before November 30, 1995, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Jackson Field Office, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, Mississippi 39213. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Theresa Jacobson at the above address (601/965–4900).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The species considered in this draft recovery plan is *Cambarus aculabrum*. This cave crayfish inhabits streams and pools located in two Ozarkian solution channels (caves) in the Mississippian cherty-limestone Boone Formation of Benton county, Arkansas. Cave crayfish (troglobites) are highly specialized for living in stable cave environments with low light and low temperatures and as such are unable to cope with changes in their habitats that may be induced by human activities. The cave crayfish was listed as endangered in 1993 due to its limited distribution, with only two known populations containing a small number of individuals; its limited reproductive potential; the potential for take by humans; and threat of water quality degradation.

The objective of this proposed plan is reclassification of the cave crayfish to threatened status. Reclassification will be considered when the two known populations are self-sustaining and are protected to the degree that they are secure from present or foreseeable threats. Actions needed to reach this goal include: (1) protecting populations and habitat, (2) educating the public on sensitivity of groundwater and fauna to pollution, (3) monitoring populations and habitat, including water quality, (4) searching for additional populations, (5) studying species biology, and (6) monitoring and studying troglophilic competitors and predators (non-obligate cave inhabitants).

This Plan is being submitted for agency review. After consideration of comments received during the review period, it will be submitted for final approval.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 11, 1995.

Paul Hartfield,

Acting Field Supervisor.

BILLING CODE 4310–55–M

Notice to Extend the Public Comment Period for the Draft Environmental Impact Statement on the Proposed Water Rights Acquisition for Lahontan Valley Wetlands, Churchill County, Nevada

AGENCIES: U.S. Fish and Wildlife Service (lead agency); Nevada Division of Wildlife, U.S. Bureau of Reclamation, U.S. Bureau of Indian Affairs, U.S. Bureau of Land Management, U.S. Natural Resources Conservation Service, Naval Air Station—Fallon, Fallon Paiute-Shoshone Tribes, and Churchill County, Nevada (cooperators).

ACTION: Notice to extend the public comment period.

SUMMARY: This notice advises the public that the public comment period has been extended for an additional 30 days for the Draft Environmental Impact Statement (EIS) for Water Rights acquisition for Lahontan Valley Wetlands, Churchill County, Nevada.

DATES: Public comments on the Draft EIS are requested by October 20, 1995. This 30-day extension of the comment period provides the public a 90-day review period for the Draft EIS.

ADDRESSES: Written comments should be addressed to:

Project Leader, Stillwater National Wildlife Refuge, P.O. Box 1236, Fallon, NV 89407.

Copies of the Draft EIS may be inspected at the following locations:

Stillwater National Wildlife Refuge, 1000 Auction Road, Fallon, NV 89406
U.S. Fish and Wildlife Service, Refuge and Wildlife, 911 N.E. 11th Avenue, Portland, OR 97232
Churchill County Public Library, 553 South Maine St., Fallon, NV 89406
Nevada State Library and Archives, Reference Desk, 100 Stewart Street, Carson City, NV 89701
Reno Branch, Washoe County Public Library, 301 S. Center Street, Reno, NV 89501.

FOR FURTHER INFORMATION CONTACT:

Ron Anglin, Project Leader, or Gary Shellhorn, Stillwater National Wildlife Refuge, P.O. Box 1236, Fallon, NV 89407, (702) 423–5128.

Individuals desiring a copy of the draft EIS for review should immediately contact the above individuals. Copies have been sent to agencies and individuals who participated in the scoping process and to those people that requested to be added to the mailing list.

Dated: September 1, 1995.

Thomas J. Dwyer,

Acting Regional Director, Region 1, Fish and Wildlife Service.

BILLING CODE 4310–55–M

National Park Service

Santa Rosa Island Resources Management Plan; Channel Islands National Park, California; Intent to Prepare an Environmental Impact Statement

Summary: The National Park Service will prepare a Santa Rosa Island Resources Management Plan/Environmental Impact Statement (SRI–RMP/EIS) for Santa Rosa Island, Channel Islands National Park, California and is initiating the scoping process for this project. This notice is in accordance with 40 CFR 1501.7 and 40 CFR 1508.22, of the regulations of the President's Council on Environmental Quality for the National Environmental Policy Act of 1969, Public Law 91–190.

Background

This planning effort is intended to supplement and expand upon the parkwide Resources Management Plan, which was approved in 1994 and focused primarily on research, inventory/monitoring, and project needs. The primary objective of the current planning process is to prepare an RMP/EIS specific to Santa Rosa Island which analyzes and selects management actions to accomplish three primary objectives: (1) To conserve and restore rare plant and animal species, as well as the habitats upon which they depend, (2) to ensure that non-native plant species will not threaten restoration of rare species and their habitats, and (3) to ensure that management of non-native ungulates (e.g., cattle, deer, elk, horses) and island infrastructure (e.g., roads and culverts) will protect or recover riparian habitat and water quality sufficiently to ensure compliance with the Clean Water Act. In addition, since Santa Rosa Island has yet to be reviewed for suitability as wilderness (pursuant to the Wilderness Act and Public Law 96–199), all proposed management actions will be evaluated in terms of their impact on wilderness suitability.

Supplementary Information: Persons wishing to express concerns or provide information on the above management issues and proposed future management direction of Santa Rosa Island, Channel Islands National Park may address these to the Superintendent, Channel Islands National Park, 1901 Spinnaker, Ventura, California 93001. Public scoping sessions will be scheduled and additional information given via press release and notices distributed to area libraries. The first scoping session will be held in Fall, 1995 in Ventura, California. Questions or comments regarding this Notice of Intent or the final schedule and location of scoping sessions should be addressed to the Superintendent, either by mail or by telephone at 805/658–5700.

The responsible official is Stanley T. Albright, Field Director, Pacific West Area, National Park Service. The draft SRI–RMP/EIS is expected to be available for public review in Winter-Spring 1995–96.

Dated: September 1, 1995.

Stephen G. Crabtree,

Acting Field Director, Pacific West Area.

[FR Doc. 95–22941 Filed 9–15–95; 8:45 am]

BILLING CODE 4310–70–P

Record of Decision for the General Management Plan/Final Environmental Impact Statement, Lake Chelan National Recreation Area, Washington

ACTION: Ntoice of Approval of Record Decision.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Public Law 91–190, as amended) and the regulations promulgated by the Council on Environmental Quality in 40 CFR 1505.2, the National Park Service has approved the Record of Decision for the General Management Plan/Final Environmental Impact Statement for Lake Chelan National Recreation Area, Washington. The National Park Service will implement the proposed action as described in the Final Impact Statement.

DATES: The Record of Decision was recommended by the Superintendent of North Cascades National Park Service Complex, concurred by the Deputy Field Director, Pacific West Area, and approved by the Field Director, Pacific West Area, on August 30, 1995.

ADDRESSES: Inquiries regarding the Record of Decision or the Environmental Impact Statement should be submitted to the Superintendent, North Cascades National Park Service Complex, 2105 Highway 20, Sedro Woolley, WA 98284–9314; telephone: (360) 856–5700.

SUPPLEMENTARY INFORMATION: The text of the Record of Decision follows: The Department of the Interior, National Park Service, has prepared this Record of Decision on the Final Environmental Impact Statement (EIS) for the General Management Plan for Lake Chelan National Recreation Area, Washington. This Record of Decision is a statement of the decision made, the background of the project, other alternatives considered, the basis for the decision, the environmentally preferable alternative, measures to minimize environmental harm, and public involvement in the decision making process.

Decision (Selected Action)

The National Park Service will implement the proposed action as described in the Final Environmental Impact Statement.

The National Park Service will manage visitor and resident use of the recreation area's resources in order to preserve the natural, scenic and cultural values of the area. The rustic setting of Lake Chelan National Recreation Area will be part of the transition from the downlake, primarily recreational and residential setting, to the wild and natural North Cascades National Park.

The National Park Service will not manipulate the Stehekin river or its tributaries except to protect public roads and bridges. Woody debris could be trimmed or turned in the lower 9 miles of the Stehekin River to allow safer recreational use of the river for rafting, kayaking, and canoeing if it did not alter the function or stability of woody debris accumulations and was permitted by the appropriate regulatory agency. The Park Service will not remove woody debris from the river system except to protect public roads and bridges. The Park Service will discourage private landowners from manipulating the Stehekin River or removing woody debris. The active sand, rock, and gravel borrow pit will be maintained at less than or equal to its current size; no new borrow pits will be opened, and abandoned borrow pits will be restored. Gravel will be sold to the public at fair market value, with restrictions.

Fire suppression, prescribed natural fire, management-ignited prescribed fire, and selective manual fuel reductions will be used to improve wildland fire protection for human life and property and to manage for late-succession stage in ponderosa pine/Douglas fir forest. The practice of woodlot cutting for firewood will be phased out. When available, firewood will be provided from administrative sources, at fair market value.

The Golden West Lodge and the High Bridge Historic District will be rehabilitated and the Buckner homestead and orchard will be preserved. The airstrip will be operated under a special use permit with the Washington State Department of Transportation for private, noncommercial use. Some NPS and concession housing, maintenance, and related facilities will be consolidated beside the airstrip.

The Stehekin Valley road between the Landing and Harlequin Bridge will remain a two-lane paved road; from Harlequin Bridge to 9-Mile, it will become a single-lane, paved road with pullouts; from 9-Mile to High Bridge, a single-lane, gravel road; and from High Bridge to Cottonwood, a high-clearance, shuttle vehicle road. Unconstrained private vehicle use will end at High Bridge. Private vehicle use from High Bridge to Bridge Creek will be allowed, but traffic flow will be regulated. Public shuttle service will be provided from the Landing to Cottonwood. Only the public shuttle service, hikers, horses, and bicycles will be allowed from Bridge Creek to Cottonwood. Company Creek road will be maintained in its current alignment, and will be protected from river erosion at two locations. Stehekin Landing will be redesigned to improve visitor flow and parking, and to relocate lodging and other facilities away from geohazards. The current capacity of concession services for food and lodging will increase somewhat.

Land protection will emphasize high flood influence areas, wetlands, riparian areas, and high visual sensitivity areas.

Background of the Project

Preparation of the EIS was required by a consent decree entered in U.S. District Court, Western District of Washington, on April 22, 1991. The consent decree specified actions for resolving the dispute between the plaintiff, North Cascades Conservation Council, and defendants in the U.S. Department of the Interior. The consent decree resulted from a law suit filed by the North Cascades Conservation Council (Civil Case No. C–89–1342D). This Record of Decision is the last necessary action under the National Environmental Policy Act regulations regarding the consent decree.

Other Alternatives Considered

Four other alternatives to the selected action were considered. Under the no action alternative, the recreation area would be a rural resort community where resources are used, within limits, by an expanding residential presence. This alternative was the 1988 General Management Plan and supporting implementation plans.

Under alternative A, the area would be a wild, natural area where resources and natural processes would be largely undisturbed; natural forces would be allowed to slowly remove evidence of human occupation. The Stehekin River would not be manipulated, mining gravel would not be allowed, prescribed fire would be used to manage wildland fire risk, select cultural properties would be protected, the airstrip closed, and all roads restored to natural conditions as private property was acquired.

Under alternative B, the area would be a rural, woodland gateway to the North Cascades; use of resources by visitors and residents would be limited in order to preserve natural, scenic, and cultural values. Some river manipulation would be allowed, mining gravel would not be allowed, wildland fire protection and cultural resource management would be similar to the selected action, the airstrip closed, and roads would be similar in character to existing conditions.

Under alternative C, the area would be a retreat/refuge/resort where resources and natural processes are showcased for the enjoyment of visitors. All existing public and private improvements would be protected from river erosion, gravel mining would be maintained and expanded if necessary, wildland fire protection would be augmented using selective manual thinning, all cultural properties would be rehabilitated or preserved, the airstrip used for emergency landings only, and roads would be similar in character to existing conditions.

Basis for Decision

As presented in the final EIS, the National Park Service's management objectives are numerous. Twenty seven individual objectives are identified, from natural resource management to land use and development. After evaluation of public comments on the alternatives presented in the draft EIS, the selected action best balances the statutory mission of the National Park Service to provide long term resource preservation while allowing for appropriate levels of visitor use and appropriate means of visitor enjoyment. The selected action provides for projected growth in visitation through the year 2007, while complying with provisions of law under the Endangered Species Act, National Historic Preservation Act, and Wilderness Act; policies of the National Park Service; the recreation area's purpose based on its enabling legislation; constraints imposed on the area's management under the same legislation; and the protection of its significant resources.

Environmentally Preferable Alternative

A Record of Decision must identify the environmentally preferable alternative, which is that alternative which causes the least damage to the biological environment, and that best protects, preserves, and enhances resources. With its emphasis on preservation of the natural ecosystem of the valley, alternative A is the environmentally preferable alternative.

Measures to Minimize Environmental Harm

All practicable measures to avoid or minimize environmental impacts that could result from implementation of the selected action have been identified and incorporated into the selected action. These include protection of high flood influence areas, wetlands, riparian areas, and high visual sensitivity areas; protection of threatened, endangered and rare species; protection of properties eligible for listing on the National Register of Historic Places; and the restoration of wetlands, disturbed sites in the river corridor, abandoned gravel pits, woodlots, old fairways, and road segments. The NPS would not manipulate natural river dynamics except, under certain conditions, to protect roads and bridges.

Additional mitigating measures are identified in the implementation plans associated with the EIS. The implementation plans completed or amended in this EIS are the Sand, Rock, and Gravel Plan; Forest Fuel Reduction / Firewood Management Plan; Wilderness Management Plan; Transportation Plan; Stehekin Landing and Valley Development Concept Plans; and the Land Protection Plan. The environmental impacts of these plans were presented in the final EIS, by impact topic, on pages 274 through 315. Impacts from these plans are incorporated into the impact analysis sections for each of the 13 impact topics. A range of management options for each of the implementation plans was integrated into each of the five alternatives considered in the EIS.

Mitigating and monitoring measures in the implementation plan follow.

Sand, Rock, and Gravel Plan: mining will only occur at the Company Creek borrow pit; this pit will be reclaimed as new mining occurs; sand, rock, and gravel will be conserved and recycled whenever possible; except for emergencies, the use of sand, rock, and gravel from the Company Creek pit will be limited to 1400 cubic yards per year—1200 cubic yards for NPS use and 200 cubic yards for private use; material beyond this limit or for new construction will be imported; material will be used only for maintenance activities listed in the plan; the reclaimed portions of the pit will be topsoiled, fertilized, seeded, and planted with plant stocks indigenous to Stehekin; the working face of the pit will be temporarily covered with native grasses; the pit will be monitored before, during, and after active mining operations to identify sensitive resources, to ensure that operations minimize impacts, and to see that reclamation goals are met; the Rainbow Creek gravel pit will be actively reclaimed including topographic restoration, surface erosion control, nonnative species control, soil building, revegetation, plant irrigation, and monitoring; continued natural recovery at all other abandoned pits will be monitored.

Forest Fuel Reduction/Firewood Management Plan: data from forest stand examinations in the forest fuel reduction areas, and in control plots, will be used as baseline information for monitoring forest changes through time; thirteen attributes, as identified in the plan, will be monitored using the NPS's Fire Monitoring Handbook in order to document the effects of manual thinning and firewood administration activities; except for two transitional woodcutter areas, no woodcutting or manual thinning will occur within any forest fuel reduction area until monitoring plots are established and measured; program effectiveness will be reviewed every five years; during woodcutting, soil compaction will be minimized by limiting skid trails, not allowing vehicle access by woodcutters, and hand raking tire/track ruts; stumps will be flush-cut and slash placed over them; the existing harvested woodlots, and associated access roads, will be rehabilitated; the Stehekin Landing, after mistletoe control and hazard fuel reduction work, will also be rehabilitated; as manual thinning is completed, old roads and log decks will be closed and rehabilitated including eight old road segments; revegetation will include mechanical ripping and recontouring soil, adding mulch, and scattering native plant seeds, litter, and coarse woody debris; if significant revegetation is not observed within five years, native seedlings may be planted.

Wilderness Management Plan: the maximum backcountry party size in the NRA is six pairs of eyes (human or stock) in crosscountry areas, and 12 pairs of eyes otherwise; the existing commercial stock user may exceed this limit at historic levels (up to 30 pairs of eyes, four to six times per year); no oversized parties are allowed at Juanita Lake camp (12 pairs of eyes maximum); open campfires and gathering firewood in subalpine zones (and some other sensitive areas) is prohibited; grazing in the NRA is permitted only at three areas currently used—Rainbow Meadow, Hidden Lake, and Juanita Lake basin; grazing is prohibited within 0.25 mile of Juanita Lake; all grazing will be regulated by monitoring soil moisture conditions, and will be restricted to the dry period of the summer which generally begins about July 15th; otherwise, only certified, weed-free, processed feed is allowed.

Transportation Plan: between Harlequin Bridge and 9-Mile, the road will be paved and reduced to a single-lane (12–14 feet wide) with pullouts; the sides of gravel roads that have become excessively wide will be rehabilitated; unconstrained private vehicle use will end at High Bridge; private vehicle use from High Bridge to Bridge Creek will be regulated by season an/or hour of day; only the public shuttle service, hikers, horses, and bicycles will be allowed to use the road from Bridge Creek to Cottonwood; the road from High Bridge to Cottonwood will be maintained to sustain heavy-duty, high-clearance shuttle vehicles; erosion control systems along the upper Company Creek road will be removed and replaced, designed to keep the road from eroding during frequently recurring flood events (i.e., 10- to 25-year recurrence interval), and will be made from rock, soil, and native vegetation; public roads will be protected in active river erosion zones only if (1) there are no feasible alternatives, (2) funds are available, (3) the actions will have less impacts than other alternatives, and (4) the action are permitted by county, state, and other federal agencies; snowmobile use will be limited to existing roads below High Bridge; the airstrip will be retained and operated under a special use permit for noncommercial public use on a "use at your own risk" basis; the Washington State Department of Transportation, Aeronautics Division (the Division) will keep the airstrip and approaches equipped and maintained in accordance with requirements for state-operated emergency airstrips; there will be no expansion of the permitted area beyond that identified in the current permit; camping will not be permitted within the permit area; the Division will be required to prepare a plan and conduct noxious weed control measures within the area under permit, as approved by the NPS; an annual maintenance and operating plan will be prepared by the Division and submitted for review and approval by the NPS.

Stehekin Landing and Valley Development Concept Plan: the "outpost community" image of the area will be encouraged using the Architectural Character Guidelines; the Golden West Lodge and High Bridge Historic District will be rehabilitated following the Secretary of the Interior Standards for the Treatment of Historic Properties; the Buckner homestead and orchard will be preserved, and items associated with the farming operation will be restored on a priority basis, if owned by the NPS; the genetic stock of the Buckner orchard will be maintained; the natural character of public lands within 200 feet of the lake and river shoreline will be restored; NPS structures will be removed from the shoreline, where appropriate, and no new NPS structures will be constructed on the shoreline; the "fairways" will be restored to natural conditions as appropriate; all abandoned vehicles will be removed from public lands; unnecessary powerlines will be removed and all others will be buried where appropriate, especially in areas with high visitor use; some campsites at Weaver Point Campground will be moved back from the shoreline; at the Landing, as the useful lives of existing structures are approached, new lodging facilities, grocery, and post office will be built away from geohazards, and existing facilities will be demolished and their sites restored; the current NPS headquarters building will be removed; the NPS will provide boat sewage disposal at no cost; visitors will be encouraged to use nonmotorized transportation through rental services.

Land Protection Plan: incompatible uses of private property are (1) any subdivision of land that was not in effect prior to this Record of Decision, except as permitted through the Chelan County Subdivision Regulations and as consistent with Chelan County health standards, (2) the siting or construction of any building in an identified high flood influence area, wetland, riparian area, or highly unstable area, e.g., slopes greater than 20%, where potential impacts cannot be confined to the specific private ownership, (3) any dredging or filing of Lake Chelan or the Stehekin River without full compliance with the U.S. Army Corps of Engineers permitting process and/or appropriate authorization from the state, (4) the cutting of timber for sale or transport outside the Stehekin valley, (5) the cutting of timber by any means other than selective tree harvesting except as required by Washington State Department of Natural Resources regulations, and (6) the mining of sand, rock, or gravel for sale or transport outside the Stehekin valley; the NPS will not site any new building or structure in (1) the 100-year floodplain, unless used for nonhuman occupancy and with conditions on specific uses or mitigation, (2) wetland soils, and those soils not conducive to building foundations, leachfield percolation, or

site drainage, (3) geohazard areas, (4) areas with slopes greater than 20% and (5) areas of high visual sensitivity, except where specific design mitigation can successfully be used; ensure that applicable laws and policies of the state of Washington are followed, including health and safety regulations and Washington Growth Management Act provisions; continue willing buyer/willing seller acquisitions for properties with areas that have a high priority for resource protection, or for which public needs have been identified; emphasize opportunities for easement purchases and other less-than-fee interests for resource protection and public use.

The conclusion on impacts to the northern spotted owl in the final EIS is modified by this Record of Decision. After formal consultation with the U.S. Fish and Wildlife Service (FWS), it is the biological opinion of the FWS that the impacts from the General Management Plan for Lake Chelan NRA are not likely to jeopardize the continued existence of the threatened northern spotted owl. Incidental take of one pair of spotted owls or resident single owl is anticipated. The FWS concurs with the NPS determinations that the General Management Plan for Lake Chelan NRA will have "no effect" on the bald eagle and peregrine falcon and will "beneficially affect" the gray wolf, and "may affect," but will "not likely" "adversely affect," the grizzly bear.

Public Involvement

Public comment has been requested, considered and incorporated into the planning process during four major planning stages, and has also been considered in numerous other ways. Initial public scoping meetings were held in June 1991, in Stehekin, Chelan and Seattle. Public comment was again requested on the primary data set used in planning in April 1933; in a preliminary alternatives document distributed in May 1993; and in public hearings on the draft EIS in October 1994. Additionally, four newsletters were distributed during the planning process, including an extensive data summary booklet. Consultation was also completed with the U.S. Fish and Wildlife Service, the Advisory Council on Historic Preservation, the Washington State Historic Preservation Office, and Native American tribes.

About 750 copies of the draft EIS were distributed. Written comments were accepted for 60 days, and over 1000 comment letters or testimonies were recorded. Responses to substantive comments on the draft EIS were published in Volume II of the final EIS, distributed in July 1995. All substantive comments were addressed by either providing clarification of information, modifying the test, or directly responding in the final EIS.

Dated: September 7, 1995.

Rory D. Westberg,

Acting Deputy Field Director, Pacific West Area, National Park Service.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

Agricultural Cooperative Notice to the Commission of Intent to Perform Interstate Transportation for Certain Nonmembers

The following Notice was filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. The rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interstate transportation must file the Notice, Form BOP–102, with the Commission within 30 days of its annual meeting each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, D.C. 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C.

(1) MFA Incorporated.

BILLING CODE 7035–10–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 95–24]

Carmencita E. Galloza, M.D.; Revocation of Registration

On March 7, 1995, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Carmencita E. Galloza, M.D. (Respondent), of Paintsville, Kentucky. The Order to Show Cause proposed to revoke Respondent's DEA Certificate of Registration, AG9685162, under 21 U.S.C. 824(a) (3), (4) and (5) and deny any pending applications for renewal of such registration under 21 U.S.C. 823(f).

Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause, and the matter was placed on the docket of Administrative Law Judge Mary Ellen Bittner. On April 21, 1995, the Government filed a motion for summary disposition, alleging that Respondent was not authorized to handle controlled substances in the Commonwealth of Kentucky. On May 1, 1995, Respondent responded to the Government's motion, arguing that her medical license had only been temporarily suspended by the Board, and that any action by DEA should be delayed until the Board holds an evidentiary hearing regarding Respondent's medical license.

On May 10, 1995, in her opinion and recommended decision, the administrative law judge granted the Government's motion for summary disposition and recommended that Respondent's DEA Certificate of Registration be revoked and that any pending applications for registration be denied. On May 25, 1995, Respondent filed exceptions to the opinion and recommended decision of the administrative law judge. On June 12, 1994, the administrative law judge transmitted the record to the Deputy Administrator. The Deputy Administrator has carefully considered the entire record in this matter and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The administrative law judge found that the Government's motion for summary disposition alleged that Respondent is not authorized to handle controlled substances in Kentucky. The Government's motion was based on the Kentucky Board of Medical Licensure's January 19, 1995, Order of Temporary

Suspension of Respondent's medical license. The administrative law judge also found that Respondent's response to the Government's motion did not deny that her state license has been temporarily suspended. The administrative law judge therefore concurred with the Government's motion regarding Respondent's lack of state authorization to handle controlled substances in Kentucky.

The Drug Enforcement Administration cannot register or maintain the registration of a practitioner who is not duly authorized to handle controlled substances in the state in which he conducts his business. 21 U.S.C. 802(21), 823(f) and 824(a)(3). This prerequisite has been consistently upheld. *See James H. Nickens, M.D.*, 57 FR 59847 (1992); *Elliott Monroe, M.D.*, 57 FR 23246 (1992); *Bobby Watts, M.D.*, 53 FR 11919 (1988).

The administrative law judge properly granted the Government's motion for summary disposition. It is well-settled that when no question of fact is involved, or when the facts are agreed upon, a plenary, adversary administrative proceeding involving evidence and cross-examination of witnesses is not obligatory. The rationale is that Congress does not intend administrative agencies to perform meaningless tasks. *Philip E. Kirk, M.D.*, 48 FR 32887 (1983), *aff'd sub nom Kirk v. Mullen*, 749 F.2d 297 (6th Cir. 1984); *Alfred Tennyson Smurthwaite, N.D.*, 43 FR 11873 (1978; *see also, NLRB v. International Association of Bridge, Structural and Ornamental Ironworkers, AFL–CIO*, 549 F.2d 634 (9th Cir. 1977); *United States v. Consolidated Mines and Smelting Co., Ltd.*, 455 F.2d 432, 453 (9th Cir. 1971).

In her exceptions to the opinion and recommended decision of the administrative law judge, the Respondent argued, *inter alia*, that: her state medical license had been temporarily suspended; DEA does not possess the authority to suspend or revoke Respondent's DEA registration pursuant to 21 U.S.C. 824(a)(3) under the circumstances of this case; and, the administrative law judge exceeded her authority by recommending revocation of Respondent's DEA registration without affording Respondent a hearing.

The Respondent acknowledged in her exceptions that she is temporarily suspended from the practice of medicine in the Commonwealth of Kentucky. The action taken by the Board in suspending Respondent's state license to practice medicine has rendered the Respondent without authorization to handle controlled substances in the jurisdiction in which she maintains her DEA registration. As outlined above, DEA cannot register the Respondent to handle controlled substances without such authority, and therefore, the administrative law judge's recommendations in this matter were appropriate. As a result, the Deputy Administrator finds that there is no need to address the remaining arguments as set forth in Respondent's exceptions.

Moreover, since Respondent is not currently authorized to handle controlled substances in the Commonwealth of Kentucky, it is not necessary to reach a conclusion regarding the other grounds for revocation alleged in the Order to Show Cause. The Deputy Administrator hereby adopts the opinion and recommended decision of the administrative law judge in its entirety.

Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) and 0.104, hereby orders that DEA Certificate of Registration, AG9685162, previously issued to Carmencita E. Gallosa, M.D., be, and it hereby is, revoked, and that any pending applications for renewal of such registration be, and they hereby are, denied. This order is effective October 16, 1995.

Dated: September 8, 1995.

Stephen H. Greene,

Deputy Administrator.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, DC this 8th Day of September 1995.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510–27–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–293]

Pilgrim Nuclear Power Plant; Notice of Withdrawal of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request by Boston Edison Company (the licensee) to withdraw its November 22, 1995, application for an amendment to Facility Operating License No. DRP–35, for the operation of the Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on February 1, 1995, (95 FR 6297).

The purpose of the licensee's amendment request was to revise the Technical Specifications to increase the emergency diesel generator allowed out-of-service time from 72 hours to 7 days.

Subsequently, the licensee informed the staff that the amendment would be integrated with proposed changes to the Containment Cooling System and resubmitted at a later date. Thus, the amendment application is considered to be withdrawn by the licensee.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the Local Public Document Room located at the Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Dated at Rockville, Maryland, this 8th day of September 1995.

For the Nuclear Regulatory Commission.

Ronald B. Eaton,

Senior Project Manager, Project Directorate I–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22995 Filed 9–14–95; 8:45 am]

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Request for Extension of Approval Under the Paperwork Reduction Act; Collection of Information Under 29 CFR Part 2647, Reduction or Waiver of Complete Withdrawal Liability

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval.

SUMMARY: The Pension Benefit Guaranty Corporation has requested that the Office of Management and Budget extend approval, under the Paperwork Reduction Act, of the collection of information requirements (1212–0044) contained in its regulation on Reduction or Waiver of Complete Withdrawal Liability (29 CFR Part 2647). The effect of this notice is to advise the public of the PBGC's request.

DATES: Th PBGC is requesting that OMB complete action on the PBGC's request by September 29, 1995. Comments must be received by September 25, 1995.

ADDRESSES: All written comments should be addressed to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Pension Benefit Guaranty Corporation, Washington, DC 20503. The request for extension will be available for public inspection at the PBGC's Communications and Public Affairs Department, Suite 240, 1200 K Street, NW., Washington, DC 20005–4026, between 9:00 a.m. and 4:00 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005–4026, 202–326–4024 (202–326–4179 for TTY and TDD).

SUPPLEMENTARY INFORMATION: This collection of information is contained in the Pension Benefit Guaranty Corporation's regulation on Reduction or Waiver of Complete Withdrawal Liability (29 CFR Part 2647), which is promulgated pursuant to section 4207 of the Employee Retirement Income Security Act of 1974. Section 4208 authorizes the Pension Benefit Guaranty Corporation to promulgate rules for the reduction or elimination of an employer's complete withdrawal liability.

Under the regulation, a contributing employer can apply to a multiemployer plan for a determination that it has met the requirements for abatement of complete withdrawal liability, and a multiemployer plan sponsor can apply to the PBGC for approval of individually-tailored plan rules for abatement of complete withdrawal liability. The PBGC uses information submitted to it to determine whether plan rules satisfy statutory standards.

The PBGC estimates that the total annual burden of the regulation is 125½ hours. Of this total, 125 hours represents 100 employer abatement applications and plan responses and one-half hour represents a submission to the PBGC by one plan sponsor.

Issued at Washington, DC., this 12th day of September, 1995.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36207; File No. SR–CBOE–95–38]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment Nos. 1, 2, and 3 to the Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to the Listing of Warrants Based on the CBOE Technology 50 Index

September 8, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on August 1, 1995, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The CBOE subsequently filed Amendment No. 1 to the proposed rule change on August 2, 1995,[2] Amendment No. 2 on August 3, 1995,[3] and Amendment No. 3 on August 29, 1995.[4] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes list and trade warrants on the CBOE Technology 50 Index ("Tech 50 Index" or "Index"), which the Exchange represents is a broad-based index. The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Section (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to permit the Exchange to list and trade cash-settled index warrants based on the Tech 50 Index ("Index Warrants"). On August 29, 1995, the Commission approved the Exchange's proposal to amend its standards for the listing and trading of currency warrants and index warrants ("Generic Warrant Listing Standards").[5] The Exchange states that the listing and trading of warrants based on the Tech 50 Index will comply in all respects with the Generic Warrant Listing Standards.

Index Design

The Exchange represents that the Tech 50 Index is a broad-based index comprised of stocks of 50 of the largest domestic technology companies, representing various industries within that general economic category. The Index was designed by and will be maintained by the CBOE. The Index is price-weighted and reflects changes in the prices of the component stocks relative to the Index base date, January 3, 1995, when the Index was set to an initial level of 200.00.

On August 15, 1995,[6] the 50 stocks in the Index ranged in market capitalization from a low of approximately $829.28 million to a high of approximately $82.47 billion. Total market capitalization for the Index on August 15, 1995, was approximately $578.53 billion. The highest weighted stock in the Index on that date accounted for 5.62% of the weight of the Index and the lowest weighted security in the Index accounted for 0.68% of the weight of the Index. In aggregate, the five highest weighted components on that date accounted for 21.45% of the weight of the Index. Currently, the Exchange represents that all of the component stocks are eligible for the listing of standardized options on the Exchange pursuant to CBOE Rule 5.3.

As of August 15, 1995, the Exchange represents that the industry breakdown for the Index, by weight, was as follows: (1) computer hardware—8.20%; (2) computer software—14.63%; (3) computers systems and services—11.12%; (4) integrated circuit components—10.43%; (5) semiconductors—12.66%; (6) precision instrumentation—3.15%; (7) medical technology—8.74%; (8) network and server systems—10.14%; (9) telecommunication components—12.62%; and (10) telecommunications—8.31%.[7]

Warrant Terms

Index Warrants will be direct obligations of the issuing entity and will be cash-settled in U.S. dollars. Upon exercise (or at the warrant expiration date in the case of warrants with European-style exercise), the holder of an Index Warrant structured as a "put" will receive payment in U.S. dollars to the extent that the value of the Index has declined below a pre-stated cash settlement value. Conversely, upon exercise (or at the warrant expiration date in the case of warrants with European-style exercise), the holder of an Index Warrant structures as a "call" will receive payment in U.S. dollars to the extent that the Index value has increased above a pre-stated cash settlement value. Index Warrants that are out-of-the-money at the time of expiration will expire worthless.

---

[1] 15 U.S.C. § 78s(b)(1) (1988).

[2] As a result of the Commission's approval of the Exchange's Generic Warrant Listing Standards (as defined herein), Amendment No. 1 has been rendered moot.

[3] In Amendment No. 2, as discussed herein, the CBOE amended certain of the objective standards set forth in the section of its proposal entitled "Classification of the Index as Broad-Based." *See* Letter from Timothy Thompson, Senior Attorney, Legal Department, CBOE, to Michael Walinskas, Branch Chief, Office of Market Supervision ("OMS"), Division of Market Regulation ("Division"), Commission, dated August 3, 1995 ("Amendment No. 2").

[4] In Amendment No. 3, as discussed herein, the Exchange amended the composition of the Index to, in the Exchange's opinion, provide better balance between the technology industry subsectors represented in the Index. *See* Letter from William Speth, Jr., Senior Research Analyst, Research Department, CBOE, to Brad Ritter, Senior Counsel, OMS, Division, Commission, dated August 29, 1995 ("Amendment No. 3").

[5] *See* Securities Exchange Act Release No. 36169 (August 29, 1995).

[6] *See* Amendment No. 3, *supra* note 4.

[7] *Id.*

Maintenance of the Index

The Index will be maintained by the Exchange and will be reviewed monthly.[8] The CBOE may change the composition of the Index at any time to reflect changes affecting the components of the Index or the various technology industry subsectors represented in the Index. If it becomes necessary to remove a stock from the Index (*e.g.*, because of a takeover or merger), the CBOE will take into account the capitalization, liquidity, volatility, and name recognition of any proposed replacement security.[9]

The Exchange intends to maintain the Index with 50 components, however, the Exchange may increase the number of components in the Index by up to 33%, *i.e.*, 66 stocks.[10]

Calculation and Dissemination of the Value of the Index

The Index value will be calculated by the CBOE or its designee on a real-time bases using last-sale prices, and will be publicly disseminated[11] every 15 seconds. If a component stock is not currently being traded, the most recent price at which the stock traded will be used in the Index value calculation. The value of the Index as of the close of trading on July 17, 1995, was 335.10.

The Index is price-weighted and reflects changes in the prices of the component stocks relative to the base date of January 3, 1995, when the Index was set to an initial value of 200.00. Specifically, the Index value is calculated by adding the prices of the component stocks and then dividing this sum by the Index divisor.[12] The Index divisor is adjusted to reflect non-market changes in the prices of the component securities as well as changes in the composition of the Index. Changes that may result in divisor changes include, but are not limited to, stock splits and dividends (other than ordinary cash dividends),[13] spin-offs, certain rights issuances, and mergers and acquisitions.

Classification of the Index as Broad-Based[14]

The CBOE has designed the Index to meet certain objective criteria which it believes are appropriate to classify the Index as broad-based. To ensure that the Index remains representative of a broad spectrum of the various high technology industries and that stocks with low trading volumes are not included in the Index, the Exchange chose the current components and will maintain the Index according to the following guidelines: (1) Each underlying security selected for inclusion in the Index must have an average daily trading volume of at least 75,000 shares during the preceding six months; (2) each underlying security included in the Index must maintain an average daily trading volume of at least 50,000 shares during the preceding six months;[15] (3) no underlying security will represent more than 15% of the total weight of the Index; (4) the five most heavily weighted securities in the Index will not represent more than 40% of the total weight of the Index; (5) the Index will be comprised of at least ten technology industry subsectors representing a total of no less than 50 underlying securities; and (6) at least 75% of the total weight of the Index will be represented by underlying securities that are eligible for the listing of standardized options pursuant to CBOE Rule 5.3. The Exchange will conduct semi-annual reviews of the underlying securities included in the Index to assure that the Index continues to meet the standards set forth above. The Exchange represents that the above guidelines are similar to the requirements set forth in Interpretation .01 to Rule 7.3 of the Pacific Stock Exchange ("PSE") regarding the designation of the PSE's High Technology Index as a broad-based index for purposes of the trading of standardized options.

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act in general and with Section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation with persons engaged in facilitating and clearing transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. §552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to SR–CBOE–95–38 and should be submitted by October 6, 1995.

---

[8] These reviews are mainly for the purpose of determining whether to make composition changes to the Index. These monthly reviews generally are not for the purpose of applying the proposed objective standards for ensuring that the Index remains broad-based (*see* "Classification of the Index as Broad-Based," *infra*). Telephone conversation among Timothy Thompson, Senior Attorney, Legal Department, CBOE, Eileen Smith, Director, Product Department, Research Department, CBOE, and Brad Ritter, Senior Counsel, OMS, Division, Commission, on August 3, 1995 ("August 3 Conversation").

[9] Whenever a new component is added to the Index, the CBOE will apply those objective standards proposed for ensuring that the Index remains broad-based (*see* "Classification of the Index as Broad-Based," *infra*) that could be affected by the addition of a new component security to the Index. Telephone conversation between Timothy Thompson, Senior Attorney, Legal Department, CBOE, and Brad Ritter, Senior Counsel, OMS, Division, Commission, on August 4, 1995 ("August 4 Conversation").

[10] The Commission notes that the Exchange will be required to distribute a circular to members notifying them of any change in the components of the Index. Further, if the Exchange determines to maintain the Index with some number of components other than 50, the Exchange will be required to change the name of the Index. In such an event, the Exchange should immediately notify the Commission to determine whether a rule filing pursuant to Section 19(b) of the Act will be required.

[11] *See* August 3 Conversation, *supra* note 8.

[12] As of August 15, 1995, the share prices of the Index components ranged from a high of $158.13 to a low of $19.00. *See* Amendment No. 3, *supra* note 4.

[13] *See* August 3 Conversation, *supra* note 8.

[14] *See* Amendment No. 2, *supra* note 3.

[15] *See* August 4 Conversation, *supra* note 9.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[16]

Margaret H. McFarland,

Deputy Secretary.

[Application No. 99000121]

Conrad/Collins Capital, Ltd.; Filing of an Application for a License To Operate as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to Section 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1995)) by Conrad/Collins Capital, Ltd., Plaza of the Americas, North Tower, 700 North Pearl, Suite 1910, Dallas, Texas 75201, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958, as amended, (15 U.S.C. et seq.), and the rules and regulations promulgated thereunder.

The initial investors and their percentage of ownership of the Applicant are as follows:

	Percentage of ownership
General Partners:	
Conrad/Collins Capital Partners, Ltd., 700 North Pearl, Dallas, Texas 75201	4.8
Limited Partners:	
Douglas A. Smith, 700 North Pearl, Dallas, Texas 75201	38.0
Brian A. Harpster, 700 North Pearl, Dallas Texas 75201	28.6
Edwin W. Ross, 700 North Pearl, Dallas, Texas 75201	19.0
Two other individuals shareholders none of which own more than 10 percent	9.6

Conrad/Collins Capital, Ltd. will be managed by Conrad/Collins Capital Partners, Ltd. which is owned equally by:

	Percentage of ownership
General Partners:	
Barry B. Conrad, 700 North Pearl, Dallas, Texas 75201	50
Floyd W. Collins, 700 North Pearl, Dallas, Texas 75201	50

The applicant will begin operations with a capitalization of $10,500,000 and will be a source of equity capital and long term funds for qualified small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including profitability and financial soundness in accordance with the Act and regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street SW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in Dallas, Texas.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

September 5, 1995.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms (BATF)

OMB Number: 1512–0058

Form Number: ATF F 5120.25 and ATF F 5120.36

Type of Review: Revision

Title: Application to Establish and Operate Wine Premises

Description: ATF F 5120.25 is the form used to establish the qualifications of an applicant for a wine premises. The applicant certifies the intention to produce and/or store a specified amount of wine and takes certain precautions to protect it from unauthorized use. The bond form is used by the proprietor and a surety company as a contract to ensure the payment of the wine excise tax.

Respondents: Business or other for-profit

Estimated Number of Respondents: 1,720

Estimated Burden Hours Per Respondent: 1 hour

Frequency of Response: On occasion

Estimated Total Reporting Burden: 810 hours

OMB Number: 1512–0144

Form Number: ATF F 2736 (5100.12) and ATF F 2737 (5110.67)

Type of Review: Revision

Title: Specific and Continuing Transportation Bond—Distilled Spirits and/or Wines Withdrawn for Transportation to Manufacturing Bonded Warehouse—Class Six

Description: These bonds protect the tax liability on distilled spirits and wine while in transit from one type of bonded facility to another. The bonds identify the shipment, the parties, the date, and the amount of the bond.

Respondents: Business or other for-profit

Estimated Number of Respondents: 1

Estimated Burden Hours Per Respondent: 1 hour

Frequency of Response: On occasion

Estimated Total Reporting Burden: 1 hour

OMB Number: 1512–0341

Recordkeeping Requirement ID Number: ATF REC 5150/8

Type of Review: Extension

Title: Stills: Notices, Registration, and Records

Description: The information collection requirement is used to account for and regulate the distillation of spirits. As there could be a substantial tax revenue loss that would be incurred through the illegal distillation of spirits, the data collected identifies the manufacturers, vendors, and users of spirits as well as providing an accounting of skills and other apparatus.

Respondents: Business or other for-profit

Estimated Number of Respondents/Recordkeepers: 10

Estimated Burden Hours Per Respondent/Recordkeeper:

1. Notice of Manufacture of Still—30 minutes
2. Notice of Set Up of Still—30 minutes
3. Registration; Notice of Change in Ownership or Location of a Registered Still or Distilling Apparatus—30 minutes

Frequency of Response: On occasion

Estimated Total Reporting/Recordkeeping Burden: 21 hours

OMB Number: 1512–0353

Recordkeeping Requirement ID Number: ATF REC 5170/2

Type of Review: Extension

Title: Wholesale Dealers Records of Receipt of Alcoholic Beverages Disposition of Distilled Spirits, and Monthly Summary Report

Description: Accounting tool, audit trail, part of accounting process. Shows from whom purchased, to whom sold, and amount. When required, provides a monthly report of sales activities and on-hand inventories.

Respondents: Business or other for-profit

Estimated Number of Respondents/Recordkeepers: 50

Estimated Burden Hours Per Respondent/Recordkeeper: 2 hours

Frequency of Response: Monthly

Estimated Total Reporting/Recordkeeping Burden: 1,200 hours

Clearance Officer: Robert N. Hogarth (202) 927–8930, Bureau of Alcohol, Tobacco and Firearms, Room 3200, 650 Massachusetts Avenue, N.W., Washington, DC 20226

OMB Reviewer: Milo Sunderhauf (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503

Lois K. Holland,

Departmental Reports Management Officer.

Public Information Collection Requirements Submitted to OMB for Review

September 8, 1995.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms (BATF)

OMB Number: 1512–0030

Form Number: ATF F 4483–A (5300.11)

Type of Review: Extension

Title: Annual Firearms Manufacturing and Exportation Report

Description: ATF collects this data for the purpose of law enforcement, fitness qualification, Congressional inquiries, disclosure to the public in compliance with a court order, furnishing information to other Federal agencies, compliance inspections, and insuring that the requirements of the National Firearms Act (25 USC 5801–5872) are met.

Respondents: Business or other for-profit

Estimated Number of Respondents: 1,016

Estimated Burden Hours Per Respondent: 45 minutes

Frequency of Response: Annually

Estimated Total Reporting Burden: 762 hours

OMB Number: 1512–0092

Form Number: ATF F 5110.31 (1648/1649/1650)

Type of Review: Revision

Title: Application for Certification/Exemption of Label/Bottle Approval Under the Federal Alcohol Administration Act

Description: 26 U.S.C. 205(e) requires that persons who label alcoholic beverages obtain a certificate of label approval for labels used. Submission of these forms (ATF F 5110.31) allows ATF to ensure that labels used on alcoholic beverages contain all information required by regulations and do not contain prohibited, deceptive, misleading information.

Respondents: Business or other for-profit

Estimated Number of Respondents: 6,060

Estimated Burden Hours Per Respondent: 30 minutes

Frequency of Response: On occasion

Estimated Total Reporting Burden: 27,300 hours

OMB Number: 1512–0137

Form Number: ATF F 5150.22 and ATF 5150.25

Type of Review: Extension

Title: Application for an Industrial Alcohol Users Permit (5150.22); and Industrial Alcohol Bond (5150.25)

Description: ATF F 5150.22 is used to determine the eligibility of the applicant to engage in certain operations and the extent of the operations for the production and distribution of specially denatured spirits (alcohol/rum). This form identifies the location of the premises and establishes whether the premises will be in conformity with Federal laws and regulations. ATF F 5150.25 provides notification that sufficient bond coverage has been obtained prior to the issuance of a permit.

Respondents: Business or other for-profit

Estimated Number of Respondents/Recordkeepers: 738

Estimated Burden Hours Per Respondent/Recordkeeper: 2 hours

Frequency of Response: On occasion

Estimated Total Reporting/Recordkeeping Burden: 1,476 hours

OMB Number: 1512–0192

Recordkeeping Requirement ID Number: ATF REC 5110/01

Form Number: ATF F 5110.11

Type of Review: Extension

Title: Distilled Spirits Plants Warehousing Records and Reports

Description: The information collected is used to account for proprietor's tax liability, adequacy of bond coverage and protection of the revenue. The information also provides data to analyze trends, audit plant operations, monitor industry activities and compliance to provide for efficient allocation of field personnel plus provide for economic analysis.

Respondents: Business or other for-profit

Estimated Number of Respondents/Recordkeepers: 230

Estimated Burden Hours Per Respondent/Recordkeeper: 2 hours

Frequency of Response: Monthly

Estimated Total Reporting/Recordkeeping Burden: 5,520 hours

OMB Number: 1512–0205

Recordkeeping Requirement ID Number: ATF REC 5110/01

Form Number: ATF F 5110.40

Type of Review: Extension

Title: Distilled Spirits Records (5110/01); and Monthly Report of Production Operations (5110.40)

Description: The information collected is used to account for proprietor's tax liability, adequacy of bond coverage and protection of the revenue. The information also provides data to analyze trends in the industry, plan efficient allocation of field resources, audit plant operations, and compile statistics for government economic analysis.

Respondents: Business or other for-profit

Office of Thrift Supervision

[No. 95–157]

Proposed Reduction of Data Collected on the Thrift Financial Report; Correction

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Notice; correction.

SUMMARY: In the notice document entitled "Proposed Reduction of Data Collected on the Thrift Financial Report," beginning on page 44116 of the issue of August 24, 1995, on page 44118 in the second and third columns under the heading "V. Paperwork Reduction Act," the notice incorrectly stated that a request for approval of an information collection contained in the notice had been submitted to the Office of Management and Budget (OMB) for their review under the Paperwork Reduction Act of 1980. The notice should not have contained that statement and the burden estimates that followed, but should have only stated that a request for approval of an information collection will be sent to OMB after the revisions to the Thrift Financial Report are complete.

FOR FURTHER INFORMATION CONTACT: Mary H. Gottlieb, Regulations and Legislation Division, Chief Counsel's Office, Office of Thrift Supervision, 1700 G Street, NW., Washington DC 20552, (202) 906–7135.

Dated: September 11, 1995.

By the Office of Thrift Supervision.

Sunshine Act Meetings

Federal Register
Vol. 60, No. 179
Friday, September 15, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BROADCASTING BOARD OF GOVERNORS

DATE AND TIME: September 22, 1995; 10:00 a.m.

PLACE: Cohen Building, 330 Independence Avenue, SW., Suite 3300, Washington, DC 20547.

CLOSED MEETING: The members of the Broadcasting Board of Governors (BBG) will meet in closed session to address internal procedural issues, as well as sensitive foreign policy and personnel issues relating to potential budgetary alternatives and deadlines set by the Congress. This meeting is closed because if open it likely would either disclose matters that would be properly classified to be kept secret in the interest of foreign policy under the appropriate executive order (5 U.S.C. 552b.(c)(1)) or would disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. (5 U.S.C. 552b.(c)(9)(B)) In addition, part of the discussion will relate solely to the internal personnel rules and practices of the BBG, the International Broadcasting Bureau, and USIA. (5 U.S.C. 552b.(c)(2))

CONTACT PERSON FOR MORE INFORMATION: Persons interested in obtaining more information should contact Joshua Fouts at (202) 619–3375.

Dated: September 13, 1995.

David W. Burke,

Chairman.

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Amendment to Sunshine Act Meeting

SUMMARY: Pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), the Farm Credit Administration gave notice on September 11, 1995 (60 FR 47203) of the special meeting of the Farm Credit Administration Board (Board) scheduled for September 12, 1995. This notice is to amend the agenda by adding an item to the open session of that meeting.

FOR FURTHER INFORMATION CONTACT: Floyd Fithian, Secretary to the Farm Credit Administration Board, (703) 883–4025, TDD (703) 883–4444.

ADDRESSES: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board were open to the public (limited space available), and parts of this meeting were closed to the public. The agenda for September 12, 1995, is amended as follows:

Open Session

A. Approval of Minutes

B. FCSBA Quarterly Report

Dated: September 13, 1995.

Floyd Fithian,

Secretary, Farm Credit Administration Board.

[FR Doc. 95–23122 Filed 9–13–95; 2:51 pm]

BILLING CODE 6705–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:05 a.m. on Tuesday, September 12, 1995, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following matters:

Reports of the Office of Inspector General.

Matters relating to the Corporation's supervisory and corporate activities.

Recommendation regarding the leasing of office space.

In calling the meeting, the Board determined, on motion of Vice Chairman Andrew C. Howe, Jr., seconded by Mr. Stephen R. Steinbrink, acting in the place and stead of Director Eugene A. Ludwig (Comptroller of the Currency), concurred in by Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), and Chairman Ricki Helfer, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550 17th Street NW., Washington, DC.

Dated: September 12, 1995.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 95–23080 Filed 9–13–95; 12:13 pm]

BILLING CODE 6714–01–M

FEDERAL HOUSING FINANCE BOARD

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 60 FR 45774, September 1, 1995.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:00 a.m., Tuesday, September 12, 1995.

CHANGES IN THE MEETING: The following topics were withdrawn from the open portion of the meeting:

- The portion of the dividends discussion on third quarter dividend requests.
- Membership regulation.
- Affordable Housing Program Advisory Councils.
- Review of the FHLBank of San Francisco's AHP/CIP Policy Changes.

Topic added to the open portion of the meeting:

- Federal Home Loan Bank of Des Moines Proposal to Certify Minnesota Chippewa–Tribal Housing Corporation as a Nonmember Mortgagee.

The Board determined that agency business requires its consideration of this matter on less than seven days notice to the public and that no earlier notice of this change in the subject matter of the meeting was possible.

CONTACT PERSON FOR MORE INFORMATION: Elaine L. Baker, Secretary to the Board, (202) 408–2837.

Rita I. Fair,

Managing Director.

[FR Doc. 95–23056 Filed 9–13–95; 10:13 am]

BILLING CODE 6725–01–P

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Provision for the Delivery of Legal Services Committee Meeting

TIME AND DATE: The Legal Services Corporation Board of Directors Provision for the Delivery of Legal Services Committee will meet on

September 22, 1995. The meeting will commence at 9:00 a.m.

PLACE: Legal Services Corporation, 750 1st Street, N.E., 11th Floor, Board Room, Washington, D.C. 20002, (202) 336–8800.

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.
2. Approval of Minutes of May 12, 1995 Meeting.
3. Report On the Competition Initiative.
4. Report on Other Activities of the Offices of Program Support, and Program Evaluation, Analysis, and Review.
5. Consider and Act on Other Business.

CONTACT PERSON FOR INFORMATION: Patricia Batie (202) 336–8800.

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments.

Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia Batie at (202) 336–8800.

Date Issued: September 13, 1995.

Suzanne B. Glasow,

Senior Counsel.

[FR Doc. 95–23126 Filed 9–13–95; 2:52 pm]

BILLING CODE 7050–01–M

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Finance Committee Meeting

TIME AND DATE: The Legal Services Corporation Board of Directors Finance Committee will meet on September 22, 1995. The meeting will commence at 9:00 a.m.

PLACE: Legal Services Corporation, 750 1st Street, N.E., The Board Room, Washington, D.C. 20002, (202) 336–8800.

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.
2. Approval of Minutes of September 10, 1995 Meeting.
3. Consideration and Review of Budget and Expenses for the Period Ending August 31, 1995.
4. Consider and Act on Proposed Revisions to the Corporation's Fiscal Year 1995 Consolidated Operating Budget.
5. Consideration of Proposed Fiscal Year 1996 Consolidated Operating Budget.
6. Consideration of Proposed Fiscal Year 1997 Budget Mark.
7. Consider and Act on Proposed Audit Guide.
8. Consider and Act on Other Business.

CONTACT PERSON FOR INFORMATION: Patricia Batie (202) 336–8800.

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments.

Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia Batie at (202) 336–8800.

Date Issued: September 13, 1995.

Suzanne B. Glasow,

Senior Counsel.

[FR Doc. 95–23127 Filed 9–13–95; 2:52 pm]

BILLING CODE 7050–01–M

LEGAL SERVICES CORPORATION

Board of Directors Meeting

TIME AND DATE: The Legal Services Corporation Board of Directors will meet on September 22–23, 1995. The meeting will commence at 2:00 p.m. on September 22nd, and at 9:00 a.m. on September 23, 1995.

PLACE: Legal Services Corporation, 750 1st Street, N.E., Board Room, 11th Floor, Washington, D.C. 20002, (202) 336–8800.

STATUS OF MEETING: *Open*, except that a portion of the meeting may be closed pursuant to a unanimous vote of the Board of Directors to hold an executive session. At the closed session, in accordance with the aforementioned vote, the Board may discuss matters related to internal operational and personnel matters. In addition, the Board may hear and consider the General Counsel's report on litigation in which the corporation is or may become a party. Finally, the Board may be briefed by the Inspector General on Office of the Inspector General Activities.[1] The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Section 552b(c) (2) and (10)], and the corresponding regulation of the Legal Services Corporation [45 C.F.R. Section 1622.5 (a) and (h)]. The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 750 First Street N.E., Washington, D.C. 20002, in its eleventh floor reception area, and will otherwise be available upon request.

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda
2. Approval of Minutes of June 24–25, 1995 Meeting
3. Approval of Minutes of June 25, 1995 Executive Session
4. Chairman's and Members' Reports
5. President's Report on Status of Appropriations and Authorization Proceedings
6. Report and Discussion of Planning for the Future of Legal Services
7. Inspector General's Report
8. Consider and Act on Finance Committee Report
    a. Consider and Act on Proposed Revisions to Fiscal Year 1995 Consolidated Operating Budget
    b. Consider and Act on Proposed Fiscal Year 1996 Consolidated Operating Budget
    c. Consider and Act on Proposed Fiscal Year 1997 Budget Mark
    d. Consider and Act on Proposed Audit Guide
9. Consider and Act on Operations and Regulations Committee Report.
10. Consider and Act on Provision for the Delivery of Legal Services Committee Report.
11. Public Comment.

SATURDAY, SEPTEMBER 23, 1995

CLOSED SESSION:

12. Discussion of Issues Relating to Internal Operational and Personnel Matters
13. Briefing of Board by the Inspector General on Office of the Inspector General Activities
14. Consider and Act on the General Counsel's Report on Litigation

OPEN SESSION: (Resumed)

15. Consider and Act on Other Business.

CONTACT PERSON FOR INFORMATION: Patricia Batie (202) 336–8800.

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments.

Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia Batie at (202) 336–8800.

Date Issued: September 13, 1995.

Suzanne B. Glasow,

Senior Counsel.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [60 FR 46689, September 7, 1995].

STATUS: Closed meeting.

PLACE: 450 Fifth Street, N.W., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: September 7, 1995.

CHANGE IN THE MEETING: Cancellation.

The closed meeting scheduled for Friday, September 8, 1995, at 10:00 a.m., has been cancelled.

Commissioner Wallman, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary (202) 942–7070.

Dated: September 8, 1995.

Jonathan G. Katz,

Secretary.

RIN 0938–AG66

CLIA Program; Categorization and Certification Requirements for a New Subcategory of Moderate Complexity Testing

AGENCY: Health Care Financing Administration (HCFA) and Public Health Service (PHS), HHS.

ACTION: Proposed rule.

SUMMARY: In this proposed rule we are responding to some of the comments on categories of tests received in response to the rule published on February 28, 1992. To reduce the regulations burden on laboratories, we are proposing to revise our regulations to create a new subcategory of high quality moderate complexity procedures called accurate and precise technology (APT) tests.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on November 14, 1995.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Centers for Disease Control and Prevention, Public Health Service, Department of Health and Human Services, Attention: HSQ–222–P, 4770 Buford Highway, N.E., MSF11, Atlanta, Georgia 30341–3724.

If you prefer, you may deliver your written comments (1 original and 3 copies) to one of the following addresses: Room 714–B, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code HSQ–222–P. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

For comments that relate to information collection requirements, mail a copy of comments to: Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, Attn: Allison Herron Eydt, HCFA Desk Officer.

Copies: To order copies of the **Federal Register** containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512–1800 or by faxing to (202) 512–2250. The cost for each copy is $8.00. As an alternative, you can view and photocopy the **Federal Register** document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Rosemary Bakes-Martin (404) 488–7655, for questions regarding the APT requirements and criteria for APT categorization; and Judy Yost, (410) 786–3531, for certificate, fee, and inspection issues.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 353 of the Public Health Service Act (42 U.S.C. 263a), as amended by the Clinical Laboratory Improvement Amendments of 1988 (CLIA), all laboratories that examine human specimens for the diagnosis, prevention or treatment of any disease or impairment of, or the assessment of the health of, human beings, must meet certain requirements to perform the examination. In accordance with the law, regulations implementing CLIA that HHS published on February 28, 1992 (57 FR 7002) established laboratory requirements based on the complexity of the tests performed. There are currently three test categories: waived, moderate, and high complexity.

Following publication of the February 28, 1992 regulations, HHS established a Clinical Laboratory Improvement Advisory Committee (CLIAC) to advise and make recommendations on technical and scientific aspects of the regulations. The CLIAC is composed primarily of individuals involved in the provision of laboratory services, use of laboratory services, development of laboratory testing devices or methodologies, and others as approved by HHS. The CLIAC has four subcommittees: cytology; personnel; proficiency testing, quality control and quality assurance; and test categorization.

In response to publication of the February 28, 1992 regulations, we received approximately 16,000 letters from professional organizations and individuals providing around 71,000 comments.

In response to those comments, we have published three rules (in addition to this proposed rule). One of those rules responds to the comments received on the waived criteria, tests presently included in the waived category and those tests that commenters believed should be added. At our request, the CLIAC evaluated the waived category and suggested that the Centers for Disease Control and Prevention (CDC) clarify the criteria and develop a process for review of requests for waiver. We clarified the criteria for waiver and the process for requesting waived categorization and published the clarified criteria and process for requesting waiver in a proposed rule with comment on September 13, 1995 (60 FR 47534). (The other two rules appeared in the **Federal Register** on January 19, 1993 (58 FR 5215) and on April 24, 1995.

In this rule, in response to numerous comments regarding the test complexity model, we are proposing to establish a new subcategory of moderate complexity that would include high quality tests that would be subject to less stringent requirements. Establishment of this subcategory should encourage manufacturers to produce accurate, easy-to-use test systems for use by physicians and laboratories to improve test quality and enhance patient care.

II. Response to Comments Received to Previous CLIA Regulations

In this rule we address additional comments received in response to the establishment of the three testing categories. Below we have provided a general overview of the comments and our responses, followed by some additional specific comments concerning the categories of testing and our response to these comments, which includes the rationale used to develop the proposed accurate and precise technology (APT) subcategory.

Upon review of the comments, we believe that additional revision of the test categorization model is warranted. The revisions to the regulations proposed in this rule would address the commenters' concerns that many high quality tests are less complex than many of the tests currently categorized as moderate complexity, but they do not meet the criteria for waiver. The commenters feel and we agree that these tests should be subject to less stringent requirements than those currently associated with moderate complexity tests.

In addition, we received numerous comments from professional organizations and individuals expressing concern about the burden associated with regulating laboratories based on test complexity and the criteria used to categorize tests as moderate or high complexity. Many commenters indicated that the special circumstances involved in physician offices, rural and public health clinics providing laboratory services should justify minimizing the regulatory burden on them. Some commenters believed that regulating laboratories on the basis of test complexity and the requirements applicable to moderate and high complexity tests would increase the cost of laboratory testing. Several commenters thought this regulatory burden would cause many laboratories to discontinue providing services, thereby limiting health care in underserved and rural areas. Some commenters recommended reducing some of the regulatory burden by creating a category of tests at a level between waived and moderate complexity. Other commenters suggested creating additional categories and provided examples for alternatives to the current test complexity model.

In response to these comments, the CDC developed a proposal to create a new subcategory of moderate complexity that would include simple, easy-to-use tests with proven accuracy and precision and therefore would require somewhat less stringent requirements than the requirements currently applicable to other moderate complexity tests.

During the development of the subcategory, we were especially cognizant of the concerns of the commenters who stated that there are many high quality, moderate complexity tests that might not qualify for waiver, but, on the other hand, should not be subject to the full range of requirements currently applicable to moderate complexity testing. We agree with the commenters that regulatory relief for high quality tests is appropriate. In order to justify less stringent application of the requirements, we are proposing that the tests meet rigid performance specifications and have demonstrated, through scientifically valid studies, a high level of accuracy and precision. Through this process, test systems would be evaluated to ensure they provide quality results and physicians and laboratories would have access to this categorization information to employ in test selection and determining types of laboratory services to provide.

We therefore designed a subcategory of moderate complexity testing that we proposed to call APT testing that would include high quality, less complex tests that would be unique in that the test system instructions would not only contain complete procedures for test performance, including instructions regarding the preanalytic, analytic and postanalytic phases of testing, but would also include protocols that would assist laboratories in meeting the CLIA requirements. We proposed that, in order to be considered for categorization in the APT subcategory, the producer or manufacturer of the test system would have to submit data demonstrating that the test system meets the criteria for APT categorization. In addition, the test system instructions would have to specify clearly what laboratories must do to be in compliance with the CLIA requirements. For APT testing, laboratories could rely on the manufacturer's or producer's test system instructions to meet the CLIA requirements. Since, for APT testing, compliance with the CLIA requirements would be based on laboratories following the test system instructions, we believe that random, rather than routine, inspections of laboratories having an APT certificate would be sufficient.

We discussed with the CLIAC the proposed criteria and requirements to be applicable to the new subcategory. The CLIAC supported the concept of the APT subcategory. However, the CLIAC expressed the view that the subcategory (as currently structured) would not provide the amount of regulatory relief desired by many commenters who requested revisions to the complexity model. We understand the CLIAC's concerns; however, we believe that it is essential that we reevaluate the complexity model to determine whether the regulations are effective in ensuring public access to quality laboratory services. When we established the CLIA requirements in 1992, we sought to devise a regulatory model based on the complexity of testing performed that would establish the minimum requirements necessary to ensure accurate testing. At this point, we believe there are many highly accurate, simple, easy-to-use test systems currently categorized as moderate complexity that could be eligible for less stringent requirements, and laboratories performing such testing should be provided financial and regulatory relief through a reduction in the CLIA requirements.

To obtain broad public review, we are publishing this proposed rule and encourage commenters to provide suggestions on how we might revise the CLIA requirements to ensure that they promote access to quality services and stimulate technological advances in testing. With respect to the provisions contained in this rule, we are seeking specific suggestions and recommendations concerning the criteria and process for categorizing tests in the APT subcategory, as well as comments on the appropriateness of the proposed requirements for APT testing.

III. Provisions of the Proposed Rule

Criteria for APT Categorization

In this rule, we are proposing to establish at 42 CFR 493.18 a new subcategory of moderate complexity testing designated as APT, and we are outlining the proposed criteria for determining which tests would be categorized as APT. The proposed criteria for inclusion in the APT subcategory are structurally similar to our proposed clarifications to the criteria for waived tests published on September 13, 1995.

For quantitative and qualitative tests, the similarities between the proposed criteria for APT categorization and the proposed clarifications to the criteria for waiver are as follows:

- Quantitative APT tests and quantitative waived tests would have to meet similar test characteristics and performance specifications by demonstrating, through scientifically valid studies, a high level of accuracy and precision.
- Qualitative APT tests would have to meet the same requirements for allowable error as we have proposed for qualitative waived tests.

The proposed criteria for inclusion in the APT subcategory would differ from the proposed criteria for waiver in that:

- Waived tests must be fail-safe with no operator intervention, whereas APT test protocols could allow some operator intervention to investigate questionable results and to resolve test system failures.
- Waived qualitative tests are limited to reagent impregnated devices (such as dipsticks), whereas qualitative APT tests would not be limited to any specific type of technology. [It is important to clarify what is meant by qualitative tests in this regulation. Qualitative tests are test methods that provide two categorical responses (e.g., positive/negative or presence/absence). For these types of tests, the concentration of the analyte is defined as being above or below a certain discrimination zone that

VOL
60
SS
1
7
9
SE
15
995
UMI

defines negativity or positivity.] On the other hand, test methods that give results by defining specific absorbance values at which tests will be considered positive are essentially quantitative tests in that they directly depend on defined concentrations of the analyte producing the discrete absorbance value. In this regulation, we are proposing to consider the latter as quantitative tests.

- Waived tests may use only direct unprocessed specimens, have direct readout of results and require no invasive troubleshooting or electronic or mechanical maintenance. However, APT tests could have simple noncalculated conversions and some troubleshooting and maintenance performed by the analyst.
- Instructions for performance of waived tests must be written at no higher than a seventh grade reading level and include a description of the analytic skills required to perform the test. APT test instructions would have no such requirements, since personnel performing APT testing would, at a minimum, have to have a high school diploma, or equivalent, and relevant training.
- Quantitative waived tests may have a certain amount of random error but they must be shown to be essentially free of systematic error, whereas quantitative APT tests would be allowed a minimal amount of error that may be either random or systematic, or both.

Review Process

Also at § 493.18, we are proposing the process for approving tests for the APT subcategory. We are proposing that requests for placement of tests in this subcategory be in conformance with the proposed submission process outlined in this regulation. The data submitted for evaluation would have to meet specific criteria related to operational characteristics, ease of use, and test performance. The test system's instructions will be reviewed by PHS to ensure that laboratories can rely on these instructions to assist them in meeting the regulations in subparts J, K and P when performing APT testing.

Submission Requirements

Under the proposed rule, the manufacturer or test system producer would have to determine which procedures in the preanalytic, analytic and postanalytic phases of testing are essential to ensure accurate test results. These procedures would be identified in the submission to PHS as mandatory procedures for the laboratory to follow. In addition, the manufacturer or test system producer would have to include protocols to assist laboratories in meeting the CLIA requirements. The test system instructions should remind laboratories to enroll in an HHS-approved proficiency testing program, if applicable.

Since many manufacturers are currently providing this type of assistance to laboratories, often in the form of complete protocols containing instructional materials that cover all aspects of the regulations and, in addition, examples of suggested forms to use to document monitoring activities, we believe that the APT subcategory merely strengthens and confirms that interaction between the producer of the test system and the laboratory user. Formalizing this relationship and making it uniform for all manufacturers and producers of these test systems should reduce the regulatory burden on laboratories, while providing an effective mechanism for laboratories to achieve regulatory compliance with the CLIA requirements.

We encourage individuals to submit their comments and suggestions on how we might improve the APT categorization criteria or process and revise the regulations to incorporate these changes. Following review of comments received in response to this notice, we will make the necessary revisions to the APT requirements, including the criteria for APT categorization and the process for reviewing requests for APT categorization of test systems.

After a final rule responding to the comments received to this proposed rule is published establishing the APT subcategory, requests for APT categorization may be submitted for review. Once a test system review has been completed, the manufacturer or producer would be notified of the APT categorization decision, whether denied or granted. APT categorization would be effective on the date of notification to the applicant. Any test categorized as APT also would be published in the **Federal Register** as a notice with an opportunity for public comment. (As with all comments received on test categorization, our responses to the comments received on APT categorization will be included in a subsequent **Federal Register** notice.) Once we receive comments on the **Federal Register** notice, we reserve the right to reevaluate and recategorize the test based upon those comments.

Administration

We are proposing to make conforming changes to subpart F (General Administration) to accommodate the addition of the new certificate for APT tests. Laboratories that qualify for a certificate of APT tests would have to pay a fee for the issuance of a certificate. Each laboratory would be assessed a fee representing the certificate fee and a fee for the costs of the random inspections. The certificate fee would be based on the fee schedule (which is based on the test volume and scope of specialties tested) in effect. This fee would represent the APT laboratory's share of the general cost to HHS of administering the laboratory certification program. This would include, but would not be limited to, the cost of issuing the certificate, the cost of collecting fees, the administrative costs of determining which tests would qualify for inclusion in the APT test category, and the administrative costs associated with processing and evaluating laboratory applications. The fee for random inspection would represent the cost to HHS of conducting random inspections of approximately five percent of the laboratories issued a certificate for APT tests to assess compliance with the applicable requirements of 42 CFR part 493. Random inspection costs would be shared by all laboratories issued a certificate for APT tests.

If, in the case of a laboratory subject to a random inspection, it is determined that a follow-up survey is necessary because of identified deficiencies, HHS would assess that laboratory an additional fee to cover the cost of the follow-up survey activities. The fee would be based on the actual resources and time necessary to perform the follow-up visits. Failure of a laboratory to pay any assessed costs would result in HHS revoking the laboratory's certificate.

Patient Test Management

We are proposing to add a new § 493.1102 to subpart J (patient test management) to include the new patient test management requirements that would be applicable to APT testing. These requirements would be less burdensome to the laboratory than the requirements currently applicable to other moderate complexity testing because the manufacturer's or producer's PHS-approved test system instructions would specify what laboratories must do to comply with the CLIA patient test management requirements. There would be two requirements in this new standard. The two requirements would be that the laboratory must: (a) have available and follow the patient test management procedures specified in the PHS-approved instructions; and (b) maintain records documenting compliance with

the patient test management requirements for two years.

Quality Control

In subpart K (quality control), we propose to recodify the current § 493.1204 as § 493.1206 and add a new § 493.1204 to accommodate the quality control provisions resulting from the proposed addition of the new subcategory of APT tests. Since the PHS-approved test system instructions for APT procedures would include instructions for meeting the CLIA requirements, the laboratory quality control requirements for APT testing would be less stringent than for other moderate complexity tests. We are proposing that, before reporting patient test results, laboratories, at a minimum, use the PHS-approved test system instructions for verifying the test system's performance specifications. The laboratory may include, as appropriate, expanded or additional protocols for verifying the test system's performance specifications. As with other procedures of moderate complexity, quality control activities for APT tests would have to be documented and the records retained for two years, except immunohematology records, which must be maintained for a period of no less than five years. We would stress that laboratories must not modify the test system's PHS-approved test performance instructions, since any modification would result in the test no longer being categorized as APT. Any modified procedure would become an uncategorized test and would be considered high complexity until categorized by PHS.

Personnel

The personnel requirements for APT testing would be located at § 493.1371 through § 493.1387. APT personnel requirements would be somewhat less stringent than for other moderate complexity testing because APT tests would have been reviewed to ensure that they meet the criteria for simple, reliable, accurate and precise tests. The personnel requirements for this subcategory would not include a technical consultant because manufacturers or producers of APT tests would develop maintenance protocols, calibration and control procedures, remedial action policies and criteria for reporting and interpreting test results, which would fulfill most of the technical consultant's responsibilities. The remaining technical consultant responsibilities (e.g., employee evaluations) would be performed by the laboratory director.

For APT tests, we would require laboratories to have a qualified director, clinical consultant and testing personnel. The qualifications required for director and clinical consultant would be the same as for moderate complexity testing, while the testing personnel training requirements would be modified slightly from the training required for other moderate complexity testing because the test system manufacturer or producer would be providing specific instructions on test system performance, including reagent stability and storage and quality control. The responsibility requirements for each level of personnel within the APT subcategory would be somewhat less stringent in accordance with the laboratory's reliance on the manufacturer or producer of the test system to provide detailed test instructions, protocols for meeting the regulatory requirements, performance specifications and information regarding test results and interpretation.

Quality Assurance

We are proposing to add a new § 493.1702 to the quality assurance requirements located in subpart P to include the proposed requirements applicable to APT testing. These requirements would be less burdensome than the requirements currently applicable to other moderate complexity testing, since the PHS-approved test system instructions would assist the laboratory in meeting the quality assurance requirements. Like § 493.1102 in subpart J (patient test management), there would be two requirements in § 493.1702. To meet the quality assurance requirements in subpart P, we are proposing that: (a) laboratories must have available and follow procedures specified in the test system's PHS-approved instructions to meet the quality assurance requirements; and (b) laboratories must document and maintain records of quality assurance activities for two years.

Inspections

We are proposing to establish a new § 493.1778 specifying that laboratories with a certificate for APT tests are subject to announced or unannounced inspections on a random basis to assess compliance with the applicable requirements of part 493, to evaluate compliance when indicated by unsuccessful participation in proficiency testing and complaints, and to collect information for determining the appropriateness of tests categorized as APT. We are proposing to require random, rather than routine, inspections for a laboratory having an APT certificate since the laboratory would be required only to follow the PHS-approved instructions to meet the CLIA requirements for APT testing. During a random inspection, as with any inspection of other test complexity categories, not all test systems would be reviewed. A few test systems would be randomly selected and assessed for compliance. We would also clarify in this section that if the same laboratory is performing provider-performed microscopy procedures, those tests may also be assessed for compliance with all applicable requirements specific to that subcategory of testing during the random inspection.

Additionally, we would revise the introductory paragraph to § 493.1777, which currently contains the condition concerning inspection of laboratories requesting or issued a certificate of compliance, to clarify the inspection requirements for a laboratory with a certificate of compliance when the laboratory also performs APT procedures. Specifically, for laboratories that perform APT procedures and have a certificate of compliance, APT procedures may be included in the sample of moderate complexity tests inspected during the laboratory's routine, biennial inspections.

Summary of Changes to the Regulations

We are proposing to add or change the following sections to incorporate requirements applicable to APT tests:

- Section 493.18, Accurate and precise technology (APT) tests.
- Section 493.21, Laboratories performing accurate and precise technology (APT) tests.
- Section 493.48, Requirements for a certificate for accurate and precise technology (APT) tests.
- Section 493.1102, Patient test management requirements for accurate and precise technology (APT) tests.
- In subpart K, we are proposing to add the new quality control requirements applicable to APT testing at § 493.1204 and move the facilities requirements (without change) currently located at § 493.1204 to a new § 493.1206.
- To subpart M, we are proposing to add nine new sections to include the personnel requirements for laboratories performing APT testing. At § 493.1371, we are proposing to add the condition requirements for director, and at §§ 493.1373 and 493.1375, respectively, we plan to include the qualification and responsibility requirements for director. The condition level requirements for clinical consultant would be located at § 493.1377, with clinical consultant qualifications to be specified under

§ 493.1379 and responsibilities to be included under § 493.1381. The testing personnel condition requirements would be at § 493.1383, with testing personnel qualifications at § 493.1385 and responsibilities to be included at § 493.1387.

- Section 493.1702, Quality assurance requirements for accurate and precise technology (APT) tests.
- Section 493.1778, Inspection of laboratories issued a certificate for accurate and precise technology (APT) tests.

We are proposing to make conforming technical changes to the following sections and headings: §§ 493.2; 493.3(a)(1); 493.5 (a)(2), (b) and (c)(4); 493.20 (a) and (b); 493.25(c); the headings for subpart C and 493.43; 493.43(a); 493.45 introductory paragraph and (a); 493.49; 493.51 heading, introductory paragraph and paragraphs (b) and (c) and new (d); 493.53(a); 493.602; 493.638 (a) and (b); 493.639(b); 493.643(a); 493.645 heading and new paragraph (c) and paragraph (d) (redesignated from paragraph (c)); subpart H; 493.803(a); 493.807 heading; subheading preceding 493.821; subpart I heading; subpart J heading; 493.1101 heading and introductory paragraph; subpart K heading; 493.1201 heading, revision to paragraph (a) and (b) and addition of new paragraph (c); 493.1202(c); 493.1203; part M heading; 493.1351; subpart P heading; 493.1777 introductory paragraph; 493.1814(b)(3); 493.1834 (b) and (f)(2)(iii); and 493.1836 (c)(2) and (c)(3); and 493.2001.

In addition, we are deleting the words "of this part" wherever they follow a specific section number in regulations text appearing in this **Federal Register** document to conform with rules of the Office of the Federal Register.

IV. Response to Comments

Because of the large number of items of correspondence we normally receive on **Federal Register** documents published for comment, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, if we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

V. Collection of Information Requirements

The proposed rule contains information collections that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The title, description, and respondent description of the information collection requirements are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

§ 493.18: This section outlines the criteria a manufacturer must follow in order to have its moderate complexity test categorized as an "Accuracy and Precise Technology" (APT) test. These include but are not limited to test system characteristics, instructions, field studies and evaluation of data.

§§ 493.43, 493.45, 493.48, 493.49, 493.51, 493.53: Sections 493.43 through 493.53 are currently approved under OMB approval number 0938–0612 with an expiration date of February 28, 1998. The information is gathered on form number HCFA-R–26. These sections outline the requirements for a laboratory to follow to submit application forms for CLIA certification. The requirements include laboratory notification to HHS of changes to the types of tests performed or changes in ownership, name location or director.

Section 493.48 is a new section added to reflect the addition of the new certificate category for laboratories performing tests categorized as accurate and precise technology testing (APT).

§§ 493.1101 and 493.1102: Sections 493.1101 through 493.1111 are currently approved under OMB approval number 0938–0612 with an expiration date of February 28, 1998. This section concerns patient test management for laboratories performing tests of moderate and high complexity that implement the CLIA statutory mandate for laboratories to meet requirements relating to the proper collection, transportation, and storage of specimens and the reporting of results. Section 493.1102 is a new section added to reflect the addition of the new subcategory for tests categorized as accurate and precise technology testing (APT).

§§ 493.1201, 493.1202 and 493.1204: Sections 493.1201 and 493.1202 are currently approved under OMB approval number 0938–0612 with an expiration date of February 28, 1998. These sections set forth the general quality control standards for monitoring and evaluating the quality of the testing process to assure accurate and reliable patient test results and reports as required under CLIA. Section 493.1204 is a new section required to reflect the addition of the new subcategory for accurate and precise technology testing (APT).

§ 493.1702: Sections 493.1701 through 493.1721 are currently approved under OMB approval number 0938–0612 with an expiration date of February 28, 1998. Section 493.1702 is a new section developed to address specific requirements that relate to quality assurance for a laboratory performing APT testing. Specifically it requires a laboratory to have available and follow the PHS-approved instructions and supplements (where appropriate) and maintain records documenting compliance for a 2-year period.

§§ 493.1777 and 493.1778: Sections 493.1725 through 493.1780 are currently approved under OMB approval number 0938–0612 with an expiration date of February 28, 1998. Section 493.1777 concerns the inspections of laboratories. The burden associated with inspections consists of retrieving the records and documentation requested by the inspector, participating in the entrance and exit interviews, responding to the statement of deficiencies that may result from the inspection and documenting any corrective actions taken that are appropriate to the plan of correction for the deficiencies cited. Section 493.1778 is a new section developed to address the inspection requirements as they apply to laboratories with an APT certificate. This section sets forth the policy of random inspections for laboratories with an APT certificate.

When OMB approves those provisions not currently approved we will publish a notice in the **Federal Register** to that affect.

Description of Respondents

§ 493.18: Small businesses or organizations, businesses or other for profit, non-profit institutions, who manufacture laboratory tests.

§§ 493.43, 493.45, 493.48, 493.49, 493.51, 493.53; 493.1101 and 493.1102; 493.1201, 493.1202 and 493.1204; 493.1702; 493.1777 and 493.1778: Small businesses or organizations, businesses or other for profit, non-profit institutions, state and local governments, federal agencies.

ESTIMATED ANNUAL REPORTING AND RECORDKEEPING BURDEN

CFR sections	Annual number of responses	Annual frequency	Average burden per response (hours)	Annual burden hours
493.18	50	1	336	16,800
493.43, 493.45, 493.48, 493.49, 493.51, 493.53	28,700	1	.25	7,175
493.1101, 493.1102	82,000	1	.5	41,000
493.1201, 493.1202 and 493.1204	82,000	1	12	984,000
493.1702	24,600(a)	1	42	1,033,200
493.1777 and 493.1778	1,230(a)	1	4	4,920

(a) Assuming 30% of 82,000 non-waived laboratories become APT.

The agency has submitted a copy of the proposed rule to OMB for its review of these information collections. Interested persons are invited to send comments regarding this burden estimate or any other aspect of these collections of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden. Comments should be sent to HCFA, OFHR, MPAS, C2–26–17, 7500 Security Boulevard, Baltimore, Maryland 21244–1850 and to the OMB official whose name appears in the **ADDRESSES** section of this preamble.

VI. Regulatory Impact Statement

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all laboratories and manufacturers of laboratory test systems are considered to be small entities. Individuals and States are not included in the definition of a small entity.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This proposed rule would modify CLIA regulations published February 28, 1992 by establishing a new subcategory of moderate complexity testing, accurate and precise technology (APT) tests. There are approximately 157,000 entities enrolled under CLIA that could be affected by this rule; however, the significance of the effect would vary depending on the volume and complexity of tests performed. While we cannot estimate the number of entities that may make changes in their laboratory testing practices, we believe the modifications to the CLIA program would be beneficial to the affected entities and would be well received, since they are being proposed in response to comments requesting revisions to the test complexity categories.

In proposing this new subcategory, we acknowledge the unique aspects of the many tests with proven accuracy and precision that may not qualify for waiver, but should not be subject to all of the requirements applicable to moderate complexity testing, including routine inspection. To this end, this proposed rule would establish less stringent requirements, including less frequent (random) inspections and fewer personnel requirements, for laboratories providing tests categorized as APT. We expect no clinically meaningful decrease in test accuracy, or patient health, from this proposal. Furthermore, to the extent that it encourages cost-effective testing more than the present CLIA rules, and increases the amount of such testing in settings that might otherwise eschew testing, it is likely to improve patient health. In addition, this proposed rule would reduce the financial burden for some laboratories by enabling them to provide an expanded test menu without incurring the higher costs associated with a certificate of compliance.

The changes proposed in this regulation may affect a laboratory's test menu and choice of certificate. Laboratories holding a certificate of compliance that change to a certificate for APT would experience a decrease in compliance costs and the number of surveys, since APT laboratories would not be subject to routine inspections and the associated fees. The laboratories that would realize the greatest benefit from these savings would most likely be physician office laboratories and public health laboratories. Laboratories, specifically many physician offices and other limited service laboratories, expanding from a certificate of waiver or PPM to a certificate for APT would be able to enhance the range of laboratory services available to patients, while their costs (including certification fees and costs inherent in meeting applicable requirements such as personnel and quality control), would remain less than the costs of obtaining a certificate of compliance. The availability of a CLIA certificate that allows an expanded test menu at less cost also may encourage new entities to begin providing services, thereby increasing physician and patient access to health care, particularly in underserved and rural areas.

This proposed rule may affect some manufacturers of laboratory tests who would be required to submit specific information and data demonstrating that their test meets the criteria for APT categorization. We estimate that approximately 500 test systems may qualify for this subcategory. These test systems are predominantly small automated instruments or "desktop" analyzers. Manufacturers of any test system approved by PHS in the APT subcategory also must provide laboratories with complete instructions, which include protocols to assist laboratories in meeting the CLIA requirements. However, many manufacturers are currently providing this type of information and assistance to laboratories in the form of instructional materials and protocols. Because laboratories would not be required to develop their own operational policies and quality control protocols, a wider variety of laboratories might decide to offer APT testing.

Therefore, we anticipate that categorization as an APT test would result in increased sales and distribution for the manufacturers.

As indicated above, we believe that the creation of the subcategory of APT and subsequent decrease in the regulatory and financial burden for laboratories performing APT tests would benefit patients, laboratories, and manufacturers. However, we are unable to quantify these likely long run effects because they depend on market decisions, research results, and technological change that cannot be predicted.

Regardless, we believe that for the most part these effects would involve relatively small savings of a few hundred or a few thousand dollars a year for each laboratory, mainly due to reduced inspection fees or QC costs. In the aggregate these savings would be substantial, because they are shared by thousands of laboratories. However, few if any entities are likely to achieve very substantial savings.

This proposed rule would establish the process for categorizing moderate complexity tests into a new subcategory of moderate complexity testing and would also establish a new type of certificate. Proper realignment of the fee schedule, if necessary, would follow implementation of this rule.

For these reasons, we are not preparing analyses for either the RFA or section 1102(b) of the Act because we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals. We do request comments, however, on possible improvements in these proposed regulations to achieve even greater savings to affected entities and will consider them carefully in formulating the final rule.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 493

Grant programs-health, Health facilities, Laboratories, Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR part 493 would be amended as set forth below:

PART 493—LABORATORY REQUIREMENTS

1. The authority citation continues to read as follows:

Authority: Sec. 353 of the Public Health Service Act, secs. 1102, 1861(e), the sentence following 1861(s)(11), 1861(s)(12), 1861(s)(13), 1861(s)(14), 1861(s)(15), and 1861(s)(16) of the Social Security Act (42 U.S.C. 263a, 1302, 1395x(e), the sentence following 1395x(s)(11), 1395x(s)(12), 1395x(s)(13), 1395x(s)(14), 1395x(s)(15), and 1395x(s)(16)).

2. In Section 493.2, in the definition of "CLIA certificate" the introductory text is republished and paragraph (6) is added to read as follows:

§ 493.2 Definitions.

* * * * *

CLIA certificate means any of the following types of certificates issued by HCFA or its agent:

* * * * *

(6) *Certificate for accurate and precise technology (APT) tests* means a certificate issued or reissued before the expiration date, pending an appeal in accordance with § 493.48, to a laboratory that only performs tests approved by PHS as APT tests and, if desired, tests specified as PPM procedures, tests approved by PHS as waived tests, or both.

* * * * *

3. In § 493.3, the introductory text of paragraph (a) is republished and paragraph (a)(1) is revised to read as follows:

§ 493.3 Applicability.

(a) *Basic rule.* Except as specified in paragraph (b) of this section, a laboratory will be cited as out of compliance with section 353 of the Public Health Service Act unless it—

(1) Has a current, unrevoked or unsuspended certificate of waiver, a registration certificate, a certificate of compliance, certificate for PPM procedures, certificate for APT tests, or a certificate of accreditation issued by HHS applicable to the category of examinations or procedures performed by the laboratory; or

* * * * *

4. Section 493.5 is revised to read as follows:

§ 493.5 Categories of tests by complexity.

(a) Laboratory tests are categorized as one of the following types of tests:

(1) Waived tests.

(2) Tests of moderate complexity, including the subcategories of moderate complexity, which are limited to the following tests and procedures:

(i) PPM procedures.

(ii) APT tests.

(3) Tests of high complexity.

(b) A laboratory has the option of performing only waived tests, only tests of moderate complexity, only PPM procedures, only APT tests, only tests of high complexity, or any combination.

(c) Each laboratory must be either CLIA-exempt or possess one of the following certificates, as defined in this part:

(1) Registration certificate.

(2) Certificate of waiver.

(3) Certificate for PPM procedures.

(4) Certificate for APT tests.

(5) Certificate of compliance.

(6) Certificate of accreditation.

5. A new § 493.18 is added to read as follows:

§ 493.18 Accurate and precise technology (APT) tests.

(a) *Requirement.* To be included in the APT subcategory, the test system must be categorized as moderate complexity using the criteria in § 493.17 and it must meet the descriptive criteria specified in paragraph (b) of this section.

(b) *Criteria.* (1) For quantitative tests, methods must be easy to use, accurate, and precise as evidenced by the following items:

(i) Test systems that have the following characteristics:

(A) Are fully automated (no operator intervention during the analytic phase).

(B) Provide direct readout of results or simple noncalculated conversions.

(ii) Test system instructions that address the following items:

(A) Requirements for specimen collection, handling, storage and preservation.

(B) Reportable range for patient results.

(C) Reference range (normal values) and suggested panic values (values requiring immediate medical intervention).

(D) Units of measurement used for reporting patient results.

(E) Step-by-step protocols that include, as appropriate, the following items:

(*1*) Instrument or test system operation and test performance instructions.

(*2*) Test system maintenance procedures.

(*3*) Preparation and storage of reagents, calibrators, controls, or other materials used in testing.

(*4*) Control procedures including the type of materials, suggested concentrations, and frequency of assay.

(*5*) Calibration procedures including the number and type of materials and frequency of assay.

(*6*) Acceptable ranges for any control or calibration material included with the test system.

(*7*) Action to be taken when calibration or control results do not meet the acceptable range of values.

(*8*) Methods for converting test system values to reportable results.

(*9*) Description of course of action to be taken when the test system becomes inoperable.

(*10*) Any limitations to methodologies such as interfering substances.

(*11*) A written protocol for reporting patient test results.

(iii) Field studies that meet the following requirements:

(A) Demonstrate that the manufacturer's or producer's written instructions are the only protocols required to perform the test accurately and reliably.

(B) Demonstrate that individuals with no formal laboratory training can correctly perform the test.

(iv) Data from field studies that meet the following requirements:

(A) Are generated from protocols that address the points described in paragraph (b)(1)(iii) of this section.

(B) Are adequate to produce measures of performance that are both statistically valid and defensible (estimates must support valid confidence limits for all statistical parameters).

(C) Evaluate performance at all medical decision points and relevant upper and lower limits of the reportable range using at least three concentrations of the analyte being tested.

(D) Evaluate among-operator imprecision using test results of all study participants.

(E) Evaluate within-site imprecision using test results generated at each site by an adequate number of participants to produce measures of performance that are statistically valid and defensible. Testing must be performed at a minimum of three independent study sites.

(F) Evaluate among-site imprecision at an adequate number of sites to produce measures of performance that are statistically valid and defensible using results generated by study participants on aliquots of a single testing material.

(v) Method accuracy studies demonstrating little or no systematic error when—

(A) Using reference materials assayed by study participants that produce data that show there is little or no statistically significant difference between the test results and the value of the reference materials.

(B) Using patient samples instead of reference materials, demonstrating there is little or no introduction of error in patient test results due to the effects of the sample matrix.

(C) Adding or simulating common interfering substances known to affect the analyte in patient samples, demonstrating that there is little or no introduction of error due to the presence of these substances.

(vi) Demonstration that the total amount of error, which includes all components contributing to imprecision and inaccuracy as defined by studies described in paragraphs (b)(1)(iv)(D) through (b)(1)(iv)(F) and (b)(1)(v)(A) through (b)(1)(v)(C) of this section, is less than one fourth of the reference range for the analyte divided by the mean of the reference interval.

(2) For qualitative tests, methods must be easy to use, accurate, and precise as evidenced by the following items:

(i) Test systems that meet the following requirements:

(A) Contain steps that are limited in number and complexity, are self-contained and are packaged as a complete system.

(B) Have a qualitative endpoint that requires no interpretation beyond discerning agglutination patterns, color comparisons, or other easily interpreted reactions.

(ii) Test system instructions that address the following items:

(A) Requirements for specimen collection, handling, storage and preservation.

(B) Reportable range for patient results.

(C) Reference range (normal values).

(D) Step-by-step protocols that include, as appropriate, the following items:

(*1*) Test performance instructions.

(*2*) Preparation and storage of reagents, calibrators, controls, or other materials used in testing.

(*3*) Control procedures including the type of materials and frequency of assay.

(*4*) Calibration procedures including the number and type of materials and frequency of assay.

(*5*) Acceptable ranges for any control or calibration material included with the test system.

(*6*) Action to be taken when calibration or control results do not meet acceptable range of values.

(*7*) The correct interpretation of test reactions or endpoints.

(*8*) Description of course of action to be taken when test reactions or endpoints cannot be determined.

(*9*) Any limitations to methodologies.

(iii) Field studies that meet the following requirements:

(A) Demonstrate that the manufacturer's or producer's written instructions are the only protocols required to perform the test accurately and reliably.

(B) Demonstrate that individuals with no formal laboratory training can correctly perform the test.

(iv) Data from field studies that meet the following requirements:

(A) Are generated from protocols that address the points described in paragraph (b)(2)(iii) of this section.

(B) Are adequate to produce measures of performance that are both statistically valid and defensible.

(C) Confirm that study participants are able to read and interpret test endpoints with the same precision as laboratory professionals.

(D) Confirm that the performance of study participants is essentially the same as laboratory professionals when testing samples at or near the cutoff and at sufficient distance above and below the cutoff to confirm precision at all analytical decision points.

(E) Demonstrate minimal among-operator imprecision using results of all study participants.

(F) Demonstrate minimal within-site imprecision using test results generated at each site by an adequate number of participants to produce measures of performance that are statistically valid and defensible. Testing must be performed at a minimum of three independent study sites.

(G) Using results generated by study participants, demonstrate minimal among-site imprecision at an adequate number of sites to produce measures of performance that are statistically valid and defensible.

(v) Method accuracy studies demonstrating that there is no statistically significant difference between observed values and expected values at the cutoff point when—

(A) The test values are compared to a quantitative result such as the value of a reference material or the presence or absence of a particular biologic component;

(B) Confirming that there are no significant equivocal test results on either side of the cutoff;

(C) Comparing results between study participants and laboratory professionals on samples with values at the cutoff;

(D) The test is performed on patient samples instead of reference materials, confirming there is no introduction of error due to sample matrix; and

(E) Samples contain substances that commonly cause interference confirming there is no introduction of error because of these substances.

(c) *Provisions for inclusion of tests in the APT subcategory*—(1) *Process for requesting APT categorization.*

(i) Requests for APT categorization must be submitted to PHS.

(ii) PHS reviews requests for APT categorization that meet the criteria specified in paragraph (b) of this section and the submission requirements under paragraph (c)(2) of this section.

(iii) The CLIAC, as specified in subpart T of this part, conducts reviews upon the request of HHS and makes recommendations to HHS concerning APT test categorization.

(iv) Any change or modification to an APT test system by the manufacturer or producer that could affect the accuracy or reliability of that test must be resubmitted to PHS for evaluation and review. Until this review is completed and categorization status is determined, the modified test is considered uncategorized and, in accordance with § 493.17(c)(4), is considered high complexity.

(v) A request for reconsideration of a test denied APT categorization is accepted for review if the request is based on information not previously submitted.

(2) *Submission requirements.*

(i) Requests for APT categorization must meet the criteria described in paragraph (b) of this section. In the event that a request does not include complete information, the request is not reviewed and the manufacturer or producer of the test system is notified.

(ii) Data collection protocols and data submitted must be complete and data submitted must be statistically valid and meet the criteria described under paragraph (b) of this section.

(iii) Test system instructions must be complete and must include, as applicable, the items defined in paragraph (b)(1)(ii) of this section for quantitative tests and under paragraph (b)(2)(ii) of this section for qualitative tests. In addition, test system instructions must include the following statements:

(A) "Any modification by the laboratory to the PHS-approved test system instructions will result in the test no longer meeting the requirements for APT categorization. Modified tests are considered high complexity and are subject to all applicable CLIA requirements contained in 42 CFR part 493."

(B) "The laboratory must notify the producer of this test system of any performance, perceived or validated, that does not meet the performance specifications as outlined in these instructions." The name, address and phone number(s) of the producer's contact person(s) must follow this statement.

(C) If applicable: "Laboratories performing accurate and precise technology (APT) tests are subject to the proficiency testing (PT) requirements under 42 CFR part 493, subpart H of this part. The laboratory must enroll and successfully participate in an HHS-approved PT program."

(iv) Patient test management protocols must be complete and include sufficient information to assist laboratories in meeting each of the requirements in subpart J of this part. These protocols must meet the following requirements:

(A) Clearly specify the instructions that must be followed by the laboratory to ensure proper specimen handling and accurate test result reporting and assist laboratories in meeting the requirements of subpart J of this part, including the following requirements listed in paragraphs (c)(2)(iv)(A)(*1*) through (c)(2)(iv)(A)(*4*) and (c)(2)(iv)(B) of this section, as applicable:

(*1*) Section 493.1103(a), procedures for specimen submission and handling, including protocols for preparation of patients, specimen collection, preservation, and conditions for specimen transport.

(*2*) Section 493.1105(f), any test requisition information that is relevant and necessary to a specific test to assure accurate testing and reporting of results.

(*3*) Sections 493.1107(c) and 493.1109(c), test records and test report information related to the criteria for specimen acceptability.

(*4*) Section 493.1109, test report information including the following information:

(*i*) Section 493.1109(d), pertinent "reference" or "normal" ranges.

(*ii*) Section 493.1109(f), any imminent life-threatening laboratory results or panic values.

(*iii*) Section 493.1109(g), the test methodology employed and any information that may affect the interpretation of test results.

(B) Provide information (for example, written instructions, instructional materials or samples of forms for documentation of activities performed) that laboratories may follow or supplement, in accordance with the test system's PHS-approved instructions, in meeting the requirements in subpart J of this part.

(v) Quality control instructions must include the following items:

(A) Protocols for documentation of all control and calibration results, any remedial action to be taken, and the appropriate record retention requirements as described at § 493.1221.

(B) Protocols for documentation of equipment maintenance performance and the appropriate record retention requirements as described at § 493.1221.

(C) Safety precaution instructions that cover any physical hazard or biohazardous material, including the proper handling and disposal of testing materials.

(D) Protocols for developing written procedures for the following activities:

(*1*) Determining specimen acceptability.

(*2*) Reporting patient test results, including suggested panic values, if applicable.

(*3*) The course of action to be taken in the event that a test system becomes inoperable.

(*4*) Referral of samples, as specified in § 493.1111, including procedures for specimen submission and handling as described in § 493.1103.

(E) Verification of method performance specifications and verification that the reference range is appropriate for the laboratory's patient population.

(vi) Quality assurance protocols must be complete and include sufficient information to assist laboratories in meeting each of the requirements in subpart P of this part. These protocols must meet the following requirements:

(A) Clearly specify the instructions that must be followed by the laboratory in establishing a comprehensive quality assurance program for monitoring and evaluating the overall quality of the total testing process (preanalytic, analytic, and postanalytic) and identifying and correcting problems based on the results of the evaluation to assure the accurate, reliable and prompt reporting of patient results and assist laboratories in meeting the requirements of subpart P of this part listed in paragraphs (c)(2)(vi)(A)(*1*) through (c)(2)(vi)(A)(*4*) and (c)(2)(vi)(B) of this section, and, as applicable, meet the requirements of the following sections:

(*1*) Section 493.1703, Patient test management assessment, including the following requirements:

(*i*) The criteria established for patient preparation, specimen collection, preservation and transportation.

(*ii*) The completeness and relevance of the information solicited on the laboratory's test requisition.

(*iii*) The use and appropriateness of the criteria established for specimen rejection.

(*iv*) The completeness, usefulness and accuracy of the test report information necessary for the interpretation or utilization of test results.

(*2*) Section 493.1705, Quality control assessment, including a mechanism to assess the effectiveness of the corrective actions taken in the following situations:

(*i*) Problems identified during the evaluation of calibration and control data for the test method.

(*ii*) Problems identified during the evaluation of patient test values for the purpose of ensuring the appropriateness of the reference range of the test method.

(*3*) Section 493.1709, Comparison of test results, including procedures for evaluating and defining the relationship between test results using different methodologies, instruments, or testing sites.

(*4*) Section 493.1711, Relationship of patient information to patient results, including procedures for identifying and evaluating patient test results that appear inconsistent with any relevant criteria specified in § 493.1711.

(B) Provide information (for example, written instructions, instructional materials, or samples of forms for documentation of activities performed) that laboratories may follow or supplement, in accordance with the test system's PHS-approved instructions, in meeting the requirements in subpart P of this part.

(3) *Notification of decision.*

(i) PHS determines whether a laboratory test meets the criteria listed under paragraph (b) of this section for an APT test.

(ii) PHS notifies the applicant of APT categorization, whether denied or granted.

(iii) APT categorization is effective as of the date of notification to the applicant.

(iv) PHS publishes additions and revisions periodically to tests categorized as APT in the **Federal Register** in a notice with opportunity for public comment. PHS reserves the right to reevaluate and recategorize a test based upon the comments it receives in response to the **Federal Register** notice.

6. In § 493.20, paragraphs (a) and (b) are revised to read as follows:

§ 493.20 Laboratories performing tests of moderate complexity.

(a) A laboratory may qualify for a certificate to perform tests of moderate complexity if it restricts its test performance to waived tests or examinations and one or more tests or examinations meeting criteria for tests of moderate complexity including the subcategories of PPM and APT tests.

(b) A laboratory that performs tests or examinations of moderate complexity must meet the applicable requirements in subpart C or subpart D, and subparts F, H, J, K, M, P, and Q of this part. Under a registration certificate or certificate of compliance, laboratories also performing PPM procedures and APT tests must meet the inspection requirements at § 493.1777.

* * * * *

7. A new § 493.21 is added to read as follows:

§ 493.21 Laboratories performing accurate and precise technology (APT) tests.

(a) A laboratory may qualify for a certificate to perform APT tests if it performs tests categorized by PHS as APT tests and no other procedures, except those specified as PPM procedures or those approved by PHS as waived tests.

(b) Laboratories performing APT tests must meet the following requirements:

(1) Follow each test system's PHS-approved instructions for performing the test; and

(2) Meet the applicable requirements in subpart C or subpart D of this part and subparts F, H, J, K, M, P, and Q of this part.

(c) If the laboratory also performs PPM procedures, the laboratory must meet the applicable requirements in subparts H, J, K, M, P, and Q of this part.

(d) If the laboratory also performs waived tests, the requirements of subparts H, J, K, M, and P of this part are not applicable for the waived tests. However, the laboratory must comply with the requirements in §§ 493.15(e) and 493.1775.

8. In § 493.25, paragraph (c) is revised to read as follows:

§ 493.25 Laboratories performing tests of high complexity.

* * * * *

(c) If the laboratory also performs tests of moderate complexity, the applicable requirements of subparts H, J, K, M, P and Q of this part must be met. Under a registration certificate or certificate of compliance, PPM procedures and APT tests must meet the inspection requirements at § 493.1777.

* * * * *

9. The heading of subpart C is revised to read as follows:

Subpart C—Registration Certificate, Certificate for Provider-Performed Microscopy Procedures, Certificate for Accurate and Precise Technology Tests, and Certificate of Compliance

10. In § 493.43, the section heading and paragraph (a) are revised to read as follows:

§ 493.43 Application for registration certificate, certificate for provider-performed microscopy (PPM) procedures, certificate for accurate and precise technology (APT) tests, and certificate of compliance.

(a) *Filing of application.* Except as specified in paragraph (b) of this section, all laboratories performing tests of moderate complexity (including the subcategories) or high complexity, or any combination of these tests, must file a separate application for each laboratory location.

* * * * *

11. In § 493.45, the introductory paragraph is revised, the introductory text of paragraph (a) is republished, and paragraphs (a)(1) and (a)(2) are revised to read as follows:

§ 493.45 Requirements for a registration certificate.

Laboratories performing only waived tests, PPM procedures, APT tests, or any combination of these tests, are not required to obtain a registration certificate.

(a) A registration certificate is required—(1) Initially for all laboratories performing test procedures of moderate complexity (other than the subcategories of APT tests and PPM procedures) or high complexity, or both;

(2) For all laboratories that have been issued a certificate of waiver, certificate for PPM procedures, or certificate for APT tests that intend to perform tests of moderate or high complexity, or both in addition to those tests listed in § 493.15(c) or specified as PPM procedures, or categorized as APT tests; and

* * * * *

12. A new § 493.48 is added to read as follows:

§ 493.48 Requirements for a certificate for accurate and precise technology (APT) tests.

(a) A certificate for APT tests is required for all laboratories that intend to perform only the following tests:

(1) Tests that have been categorized by PHS as APT tests.

(2) APT tests in addition to waived tests or PPM procedures.

(3) APT tests, waived tests and PPM procedures.

(b) HHS issues a certificate for APT tests if the laboratory meets the following requirements:

(1) Complies with the requirements of § 493.43 for applying for a certificate.

(2) Agrees to treat proficiency testing samples in the same manner as it treats patient specimens.

(3) Agrees to be inspected by HHS as specified in § 493.1778.

(4) Remits the fee for the certificate as specified in subpart F of this part.

(c) A laboratory issued a certificate for APT tests is subject to the following requirements:

(1) The notification requirements of § 493.51.

(2) The applicable requirements of this subpart and subparts H, J, K, M, P and Q of this part.

(d) A laboratory requesting a certificate for APT tests that also performs PPM procedures is subject to the following requirements:

(1) Ensuring that PPM procedures are performed only by individuals meeting the personnel requirements of subpart M of this part.

(2) Undergoing random inspections as specified in § 493.1778.

(e) In accordance with subpart R of this part, HHS initiates suspension, limitation, or revocation of a laboratory's certificate for APT tests for failure to comply with the applicable requirements set forth in this subpart. HHS may also impose certain alternative sanctions. In addition, failure to meet the requirements of this subpart may result in suspension of all or part of payments under Medicare and Medicaid.

(f) A certificate for APT tests is valid for a period of no more than 2 years. A laboratory must follow the procedures established by HHS for renewal of this certificate.

13. Section 493.49 is amended by revising the introductory text and paragraphs (a) and (b) to read as follows:

§ 493.49 Requirements for a certificate of compliance.

A certificate of compliance may include any combination of tests categorized as high complexity or moderate complexity or listed in § 493.15(c) as waived tests. Moderate complexity tests may include those specified as PPM procedures or categorized as APT tests.

(a) HHS issues a certificate of compliance to a laboratory only if the laboratory meets the following requirements:

(1) Meets the requirements of §§ 493.43 and 493.45.

(2) Remits the certificate fee specified in subpart F of this part.

(3) Meets the applicable requirements of this subpart and subparts H, J, K, M, P, and Q of this part.

(b) A laboratory issued a certificate of compliance must meet the following requirements:

(1) Meets the notification requirements of § 493.51.

(2) Permits announced or unannounced inspections by HHS in accordance with subpart Q of this part for the following reasons:

(i) Routine determination of compliance with the applicable requirements of this part.

(ii) Evaluation of complaints.

(iii) Nonroutine survey of the laboratory when HHS has substantive reason to believe that tests are being performed, or the laboratory is being operated in a manner that constitutes an imminent and serious risk to human health.

(iv) Collection of information regarding the appropriateness of tests listed in § 493.15 or tests categorized as moderate complexity (including the subcategories) or high complexity.

* * * * *

14. Section 493.51 is revised to read as follows:

§ 493.51 Notification requirements for laboratories issued a certificate for accurate and precise technology (APT) tests or a certificate of compliance.

Laboratories issued a certificate for APT tests or a certificate of compliance must meet the following requirements:

(a) Notify HHS or its designee within 30 days of any change in any of the following items:

(1) Ownership.

(2) Name.

(3) Location.

(4) Director.

(5) Technical supervisor (laboratories performing high complexity testing only).

(b) Notify HHS no later than 6 months after performing any test or examination within a specialty or subspecialty area that is not included on the laboratory's certificate for APT tests or a certificate of compliance, so that compliance with requirements can be determined.

(c) Notify HHS no later than 6 months after any deletions or changes in test methodologies for any test or examination included in a specialty or subspecialty, or both, for which the laboratory has been issued a certificate for APT tests or a certificate of compliance.

(d) Notify HHS before performing and reporting results for tests not included under the certificate for APT tests (which are tests other than waived tests, PPM procedures, and APT tests) unless the laboratory has been issued a registration certificate as required in subpart C or subpart D of this part, as applicable.

15. Section 493.53 is amended by revising the introductory text and paragraph (a) to read as follows:

§ 493.53 Notification requirements for laboratories issued a certificate for provider-performed microscopy (PPM) procedures.

Laboratories issued a certificate for PPM procedures must notify HHS or its designee in the following situations:

(a) Before performing and reporting results for any test of moderate complexity (including the subcategory of APT tests) or high complexity, or both, in addition to tests specified as PPM procedures, or any test or examination that is not specified under § 493.15(c) for which it does not have a registration certificate or certificate for APT technology tests as required in subpart C or subpart D, as applicable, of this part.

* * * * *

16. In § 493.638, introductory paragraph (a) is revised, paragraph (a)(4) is redesignated as (a)(5), new paragraph (a)(4) is added, and paragraph (b) is revised to read as follows:

§ 493.638 Certificate fees.

(a) *Basic rule.* Laboratories must pay a fee for the issuance of a registration certificate, certificate for PPM procedures, certificate of waiver, certificate for APT tests, certificate of accreditation, or a certificate of compliance, as applicable. Laboratories must also pay a fee to reapply for a certificate for PPM procedures, certificate of waiver, certificate for APT tests, certificate of accreditation, or a certificate of compliance. The total of fees collected by HHS under the laboratory program must be sufficient to cover the general costs of administering the laboratory certification program under section 353 of the PHS Act.

* * * * *

(4) For a certificate for APT tests, the costs include issuing the certificate, collecting the fees, determining if a certificate for APT tests should be issued, evaluating which test systems qualify for inclusion in the subcategory of APT tests, and other direct administrative costs.

(5) For a certificate of accreditation, the costs include issuing the certificate, collecting the fees, evaluating the programs of accrediting bodies, and other direct administrative costs.

(b) *Fee amount.* The fee amount is set annually by HHS on a calendar year basis and is based on the category of test complexity, or on the category of test complexity and schedules or ranges of annual laboratory test volume (excluding waived tests and tests performed for quality control, quality assurance, and proficiency testing purposes) and specialties tested, with the amounts of the fees in each schedule being a function of the costs for all aspects of general administration of CLIA as set forth in § 493.649 (b) and (c). This fee is assessed and payable at least biennially. The methodology used to determine the amount of the fee is found in § 493.649. The amount of the fee applicable to the issuance of the registration certificate or the issuance or renewal of the certificate for PPM procedures, certificate of waiver, certificate for APT tests, certificate of accreditation, or certificate of compliance is the amount in effect at

---

the time the application is received. Upon receipt of an application for a certificate, HHS or its designee notifies the laboratory of the amount of the required fee for the requested certificate.

17. In § 493.639, paragraphs (b) introductory text and (b)(1) are revised to read as follows:

§ 493.639 Fee for revised certificate.

* * * * *

(b) A laboratory must pay a fee to cover the cost of issuing a revised certificate in any of the circumstances specified in paragraphs (b)(1) and (b)(2) of this section.

(1) The fee for issuing an appropriate revised certificate is based on the cost of issuing the revised certificate to the laboratory as follows:

(i) If a laboratory with a certificate of waiver wishes to perform tests in addition to those listed in § 493.15(c) as waived tests, it must, as set forth in § 493.638, pay an additional fee for the appropriate certificate to cover the additional testing.

(ii) If a laboratory with a certificate for PPM procedures wishes to perform tests in addition to those specified as PPM procedures or listed in § 493.15(c) as waived tests, it must, as set forth in § 493.638, pay an additional fee for the appropriate certificate (registration or certificate for APT tests) to cover the additional testing.

(iii) If a laboratory with a certificate for APT tests wishes to perform tests in addition to those categorized as APT tests, specified as PPM procedures, or listed in § 493.15(c) as waived tests, it must, as set forth in § 493.638, pay an additional fee for a registration certificate to cover the additional testing.

* * * * *

18. In § 493.643, paragraph (a) is revised to read as follows:

§ 493.643 Fee for determination of program compliance.

(a) *Fee requirement.* In addition to the fee required under § 493.638, a laboratory subject to routine inspections must pay a fee to cover the cost of determining program compliance. Laboratories issued a certificate for PPM procedures, certificate of waiver, certificate for APT tests, or a certificate of accreditation are not subject to this fee for routine inspections.

* * * * *

19. In section 493.645, the heading is revised, paragraph (c) is redesignated as (d) and revised, and a new paragraph (c) is added:

§ 493.645 Additional fee(s) applicable to approved State laboratory programs and laboratories issued certain certificates.

* * * * *

(c) *Laboratories with a certificate for APT tests.*

(1) In addition to the certificate fee, a laboratory requesting a certificate for APT tests is also assessed a fee representing the cost to HHS of random inspections to determine compliance with CLIA requirements. All laboratories issued a certificate for APT tests will share in the cost of these inspections.

(2) If a laboratory issued a certificate for APT tests has been inspected and followup visits are necessary because of identified deficiencies, HHS assesses the laboratory a fee to cover the cost of these visits. The fee is based on the actual resources and time necessary to perform the follow up visits. HHS revokes the laboratory's certificate for APT tests for failure to pay the assessed fee.

(d) *Other fees.* If, in the case of a laboratory that has been issued a certificate of accreditation, certificate of waiver, certificate for PPM procedures, or certificate for APT tests, it is necessary to conduct a complaint investigation, impose sanctions, or conduct a hearing, HHS assesses that laboratory a fee to cover the cost of these activities. Costs are based on the actual resources and time necessary to perform the activities and are not assessed until after the laboratory concedes the existence of deficiencies or an ALJ rules in favor of HHS. HHS revokes the laboratory's certificate for failure to pay the assessed costs. If a complaint investigation results in the determination that a complaint is unsubstantiated, or if an HHS adverse action is overturned at the conclusion of the administrative appeals process, the costs of these activities are not imposed upon the laboratory.

20. The heading of subpart H is revised to read as follows:

Subpart H—Participation in Proficiency Testing for Laboratories Performing Tests of Moderate Complexity (Including the Subcategories), High Complexity, or any Combination of These Tests

21. Section 493.803(a) is revised to read as follows:

§ 493.803 Condition: Successful participation.

(a) Each laboratory performing tests of moderate complexity (including the subcategories) and/or high complexity must successfully participate in a proficiency testing program approved by HCFA, if applicable, as described in subpart I of this part for each specialty, subspecialty, and analyte or test in which the laboratory is certified under CLIA.

* * * * *

22. The heading of § 493.807 is revised to read as follows:

§ 493.807 Condition: Reinstatement of laboratories performing tests of moderate complexity (including the subcategories), high complexity, or any combination of these tests, after failure to participate successfully.

* * * * *

23. The undesignated center heading immediately preceding § 493.821 is revised to read as follows:

Proficiency Testing by Specialty and Subspecialty for Laboratories Performing Tests of Moderate Complexity (Including the Subcategories), High Complexity, or Any Combination of These Tests

24. The heading to subpart I is revised to read as follows:

Subpart I—Proficiency Testing Programs for Tests of Moderate Complexity (Including the Subcategories), High Complexity, or any Combination of These Tests

25. The heading to subpart J is revised to read as follows:

Subpart J—Patient Test Management for Moderate Complexity (Including the Subcategories), High Complexity, or any Combination of These Tests

26. Section 493.1101 is revised to read as follows:

§ 493.1101 Condition: Patient test management; moderate complexity (including the subcategories), high complexity testing, or any combination of these tests.

Each laboratory performing moderate complexity (including the subcategories) or high complexity testing, or any combination of these tests, must employ and maintain a system that provides for proper patient preparation; proper specimen collection, identification, preservation, transportation, and processing; and accurate result reporting. This system must assure optimum patient specimen integrity and positive identification throughout the preanalytic (pre-testing), analytic (testing), and postanalytic (post-testing) processes and must meet the standards as they apply to the testing performed.

27. A new § 493.1102 is added to read as follows:

OL
60
SS
1
7
9
SE
15
995
MI

§ 493.1102 Standard; Patient test management requirements for accurate and precise technology (APT) tests.

For each APT test performed, the laboratory must meet all applicable patient test management requirements specified in §§ 493.1103 through 493.1111. The laboratory meets these requirements by doing both of the following activities:

(a) Having available and following the test system's PHS-approved instructions and, as appropriate, any supplements to the procedures established by the laboratory in accordance with the test system's PHS-approved instructions.

(b) Maintaining all records documenting compliance with paragraph (a) of this section for 2 years.

28. The heading to subpart K is revised to read as follows:

Subpart K—Quality Control for Tests of Moderate Complexity (Including the Subcategories), High Complexity, or any Combination of These Tests

29. Section 493.1201 is amended by revising paragraph (a) introductory text and paragraph (b) and by adding paragraph (c) to read as follows:

§ 493.1201 Condition: General quality control; Moderate complexity (including the subcategories) or high complexity testing, or any combination of these tests.

(a) *General.* Subpart K of this part is divided into two sections, general quality control and quality control for specialties and subspecialties. The quality control requirements are specified in §§ 493.1201 through 493.1285 unless—

* * * * *

(b) *Applicability of subpart K to moderate complexity (excluding APT tests) and high complexity tests.* The laboratory must establish and follow written quality control procedures for monitoring and evaluating the quality of the analytical testing process of each method to assure the accuracy and reliability of patient test results and reports. The laboratory must meet the applicable general quality control standards in §§ 493.1202 through 493.1221, unless an alternative procedure specified in the manufacturer's protocol has been cleared by the Food and Drug Administration (FDA) as meeting certain CLIA requirements for quality control or HHS approves an equivalent procedure specified in appendix C of the State Operations Manual (HCFA Pub. 7). HCFA Pub. 7 is available from the National Technical Information Service, U.S. Department of Commerce, 5825 Port Royal Road, Springfield, VA 22161, telephone number (703) 487–4630.

(c) *Applicability of subpart K to APT testing.* The laboratory must follow each test system's PHS-approved written instructions for monitoring and evaluating the quality of the analytical testing process to assure the accuracy and reliability of patient test results and reports. For each APT test, the laboratory must meet the quality control requirements of § 493.1204.

30. In § 493.1202, the introductory text of paragraph (c) is revised to read as follows:

§ 493.1202 Standard; Moderate or high complexity testing, or both: Effective from September 1, 1992 to September 1, 1996.

* * * * *

(c) For all other tests of moderate complexity, excluding the subcategory of APT testing, performed using an instrument, kit, or test system cleared by the FDA through premarket notification (510(k)) or the premarket approval (PMA) process for in-vitro diagnostic use, the laboratory must—

* * * * *

31. Section 493.1203 is amended by revising the introductory text to read as follows:

§ 493.1203 Standard; Moderate complexity (excluding accurate and precise technology (APT) tests) or high complexity testing or both: Effective September 1, 1996.

For each moderate complexity (excluding APT tests) or high complexity test performed, the laboratory is in compliance with this section if it—

* * * * *

§ 493.1204 [Redesignated as § 493.1206]

32. Section 493.1204 is redesignated as § 493.1206.

33. New § 493.1204 is added to read as follows:

§ 493.1204 Standard; Quality control requirements for accurate and precise technology (APT) tests.

For each APT test performed, the laboratory is in compliance with this subpart if it meets all applicable quality control requirements in this section. The laboratory must meet the following requirements:

(a) Have available and follow each test system's PHS-approved written instructions, which include the following protocols:

(1) Safety precautions.

(2) Protocols for instrument or test system operation and test performance, including maintenance and function checks.

(3) Calibration procedures.

(4) Quality control procedures defined by the manufacturer or producer of the test system, which include running at least two levels of control each day of testing to monitor all steps in the testing process, including the extraction phase if applicable, unless one of the following circumstances applies:

(i) The test system's PHS-approved instructions specify other than two levels of control.

(ii) The procedure cannot be controlled by conventional procedures and an alternative means of controlling the system has been approved by PHS.

(5) Remedial action procedures.

(b) Ensure that it meets the following requirements:

(1) It has available and follows written procedures, based on each test system's PHS-approved instructions, as applicable, for the following procedures:

(i) Determining specimen acceptability.

(ii) Reporting patient test results, including panic values (values requiring immediate medical intervention).

(iii) Course of action to be taken in the event that a test system becomes inoperable.

(iv) Referral of samples as specified in § 493.1111, including procedures for specimen submission and handling, as described in § 493.1103.

(2) The written procedures, whether provided by the manufacturer, the test system producer, or the laboratory, are approved, signed and dated by the current director of the laboratory.

(3) Any change to a procedure by the manufacturer or producer of a test system is approved by PHS and signed and dated by the laboratory director for use by laboratory personnel.

(4) Any change to a laboratory's protocol designed to meet the requirements is approved, signed and dated by the laboratory director.

(5) A copy of each procedure with the dates of initial use and discontinuance is retained for 2 years after a procedure has been discontinued.

(c) Before reporting patient results, using at least the test system's PHS-approved written instructions, verify that it can obtain performance specifications for accuracy, precision and reportable range of patient results that meet those established by the manufacturer or producer of the test system. The laboratory must also ensure that the laboratory's patient population is included in the reference range specified in the PHS-approved instructions.

(d) Document all remedial actions taken—

(1) In accordance with the test system's PHS-approved written instructions; and

(2) When errors in the reported patient test results are detected. In such a case, the laboratory must perform the following procedures:

(i) Promptly notify the authorized person ordering the test or individual using the test results of report errors.

(ii) Issue corrected reports promptly to the authorized person ordering the test or the individual using the test results.

(iii) Maintain exact duplicates of the original erroneous report as well as the corrected report for 2 years.

(e) Document and maintain records of all quality control activities specified in this section and retain records for at least 2 years or longer as specified by the manufacturer or producer of the test system in accordance with § 493.1221.

(f) Promptly report any inaccurate or imprecise method performance, whether perceived or validated, to the manufacturer or producer of the test system and, if the problem is not rectified, to PHS.

(g) Ensure that no modification is made in the test system's PHS-approved written instructions. Any changes made to the test system will result in the test system no longer meeting the requirements for categorization in the APT category. Modified tests are considered high complexity and are subject to the applicable CLIA quality control requirements contained in subpart K of this part, as well as all other applicable requirements for high complexity testing.

34. The heading to subpart M is revised to read as follows:

Subpart M—Personnel for Moderate Complexity (Including the Subcategories) and High Complexity Testing

35. Section 493.1351 is revised to read as follows:

§ 493.1351 General.

This subpart consists of the personnel requirements that must be met by laboratories performing moderate complexity testing, PPM procedures, APT tests, high complexity testing, or any combination of these tests.

36. Following § 493.1365, a new undesignated center heading and new §§ 493.1371 through 493.1387 are added to read as follows:

Laboratories Performing Accurate and Precise Technology (APT) Tests

Sec.
493.1371 Condition: Laboratories performing APT tests; Laboratory director.
493.1373 Standard; Laboratory director qualifications.
493.1375 Standard; Laboratory director responsibilities.
493.1377 Condition: Laboratories performing APT testing; clinical consultant.
493.1379 Standard; Clinical consultant qualifications.
493.1381 Standard: Clinical consultant responsibilities.
493.1383 Condition: Laboratories performing APT testing; testing personnel.
493.1385 Standard; Testing personnel qualifications.
493.1387 Standard; Testing personnel responsibilities.

Laboratories Performing Accurate and Precise Technology (APT) Tests

§ 493.1371 Condition: Laboratories performing APT tests; Laboratory director.

The laboratory must have a director who meets the qualification requirements of § 493.1373 and provides overall management and direction in accordance with § 493.1375.

§ 493.1373 Standard; Laboratory director qualifications.

The laboratory director must be qualified to manage and direct the laboratory personnel and the performance of APT tests and must be eligible to be an operator of a laboratory within the requirements of subpart R of this part and meet the requirements of § 493.1405, which contain laboratory director qualifications for moderate complexity testing.

§ 493.1375 Standard; Laboratory director responsibilities.

The laboratory director is responsible for the overall operation and administration of the laboratory, including the employment of personnel who are competent to perform APT tests in accordance with each test system's PHS-approved instructions, and record and report test results promptly, accurately, and proficiently, and for assuring compliance with applicable regulations.

(a) The laboratory director, if qualified, may perform the duties of the clinical consultant and testing personnel or may delegate these responsibilities to personnel meeting the qualification requirements of §§ 493.1379 and 493.1385, respectively.

(b) The laboratory director must be accessible to the laboratory to provide onsite, telephone or electronic consultation as needed.

(c) No individual may direct more than five laboratories.

(d) The laboratory director must meet the following requirements:

(1) Ensure that testing systems selected for each of the tests performed in the laboratory are appropriate for the clinical use of the test results.

(2) Ensure that the physical plant and environmental conditions of the laboratory are appropriate for the testing performed and provide a safe environment in which employees are protected from physical, chemical, and biological hazards.

(3) Ensure that the following requirements are met:

(i) Before reporting patient results, using at least the test system's PHS-approved verification procedure, the laboratory can obtain or verify performance specifications for accuracy, precision and reportable range of patient results that meet those established by the manufacturer or producer of the test system and can ensure that the reference range specified by the manufacturer or producer of the test system is appropriate for the laboratory's patient populations.

(ii) Testing personnel are following test analyses and quality control procedures in accordance with each test system's PHS-approved instructions.

(4) Ensure that the laboratory is enrolled in an HHS-approved proficiency testing program for the

testing performed and that the laboratory meets the following requirements:

(i) The proficiency testing samples are tested as required under subpart H of this part.

(ii) The results are returned within the time frames established by the proficiency testing program.

(iii) All proficiency testing reports received are reviewed to evaluate the laboratory's performance and to identify any problems that require corrective action.

(iv) An approved corrective action plan is followed and documented when any proficiency testing results are found to be unacceptable or unsatisfactory.

(5) Ensure that a quality assurance program is established and maintained to assure the quality of laboratory services provided.

(6) Ensure that all necessary remedial actions are taken and documented and that patient results are reported only when the test system is functioning properly.

(7) Ensure that the producer or manufacturer of the test system is notified when the test system does not meet the performance specifications as outlined in the test system's PHS-approved instructions and, if the problem is not rectified, notify PHS.

(8) Ensure that reports of test results include pertinent information required for interpretation.

(9) Ensure that consultation is available to the laboratory's clients on matters relating to the results of APT tests reported and their interpretation concerning specific patient conditions, including any relevant information provided in the test system's PHS-approved instructions.

(10) Employ a sufficient number of testing personnel with the appropriate education and either experience or training to perform tests and report test results in accordance with the personnel responsibilities described in this subpart.

(11) Ensure that, before they test patient samples, testing personnel receive the appropriate training for the services offered and have demonstrated that they can perform all testing operations, in accordance with each test system's PHS-approved instructions, to provide and report accurate results.

(12) Ensure that policies and procedures are established for evaluating and documenting the performance of testing personnel responsible for APT testing to ensure that they are competent and maintain their competency to handle specimens, perform test procedures, report test results promptly and proficiently, and, whenever necessary, identify needs for remedial training or continuing education to improve testing skills. The director must ensure that evaluations are conducted at least semiannually during the first year the individual tests patient specimens and that, thereafter, the evaluations are performed at least annually unless test methodology or instrumentation changes, in which case, before reporting patient test results, the individual's performance must be reevaluated to include the use of the new test methodology or instrumentation. The evaluation of the competency of testing personnel must include at least one or more of the following, but is not limited to the following procedures:

(i) Direct observations of routine patient test performance, including patient preparation, if applicable, specimen handling, and testing.

(ii) Monitoring the recording and reporting of test results.

(iii) Review of work sheets, quality control records, proficiency testing results, and preventive maintenance records.

(iv) Assessment of test performance through testing previously analyzed specimens, internal blind testing samples, or external proficiency testing samples.

(13) Ensure that an approved procedure manual is available to all testing personnel.

(14) Specify, in writing, the responsibilities and duties of each person engaged in the performance of APT testing that identifies which examinations and procedures each individual is authorized to perform.

§ 493.1377 Condition: Laboratories performing APT testing; clinical consultant.

The laboratory must have a clinical consultant who meets the qualification requirements of § 493.1379 and provides clinical consultation in accordance with § 493.1381.

§ 493.1379 Standard; Clinical consultant qualifications.

The clinical consultant must be qualified to consult with and furnish opinions to the laboratory's clients concerning the diagnosis, treatment and management of patient care. The clinical consultant must meet the requirements of § 493.1417, Clinical consultant qualifications for moderate complexity testing.

§ 493.1381 Standard; Clinical consultant responsibilities.

The clinical consultant provides consultation regarding the appropriateness of the testing ordered and interpretation of test results. The clinical consultant must meet the following requirements:

(a) Be available to provide clinical consultation to the laboratory's clients.

(b) Be available to assist the laboratory's clients in ensuring that appropriate tests are ordered to meet the clinical expectations.

(c) Ensure that reports of test results include pertinent information required for specific patient interpretation.

(d) Ensure that consultation is available and communicated to the laboratory's clients on matters related to the results of APT tests reported and their interpretation concerning specific patient conditions, including any relevant information provided in the test system's PHS-approved instructions.

§ 493.1383 Condition: Laboratories performing APT testing; testing personnel.

The laboratory must have a sufficient number of individuals who meet the qualification requirements of § 493.1385 to perform the functions specified in § 493.1387 for the volume of tests performed.

§ 493.1385 Standard; Testing personnel qualifications.

Each individual performing APT testing must meet the following requirements:

(a) Possess a current license issued by the State in which the laboratory is located, if such licensing is required.

(b) Meet one of the following requirements:

(1) Be a doctor of medicine, doctor of osteopathy, or doctor of podiatric medicine licensed to practice medicine, osteopathy, or podiatry in the State in which the laboratory is located or have earned a doctoral, master's, or bachelor's degree in a chemical, physical, biological or clinical laboratory science or medical technology from an accredited institution.

(2) Have earned an associate degree in a chemical, physical, or biological science, or in medical laboratory technology from an accredited institution.

(3) Be a high school graduate or equivalent and have successfully completed an official U.S. military medical laboratory procedures course of at least 50 weeks duration and have held the military enlisted occupational specialty of Medical Laboratory Specialist (Laboratory Technician).

(4) (i) Have earned a high school diploma or equivalent; and

(ii) Have documentation of training appropriate for the APT testing performed before analyzing patient

specimens. This training must ensure that the individual has the following skills and knowledge:

(A) The skills required for proper specimen collection, including patient preparation (if applicable), labeling, handling, preservation, transportation and storage of specimens.

(B) The skills required for performing each test method and control procedure and for proper instrument use.

(C) The skills required for performing preventive maintenance, troubleshooting and calibration procedures related to each test performed.

(D) An awareness of the factors that influence test results.

§ 493.1387 Standard; Testing personnel responsibilities.

The testing personnel performing APT tests are responsible for specimen processing, test performance, and for reporting test results.

(a) Each individual performs only those APT tests that they are authorized by the laboratory director to perform.

(b) Each individual performing APT testing must meet the following requirements:

(1) Follow each test system's PHS-approved written instructions and, as applicable, the laboratory's written policies and procedures for specimen submission and handling and for reporting and maintaining records of patient test results.

(2) Maintain records that demonstrate that proficiency testing samples are tested in the same manner as patient samples.

(3) Adhere to each test system's PHS-approved written instructions for quality control procedures, including the documentation of all quality control activities, remedial actions, instrument and procedural calibrations, and maintenance performed.

(4) Be capable of identifying problems that may adversely affect test performance or reporting of test results and either must correct the problems or immediately notify the director.

(5) Notify the director of any test system performance that does not meet the performance specifications as outlined in the test system's PHS-approved instructions.

37. The heading to subpart P is revised to read as follows:

Subpart P—Quality Assurance for Moderate Complexity (Including the Subcategories), High Complexity Testing, or any Combination of These Tests

§ 493.1701 [Amended]

38. Section 493.1701 is amended by revising the word "subcategory" to read "subcategories" wherever it appears in the heading and text.

39. A new § 493.1702 is added to read as follows:

§ 493.1702 Standard; Quality Assurance for accurate and precise technology (APT) tests.

For each APT test performed, the laboratory must meet all applicable quality assurance requirements specified in §§ 493.1703 through 493.1721. The laboratory meets these requirements by doing both of the following activities:

(a) Having available and following the test system's PHS-approved instructions and, as appropriate, any supplements to the procedures established by the laboratory in accordance with the test system's PHS-approved instructions.

(b) Maintaining all records documenting compliance with paragraph (a) of this section for 2 years.

40. In § 493.1777 the introductory text is revised to read as follows:

§ 493.1777 Condition: Inspection of laboratories requesting or issued a certificate of compliance.

Laboratories requesting a certificate of compliance must permit an inspection to assess compliance with part 493 of this chapter. All testing conducted, including testing in the subcategories of APT tests or PPM procedures, may be included in the laboratory's routine or complaint inspection. APT tests and PPM procedures are assessed for compliance with only the applicable requirements specific to those subcategories of testing.

* * * * *

41. A new § 493.1778 is added to read as follows:

§ 493.1778 Condition: Inspection of laboratories issued a certificate for accurate and precise technology (APT) tests.

(a) HHS or its designee may conduct announced or unannounced inspections of any laboratory issued a certificate for APT tests at any time during its hours of operation for the following purposes:

(1) Assess compliance with the following circumstances, as applicable:

(i) On a random basis.

(ii) Following a laboratory's demonstration of unsuccessful participation in proficiency testing for analytes specified in subpart I of this part.

(iii) To evaluate complaints from the public.

(2) Determine whether testing is being performed or the laboratory is being operated in a manner that does not constitute an imminent and serious risk to public health.

(3) Collect information to determine the appropriateness of tests categorized as APT tests according to the criteria listed at § 493.18.

(4) Determine whether the laboratory is performing tests in addition to tests categorized as APT tests according to the criteria listed at § 493.18, specified as PPM procedures, or tests approved by PHS as waived tests that are not included on the laboratory's certificate.

(b) The laboratory may be required as part of this inspection to perform or authorize the following activities:

(1) Test samples (including proficiency testing samples) or perform procedures as HHS or its designee requires.

(2) Allow HHS or its designee to interview all employees of the laboratory concerning the laboratory's compliance with the applicable requirements as noted in paragraph (d) of this section.

(3) Permit employees to be observed performing tests (including proficiency testing specimens), data analysis and reporting.

(4) Permit HHS or its designee access to all areas of the facility, including the following areas:

(i) Specimen procurement and processing areas.

(ii) Storage facilities for specimens, reagents, supplies, records, and reports.

(iii) Testing and reporting areas.

(5) Provide copies to HHS or its designee of all records and data required under this part.

(c) The laboratory must have all records and data accessible and retrievable within a reasonable time frame during the inspection.

(d) Applicable requirements for the purpose of this section are located in subparts C, H, J, K, M, and P of this part and § 493.21.

(e) The laboratory must provide upon reasonable request all information and data needed by HHS or its designee to make a determination of compliance with the applicable requirements.

(f) HHS or its designee may reinspect a laboratory at any time necessary to assess the laboratory's compliance with the applicable requirements.

(g) Failure to permit an inspection under this section will result in the suspension of Medicare and Medicaid payments to the laboratory or termination of the laboratory's participation in Medicare and Medicaid for payment, and suspension of, or action to revoke, the laboratory's CLIA certificate in accordance with subpart R of this part.

42. In § 493.1814, the text of the introductory text of paragraph (b) is republished and paragraph (b)(3) is revised to read as follows:

§ 493.1814 Action when deficiencies are at the condition level but do not pose immediate jeopardy.

* * * * *

(b) *Failure to correct condition level deficiencies.* If HCFA imposes alternative sanctions for condition level deficiencies that do not pose immediate jeopardy and the laboratory does not correct the condition level deficiencies within 12 months after the last day of inspection, HCFA—

* * * * *

(3) May impose (or continue, if already imposed) any alternative sanctions that do not pertain to Medicare payments. (Sanctions imposed under the authority of section 353 of the PHS Act may continue for more than 12 months from the last date of inspection, while a hearing on the proposed suspension, limitation, or revocation of the certificate of compliance, registration certificate, certificate of accreditation, certificate for APT tests, or certificate for PPM procedures is pending.)

* * * * *

43. In § 493.1834, the heading and introductory text of paragraph (f)(2) are republished and paragraphs (b) and (f)(2)(iii) are revised to read as follows:

§ 493.1834 Civil money penalty.

* * * * *

(b) *Scope.* This section sets forth the procedures that HCFA follows to impose a civil money penalty in lieu of, or in addition to, suspending, limiting, or revoking the certificate of compliance, registration certificate, certificate of accreditation, certificate for APT tests, or certificate for PPM procedures of a laboratory that is found to have condition level deficiencies.

* * * * *

(f) *Accrual and duration of penalty.* * * *

(2) *Duration of penalty.* The civil money penalty continues to accrue until the earliest of the following occurs:

* * * * *

(iii) HCFA suspends, limits, or revokes the laboratory's certificate of compliance, registration certificate, certificate of accreditation, certificate for APT tests, or certificate for PPM procedures.

* * * * *

44. In § 493.1836, the heading of paragraph (c) is republished and paragraphs (c)(2) and (c)(3) are revised to read as follows:

§ 493.1836 State onsite monitoring.

* * * * *

(c) *Duration and sanction.* * * *

(2) If the laboratory does not correct all deficiencies within 12 months, and a revisit indicates that deficiencies remain, HCFA cancels the laboratory's approval for Medicare payment for its services and notifies the laboratory of its intent to suspend, limit, or revoke the laboratory's certificate of compliance, registration certificate, certificate of accreditation, certificate for APT tests, or certificate for PPM procedures.

(3) If the laboratory still does not correct its deficiencies, the Medicare sanction continues until the suspension, limitation, or revocation of the laboratory's certificate of compliance, registration certificate, certificate of accreditation, certificate for APT tests, or certificate for PPM procedures is effective.

45. In § 493.2001, the introductory text of paragraph (e) is republished and paragraph (e)(1) is revised to read as follows:

§ 493.2001 Establishment and function of the Clinical Laboratory Improvement Advisory Committee.

* * * * *

(e) The Clinical Laboratory Improvement Advisory Committee or subcommittee at the request of HHS will review and make recommendations concerning—

(1) Criteria for categorizing tests and examinations of moderate complexity (including the subcategories) and high complexity;

* * * * *

RIN 0648-AH99

Hawaiian Islands Humpback Whale National Marine Sanctuary Regulations

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC)

ACTION: Proposed rule; summary of draft management plan; and Notice of public availability of draft management plan and draft environmental impact statement.

SUMMARY: NOAA, as required by section 2306 of the Hawaiian Islands National Marine Sanctuary Act (the "HINMSA" or "Act"), is proposing a comprehensive management plan and implementing regulations for the Hawaiian Islands Humpback Whale National Marine Sanctuary (the "HIHWNMS" or "Sanctuary"). The Sanctuary was designated by Congress in 1992. This document publishes the proposed Designation Document and regulations for the Sanctuary, and summarizes the proposed management plan. The proposed management plan details the proposed goals and objectives, management responsibilities, research and long-term monitoring activities, interpretive and educational programs, resource protection strategies, and enforcement for the Sanctuary. The proposed regulations would implement the comprehensive management plan and govern the conduct of activities consistent with the HINMSA and the National Marine Sanctuaries Act ("NMSA"), and the Designation Document for the Sanctuary. By this notice NOAA also announces the public availability of the draft environmental impact statement and management plan (DEIS/MP) for the Sanctuary.

The primary purposes of the proposed designation document, proposed regulations and proposed management plan are to protect humpback whales and their Sanctuary habitat; to educate and interpret for the public the relationship of humpback whales to the Hawaiian Islands marine environment; to manage human uses of the Sanctuary consistent with the HINMSA and the NMSA; and to provide for the identification of marine resources and ecosystems of national significance for possible inclusion in the Sanctuary.

DATES: Comments are invited and will be considered if submitted in writing to the address below on or before December 14, 1995.

ADDRESSES: Comments should be submitted to the Chief, Sanctuaries and Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, 1305 East-West Highway, SSMC-4, 12th Floor, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Debra Malek, Regional Manager, Pacific Branch, Sanctuaries and Reserves Division, Silver Spring, Maryland, (301) 713-3141, or Allen Tom, On-site Project Specialist, Kihei, Maui, Hawaii, (808) 879-2818 (Maui), (808) 541-3184 (Oahu) or (800) 831-4888 (inter-island toll-free).

SUPPLEMENTARY INFORMATION:

I. Background

The establishment of a national marine sanctuary in the waters around Hawaii was first considered in 1977, when NOAA received the nomination for a proposed Humpback Whale National Marine Sanctuary in the waters between the islands of Maui, Molokai, Lanai, and Kahoolawe. Scientists and resource managers, at a workshop convened in December 1977, recommended that a marine sanctuary would be most beneficial for the long-term protection of the endangered humpback whale. Workshop participants concluded that a Sanctuary that encompassed the marine waters around the main Hawaiian islands would provide the greatest protection for humpback whales in the waters off Hawaii. The nomination was placed on NOAA's List of Recommended Areas in October 1979. In accordance with NOAA regulations, NOAA declared the site an "active candidate" for sanctuary designation in March 1982, and public workshops were conducted in Hawaii during April 1982. Both support for a sanctuary and concerns regarding possible regulation of fishing activities and vessel operation were voiced at these meetings. In early 1984, at the request of the State government, NOAA suspended further consideration of the site as a possible national marine sanctuary.

In October 1990 Congress directed NOAA to determine the feasibility of establishing a national marine sanctuary around Kahoolawe Island, the smallest of the eight main Hawaiian islands (Public Law No. 101-515). NOAA's 1992 report to Congress, "Kahoolawe Island National Marine Sanctuary Feasibility Study", found that although it does not appear that large numbers of humpback whales utilize Kahoolawe Island waters, other biological, cultural and historical resources adjacent to Kahoolawe Island merit further investigation as to their possible national significance. The study recommended that additional areas around the Hawaiian Islands be considered as possible components of a multiple-site, multiple-resource national marine sanctuary.

In 1992, Congress considered the reauthorization of Title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, 16 U.S.C. 1431 *et seq.* ("MPRSA"; also cited as the National Marine Sanctuaries Act). During this time, the State of Hawaii presented testimony at reauthorization hearings citing the need and desirability of designating a Humpback Whale National Marine Sanctuary in the waters around Hawaii. Coupled with the Kahoolawe Feasibility Study, the State's testimony renewed Congressional interest in designation of a sanctuary.

On November 4, 1992, Pub. L. No. 102-587 (the Oceans Act), was signed into law. Subtitle A of Title II of the Oceans Act (the National Marine Sanctuaries Program Amendments Act) reauthorized and amended Title III of the MPRSA. Subtitle C of Title II of the Oceans Act, titled the Hawaiian Islands National Marine Sanctuary Act, designated the Hawaiian Islands Humpback Whale National Marine Sanctuary. The Act specifies a boundary for the Sanctuary subject to modification by the Secretary of Commerce ("Secretary") as may be necessary to fulfill the purpose for which the Sanctuary was designated, and identifies waters around Kahoolawe Island for automatic designation as part of the Sanctuary on January 1, 1996, unless certified by the Secretary as being unsuitable for inclusion in the Sanctuary.

Section 2306 of the Act requires the Secretary to develop a comprehensive management plan and implementing regulations following the procedures of sections 303 and 304 of the NMSA (16 U.S.C. 1433 and 1434; these sections set forth designation standards and procedures for designating and implementing the designation of national marine sanctuaries). To meet these requirements, a series of scoping meetings were conducted in March 1993 on each of the main Hawaiian Islands, and in Washington, DC. During March 1994, additional public meetings were conducted on each of the main Hawaiian Islands to aid the development of a draft management plan for the Sanctuary. On-site staff have also solicited information from Federal, State and county agencies and the public to assist in the development of the DEIS/MP. The DEIS/MP was jointly developed by SRD and the Hawaii Office of State Planning pursuant to a memorandum of agreement signed in June 1993.

The authority of the Secretary to designate national marine sanctuaries was delegated to the Under Secretary of Commerce for Oceans and Atmosphere by Department of Commerce, Organization Order 10-15, § 3.01(z) (Jan. 11, 1988). The authority to administer provisions of Title III of the MPRSA was delegated to the Assistant Administrator for Ocean Services and Coastal Zone Management of NOAA by NOAA Circular 83-38, Directive 05-50 (Sept. 21, 1983, as amended).

Comments are solicited from all interested persons on the proposed Designation Document, the proposed regulations, and the DEIS/MP for the Sanctuary. Comments are in particular invited on the Sanctuary boundary, the adequacy of the regulatory regime to protect humpback whales and their habitat, the research and education programs, the structure and role of the Sanctuary Advisory Council, and the process for identifying other marine resources and ecosystems for possible inclusion in the Sanctuary. After the comments received during the public comment period have been considered, a final environmental impact statement and management plan (FEIS/MP) will be prepared, and a notice of final rule implementing the Sanctuary designation will be published in the **Federal Register**. The Designation Document, management plan, and regulations will take effect and become final 45 days after the date of issuance of the comprehensive management plan and implementing regulations, unless the Governor of Hawaii certifies to the Secretary that the management plan, any implementing regulation, or any term of the plan or regulations is unacceptable. If the Governor makes such certification, the management plan, regulations, or term, respectively, will not take effect in the State waters within the Sanctuary boundary. (The Secretary may then terminate the entire designation for the Sanctuary if he considers that an objection by the Governor will prevent the HINMSA's goals and objectives from being fulfilled.) Upon the close of the 45-day period, a notice will be published in the **Federal Register** announcing the effective date of the implementing regulations.

II. Summary of Draft Environmental Impact Statement/Management Plan

The DEIS/MP for the Hawaiian Islands Humpback Whale National Marine Sanctuary sets forth the Sanctuary's location and provides background information on humpback whales and their habitat, other marine resources located in Hawaii, and human uses of the area. The DEIS/MP describes the proposed resource protection, research and long-term monitoring, education and interpretive programs, and details specific activities to be undertaken in each program. The DEIS/MP also includes a discussion, by program area, of agency roles and responsibilities and a description of Sanctuary administration, including the establishment of a Sanctuary Advisory Council. Major components of the Sanctuary management plan are summarized below.

Resource Protection

Unlike most other national marine sanctuaries, which are based on protecting and managing a marine ecosystem environment, the only resources proposed for protection and management under the Sanctuary regime are humpback whales and their habitat. Thus, the highest management priority for the Sanctuary is the long-term protection of the humpback whales and their habitat in Hawaii. In addition to the HINMSA, the humpback whale is specifically protected by two other Federal laws. The humpback whale is listed as an endangered species under the Endangered Species Act, as amended ("ESA"), 16 U.S.C. 1531 *et seq.*, and is protected under the Marine Mammal Protection Act, as amended ("MMPA"), 16 U.S.C. 1361 et seq., both administered by NOAA's National Marine Fisheries Service ("NMFS"). As many of the activities affecting humpback whales and their habitat are presently regulated or governed by existing Federal, State and county authorities, the Sanctuary would primarily work with these authorities to ensure comprehensive, complementary, coordinated and more efficient management and protection of humpback whales and their habitat. The Sanctuary would also work with existing Federal and State enforcement entities to coordinate enforcement efforts, develop annual enforcement plans, and respond to public concerns.

The goals and objectives of the proposed Resource Protection Program are designed to reinforce, complement and coordinate existing management and regulatory efforts; fill gaps in existing authorities; enhance public participation and awareness in protecting humpback whales and their habitat; address some of the problems, objectives and policies identified in the Hawaii Ocean Resource Management Plan (1991), the NMFS Final Recovery Plan for the Humpback Whale (1991), and other programs, such as point and non-point source pollution control measures as they relate to the protection of the humpback whale's Hawaiian habitat. Because the only resources proposed for protection and management under the Sanctuary regime—humpback whales and their habitat—already are protected, directly and indirectly, by a number of other laws (*e.g.*, ESA, MMPA, Clean Water Act, Rivers and Harbors Act, and the Coastal Zone Management Act), the Sanctuary would seek to achieve these goals by working with existing authorities. The Sanctuary would reinforce existing management regimes without adding to current regulatory and administrative requirements.

To fulfill the statutory mandate of providing long-term protection for the population of humpback whales and their Sanctuary habitat, the proposed Resource Protection Program has the following objectives and strategies:

(1) Coordinate and complement policies and procedures among the agencies sharing regulatory responsibility for the protection and management of humpback whales and humpback whale habitat within the Sanctuary (Sanctuary habitat), primarily with NMFS, which administers the ESA and MMPA, and also with various State and county agencies of competent jurisdiction;

(2) Develop and issue Sanctuary regulations only as necessary to reinforce and complement existing efforts and fill gaps in existing authorities for the protection and management of humpback whales and their Sanctuary habitat;

(3) Complement coordination among appropriate Federal, State and county authorities to enhance enforcement of existing laws that fulfill Sanctuary goals;

(4) Encourage participation by interested agencies and the public in the development of procedures to address specific management concerns (*e.g.*, research, long-term monitoring, enforcement, education, and emergency-response programs);

(5) Promote public awareness of, and voluntary compliance with, Sanctuary regulations and objectives and other authorities in place that protect humpback whales and their Sanctuary habitat through education and interpretive programs stressing resource

sensitivity and wise use of the marine environment;

(6) Utilize research and monitoring results and other scientific data from resource management agencies and researchers to develop effective, comprehensive resource protection strategies and improve management decision-making; and

(7) Facilitate all public and private uses of the Sanctuary (including uses of Hawaiian natives customarily and traditionally exercised for subsistence, cultural, and religious purposes) consistent with the primary objective of protection of the humpback whales and their Sanctuary habitat.

Research and Long-Term Monitoring Program

Effective management of the Sanctuary's resources requires the development and implementation of a responsive Sanctuary research and long-term monitoring program. The primary goals of the proposed Research and Long-Term Monitoring Program are to improve our understanding of humpback whales and their habitat requirements; identify, address and resolve specific management concerns; establish a long-term ecological monitoring program with respect to humpback whales and their habitat; coordinate and facilitate information exchange among the various researchers and institutions, agencies, and the general public; and enhance the public's participation in resource stewardship. Other research priorities may result from the process to identify additional marine resources and ecosystems of national significance for possible inclusion in the Sanctuary.

The proposed Research and Long-Term Monitoring Program would be part of the overall effort to implement portions of the NMFS Final Recovery Plan for the Humpback Whale and other long-term protection plans for humpback whale habitat (e.g. Hawaii Ocean Resource Management Plan). The specific objectives for the proposed Sanctuary Research and Long-Term Monitoring Program are to:

(1) Improve the present understanding of humpback whales' vital life rates (age at sexual maturity, pregnancy rates, calving intervals, mortality and age-specific mortality), abundance, distribution, movement, behavior, and interrelationships with their Hawaiian habitat;

(2) Characterize the marine environment to establish baseline parameters for identifying, detecting and monitoring natural- and human-induced changes to humpback whales and their habitat, and to identify research needs and gaps;

(3) Establish a coordinating framework and procedures for identifying, selecting and sponsoring research projects to ensure that the research topics are responsive to management concerns and that research results contribute to improved management decision-making in the Sanctuary;

(4) Develop a long-term ecological monitoring program to detect and determine the cause or causes of future changes and trends in the vital parameters and the important habitat components of the humpback whale population that winters in the Hawaiian Islands;

(5) Develop a data and information management system for tracking and integrating new information into an evolving understanding of humpback whales and their habitat; and

(6) Encourage information exchange among all researchers, organizations and agencies undertaking humpback whale and habitat related research in the Sanctuary and elsewhere to promote more informed management and decision-making.

Education and Interpretation Program

The primary goals of the proposed Education and Interpretation Program are to improve public awareness and understanding of the humpback whale and its habitat; enhance knowledge of the Sanctuary's purposes, goals and resource protection strategies; facilitate responsible human uses within the Sanctuary consistent with the primary objective of protection of the humpback whale and its habitat; encourage public participation; and facilitate information exchange among the various environmental educators and interpreters, researchers, agencies, and the general public. Particular focus would be placed on projects which interpret for the public the relationship of humpback whales to the Hawaiian Islands marine environment.

On-site visitor programs would be instituted consisting of making available printed materials describing the Sanctuary for distribution at statewide government offices, marine recreation businesses, marinas, whalewatching vessels, humpback whale interpretive centers, libraries, schools, airports, harbors and other local establishments. A local Sanctuary headquarters would be established and the Sanctuary would also use other visitor and information centers throughout Hawaii to inform visitors about the Sanctuary, humpback whales and their habitat.

The specific objectives of the proposed Sanctuary Education and Interpretation Program are to:

(1) Enhance public awareness, understanding and appreciation of humpback whales and their habitat;

(2) Create public awareness of the National Marine Sanctuary Program, the Hawaiian Islands Humpback Whale National Marine Sanctuary, and other humpback whale conservation groups and organizations;

(3) Establish a coordinating framework and procedures for identifying, selecting and sponsoring education projects to ensure that the education topics are responsive to management concerns and that the education products contribute to greater understanding and appreciation of the Sanctuary, humpback whales and the broader Hawaiian Islands marine environment;

(4) Encourage information exchange among all persons, organizations and agencies undertaking environmental education and research activities in the Sanctuary;

(5) Establish a user-friendly Data/Information Center for the location of information and research results pertaining to Sanctuary resources and management information; and

(6) Establish cooperative education programs with native Hawaiian groups to educate people about native Hawaiian traditions, culture, uses and religion as they relate to Hawaii's unique marine environment.

Sanctuary Administration

The National Marine Sanctuary Program is administered by NOAA's Sanctuaries and Reserves Division (SRD). Depending on the resources available to the Sanctuary, staffing would include a Sanctuary manager, administrative assistant, research coordinator, education coordinator, and one or more enforcement/interpreter personnel. Staff would be distributed among the Sanctuary's main office, presently located in Kihei, Maui, other satellite offices located on other islands, or within other agencies. Arrangements may be made among various levels of government agencies and private sector organizations through cooperative agreements or memoranda of understanding to provide personnel and/or resources to carry out the duties associated with the research and education coordinator positions. SRD would coordinate its on-site activities through cooperative arrangements and/or specific memoranda of understanding with other Federal, State, and county agencies, and non-governmental organizations, as appropriate.

A Sanctuary Advisory Council (SAC) would be established pursuant to section 315 of the NMSA (16 U.S.C. 1445a) to enable agencies, interested groups, and individuals to provide advice and recommendations on the management of the Sanctuary. The SAC would consist of a balanced representation of those groups affected by Sanctuary designation, including Federal, State and county authorities, native Hawaiian groups, fishing interests, commercial whalewatching industry, boating industry, environmental interests, researchers, education groups, and members of the community. The SAC would act in an advisory capacity to the Sanctuary Manager and would be instrumental in helping produce annual operating plans and reports by identifying education, outreach, research, long-term monitoring, resource protection and revenue enhancement priorities. The SAC would also play an instrumental role in identifying marine resources and ecosystems of national significance for possible inclusion in the Sanctuary through a process outlined in Part 4(c) of the proposed management plan. The SAC would work in concert with the Manager by keeping her or him informed about issues of concern throughout the Sanctuary, offering recommendations on specific issues, and aiding the Manager in achieving the goals of the Sanctuary program within the context of Hawaii's marine programs and policies.

In order to function efficiently in an advisory capacity and incorporate the different concerns from all the main Hawaiian Islands, the SAC may appoint subcommittees or working groups that correspond to the main Sanctuary management areas of education, research, resource protection, regulations/enforcement, revenue enhancement, and others as necessary. Additional subcommittees or working groups may be formed to provide recommendations to the SAC on the identification and assessment of other marine resources and ecosystems of national significance for possible inclusion into the Sanctuary. To ensure county representation, the SAC would have one seat for each of the four counties (Kauai, Honolulu, Maui and Hawaii (Big Island)).

III. Proposed Designation Document

Section 304(a)(4) of the NMSA requires that the terms of designation include the geographic area included within the Sanctuary; the characteristics of the area that give it conservation, recreational, ecological, historical, research, educational, or aesthetic value; and the types of activities that will be subject to regulation by the Secretary to protect these characteristics. Section 304(a)(4) also specifies that the terms of designation may be modified only by the same procedures by which the original designation was made. Thus the terms of designation serve as a constitution for the Sanctuary. In the case of this Congressionally designated Sanctuary, many of the terms of designation are contained in the Hawaiian Islands National Marine Sanctuary Act. The proposed Designation Document follows:

Proposed Designation Document for the Hawaiian Islands Humpback Whale National Marine Sanctuary

On November 4, 1992, President Bush signed into law the Hawaiian Islands National Marine Sanctuary Act ("HINMSA" or "Act"; Subtitle C of the Oceans Act of 1992, Pub. L. No. 102–587) which designated the Hawaiian Islands Humpback Whale National Marine Sanctuary ("HIHWNMS" or "Sanctuary").

The purposes of the Sanctuary are to—

(1) Protect humpback whales and their Sanctuary habitat;

(2) Educate and interpret for the public the relationship of humpback whales to the Hawaiian Islands marine environment;

(3) Manage human uses of the Sanctuary consistent with the designation and Title III of the Marine Protection, Research and Sanctuaries Act, as amended ("MPRSA"; also cited as the "National Marine Sanctuaries Act" or "NMSA"), 16 U.S.C. 1431 *et seq.*; and

(4) Provide for the identification of marine resources and ecosystems of national significance for possible inclusion in the Sanctuary.

Article I. Effect of Designation

Section 2306 of the HINMSA requires the Secretary to develop and issue a comprehensive management plan and implementing regulations to achieve the policy and purposes of the Act, consistent with the procedures of sections 303 and 304 of the NMSA. Section 304 of the NMSA also authorizes the issuance of such regulations as are necessary and reasonable to implement the designation, including managing and protecting the conservation, recreational, ecological, historical, research, educational and aesthetic resources and qualities of the Hawaiian Islands Humpback Whale National Marine Sanctuary. Section 1 of Article IV of this Designation Document lists those activities that may be regulated on the effective date of the regulations, or at some later date in order to implement the Sanctuary designation.

Article II. Description of the Area

The HINMSA identified a Sanctuary boundary but authorized the Secretary to modify the boundary as necessary to fulfill the purposes of the designation. The Sanctuary boundary was modified by the Secretary to encompass the submerged lands and waters off the coast of the Hawaiian Islands extending seaward from the mean high-water line—

(1) To the 100-fathom (183 meter) isobath adjoining the islands of Maui, Molokai and Lanai, including Penguin Bank, but excluding the area within three nautical miles of the upper reaches of the wash of the waves on the shore of Kahoolawe Island;

(2) To the deep water area of Pailolo Channel from Cape Halawa, Molokai, to Nakalele Point, Maui, and southward;

(3) To the 100-fathom (183 meter) isobath around the Big Island (Hawaii);

(4) To the 100-fathom (183 meter) isobath from Kailiu Point eastward to Makahuena Point, Kauai; and

(5) To the 100-fathom (183 meter) isobath from Puaena Point eastward to Mahie Point, and from the Ala Wai Canal eastward to Makapuu Point, Oahu.

Excluded from the Sanctuary boundary are the following commercial ports and small boat harbors:

Hawaii (Big Island)

Hilo Harbor
Honokohau Boat Harbor
Kawaihae Boat Harbor and Small Boat Basin
Keauhou Bay

Kauai

Hanamaulu Bay
Nawiliwili Harbor

Lanai

Kaumalapau Harbor
Manele Harbor

Maui

Kahului Harbor
Lahaina Boat Harbor
Maalaea Boat Harbor

Molokai

Hale o Lono Harbor
Kaunakakai Harbor

As specified at sections 2305(b)(2) (A) and (B) of the HINMSA, on January, 1, 1996, the area of the marine environment within 3 nautical miles of the upper reaches of the wash of the waves on the shore of Kahoolawe Island will become part of the Sanctuary, unless during the 3 month period immediately preceding January 1, 1996, the Secretary certifies in writing to Congress that the area is not suitable for inclusion in the Sanctuary. After a certification of unsuitability is made, the Secretary shall annually make a finding concerning the suitability of the area for inclusion in the Sanctuary and submit to Congress a report on the finding and the reasons thereof. If the Secretary finds that the area is suitable for inclusion in the Sanctuary, the area is designated a part of the Sanctuary on the 30th day after such report is submitted.

The Precise Boundary of the Sanctuary is Set Forth at the End of This Designation Document

Article III. Characteristics of the Area That Give It Particular Value

The Hawaiian Islands comprise an archipelago which consists of eight major islands and 124 minor islands, with a total land area of 6,423 square miles, and a general coastline of 750 miles. The central North Pacific stock of endangered humpback whales, the largest of the three North Pacific stocks, estimated to be at approximately 10% of its pre-whaling abundance, uses the waters around the main Hawaiian Islands for reproductive activities including breeding, calving and nursing. The warm, calm waters around the main Hawaiian Islands provide protective environments required for such activities. Of the known wintering and summering areas in the North Pacific used by humpback whales, the waters around the main Hawaiian Islands maintain the largest seasonally-resident population; approximately 2,000 to 3,000 humpback whales use these waters. The proximity to shore helps support an active commercial whalewatch industry, which is supported annually by millions of visitors who either directly or indirectly enjoy the Sanctuary waters.

In sections 2302 (1) and (4) of the HINMSA, Congressional findings state that "many of the diverse marine resources and ecosystems within the Western Pacific region are of national significance," and "the marine environment adjacent to and between the Hawaiian Islands is a diverse and unique subtropical marine ecosystem." In addition, Congress found that that Sanctuary could be expanded to include other marine resources of national significance. The waters around the Hawaiian Islands contain 24 other species of cetaceans, the highly endangered Hawaiian monk seal, three species of sea turtles and many other marine species endemic to this environment. Coastal Hawaiian waters also support spectacular coral reef ecosystems which provide local people with an abundant source of fish and are a popular dive destination for visitors worldwide. These waters also contain a number of cultural/historical resources.

Article IV. Scope of Regulations

Section 1. Activities Subject to Regulation. In order to implement the Sanctuary designation, the following activities are subject to regulation to the extent necessary and reasonable to ensure the protection and management of the characteristics and values of the Sanctuary described above; primarily the protection and management of humpback whales and their Sanctuary habitat. Regulation may include governing the method, location, and times of conducting the activity, and prohibition of the activity, after public notice and an opportunity to comment. If a type of activity is not listed it may not be regulated, except on an emergency basis, unless Section 1 of Article IV is amended by the procedures outlined in section 304(a) of the NMSA. Such activities are:

a. Approaching by any means a humpback whale in the Sanctuary, or causing another vessel, aircraft or other object to approach a humpback whale;

b. Flying over a humpback whale in the Sanctuary in any type of aircraft except when in any designated flight corridor for takeoff or landing from an airport or runway;

c. Discharging or depositing, from within or from beyond the boundary of the Sanctuary, any material or other matter that enters or could enter the Sanctuary, without, or not in compliance with, the terms or conditions of a required, valid Federal, State or county permit, license, lease or other authorization;

d. Drilling into, dredging or otherwise altering the seabed of the Sanctuary; or constructing, placing or abandoning any structure, material or other matter on the seabed of the Sanctuary without, or not in compliance with, the terms or conditions of a required, valid Federal, State or county permit, license, lease or other authorization;

e. Taking, removing, moving, catching, collecting, harvesting, feeding, injuring, destroying or causing the loss of, or attempting to take, remove, move, catch, collect, harvest, feed, injure, destroy or cause the loss of any humpback whale or humpback whale habitat;

f. Operating a vessel (*i.e.*, watercraft of any description) in the Sanctuary in a manner that may adversely impact any humpback whale or humpback whale habitat;

g. Possessing within the Sanctuary a humpback whale or part thereof regardless of where taken, removed, moved, caught, collected or harvested; and

h. Interfering with, obstructing, delaying or preventing an investigation, search, seizure or disposition of seized property in connection with enforcement of the HINMSA or NMSA or any regulation or permit issued under the HINMSA or NMSA.

Section 2. Emergencies. Where necessary to prevent or minimize the destruction of, loss of, or injury to a Sanctuary resource or quality; or minimize the imminent risk of such destruction, loss or injury, any activity, including those not listed in Section 1 of this Article, is subject to immediate temporary regulation, including prohibition. If such a situation arises, the Director of NOAA's Office of Ocean and Coastal Resource Management or his or her designee shall seek to notify and consult to the extent practicable with any relevant Federal agency and the Governor of the State of Hawaii.

Article V. Effect on Leases, Permits, Licenses, and Rights

Pursuant to section 304(c)(1) of the NMSA, 16 U.S.C. 1434(c)(1), no valid lease, permit, license, approval or other authorization issued by any Federal, State, or local authority of competent jurisdiction, or any right of subsistence use or access, may be terminated by the Secretary of Commerce, or his or her designee, as a result of this designation, or as a result of any Sanctuary regulation, if such authorization or right was in existence on the effective date of Sanctuary designation (November 4, 1992).

Article VI. Alteration of This Designation

The terms of designation, as defined under section 304(a) of the NMSA, may be modified only by the procedures outlined in section 304(a), including public hearings, consultation with interested Federal, State, and county agencies, review by the appropriate Congressional committees, and the Governor of the State of Hawaii, and approval by the Secretary of Commerce, or his or her designee.

Appendix I—Hawaiian Islands Humpback Whale National Marine Sanctuary Boundary Coordinates

The boundary of the Hawaiian Islands Humpback Whale National Marine Sanctuary—

(Appendix I will set forth the precise boundary based on the comments received on the DEIS/MP)

End of Proposed Designation Document

IV. Summary of Proposed Regulations

The proposed regulations set forth the boundary of the Sanctuary and would augment existing authorities by prohibiting a relatively narrow range of activities that are conducted without, or not in compliance with required, valid authorizations from Federal, State, or local authorities of competent jurisdiction. The proposed regulations set forth the maximum per-day penalties for violating the National Marine Sanctuaries Act (NMSA), Hawaiian Islands National Marine Sanctuaries Act (HINMSA), or any Sanctuary regulation; identify the interagency cooperation requirements under the NMSA; and set forth procedures for administrative appeals.

The HIHWNMS is unlike most other national marine sanctuaries for a number of reasons. First, while most national marine sanctuaries are designated to protect ecosystem environments, the Congress designated the HIHWNMS primarily to protect the humpback whale and its habitat. These are the only resources proposed for protection and management under the Sanctuary regime. Second, the humpback whale is directly protected under two other Federal laws: the Endangered Species Act, 16 U.S.C. 1531 *et seq.*, and the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, both administered by NOAA's NMFS.

The proposed regulations reflect the uniqueness of the Sanctuary. For example, with one exception (hindering law enforcement activities) the regulations would not place additional or independent substantive restrictions or prohibitions on activities conducted in the Sanctuary to those already in place under other regulatory authorities. Rather, to protect humpback whales and their Sanctuary habitat the proposed regulations essentially rely on and incorporate restrictions or prohibitions already in place under Federal, State, and county authorities that protect, directly and indirectly, humpback whales and humpback whale habitat within the Sanctuary. By essentially incorporating into the Sanctuary regulatory regime restrictions or prohibitions already existing under other authorities, these restrictions or prohibitions are strengthened because they could be enforced by Sanctuary personnel and would be subject to enforcement mechanisms and penalties of the NMSA. Moreover, monies collected as civil penalties under the NMSA would be available to manage and improve the Sanctuary.

The proposed regulations would prohibit the following activities also prohibited under the MMPA or ESA: approaching any humpback whale; operating an aircraft above a humpback whale; and taking or possessing any humpback whale. However, any of these activities could be conducted if permitted or authorized under the MMPA or ESA. Additionally, the proposed regulations would prohibit the following activities conducted without, or not in compliance with, a required Federal, State or county permit, license, lease or other authorization: discharging or depositing in the Sanctuary any material or other matter; discharging or depositing outside the Sanctuary any material or other matter that subsequently enters the Sanctuary and injures a humpback whale or habitat; and altering the seabed of the Sanctuary. It is important to note that these proposed regulations would prohibit these activities only if a permit, license, lease, or other authorization from a Federal, State, or county authority of competent jurisdiction is required to conduct them and they are conducted without, or not in compliance with, such authorization. The only independent prohibition proposed in the regulations is interfering with, obstructing, delaying or preventing an investigation, search, seizure or disposition of seized property in connection with enforcement of either the NMSA or HINMSA or any regulation issued under either of those Acts.

Also, unlike the regulations in effect for other sanctuaries, the proposed regulations do not contain any provision for the issuance of Sanctuary permits or authorizations to conduct an otherwise prohibited activity. Since the regulations essentially incorporate restrictions or prohibitions imposed by other existing authorities, the SRD will recognize permits or other authorizations issued by those authorities to conduct an otherwise prohibited activity. SRD will coordinate with NMFS on the issuance of permits or authorizations under the ESA and MMPA, and with other Federal, State and county agencies that issue permits or other authorizations for activities that could impact humpback whales, or humpback whale habitat within the Sanctuary. Such coordination should eliminate potentially duplicative administrative processes while still allowing the Sanctuary to fulfill its trustee responsibilities to protect and manage humpback whales and humpback whale Sanctuary habitat.

The proposed scheme of relying on, and coordinating with, other authorities is possible because the only resources proposed for protection and management under the Sanctuary regime are humpback whales and humpback whale Sanctuary habitat, and those resources already are protected, directly and indirectly, under other laws and regulations.

Specifically, the proposed regulations would add a new part 945 to Title 15, Code of Federal Regulations.

Proposed § 945.1 would set forth the purpose of the regulations which is to implement the designation of the Hawaiian Islands Humpback Whale National Marine Sanctuary, consistent with the terms of that designation, by regulating a narrow range of activities in order to protect and manage the North Pacific population of humpback whales, and their wintering habitat in the Sanctuary.

Proposed § 945.2 and proposed Appendix 1 would set forth the boundary of the Sanctuary. Although not presently included in the Sanctuary boundary, pursuant to sections 2305(b)(2)(A) and (B) of the HINMSA, on January, 1, 1996, the area of the marine environment within 3 nautical miles of the upper reaches of the wash of the waves on the shore of Kahoolawe Island will become part of the Sanctuary, unless during the 3 month period immediately preceding January 1, 1996, the Secretary certifies in writing to Congress that the area is not suitable for inclusion in the Sanctuary. After a certification of unsuitability is made, the Secretary must annually make a finding concerning the suitability of the area for inclusion in the Sanctuary and submit to Congress a report on the finding and the reasons thereof. If the Secretary finds that the area is suitable for inclusion in the Sanctuary, the area is designated a part of the Sanctuary 30 days after such report is submitted.

Proposed § 945.3 would define various terms used in the regulations. Other terms appearing in the proposed regulations are defined at 15 CFR 922.2 and/or in the Marine Protection, Research and Sanctuaries Act, as amended (33 U.S.C. 1401–1445, and 16 U.S.C. 1431–1445). "Sanctuary resource" would be defined as "any humpback whale, or the humpback whale's habitat within the Sanctuary," because these are the only resources proposed for protection and management under the Sanctuary regime.

Proposed § 945.4 would allow all activities except those prohibited by § 945.5 to be undertaken subject to any emergency regulation promulgated pursuant to § 945.6, subject to the interagency cooperation provisions of section 304(d) of the NMSA, 16 U.S.C.

1434(d), subject to the liability established under section 312 of the NMSA, 16 U.S.C. 1443, and subject to all prohibitions, restrictions, and conditions validly imposed by any other authority of competent jurisdiction. Under proposed § 945.4, the regulatory prohibitions in § 945.5 expressly would not apply to military activities conducted by the United States Department of Defense, including combined military activities conducted by the Department of Defense and the military forces of a foreign nation, in existence on the effective date of the regulations as identified and listed in the Environmental Impact Statement/Management Plan (EIS/MP) for the Sanctuary. Military activities proposed after the effective date of the regulations would be subject to the regulatory prohibitions unless they are not likely to destroy, cause the loss of, or injure any humpback whale or humpback whale habitat in the Sanctuary, or if after consultation under section 304(d) of the NMSA, the Director of NOAA's Office of Ocean and Coastal Resource Management (OCRM) or his or her designee expressly finds that the regulatory prohibitions do not apply to the military activity. Exemption from the regulatory prohibitions should not result in significant adverse impacts to humpback whales or their Sanctuary habitat. Department of Defense operating procedures require military activities to be conducted in a manner that avoids adverse impacts to humpback whales and requires compliance with applicable authorities already in place to protect humpback whales. Department of Defense military activities remain subject to the statutory requirements of the NMSA (*e.g.*, interagency cooperation provisions of section 304(d), and the liability established by section 312), any emergency regulations promulgated pursuant to § 945.6, and all other applicable laws (*e.g.*, ESA and MMPA).

Proposed § 945.5 would prohibit a relatively narrow range of activities and thus make it unlawful to conduct them. As discussed above, the Sanctuary is unlike most other national marine sanctuaries in that the only resources that would be protected and managed under the Sanctuary regime are humpback whales and their Sanctuary habitat and those resources are already protected under other laws. Therefore, unlike any other national marine sanctuary, the regulations, with the exception of a prohibition on hindering enforcement activities, would not place additional or independent substantive restrictions or prohibitions on activities conducted in the Sanctuary. Rather, the proposed regulations would essentially incorporate restrictions or prohibitions already in place under existing Federal, State, or county authorities, that protect, directly or indirectly, humpback whales and humpback whale habitat. Thus, the proposed regulations prohibit certain activities only if they are conducted without, or not in compliance with, a valid Federal, State or county permit, license, lease or other authorization required to conduct the activity. For example, if a person is discharging any material or matter into the Sanctuary without, or not in compliance with, a required National Pollutant Discharge Elimination System (NPDES) permit from the Hawaii Department of Health, that person will be in violation of the Sanctuary regulations. Similarly, if a person approaches a humpback whale in the Sanctuary in violation of the MMPA or ESA, that person will also be in violation of the Sanctuary regulations. Reinforcing existing restrictions provides additional protection for humpback whales, and humpback whale habitat in the Sanctuary necessary to achieve the purposes of the designation.

The prohibitions would be applied to foreign persons and foreign-flag vessels in accordance with recognized principles of international law, and in accordance with treaties, conventions, and other agreements to which the United States is a party.

The first activity prohibited would be approaching, while in the Sanctuary, by any means, within 100 yards (90 m) of any humpback whale except as authorized under the MMPA and the ESA.

The second activity prohibited would be causing a vessel or other object to approach, while in the Sanctuary, within 100 yards (90 m) of a humpback whale except as authorized under the MMPA and the ESA.

The third activity prohibited would be operating any aircraft above the Sanctuary within 1,000 feet (300 m) of any humpback whale except when in any designated flight corridor for takeoff or landing from an airport or runway, or as authorized under the MMPA and the ESA.

The intent of the first three prohibitions is to extend protection to humpback whales from harassment or other disturbance from human approaches by strengthening existing protections under the MMPA and the ESA. These three prohibitions essentially already are in effect through regulations promulgated by the NMFS at 50 CFR 222.31(a) (1)–(3). As prohibitions under the Sanctuary regulations, they would be strengthened since they could be enforced by Sanctuary personnel and would be subject to enforcement mechanisms and civil penalties under the NMSA. Moreover, monies collected as civil penalties under the NMSA would be available to manage and improve the Sanctuary.

The fourth activity prohibited would be the taking of humpback whales in the Sanctuary, except as authorized under the MMPA and the ESA. As with the first three prohibitions, the intent of this prohibition also is to extend protection to humpback whales from taking, as defined by the ESA and MMPA, by reinforcing the protections afforded under these laws.

The fifth activity prohibited would be the possession within the Sanctuary of any living or dead humpback whale or part thereof taken in violation of the MMPA or the ESA (regardless of where taken, moved or removed from). This prohibition is designed to facilitate and supplement enforcement for violations of the MMPA, ESA and Sanctuary regulations.

The sixth activity prohibited would be discharging or depositing any material or other matter in the Sanctuary; altering the seabed of the Sanctuary; or discharging or depositing, from beyond the boundary of the Sanctuary, any material or other matter that subsequently enters the Sanctuary and injures any humpback whale or humpback whale habitat; provided that such activity requires a Federal, State or county permit, license, lease or other authorization, and is conducted (i) without such permit license, lease or other authorization, or (ii) not in compliance with the terms and conditions of such permit, license, lease, or other authorization. Degradation of water quality, sediment quality, and modification of the seabed within the Sanctuary could adversely affect the humpback whale's habitat and, therefore, regulation of discharges and deposits and activities that alter the seabed is necessary. However, this prohibition recognizes that the humpback whale's Hawaiian habitat may not necessarily entail every aspect of the marine environment, and is, therefore, intended to enhance existing protections by supplementing enforcement authority and providing for the application of greater maximum civil penalties under the NMSA against illegal, and potentially harmful, discharge or deposit, or alteration of the seabed activities. Also, this provision does not prohibit or otherwise regulate discharge or deposit, or alteration of the seabed activities which do not require a

Federal, State or county permit, license, lease or other authorization. Rather, this prohibition only applies in instances when a person is conducting a particular activity without, or not in compliance with, a required Federal, State or county permit, license, lease or other authorization. This provision will help ensure that general water quality and seabed conditions in the Sanctuary will not degrade. As a result of the ongoing research and long-term monitoring program contained in the management plan for the Sanctuary, information will identify those specific features and qualities of the marine environment that are significant habitat components. Such information will aid the Sanctuary and other relevant Federal, State and county agencies in devising specific management techniques and, if necessary, additional regulations to further protect humpback whale habitat.

The seventh activity prohibited would be interference with, obstruction, delay or prevention of any investigation, search, seizure or disposition of seized property in connection with enforcement of the HINMSA or NMSA or any regulation issued under either of those Acts. The intent of this prohibition is to ensure the facilitation of Sanctuary enforcement activities, which enhance resource protection.

Proposed § 945.6 would authorize the immediate temporary regulation, including prohibition, of any activity where necessary to prevent or minimize the destruction of, loss of, or injury to any humpback whale or humpback whale Sanctuary habitat, or minimize the imminent risk of such destruction, loss or injury. If such a situation arises, the Sanctuaries and Reserves Division would seek to notify and consult with potentially affected Federal agencies and the Governor of Hawaii prior to taking such action.

Proposed § 945.7 would set forth the maximum statutory civil penalty per day for violating the NMSA, HINMSA or any Sanctuary regulation at $100,000. Each day of a continuing violation would constitute a separate violation. This section would also establish the right of any person subject to a Sanctuary enforcement action to appeal pursuant to applicable procedures in 15 CFR Part 904.

Proposed § 945.8 would implement the consultation with NOAA requirements of section 304(d) of the NMSA, 16 U.S.C. 1434(d), for any proposed Federal agency action internal or external to the Sanctuary, including private activities authorized by licenses, leases, or permits, that is likely to destroy, cause the loss of, or injure any Sanctuary resource, in this case the humpback whale or its Sanctuary habitat. The Federal agency proposing the action would be required to determine whether the activity is likely to destroy, cause the loss of, or injure a humpback whale or humpback whale Sanctuary habitat at the earliest practicable time, but no later than 45 days before final approval of the action, unless a different schedule is agreed upon by the Federal agency and the Director of OCRM. However, should SRD obtain information that a Federal agency action is likely to destroy, cause the loss of, or injure any Sanctuary resource, SRD would notify the Federal agency in writing that it believes section 304(d) applies, and the reasons why. SRD and NMFS are developing a Memorandum of Understanding that will specify agency coordination and cooperation with respect to consultations required under section 304(d) of the NMSA and section 7 of the ESA for Federal activities that may affect humpback whales or their Sanctuary habitat. In essence, the MOU identifies the NMFS as the lead contact agency for consultations pertaining to humpback whales or their habitat.

Proposed § 945.9 repeats the provisions in section 312 of the NMSA that any person who destroys, causes the loss of, or injures any Sanctuary resource is liable to the United States for response costs and damages resulting from such destruction, loss or injury, plus interest. Any vessel used to destroy, cause the loss of, or injure any Sanctuary resource is liable in rem to the United States for response costs and damages resulting from such destruction, loss or injury. Person, includes any private person or entity, or any officer, employee, agent, department, agency, or instrumentality of the Federal Government, of any State or local unit of government, or of any foreign government.

V. Miscellaneous Rulemaking Requirements

National Marine Sanctuaries Act

Section 2306 of the HINMSA requires the development of a comprehensive management plan and implementing regulations to achieve the policy and purposes of the Sanctuary. To meet the requirements of section 2306, the comprehensive management plan and implementing regulations must be developed in accordance with sections 303 and 304 of the NMSA. Section 304 of the NMSA requires, on the same day as this notice is published, the submission of documents to the appropriate Senate and House Committees, which contain, among other things, the proposed regulations, a draft management plan detailing the goals and objectives, management responsibilities, research activities, interpretive and educational programs, and enforcement, including surveillance activities, for the area, and a draft environmental impact statement. In accordance with section 304(a)(1), the required documents are being submitted to the specified Congressional Committees.

Executive Order 12866: Regulatory Impact

This action has been determined to be not significant for purposes of Executive Order 12866.

Regulatory Flexibility Act

The regulations proposed in this notice would allow all activities to be conducted in the Sanctuary other than a relatively narrow range of prohibited activities. The prohibitions primarily reinforce existing authorities and do not place additional substantive restrictions on any person. For this reason, the proposed regulations, in total, if adopted in final form as proposed, are not expected to have a significant economic impact on a substantial number of small entities, and the Assistant General Counsel for Legislation and Regulation of the Department of Commerce has so certified to the Chief Counsel for Advocacy of the Small Business Administration. As a result, an initial Regulatory Flexibility Analysis was not prepared.

Paperwork Reduction Act of 1980

This rule does not contain collection of information requirements and, therefore, is not subject to the requirements of the Paperwork Reduction Act (Pub. L. No. 96–511).

Executive Order 12612

A Federalism Assessment (FA) was prepared for the draft management plan and proposed implementing regulations. The FA concluded that all were fully consistent with the principles, criteria, and requirements set forth in sections 2 through 5 of Executive Order 12612, Federalism Considerations in Policy Formulation and Implementation (52 FR 41685, Oct. 26, 1987). Copies of the FA are available upon request from the Office of Ocean and Coastal Resource Management at the address listed above.

National Environmental Policy Act

In accordance with section 304(a)(2) of the NMSA (16 U.S.C. 1434(a)(2)) and the provisions of the National

Environmental Policy Act of 1969 (42 U.S.C. 4321–4370(a)), a DEIS has been prepared for the proposed implementation of the designation and the proposed regulations. As required by section 304(a)(2) of the NMSA, the DEIS includes the resource assessment report required by section 303(b)(3) of the NMSA (16 U.S.C. 1433(b)(3)), maps depicting the proposed boundary of the designated area, and the existing and potential uses and resources of the area. Copies of the DEIS are available upon request to the Office of Ocean and Coastal Resource Management at the address listed above.

Executive Order 12630

This proposed rule, if issued in final form as proposed, would not have any takings implications within the meaning of Executive Order 12630 because it would not appear to have an effect on private property sufficiently severe as to effectively deny economically viable use of any distinct legally potential property interest to its owner or to have the effect of, or result in, a permanent or temporary physical occupation, invasion, or deprivation.

Federal Domestic Assistance Catalog Number 11.429 Marine Sanctuary Program

Dated: September 6, 1995.

David L. Evans,

Acting Deputy Assistant Administrator for Ocean Services and Coastal Zone Management.

Accordingly, for the reasons set forth above, 15 CFR chapter IX is proposed to be amended as follows.

A new part 945 is added to subchapter B to read as follows:

PART 945—HAWAIIAN ISLANDS HUMPBACK WHALE NATIONAL MARINE SANCTUARY

Sec.

945.1 Purpose.
945.2 Boundary.
945.3 Definitions.
945.4 Allowed activities.
945.5 Prohibited activities.
945.6 Emergency regulations.
945.7 Penalties; appeals.
945.8 Interagency cooperation.
945.9 Response costs and damages.

Appendix I to Part 945—Hawaiian Islands Humpback Whale National Marine Sanctuary Boundary Coordinates

Authority: Title II, subtitle C, Pub. L. 102–587, 106 Stat. 5055–5059 (16 U.S.C. 1431 *et seq.*).

§ 945.1 Purpose.

(a) The purpose of the regulations in this Part is to implement the designation of the Hawaiian Islands Humpback Whale National Marine Sanctuary by regulating activities affecting the resources of the Sanctuary or any of the qualities, values, or purposes for which the Sanctuary was designated, in order to protect, preserve, and manage the conservation, ecological, recreational, research, educational, historical, cultural, and aesthetic resources and qualities of the area. The regulations are intended to supplement and complement existing regulatory authorities; to facilitate to the extent compatible with the primary objective of protecting the humpback whale and its habitat, all public and private uses of the Sanctuary, including uses of Hawaiian natives customarily and traditionally exercised for subsistence, cultural, and religious purposes, as well as education, research, recreation, commercial and military activities; to reduce conflicts between compatible uses; to maintain, restore, and enhance the humpback whale and its habitat; to contribute to the maintenance of natural assemblages of humpback whales for future generations; to provide a place for humpback whales that are dependent on their Hawaiian Islands wintering habitat for reproductive activities, including breeding, calving, and nursing, and for the long-term survival of their species; and to achieve the other purposes and policies of the Hawaiian Island National Marine Sanctuary Act and National Marine Sanctuaries Act.

(b) These regulations may be modified to fulfill the Secretary's responsibilities for the Sanctuary, including the provision of additional protections for humpback whales and their habitat, if reasonably necessary, and the conservation and management of other marine resources, qualities and ecosystems of the Sanctuary determined to be of national significance. The Secretary shall consult with the Governor of the State of Hawaii on any modification to the regulations contained in this part. For any modification of the regulations contained in this part that would constitute a change in a term of the designation, as contained in the Designation Document for the Sanctuary, the Secretary shall follow the applicable requirements of sections 303 and 304 of the NMSA, and sections 2305 and 2306 of the HINMSA.

§ 945.2 Boundary.

(a) Except for excluded areas described in paragraph (b) of this section, the Hawaiian Islands Humpback Whale National Marine Sanctuary consists of the submerged lands and waters off the coast of the Hawaiian Islands seaward from the mean high-water line:

(1) To the 100-fathom (183 meter) isobath adjoining the islands of Maui, Molokai and Lanai, including Penguin Bank, but excluding the area within three nautical miles of the upper reaches of the wash of the waves on the shore of Kahoolawe Island;

(2) To the deep water area of Pailolo Channel from Cape Halawa, Molokai, to Nakalele Point, Maui, and southward;

(3) To the 100-fathom (183 meter) isobath around the Big Island (Hawaii);

(4) To the 100-fathom (183 meter) isobath from Kailiu Point eastward to Makahuena Point, Kauai; and

(5) To the 100-fathom (183 meter) isobath from Puaena Point eastward to Mahie Point and from the Ala Wai Canal eastward to Makapuu Point, Oahu.

(b)(1) Excluded from the Sanctuary boundary are the following commercial ports and small boat harbors:

Hawaii (Big Island)

Hilo Harbor
Honokohau Boat Harbor
Kawaihae Boat Harbor and Small Boat Basin
Keauhou Bay

Kauai

Hanamaulu Bay
Nawiliwili Harbor

Lanai

Kaumalapau Harbor
Manele Harbor

Maui

Kahului Harbor
Lahaina Boat Harbor
Maalaea Boat Harbor

Molokai

Hale o Lono Harbor
Kaunakakai Harbor

(2) The precise boundary of the Sanctuary appears in Appendix I of this Part.

§ 945.3 Definitions.

(a)(1) *Acts* means the Hawaiian Islands National Marine Sanctuary Act (HINMSA; sections 2301–2307 of Pub. L. 102–587), and the National Marine Sanctuaries Act (NMSA; also known as Title III of the Marine Protection, Research, and Sanctuaries Act (MPRSA), as amended, 16 U.S.C. 1431 *et seq.*).

(2) *Adverse impact* means an impact that independently or cumulatively damages, diminishes, degrades, impairs, destroys, or otherwise harms.

(3) *Alteration of the seabed* means drilling into, dredging, or otherwise altering a natural physical characteristic of the seabed of the Sanctuary; or constructing, placing, or abandoning any structure, material, or other matter on the seabed of the Sanctuary.

(4) *Director* means the Director of the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration.

(5) *Habitat* means those areas that provide space for individual and population growth and normal behavior of humpback whales, and include sites used for reproductive activities, including breeding, calving and nursing.

(6) *Injure* means to change adversely, either in the long or short term, a chemical, biological, or physical attribute of, or the viability of. To "injure" therefore includes, but is not limited to, to cause the loss of and to destroy.

(7) *Military activities* means those military activities conducted by or under the auspices of the Department of Defense and any combined military activities carried out by the Department of Defense and the military forces of a foreign nation.

(8) *Person* means any private individual, partnership, corporation, or other entity; or any officer, employee, agent, department, agency, or instrumentality of the Federal Government or of any State, regional, or local unit of government, or of any foreign government.

(9) *Sanctuary* means the Hawaiian Islands Humpback Whale National Marine Sanctuary.

(10) *Sanctuary resource* means any humpback whale, or the humpback whale's habitat within the Sanctuary.

(11) *Take* or *taking* a humpback whale means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect or injure, or to attempt to engage in any such conduct. The term includes, but is not limited to, any of the following activities: collecting any dead or injured humpback whale, or any part thereof; restraining or detaining any humpback whale, or any part thereof, no matter how temporarily; tagging any humpback whale; operating a vessel or aircraft or doing any other act that results in the disturbing or molesting of any humpback whale.

(12) *Vessel* means a watercraft of any description, including, but not limited to, motorized and non-motorized watercraft, personal watercraft, airboats, and float planes used while maneuvering on the water, capable of being used as a means of transportation in/on the waters of the Sanctuary.

(b) Other terms appearing in the regulations in this Part are defined at 15 CFR 922.2, and/or in the Marine Protection, Research, and Sanctuaries Act, as amended, 33 U.S.C. 1401 *et seq.*, and 16 U.S.C. 1431 *et seq.*

§ 945.4 Allowed Activities.

(a) All activities except those prohibited by § 945.5 may be undertaken in the Sanctuary subject to any emergency regulations promulgated pursuant to § 945.6, subject to the interagency cooperation provisions of section 304(d) of the NMSA (16 U.S.C. 1434(d)) and § 945.8 of this Part, and subject to the liability established by section 312 of the NMSA and § 945.9 of this Part. All activities are also subject to all prohibitions, restrictions, and conditions validly imposed by any other Federal, State or county authority of competent jurisdiction.

(b) Included as activities allowed under the first sentence of paragraph (a) of this section are all classes of military activities, internal or external to the Sanctuary, that are being or have been conducted before the effective date of these regulations, as identified in the FEIS. Paragraphs (a) (1) through (6) of § 945.5 do not apply to these classes of activities, nor are these activities subject to further consultation under section 304(d) of the NMSA.

(c) Military activities proposed after the effective date of these regulations are also included as allowed activities under the first sentence of paragraph (a). Paragraphs (a) (1) through (6) of § 945.5 apply to these classes of activities unless—

(1) They are not subject to consultation under section 304(d) of the NMSA and § 945.8 of this Part, or

(2) Upon consultation under section 304(d) of the NMSA and § 945.8 of this Part, NOAA's findings and recommendations include a statement that paragraphs (a) (1) through (6) of § 945.5 do not apply to the activity.

(d) If an activity described in paragraphs (b) or (c)(2) of this section is modified such that it is likely to destroy, cause the loss of, or injure a Sanctuary resource in a manner significantly greater than was considered in a previous consultation under section 304(d) of the NMSA and § 945.8 of this Part, or if the modified activity is likely to destroy, cause the loss of, or injure any Sanctuary resource not considered in a previous consultation under section 304(d) of the NMSA and § 945.8 of this Part, the modified activity will be treated as a new activity under paragraph (c) of this section.

(e) If a proposed military activity subject to section 304(d) of the NMSA and § 945.8 of this Part is necessary to respond to an emergency situation and the Secretary of Defense determines in writing that failure to undertake the proposed activity during the period of consultation would impair the national defense, the Secretary of the military department concerned may request the Director or designee that the activity proceed during consultation. If the Director or designee denies such a request, the Secretary of the military department concerned may decide to proceed with the activity. In such case, the Secretary of the military department concerned shall provide the Director or designee with a written statement describing the effects of the activity on Sanctuary resources once the activity is completed.

§ 945.5 Prohibited activities.

(a) The following activities are prohibited and thus unlawful for any person to conduct or cause to be conducted.

(1) Approaching, within the Sanctuary, by any means, within 100 yards of any humpback whale except as authorized under the Marine Mammal Protection Act, as amended (MMPA), 16 U.S.C. 1361 *et seq.*, and the Endangered Species Act, as amended (ESA), 16 U.S.C. 1531 *et seq.*;

(2) Causing a vessel or other object to approach, within the Sanctuary, within 100 yards of any humpback whale except as authorized under the MMPA and the ESA;

(3) Operating any aircraft above the Sanctuary within 1,000 feet of any humpback whale except when in any designated flight corridor for takeoff or landing from an airport or runway or as authorized under the MMPA and the ESA;

(4) Taking any humpback whale in the Sanctuary except as authorized under the MMPA and the ESA;

(5) Possessing within the Sanctuary (regardless of where taken) any living or dead humpback whale or part thereof taken in violation of the MMPA or the ESA;

(6) Discharging or depositing any material or other matter in the Sanctuary; altering the seabed of the Sanctuary; or discharging or depositing, from beyond the boundary of the Sanctuary, any material or other matter that subsequently enters the Sanctuary and injures a humpback whale or humpback whale habitat; provided that such activity requires a Federal, State or county permit, license, lease or other

authorization, and is conducted (i) without such permit, license, lease or other authorization, or (ii) not in compliance with the terms and conditions of such permit, license, lease, or other authorization.

(7) Interfering with, obstructing, delaying or preventing an investigation, search, seizure or disposition of seized property in connection with enforcement of either of the Acts or any regulations issued under either of the Acts.

(b) The regulations in this Part shall be applied to foreign persons and foreign vessels in accordance with generally recognized principles of international law, and in accordance with treaties, conventions and other international agreements to which the United States is a party.

§ 945.6 Emergency regulations.

Where necessary to prevent or minimize the destruction of, loss of, or injury to a Sanctuary resource, or to minimize the imminent risk of such destruction, loss, or injury, any and all activities are subject to immediate temporary regulation, including prohibition. Before issuance of such regulations the Director or designee shall consult to the extent practicable with any relevant Federal agency and the Governor of the State of Hawaii.

§ 945.7 Penalties; appeals.

(a) Pursuant to section 307 of the NMSA, each violation of either of the Acts, or any regulation in this Part is subject to a civil penalty of not more than $100,000. Each such violation is subject to forfeiture of property or Sanctuary resources seized in accordance with section 307 of the NMSA. Each day of a continuing violation constitutes a separate violation.

(b) Regulations setting forth the procedures governing the administrative proceedings for assessment of civil penalties for enforcement reasons, issuance and use of written warnings, and release or forfeiture of seized property appear at 15 CFR Part 904.

(c) A person subject to an action taken for enforcement reasons for violation of these regulations or either of the Acts may appeal pursuant to the applicable procedures in 15 CFR Part 904.

§ 945.8 Interagency Cooperation.

Under section 304(d) of the NMSA, federal agency actions internal or external to a national marine sanctuary, including private activities authorized by licenses, leases, or permits, that are likely to destroy, cause the loss of, or injure any sanctuary resource are subject to consultation with the Director or designee. The federal agency proposing an action shall determine whether the activity is likely to destroy, cause the loss of, or injure a Sanctuary resource. To the extent practicable, consultation procedures under section 304(d) of the NMSA may be consolidated with interagency cooperation procedures required by other statutes, such as the ESA. The Director or designee will attempt to provide coordinated review and analysis of all environmental requirements.

§ 945.9 Response costs and damages.

Under section 312 of the NMSA, 16 U.S.C. 1443, any person who destroys, causes the loss of, or injures any Sanctuary resource is liable to the United States for response costs and damages (plus interest) resulting from such destruction, loss, or injury, and any vessel used to destroy, cause the loss of, or injure any Sanctuary resource is liable in rem to the United States for response costs and damages resulting from such destruction, loss, or injury.

Appendix I to Part 945—Hawaiian Islands Humpback Whale National Marine Sanctuary Boundary Coordinates

[Note: Appendix I will set forth the precise boundary coordinates based on the comments received on the DEIS/MP.]

The President

Proclamation 6822—National Farm Safety and Health Week, 1995

Federal Register
Vol. 60, No. 179
Friday, September 15, 1995

Presidential Documents

Title 3—

The President

Proclamation 6822 of September 13, 1995

National Farm Safety and Health Week, 1995

By the President of the United States of America

A Proclamation

America's agricultural productivity is a gift to our Nation and to people everywhere. Using innovative techniques and the latest technology, our farmers, ranchers, and agricultural workers provide enough food and fiber to satisfy our needs and those of millions of people around the globe. However, we too often forget that farming can be a difficult and dangerous profession.

Agricultural workers are exposed daily to the risks associated with operating powerful machinery, managing livestock, working and travelling in adverse weather conditions, and performing countless other demanding tasks, often miles away from emergency medical care. Sadly, children and young people on our farms and ranches are particularly vulnerable to these hazards and more.

The simplest safety tool we have at hand is education. By word and by example, we must teach each new generation of Americans about the critical importance of knowledge, caution, and vigilance in farming and ranching activities. Wearing protective clothing and gear, learning the safety features that manufacturers build into equipment, and staying alert to possible dangers when working with livestock, chemicals, machinery, and vehicles—all of these measures can help to ensure longer, healthier lives for America's agricultural workers.

As important as education is to the safety and well-being of our agricultural workers, we must remember that quality health care is just as critical. We must strengthen our resolve to provide the citizens of our rural areas with high-quality, affordable, and accessible health care if we are truly to meet their needs.

By setting aside a special week each year to focus on the need for improved safety and health in our Nation's agricultural industry, we demonstrate to all of our agricultural workers that we value their lives and livelihood, that we appreciate their unsurpassed productivity, and that we honor their determined spirit.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 17 through September 23, 1995, as "National Farm Safety and Health Week." I call upon government agencies, businesses, and professional associations that serve our agricultural sector to strengthen efforts to promote safety and health measures among our Nation's farm and ranch workers. I ask these workers to take advantage of educational programs and technical innovations that can help them to avoid injury and illness. Finally, I call upon the citizens of our Nation to reflect on the bounty we enjoy thanks to the labor of agricultural workers across the land. Join me in renewing our commitment to make their health and safety a national priority.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of September, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

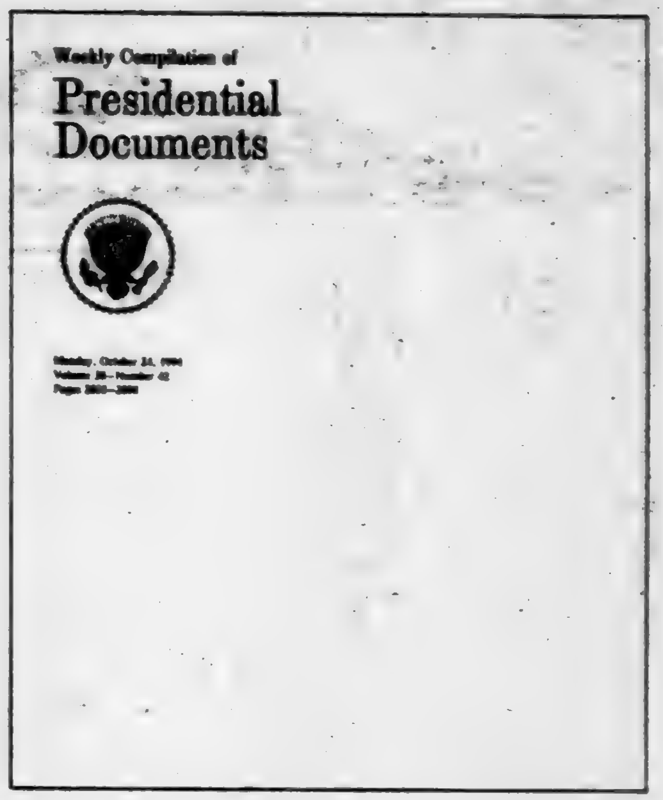
The authentic text behind the news . . .

The Weekly Compilation of Presidential Documents



Weekly Compilation of
Presidential Documents

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$26.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$24.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days before this date.

```
AFR  SMITH212J            DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days before this date.

```
AFRDO  SMITH212J          DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

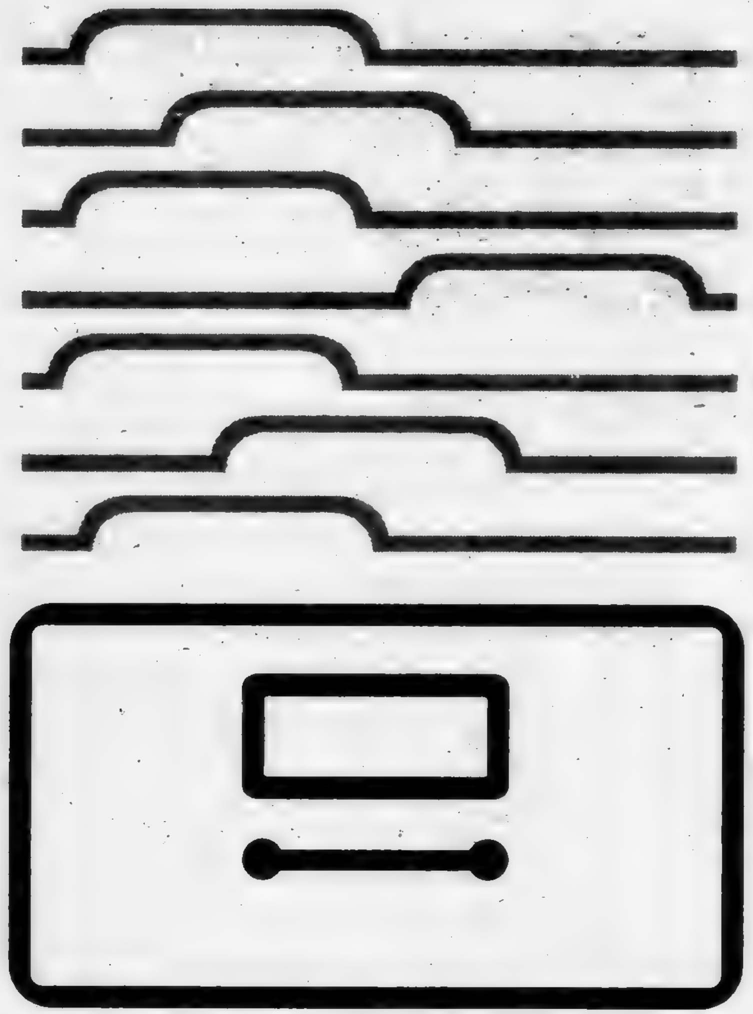
NEW EDITION



Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1994

The GUIDE is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
[Two Sessions]

WHEN: October 17 at 9:00 am and 1:30 pm
WHERE: Office of the Federal Register Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

ATLANTA, GA

WHEN: September 20 at 9:00 am
WHERE: Centers for Disease Control
and Prevention
1600 Clifton Rd., NE.
Auditorium A
Atlanta, GA
RESERVATIONS: 404–639–3528 (Atlanta area)
1–800–688–9889 (Outside Atlanta area)

Rules and Regulations

Federal Register
Vol. 60, No. 180
Monday, September 18, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

1995 Wheat and Feed Grain Acreage Reduction Programs, 1995 Oilseed Price Support Rates, and 1994 Wheat and Feed Grain Farmer-Owned Reserve Programs

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Commodity Credit Corporation (CCC) issued proposed rules with respect to the 1995 Production Adjustment Programs for Wheat on April 6, 1994, and for Feed Grains on August 4, 1994. Accordingly, this final rule amends 7 CFR Parts 1413 and 1421 to set forth: the acreage reduction program (ARP) percentages for the 1995 crops of corn, wheat, grain sorghum, barley, and oats; the determination that a paid land diversion (PLD) program will not be implemented for the 1995 crops of wheat and feed grains; the determination that producers of malting barley must, as a condition of eligibility for feed grain loans, purchases, and payments, comply with requirements of the ARP for the 1995 crop of barley; and the 1995-crop price support rates for wheat, corn, grain sorghum, barley, oats, and rye. In addition, this final rule amends 7 CFR Part 1421 to set forth the 1995-crop price support rates for oilseeds and to set forth determinations with respect to the entry of 1994-crop wheat and 1994-crop feed grains may into the farmer-owned reserve (FOR).

EFFECTIVE DATE: September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Philip W. Sronce, Consolidated Farm Service Agency, United States Department of Agriculture (USDA), P.O. Box 2415, Washington, DC 20013–2415 or call 202–720–4418.

SUPPLEMENTARY INFORMATION:

Final Regulatory Impact Analysis

The Final Regulatory Impact Analyses describing the options considered in developing this rule and the impact of the implementation of each option is available on request from the above-named individual.

Executive Order 12866

This rule has been determined to be economically significant and was reviewed by OMB under Executive Order 12866.

Federal Assistance Programs

The titles and numbers of the Federal Assistance Programs, as found in the Catalog of Federal Domestic Assistance, to which this rule applies, are as follows:

Titles	Numbers
Commodity Loans and Purchases .	10.051
Feed Grain Production Stabilization	10.055
Wheat Production Stabilization	10.058

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is applicable to this final rule because the CCC is required by sections 107B(o) and 105B(o) of the Agricultural Act of 1949, as amended (the 1949 Act), to publish a notice of proposed rulemaking with respect to certain provisions of this rule. Final Regulatory Flexibility Analyses for the 1995 Wheat and Feed Grain ARPs were prepared as part of the Final Regulatory Impact Analyses. Copies of these analyses are available from the above-named individual.

Executive Order 12778

This final rule has been reviewed in accordance with Executive Order 12778. The provisions of this final rule do not preempt State laws, are not retroactive, and do not require the exhaustion of any administrative appeal remedies.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will not have a significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Executive Order 12372

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Paperwork Reduction Act

The amendments to 7 CFR parts 1413 and 1421 set forth in this final rule do not contain new information collections that require clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 35). Information collections were previously cleared under OMB control numbers 0560–0092 and 0560–0129.

Background

This final rule amends 7 CFR parts 1413 and 1421 to set forth determinations with respect to: The 1995 Price Support and Production Adjustment Programs for Wheat and Feed Grains; the 1995 price support rates for oilseeds; and the entry of 1994-crop wheat and feed grains into the FOR. General descriptions of the statutory basis for the 1995 Wheat and Feed Grain Program determinations in this final rule were set forth at 59 FR 16149 (April 6, 1994) and at 59 FR 39707 (August 4, 1994), respectively.

1995 Wheat Program

The public was asked to comment on whether the 1995 wheat ARP percentage should be set at 0 percent, 5 percent, or 10 percent or another percentage between 0 and 15 percent. Comments received during the comment period are summarized below.

A total of 62 respondents commented on the ARP level. Table 1 shows a breakdown of the comments received by type of respondent.

TABLE 1.—SUMMARY OF COMMENTS ON 1995 WHEAT ARP LEVELS, BY RESPONDENT TYPE

Respondent	Suggested ARP percentage							
	No ARP	0%	5%	10%	12%	15%	Other >15%	Total
Farm Organizations	....	14	2	1	....	2	1	20
Agri-businesses	....	11	....	....	....	....	....	11
Individual Producers	3	10	1	5	1	9	2	31
Total	3	35	3	6	....	12	2	62

Respondents favoring lower ARP percentages indicated that they favored lower ARP percentages for the following reasons: (1) wheat-sector net income is higher with lower ARP levels; (2) the U.S. needs to maintain production in the face of high imports; (3) the U.S. needs to send a message to our competitors that the U.S. will not unilaterally reduce production and abandon world markets; (4) payment acres are higher; and (5) idling acres under the Conservation Reserve Program and annual programs hurt rural economic activity. Respondents favoring higher ARP percentages noted that higher ARP levels: (1) result in higher wheat prices; (2) result in lower Government costs; (3) reduce the risk of stock-building; and (4) help maintain crop rotations.

After considering these comments, on June 1, 1994, the Secretary of Agriculture (the Secretary) announced a 1995 ARP of zero percent. The Secretary was authorized to make adjustments in the 1995 ARP percentage no later than July 31, 1994. No change was made because estimated 1995 wheat supplies did not change significantly (up about 1 percent) from the May 1994 supply estimates. The Secretary determined that a zero-percent ARP for wheat would provide the highest income for producers, maintain U.S. competitiveness in world markets, and signal to domestic and foreign customers that the U.S. will be a reliable supplier.

Table 2 compares supply and demand estimates under three different ARP options based on May 1994 estimates (the estimates used to make the June 1 and July 31, 1994, ARP decision).

TABLE 2.—COMPARISON OF 1995 WHEAT SUPPLY AND DEMAND ESTIMATES UNDER VARIOUS ARP OPTIONS

Supply and Demand Variable	1995 ARP Options		
	0 percent	5 percent	10 percent
Participation (percent of total base acreage)	86	85	84
Planted Acreage (mil. ac.)	71.8	70.0	67.8
Production (mil. bu.)	2,406	2,347	2,272
Domestic Use (mil. bu.)	1,242	1,227	1,207
Exports (mil. bu.)	1,200	1,190	1,175
Ending Stocks 8/31 (mil. bu.)	659	627	590
Average Market Price ($ per bu.)	2.95	3.00	3.08
Deficiency Payments (mil. $)	1,937	1,712	1,464
Net Income to Wheat Producers (mil. $)	5,547	5,302	5,086

The 1949 Act provides that an ARP of not more than 15 percent may be implemented if the ending stocks-to-use (s/u) ratio for the previous marketing year is equal to or less than 40 percent. When the 1995 ARP was announced, the S/U for the 1994 marketing year was estimated to be 25.8 percent. Section 1104 of the Agricultural Reconciliation Act of 1990 provides for a minimum 5-percent ARP for the 1995 crop of wheat unless the 1994/95 wheat ending s/u ratio is less than 34 percent. Because the 1994/95 wheat s/u ratio was less than 34 percent, the 5-percent ARP minimum does not apply. ARP levels above 10 percent were not considered because expected 1995-crop supplies would fall to unacceptable levels. A PLD will not be implemented for 1995 wheat because it is unnecessary given the supply and use conditions which led to an ARP of zero percent.

1995 Feed Grain Program

The 1949 Act provides that an ARP of zero to 12.5 percent may be implemented if the corn ending s/u ratio for the previous marketing year is equal to or less than 25 percent. The corn ending s/u for the 1994/95 marketing year was estimated to be 18.9 percent when the 1995 ARP levels were announced on September 30 and 23.3 percent on November 15, 1994. In the case of grain sorghum and barley, the 1949 Act provides for ARP percentages from zero to 20 percent. Section 1104 of the Agricultural Reconciliation Act of 1990 provides for a minimum 7.5 percent ARP for the 1995 crop of corn unless the 1994/95 corn ending s/u ratio is less than 20 percent. Because the 1994/95 corn s/u ratio estimated on September 30 was below 20 percent, the 7.5-percent minimum ARP does not apply.

The public was asked to comment on the appropriate 1995 ARP percentage for corn, grain sorghum, and barley and on whether or not malting barley producers, as a condition of eligibility for feed grain loans, purchases, and payments, should be exempt from complying with requirements of the feed grain ARP. The statutory range for establishing the 1995 ARP percentages, based on the supply and demand estimates published in the proposed rule, was zero to 12.5 percent for corn and zero to 20 percent for grain sorghum and barley. The oats ARP percentage is statutorily mandated at zero percent.

Comments received during the specified comment period are summarized as follows:

A total of 1,474 respondents commented on the ARP percentages, including 1,399 from a producer survey collected by the Nebraska Corn Development, Utilization and Marketing Board at Harvest Husker Days. Fourteen hundred and fifty-five of the respondents commented on the corn ARP percentage, 33 of the respondents commented on the grain sorghum ARP percentage, and 28 of the respondents commented on the barley ARP percentage. Table 3 shows a breakdown of the comments received on the corn, grain sorghum, and barley ARP percentage by type of respondent.

TABLE 3.—SUMMARY OF COMMENTS ON THE 1995 FEED GRAIN ARP LEVELS, BY COMMODITY AND RESPONDENT TYPE

Respondent	Suggested ARP percentage					
	0%	5%	7.5%	10%	12.5%	>12.5%
Corn:						
Farm Organizations	0	1	3	1	2	0
Agri-businesses	9	1	0	0	2	0
Individual/Producers	134	261	407	87	448	86
Others	0	0	1	1	11	0
Total	143	263	411	89	463	86
Grain Sorghum:						
Farm Organizations	2	0	0	1	1	0
Agri-businesses	6	0	0	0	1	0
Individual/Producers	3	0	0	3	5	7
Others	0	0	0	1	3	0
Total	11	0	0	5	10	7
Barley:						
Farm Organizations	5	0	0	1	1	0
Agri-businesses	6	0	0	0	1	0
Individual/Producers	4	0	0	1	5	2
Others	0	0	0	0	1	1
Total	15	0	0	2	8	3

Fifty-six percent of the respondents (a majority of producer comments) favored a corn ARP of 7.5 percent or less. In general, most farm organization and agri-business respondents favored an ARP level of 7.5 percent or less.

Respondents favoring the lower ARP percentages noted that the U.S. needs to produce more to take advantage of export opportunities and confirmed USDA's analysis that a lower ARP level results in higher producer incomes. Advocates for a zero-percent barley ARP indicated the need for adequate supplies to aggressively implement the Export Enhancement Program for barley.

Respondents favoring higher ARP percentages commented that feed grain supplies would be lower, prices would be higher, and Government costs would be lower.

Three respondents commented on whether or not malting barley producers should be exempt from the 1995 ARP requirement for barley. One respondent favored and two respondents opposed the malting barley exemption.

After considering these comments, the Secretary announced on September 30, 1994, an ARP level of 7.5 percent for corn, and zero percent for grain sorghum, barley, and oats, and that malting barley producers would not be exempt from complying with the 1995 Barley ARP requirements.

Malting barley producers will not be exempted from complying with the barley ARP requirement because exempting them would increase the complexity of the program and increase program outlays.

The Secretary was authorized to make adjustments in the 1995 ARP percentages no later than November 15, 1994. On November 15, 1994, the Secretary announced that the initially announced ARP levels would not be changed. A change was not warranted because 1994 feed grain supplies had increased only 6 percent and the prospects for larger feed grain demand had improved since the September announcement.

The Secretary determined that a 7.5-percent ARP for corn and zero-percent ARP's for grain sorghum and barley would maintain adequate supplies of quality feed and food for all markets.

Table 4 shows four different 1995 Feed Grain ARP options that were considered when determining the final 1995 ARP percentages.

TABLE 4.—1995 FEED GRAIN ARP OPTIONS

Crop	1995 ARP options			
	1	2	3	4
	Percentages			
Corn	0	5	7.5	12.5
Grain Sorghum	0	0	0	5
Barley	0	0	0	5

Tables 5 through 7 compare the supply and demand estimates of four different 1995 ARP options based on September 1994 estimates for corn, grain sorghum, and barley.

TABLE 5.—COMPARISON OF 1995 CORN SUPPLY AND DEMAND ESTIMATES UNDER VARIOUS ARP OPTIONS

Supply and Demand Variable	1995 ARP options			
	0	5	7.5	12.5
Participation (percent of the total base acreage)	81	77	75	71
Planted Acreage (mil. ac.)	79.5	78.0	77.0	75.0
Production (mil. bu.)	8,980	8,815	8,705	8,470
Domestic Use (mil. bu.)	7,315	7,275	7,250	7,200

1994-crop Wheat and Feed Grains FOR Program

Section 110 of the 1949 Act sets forth the statutory authority for the FOR program for wheat and feed grains. It provides that the determination of whether there will be entry of a crop into the FOR will be announced by December 15 of the year in which the crop of wheat was harvested and, in the case of feed grains, March 15 of the year following the year in which the crop of corn was harvested.

Entry into the FOR is triggered based upon prices and s/u ratios. Section 110 of the 1949 Act generally provides that the Secretary may make extended loans available to producers of wheat or feed grains if either of the following conditions is met:

(A) *Price Condition:* The Secretary determines that the average market price for wheat or corn, respectively, for the 90-day period prior to the announcement is less than 120 percent of the current loan rate for wheat or corn, respectively; or

(B) *S/U Condition:* As of the announcement date, the Secretary estimates that the s/u ratio on the last day of the current marketing year will be:

(i) in the case of wheat, more than 37.5 percent; and

(ii) in the case of corn, more than 22.5 percent.

Section 110 of the 1949 Act, also provides that the Secretary shall make extended loans available to producers of wheat or feed grains if both of the afore-noted conditions are met for wheat and feed grains, respectively. If neither the price nor the s/u condition is met, the Secretary has no authority to make extended loans available to producers of wheat or feed grains.

In accordance with section 110 of the 1949 Act, if the Secretary makes extended loans available to producers of wheat or feed grains, the Secretary must specify the maximum quantity of wheat or feed grains to be stored under this program that the Secretary determines appropriate to promote the orderly marketing of the commodities. The maximum quantities of wheat may not be established at less than 300 million bushels, nor more than 450 million bushels. The maximum quantities of feed grains may not be established at less than 600 million bushels, nor more than 900 million bushels. Section 110 of the 1949 Act also provides that the Secretary may require producers to repay FOR loans if it is determined that these supplies are required to meet

urgent domestic and international needs.

On November 3, 1994, the CCC authorized up to 900 million bushels of corn, grain sorghum, barley, and oats to be stored under the FOR program. At the time of the decision, the estimated corn S/U ratio at the end of the 1994/95 marketing year was 18.9 percent, the 90-day average market price of corn was $2.16 per bushel, and 120 percent of the 1994 price support rate for corn was $2.27 per bushel. Entry of the 1994-crop of feed grains into the FOR was allowed because the price condition was met (the 90-day average market price of corn was less than 120 percent of the 1994 price support rate for corn) and the prospects for a large 1994 corn crop had caused corn prices to decline significantly through the summer and early fall of 1994. Corn cash prices declined from around $2.70 per bushel in late June to around $2.00 per bushel at harvest.

On June 23, 1995, in accordance with section 110(e) of the 1949 Act, the CCC announced that 1994-crop feed grains may not be pledged as collateral for FOR loans and that all existing 1994 crop feed grain FOR loans were called because the 1995/96 supply and demand outlook for feed grains had tightened significantly since authorizing the FOR entry for 1994-crop feed grain loans in November 1994. Stronger than expected corn export demand for 1994/95 and 1995/96, higher than expected feed use in 1994/95, and prospects for a smaller 1995 corn crop due to unexpected weather-related problems are all contributing factors. Recent excessive rains in major corn-producing states caused the 1995 corn production estimate to be lowered from 8.6 billion bushels in May 1995 to 7.9 billion bushels in June 1995—just one month later. Total use estimates were also lowered by 500 million bushels since May 1995, reflecting lower estimated supply estimates and rising feed costs. Corn ending stocks for 1995/96 are projected at 748 million bushels, 789 million bushels below November 1994 projections and the lowest level since 1975/76. This tightened supply situation is expected to increase feeding costs for livestock and poultry producers. A further tightening of supplies will likely cause liquidation of livestock herds, reducing feed use in subsequent crop years.

As with corn, June estimates of 1995/95 supplies and ending stocks for the other feed grains are lower compared to November estimates and are at or near historically low levels.

On December 13, 1994, the Secretary announced that 1994-crop wheat would not be eligible for the FOR because neither the s/u condition nor the price condition had been met. At the time of the decision, the estimated wheat s/u ratio at the end of the 1994/95 marketing year was 21.1 percent, the 90-day average market price of wheat was $3.74 per bushel, and 120 percent of the 1994 price support rate for wheat was $3.10 per bushel.

1995 Oilseeds Price Support Rates

Section 205 of the 1949 Act provides that the price support rate for the 1995 crop of soybeans shall not be less than $4.92 per bushel and for the 1995 crop of sunflower seed, canola, rapeseed, safflower, mustard seed, and flaxseed shall not be less than $0.087 per pound.

Acreage Reduction Percentages

In accordance with sections 107B(e)(1) and 105B(e)(1) of the 1949 Act, the ARP has been established with respect to the 1995 crop of corn at 7.5 percent, and with respect to the 1995 crops of wheat, grain sorghum, barley, and oats at zero percent. Accordingly, producers of corn will be required to reduce their 1995 acreage of corn for harvest by 7.5 percent from the established corn crop acreage base for a farm to be eligible for price support loans, purchase, and payments. Producers will not be required to reduce their 1995 acreage of grain sorghum, barley and oats for harvest from the established feed grain crop acreage base for a farm in order to be eligible for price support loans, purchase, and payments for the respective feed grain.

Paid Land Diversion

In accordance with sections 107B(e)(5) and 105B(e)(5) of the 1949 Act, a PLD program will not be implemented for the 1995 crops of wheat and feed grains.

Malting Barley Exemption

In accordance with section 105B(e)(2)(G) of the 1949 Act, producers of malting barley shall, as a condition of eligibility of feed grain loans, purchases and payments, comply with the requirements of the zero-percent ARP for the 1995 crop of barley.

Price Support Rates

In accordance with sections 107B(a) and 105B(a) of the 1949 Act, the price support rates have been established with respect to the 1995 crops of wheat at $2.58 per bushel, corn at $1.89 per bushel, grain sorghum at $1.80 per bushel, barley at $1.54 per bushel, oats at $0.97 per bushel, and rye at $1.61 per bushel.

List of Subjects

7 CFR Part 1413

Acreage allotments, Cotton, Disaster assistance, Feed grains, Price support programs, Reporting and recordkeeping requirements, Rice, Soil conservation, Wheat.

7 CFR Part 1421

Grains, Loan programs/agriculture, Oilseeds, Peanuts, Price support programs, Reporting and recordkeeping requirements, Soybeans, Surety bonds, Warehouses.

Accordingly, 7 CFR parts 1413 and 1421 are amended as follows:

PART 1413—FEED GRAIN, RICE, UPLAND AND EXTRA LONG STAPLE COTTON, WHEAT AND RELATED PROGRAMS

1. The authority citation for 7 CFR part 1413 continues to read as follows:

Authority: 7 U.S.C. 1308, 1308a, 1309, 1441–2, 1444–2, 1444f, 1445b–3a, 1461–1469; 15 U.S.C. 714b and 714c.

2. Section 1413.54 is amended by:

A. Revising paragraphs (a)(1)(iii) and (a)(1)(iv) and adding paragraph (a)(1)(v),

B. Revising paragraphs (a)(2)(iii)(C) and (a)(2)(iv) and adding paragraph (a)(2)(v),

C. Republishing paragraph (d)(5) introductory text, and adding paragraphs (d)(5)(i) and (d)(5)(ii), and

D. Revising paragraph (e):

§ 1413.54 Acreage reduction program provisions.

(a) * * *

(1) * * *

(iii) 1993 wheat, 0 percent;

(iv) 1994 wheat, 0 percent; and

(v) 1995 wheat, 0 percent.

(2) * * *

(iii) * * *

(C) Barley and oats, 0 percent;

(iv) For the 1994 crop: corn, grain sorghum, barley, and oats, 0 percent; and

(v) For the 1995 crop: corn—7.5 percent; grain sorghum, barley, and oats—0 percent.

* * * * *

(d) * * *

(5) For the 1995 crop:

(i) Shall not be made available to producers of wheat and

(ii) Shall not be made available to producers of feed grains.

* * * * *

(e) With respect to the 1991, 1992, 1993, 1994 and 1995 crop years, in order to receive feed grain loans, purchases, and payments in accordance with this part and part 1421 of this title, producers of malting barley must comply with the acreage reduction requirements of this part.

* * * * *

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

3. The authority citation for 7 CFR part 1421 continues to read as follows:

Authority: 7 U.S.C. 1421, 1423, 1425, 1441z, 1444f–1, 1445b–3a, 1445c–3, 1445e, and 1446f; 15 U.S.C. 714b and 714c.

4. Section 1421.7 is amended by adding paragraphs (b)(1)(v), (b)(2)(v), (b)(3)(v), (b)(4)(v), (b)(5)(v), (b)(6)(v), (b)(9)(v), and (b)(10)(v):

§ 1421.7 Adjustment of basic support rates.

* * * * *

(b) * * *

(1) * * *

(v) 1995 Wheat— $2.58 per bushel;

(2) * * *

(v) 1995 Corn—$1.89 per bushel;

(3) * * *

(v) 1995 Barley—$1.54 per bushel;

(4) * * *

(v) 1995 Oats—$0.97 per bushel;

(5) * * *

(v) 1995 Grain sorghum—$1.80 per bushel;

(6) * * *

(v) 1995 Rye—$1.61 per bushel;

* * * * *

(9) * * *

(v) 1995 Soybeans—$4.92 per bushel;

(10) * * *

(v) 1995 Canola, flaxseed, mustard seed, rapeseed, safflower, and sunflower seed—$0.087 per pound.

* * * * *

5. Section 1421.217 is amended by adding paragraph (e):

§ 1421.217 Reserve entry.

* * * * *

(e) No quantity of 1994-crop wheat or 1994-crop feed grains may be stored under the provisions of section 110 of the Agricultural Act of 1949, as amended.

Signed at Washington, DC, on September 8, 1995.

Richard O. Newman,

Acting Executive Vice President, Commodity Credit Corporation.

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations concerning State-Federal licensing of veterinary biological products. The effect of the amendment is that a Federally licensed establishment will not be allowed to produce the same veterinary biological product under both a State and Federal product license. Autogenous biologics will not be subject to the same requirement in that a Federally licensed establishment may hold both State and Federal product licenses for autogenous biologics, but must choose to produce each specific serial of such biologic under either a State or Federal product license. No autogenous biologic may be produced at the same time under both a Federal and State license. The amendment is necessary in order to ensure the integrity of the Federal licensing system and the safety of biological products produced in Federally licensed establishments.

We are also removing outdated sections from the regulations referring to interim establishment licenses and exemption procedures that were permitted during the 5-year transition period to attain Federal licensure under the 1985 amendments to the Virus-Serum-Toxin Act.

EFFECTIVE DATE: October 18, 1995.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Deputy Director, Veterinary Biologics, BBEP, APHIS, USDA, 4700 River Road Unit 148, Riverdale, MD 20737–1237, (301) 734–8245.

SUPPLEMENTARY INFORMATION:

Background

The Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture (USDA), licenses veterinary biological products under the Virus-Serum-Toxin Act (21 U.S.C. 151–159, hereinafter, the Act), as amended by the Food Security Act of 1985. Veterinary biologics licensed by APHIS include products such as vaccines, antitoxins, viruses, diagnostics, and autogenous biologics (vaccines, bacterins, and toxoids) which are normally used in the herd of origin (the herd from which the disease causing microorganism is derived) to immunize animals against infectious disease.

Under the Act, veterinary biological products are licensed on the basis of their purity, safety, potency, and efficacy. The 1985 amendments to the Act exempt certain products from the requirement that they be produced pursuant to an unsuspended and unrevoked Federal license. Such products include those which are prepared solely for distribution within the State of production pursuant to a license granted by such State under a program approved by the Administrator of APHIS.

The regulations in 9 CFR part 102 contain Federal licensing provisions for biological products. The regulations in 9 CFR part 114 prescribe conditions under which an unlicensed product may be prepared in a USDA-licensed establishment.

On March 6, 1995, we published in the **Federal Register** (60 FR 12162–12165, Docket No. 93–136–1) a proposal to amend parts 102 and 114.

We proposed to amend part 102 by removing the outdated reference to Federal interim licenses in § 102.1 and by removing § 102.4(h), which refers to outdated provisions. We also proposed minor editorial changes to § 102.4(b)(3) and § 102.6 (introductory paragraph and paragraph (a)) to reflect organizational changes within APHIS.

We also proposed to amend part 114 by removing outdated provisions for interim licenses and certain exemption procedures that were used in implementing the 5-year transition to Federal licensure under the 1985 amendments to the Virus-Serum-Toxin Act. In addition, we proposed to amend part 114 to establish the conditions that must be maintained when a State-licensed veterinary biological product is produced in an establishment holding a U.S. Veterinary Biologics Establishment License.

Under the proposed amendments, a Federally licensed establishment would not be allowed to produce the same veterinary biological product under both a State and Federal product license. Autogenous biologics would not be subject to the same requirement in that a Federally licensed establishment could hold both State and Federal product licenses for autogenous biologics, but would have to choose to produce each specific serial of such biologic under either a State or Federal product license. No autogenous biologic could be produced at the same time under both a Federal and State license.

We solicited comments concerning our proposal for 60 days ending May 5, 1995. We did not receive any comments. The proposed rule provides the basis for this final rule.

Therefore, based on the rationale set forth in the proposed rule, we are adopting the provisions of the proposal as a final rule without change.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for purposes of Executive Order 12866, and, therefore, has not been reviewed by the Office of Management and Budget.

This rule removes outdated sections from the regulations in §§ 102.1 and 102.4(h) and § 114.2 (b) and (d). These sections refer to outdated provisions related to the implementation of the 1985 amendments to the Virus-Serum-Toxin Act. These provisions expired on June 30, 1991.

This rule also establishes conditions applicable to some 100 producers to prepare a biological product under either a State or USDA product license in a USDA licensed establishment. An exception is provided for autogenous biologics. The amendment will not have an adverse economic impact on these producers of biologics since it still allows the production of both State and Federally licensed products in Federally-licensed establishments. Therefore, it is not anticipated that the amendment will have an economic impact on producers or small businesses.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to a judicial challenge to the provisions of this rule.

Paperwork Reduction Act

This document contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects

9 CFR Part 102

Animal biologics, Reporting and recordkeeping requirements.

9 CFR Part 114

Animal biologics, Reporting and recordkeeping requirements.

Accordingly, 9 CFR parts 102 and 114 are amended as follows:

PART 102—LICENSES FOR BIOLOGICAL PRODUCTS

1. The authority citation for part 102 continues to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

2. Section 102.1 is revised to read as follows:

§ 102.1 Licenses issued by the Administrator.

Each establishment qualified to prepare biological products under the Virus-Serum-Toxin Act shall hold an unexpired and unrevoked U.S. Veterinary Biologics Establishment License issued by the Administrator and a U.S. Veterinary Biological Product License for each product prepared in such establishment unless the product is subject to the provisions of 9 CFR parts 103 or 106 of this subchapter.

§ 102.4 [Amended]

3. In § 102.4, paragraph (b)(3), the words "Veterinary Services" are removed and the words "Animal and Plant Health Inspection Service" are added in their place.

4. In § 102.4, paragraph (h) is removed.

§ 102.6 [Amended]

5. In § 102.6, in the introductory paragraph and paragraph (a), the term "Deputy" is removed.

PART 114—PRODUCTION REQUIREMENTS FOR BIOLOGICAL PRODUCTS

6. The authority citation for part 114 is revised to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

7. In § 114.2, paragraphs (b) and (d) are removed; paragraph (c) is redesignated as p[illegible]b) and revised; and a new paragraph (c) is added to read as follows:

§ 114.2 Products not prepared under license.

* * * * *

(b) Except as provided in 9 CFR part 103, a biological product shall not be prepared in a licensed establishment unless the person to whom the establishment license is issued holds an unexpired, unsuspended, and unrevoked product license issued by the Administrator to prepare such biological product, or unless the products prepared are subject to the provisions of § 107.2 of this subchapter.

(c) A biological product produced in a USDA-licensed establishment shall be produced under a U.S. Veterinary Biological Product License or a license granted by a State under § 107.2 (referred to as a State biological product license and the products prepared pursuant thereto as State-licensed biological products, including autogenous biologics), but not under both a U.S. Veterinary Biological Product License and a State biological product license. Before a U.S. Veterinary Biological Product License (including a conditional license) is issued, the licensee shall relinquish its State license for that product: *Provided,* That autogenous biologics shall not be subject to this provision when they are prepared in accordance with the provisions of paragraph (c)(5) of this section.

(1) State-licensed biological products (including autogenous biologics) shall only be distributed or shipped intrastate, must not bear a U.S. Veterinary Biologics Establishment License Number, and must not otherwise be represented in any manner as having met the requirements for a U.S. Veterinary Biological Product license. Labeling of State- and USDA-licensed biological products produced in the same establishment must be distinctly different in color and design.

(2) All biological products in USDA-licensed establishments, whether licensed by USDA or by the State, shall be prepared only in locations indicated in legends filed in accordance with 9 CFR part 108. A description of each State-licensed product must be filed with the Animal and Plant Health Inspection Service as part of the blueprint legends and must be sufficient for Animal and Plant Health Inspection Service to determine any risk to the production of other products in the licensed establishment and to determine that adequate procedures are followed

to prevent contamination during production.

(3) Records in such establishments must be maintained in accordance with §§ 116.1 and 116.2 of this subchapter and shall include all products licensed by the State or USDA.

(4) Reports prescribed in § 116.5 of this subchapter for USDA-licensed establishments shall be submitted for all veterinary biological products in the establishment.

(5) Under the following conditions, an autogenous biologic may be produced in a USDA-licensed establishment under either a State or U.S. Veterinary Biological Product License:

(i) When a culture of microorganisms, isolated from a herd in a State, is received at a USDA-licensed establishment that is in the same State but that holds both a State and a U.S. Veterinary Biological Products License for autogenous biologics, the isolate shall be designated by the licensee for use in the production of an autogenous biological product under either the State product license, or the U.S. Veterinary Biological Product License: *Provided*, That the isolate meets the requirements of the respective regulatory authority for an autogenous biologic. If, after producing the product pursuant to one license, the licensee elects to produce an autogenous biologic from the same isolate under provisions of the other license, the licensee may do so only with the approval of the other licensing authority.

(ii) The true name of a State-licensed autogenous biologic shall specify the State of licensure: e.g.

“ ________ Autogenous Bacterin”
(State)
or ________ Autogenous Vaccine”.
(State)

Done in Washington, DC, this 11th day of September 1995.

Terry L. Medley,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF TRANSPORTATION

14 CFR Part 71

[Airspace Docket No. 95–AWP–16]

Establishment of Class D Airspace Area, Chandler Municipal Airport, AZ

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a Class D airspace area at Chandler Municipal Airport, AZ. This action will provide adequate airspace for instrument flight rules (IFR) operations at Chandler Municipal Airport, Chandler, AZ.

EFFECTIVE DATE: 0901 UTC, November 9, 1995.

FOR FURTHER INFORMATION CONTACT: Scott Speer, System Management Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 725–6533.

SUPPLEMENTARY INFORMATION:

History

On June 15, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class D airspace area at Chandler Municipal Airport, Chandler, AZ. (60 FR 31423). The effect of this action is to provide adequate Class D airspace for aircraft executing an instrument approach procedure at Chandler Municipal Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes a Class D airspace area at Chandler Municipal Airport, AZ. This action will provide adequate Class D airspace for aircraft executing instrument approach procedures at Chandler Municipal Airport, Chandler, AZ.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 is revised to read as follows:

Authority: 49 U.S.C. 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 5000 Class D Airspace

* * * * *

AWP AZ D Chandler Municipal Airport, AZ [New]

Chandler Municipal Airport, AZ
(Lat. 33°16′09″N, long. 111°48′40″W)

That airspace extending upward from the surface to and including 3700 feet MSL within a 4-mile radius of Chandler Municipal Airport, excluding the portion within the Williams-Gateway Airport, AZ, Class D airspace area. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

14 CFR Part 71

[Airspace Docket No. 95–ASO–13]

Amendment to Class E Airspace; Brewton, AL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment modifies the Class E airspace area at Brewton, AL, to accommodate a VOR RWY 6 Standard Instrument Approach Procedure (SIAP) for the Brewton Municipal Airport. Additional controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP and for instrument flight rules (IFR) operations at the airport.

EFFECTIVE DATE: 0901 UTC, January 4, 1996.

FOR FURTHER INFORMATION CONTACT: Benny L. McGlamery, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5570.

SUPPLEMENTARY INFORMATION:

History

On July 17, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by modifying Class E airspace at Brewton, AL (60 FR 36370). This action would provide adequate Class E airspace for IFR operations at Brewton Municipal Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies Class E airspace at Brewton, AL, to accommodate a VOR RWY 6 SIAP and for IFR operations at the Brewton Municipal Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significantly regulatory action” under Executive Order 12866; (2) is not a “significantly rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 16, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet above the surface of the earth.

* * * * *

ASO AL E5 Brewton, AL [Revised]

Brewton Municipal Airport, AL
(Lat. 31°03′05″N, long. 87°04′05″ W)
Crestview, FL, VORTAC
(Lat. 30°49′34″N, long. 86°40′45″ W)

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Brewton Municipal Airport and within 4 miles each side of the Crestview, FL, VORTAC 304° radial, extending from the 7-mile radius to 15 miles northwest of the VORTAC.

14 CFR Part 71

[Airspace Docket No. 95–AWP–22]

Establishment of Class E Airspace; Placerville, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a Class E airspace area at Placerville Airport, Placerville, CA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 5 has made this action necessary. The intended effect of this action is to provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at Placerville Airport, Placerville, CA.

EFFECTIVE DATE: 0901 UTC, November 9, 1995.

FOR FURTHER INFORMATION CONTACT: Scott Speer, Airspace Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 725–6533.

SUPPLEMENTARY INFORMATION:

History

On July 17, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class E airspace area at Placerville Airport, Placerville, CA. (60 FR 36372). The development of a GPS SIAP at Placerville Airport has made this action necessary.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes a Class E airspace area at Placerville, CA. The development of a GPS SIAP at Placerville Airport has made this action necessary. The intended effect of this action is to provide adequate Class E airspace for aircraft executing the GPS RWY 5 SIAP at Placerville Airport, Placerville, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a

Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 97

[Docket No. 28326; Amdt. No. 1684]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA from documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 9260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents in unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedure (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significantly regulatory action" under Executive Order 12866; (2) is not a "significantly rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air Traffic Control, Airports, Navigation (Air).

Issued in Washington, DC on September 8, 1995.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 u.t.c. on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 is revised to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120, 44701; and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§ 97.23 [Amended]

§ 97.25 [Amended]

§ 97.27 [Amended]

§ 97.29 [Amended]

§ 97.31 [Amended]

§ 97.33 [Amended]

BILLING CODE 4910–13–M

Federal Aviation Administration

14 CFR Part 97

[Docket No. 28327; Amdt. No. 1685]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviations Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPS criteria were applied to only these specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the TERPS. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Thomas C. Accardi;
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 is revised to read as follows:

Authority: 49 U.S.C. 40103, 40113, 40120, 44701; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Parts 24, 231, and 247

Guides for the Luggage and Related Products Industry, Guides for Shoe Content Labeling and Advertising, and Guides for the Ladies' Handbag Industry

AGENCY: Federal Trade Commission.

ACTION: Final Rule; Rescission of Guides.

SUMMARY: The Federal Trade Commission (the "Commission"), as part of its periodic review of its rules and guides, announces that it has concluded a review of its Guides for the Luggage and Related Products Industry ("Luggage Guides"); Guides for Shoe Content Labeling and Advertising ("Shoe Content Guides"); and Guides for the Ladies' Handbag Industry ("Handbag Guides"). The Commission has decided to rescind these three Guides. In a document published elsewhere in this issue of the **Federal Register**, the Commission seeks public comment on proposed Guides for Select Leather and Imitation Leather Products. The Commission is taking this action to clarify and streamline the Guides.

EFFECTIVE DATE: September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Susan E. Arthur, Attorney, (214) 767–5503, Federal Trade Commission, Dallas Regional Office, 100 N. Central Expressway, Suite 500, Dallas, Texas 75201.

SUPPLEMENTARY INFORMATION: In response to the Commission's request for public comment on the Luagge Guides, the Shoe Content Guides, and the Ladies' Handbag Guides, the Commission received 12 comments. The comments received are discussed in the Commission's request for public comment concerning its proposed Guides for Select Leather and Imitation Leather Products. That request is located elsewhere in this issue of the Federal Register.

A review of the comments and of the three Guides indicates that consolidation of their basic principles into one set of Guides is clearly warranted. Therefore, on the basis of the discussion in this rule—and the discussion in the Commission's request for public comment concerning its proposed Guides for Select Leather and Imitation Leather Products, which is located elsewhere in this issue of the **Federal Register**, and which is incorporated herein—16 CFR Parts 24, 231, and 247 are hereby rescinded.

List of Subjects

16 CFR Part 24

Advertising, Luggage industry, Trade practices.

16 CFR Part 231

Advertising, Footwear, Labeling, Trade practices.

16 CFR Part 247

Advertising, Handbag industry, Labeling, Trade practices.

PART 24—[REMOVED]

PART 231—[REMOVED]

PART 247—[REMOVED]

The Commission, under authority of Sections 5(a)(1) and 6(g) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1) and 46(g), amends chapter I of Title 16 of the Code of Federal Regulations by removing Parts 24, 231, and 247.

By Direction of the Commission.

Donald S. Clark,
Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 4

[T.D. 95–76]

RIN 1515–AB81

Removal of Cambodia and Vietnam From List of "Non-Entrant" Countries

AGENCY: U. S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: On January 3, 1992, the United States lifted the trade embargo against Cambodia, normalizing economic relations between the United States and Cambodia. On February 3, 1994, President Clinton lifted the trade embargo against Vietnam. Effective April 27, 1995, the National Security Council amended its policy toward Cambodia and Vietnam by removing them from the "non-entrant" "Category II" status and placing them in the "Category I" status of vessels that may enter U. S. ports subject to certain limitations.

This document amends footnote 3a of section 4.20 of the Customs Regulations to remove Cambodia and Vietnam from the list of "non-entrant" countries so that foreign vessels entering the United States from these countries are now subject to a lesser special tonnage tax assessment.

DATES: This amendment is effective September 18, 1995. Reduced special tonnage tax assessments for foreign vessels entering the United States from Cambodia and Vietnam applied commencing on April 27, 1995.

FOR FURTHER INFORMATION CONTACT: Barbara E. Whiting, Carrier Rulings Branch, (202) 482–6940.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to information provided by the Departments of State and Transportation, Customs has found that on January 3, 1992, the United States lifted the trade embargo against Cambodia, normalizing economic relations. On February 3, 1994, President Clinton lifted the trade embargo against Vietnam. Effective April 27, 1995, the National Security Council amended its policy toward Cambodia and Vietnam by removing them from the "non-entrant" "Category II" status and placing them in the "Category I" status of vessels that may enter U. S. ports subject to certain limitations.

Accordingly, Customs has determined that vessels which trade in or enter the United States from Democratic Kampuchea (Cambodia) and the Socialist Republic of Vietnam are no longer subject to the payment of special tonnage tax in the amount of $2.00 as provided in 46 U.S.C. App. 121 and 141 and section 4.20 of the Customs

Regulations (19 CFR 4.20), but they will be subject to the $0.50 special tonnage tax and $0.50 light money rates provided therein.

This document amends footnote 3a of section 4.20 of the Customs Regulations (19 CFR 4.20, footnote 3a) to remove Cambodia and Vietnam from the list of "non-entrant" countries, reflecting the lesser special tonnage tax assessments for foreign vessels entering the United States from these countries.

Regulatory Flexibility Act and Executive Order 12866

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and based upon the information set forth above, it is certified that the regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, the regulation is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

This document does not meet the criteria for a "significant regulatory action" as specified in Executive Order 12866.

Inapplicability of Public Notice and Comment Requirements and Delayed Effective Date Requirements

Because the subject matter of this document does not constitute a departure from established policy or procedures, but merely announces a benefit for the public, it has been determined, pursuant to 5 U.S.C. 553(b)(B), that the notice and public comment procedures thereon are unnecessary. For the same reasons, it has also been determined, pursuant to 5 U.S.C. 553(d)(1) and (3), that good cause exists for not requiring a delayed effective date.

Drafting Information

The principal author of this document was Janet L. Johnson, Regulations Branch. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 4

Customs duties and inspection, Exports, Freight, Harbors, Maritime carriers, Oil pollution, Reporting and recordkeeping requirements.

Amendment to the Regulations

For the reasons set forth in the preamble, part 4 of the Customs Regulations (19 CFR part 4) is amended as set forth below.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

1. The general authority citation for part 4 and the specific authority for § 4.20 continue to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1431, 1433, 1434, 1624; 46 U.S.C. App. 3, 91;

* * * * *

Section 4.20 also issued under 46 U.S.C. 2107(b), 8103, 14306, 14502, 14511, 14512, 14513, 14701, 14702, 46 U.S.C. App. 121, 128;

* * * * *

§ 4.20 [Amended]

2. In § 4.20(c), footnote 3a to the table is amended by removing the words "Democratic Kampuchea (Cambodia);" and "; and, the Socialist Republic of Vietnam".

Approved: August 23, 1995.

William F. Riley,

Acting Commissioner of Customs.

Dennis M. O'Connell,

Acting Deputy Assistant Secretary of the Treasury.

BILLING CODE 4820-02-P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 1

RIN 2900–AH71

Board of Contract Appeals: Rules of the Board

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document amends the rules of the VA Board of Contract Appeals concerning optional small claims (expedited) and accelerated procedures. The maximum jurisdictional amount of $10,000 is changed to $50,000 for cases in which an appellant may elect to have an appeal processed under the small claims (expedited) procedures. Also, the maximum jurisdictional amount of $50,000 is changed to $100,000 for cases in which an appellant may elect to have an appeal processed under the accelerated procedures. These amendments merely reflect statutory changes.

EFFECTIVE DATE: September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Patricia J. Sheridan, Counsel to the Chairman, VA Board of Contract Appeals, Department of Veterans Affairs, 810 Vermont Ave., NW. Washington, DC 20420, (202) 273–6743.

SUPPLEMENTARY INFORMATION: This document amends Rule 12 of the rules of the VA Board of Contract Appeals (38 CFR 1.780 *et seq.*). Rule 12 includes a number of provisions relating to optional small claims (expedited) and accelerated procedures.

Previously, Rule 12 at 38 CFR 1.783(l)(1)(i) included the following provisions concerning optional small claims (expedited) procedures:

> (i) In appeals where the amount in dispute is $10,000 or less, the appellant may elect to have the appeal processed under a small claims (expedited) procedure requiring decision of the appeal, whenever possible, within 120 days after the Board receives written notice of the appellant's election. The details of this procedure appear in paragraph (1)(2) of this section (rule 12). An appellant may elect the accelerated procedure set forth in paragraphs (1)(3) of this section (Rule 12) in any appeal eligible for small claims (expedited) procedure.

The $10,000 amount in this paragraph was mandated by statute. However, The Federal Acquisition Streamlining Act of 1994 (FASA) (Pub. L. 103–355) changed the $10,000 amount to $50,000. Accordingly, in 38 CFR 1.783(l)(1)(i) the $10,000 amount is changed to $50,000 to reflect the statutory change.

Previously, Rule 12 at 38 CFR 1.783(l)(1)(ii) included the following provisions concerning accelerated procedures:

> (ii) In appeals where the amount in dispute is $50,000 or less, the appellant may elect to have the appeal processed under an accelerated procedure requiring decision of the appeal, whenever possible, within 180 days after the Board receives written notice of the appellant's election. The details of this procedure appear in paragraph (1)(3) of this section (Rule 12).

The $50,000 amount in this paragraph also was mandated by statute. However, the FASA also changed the $50,000 amount to $100,000. Accordingly, in 38 CFR 1.783(l)(1)(ii) the $50,000 amount is changed to $100,000 to reflect the statutory change.

This final rule reflects statutory changes and, therefore, is not subject to the provisions of 5 U.S.C. 552 or 553, including the notice and comment provisions.

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This rule merely reflects statutory amendments. Therefore, this final rule is exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604.

List of Subjects in 38 CFR Part 1

Administrative practice and procedure, Archives and records, Cemeteries, Claims, Courts, Flags, Freedom of information, Government contracts, Government employees, Government property, Infants and children, Inventions and patents, Investigations, Parking, Penalties, Postal service, Privacy, Reporting and recordkeeping requirements, Seals and insignia, Security measures, Wages.

Approved: September 7, 1995.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 1 is amended as set forth below:

PART 1—GENERAL PROVISIONS

1. The authority citation for part 1 continues to read as follows:

Authority: Sections 1.955 to 1.970 issued under 38 U.S.C. 3720(a)(4) and 5302; 5 U.S.C. 5584.

§ 1.783 [Amended]

2. In § 1.783, paragraph (l)(1)(i) is amended by removing "$10,000" and adding in lieu thereof "$50,000"; and paragraph (l)(1)(ii) is amended by removing "$50,000" and adding in lieu thereof "$100,000".

[FR Doc. 95–23036 Filed 9–15–95; 8:45 am]

BILLING CODE 8320-01-P

---

38 CFR Parts 1 and 2

RIN 2900–AH69

Contract Appeals Board Regulations

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document removes the Department of Veterans Affairs (VA) regulations concerning "APPEALS FROM DECISIONS OF CONTRACTING OFFICERS." These regulations concerned appeals to the VA Contract Appeals Board (VACAB). Prior to 1978, contract disputes were resolved by the VACAB. However, the VACAB was "superseded" and "subsumed" by the VA Board of Contract Appeals (VABCA). The VACAB's functions were to be phased-out. The last VACAB appeal was docketed in 1986, and the phase-out has been completed. Hence, the VACAB regulations are no longer needed.

EFFECTIVE DATE: September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Patricia J. Sheridan, Counsel to the Chairman, VA Board of Contract Appeals, Department of Veterans Affairs, 810 Vermont Ave., NW, Washington, DC 20420, (202)273–6743.

SUPPLEMENTARY INFORMATION: Under 5 U.S.C. 553 there is a basis for dispensing with prior notice and comment and for dispensing with a 30-day delay of the effective date since this final rule concerns rules of agency organization, practice, or procedure. Additionally, under 5 U.S.C. there is good cause for dispensing with prior notice and comment and for dispensing with a 30-day delay of the effective date since the changes made by this document should not affect anyone and, consequently, prior procedures are impracticable, unnecessary, and contrary to the public interest.

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This final rule should not have an impact on any individual or entity. Therefore, pursuant to 5 U.S.C. 605(b), this final rule is exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604.

This regulatory action has been reviewed by the Office of Management and Budget under Executive Order 12866.

There is no Catalog of Federal Domestic Assistance number.

38 CFR Part 2

Authority delegations (Government agencies)

Approved: September 7, 1995.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR parts 1 and 2 are amended as follows:

PART 1—GENERAL PROVISIONS

1. The authority citation for part 1 continues to read as follows:

Authority: Sections 1.955 to 1.970 issued under 38 U.S.C. 3720(a)(4) and 5302; 5 U.S.C. 5584.

§§ 1.770–1.776 [Removed]

2. The heading "APPEALS FROM DECISIONS OF CONTRACTING OFFICERS" and §§ 1.770 through 1.776 are removed.

PART 2—DELEGATIONS OF AUTHORITY

3. The authority citation for part 2 continues to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501, unless otherwise noted.

§ 2.5 [Amended]

4. In § 2.5, paragraph (b) is amended by removing "and Contracts Appeals Board".

§§ 2.62–2.65a [Removed]

5. Sections 2.62 through 2.65a are removed.

40 CFR Part 51

[FRL–5294–9]

Inspection/Maintenance Flexibility Amendments

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Today's action revises the motor vehicle Inspection/Maintenance (I/M) Program Requirements. EPA announced its intent to amend the I/M Program Requirements in December 1994 and held stakeholders' meetings on January 24, 1995 and January 31, 1995. This action creates an additional, less stringent enhanced I/M performance standard which allows areas that can meet the 1990 Clean Air Act requirements for Reasonable Further Progress and attainment to implement an I/M program that falls below the originally promulgated enhanced I/M performance standard. Because the new low enhanced I/M performance standard eliminates the need for the special enhanced performance standard for El Paso, Texas, today's action repeals that special performance standard. This action also revises the high enhanced I/M performance standard to include a visual inspection of the positive crankcase ventilation (PCV) valve on all light-duty vehicles and light-duty trucks from model years 1968 to 1971, inclusive, and of the exhaust gas recirculation (EGR) valve on all light-duty vehicles and light-duty trucks from

model years 1972 through 1983, inclusive. The low enhanced performance standard contains similar testing requirements, which are necessary to ensure full compliance with the Clean Air Act's requirement that all federal performance standards for enhanced I/M programs be based upon a model program that includes, at a minimum, two inspections per subject vehicle: an emission inspection and a visual inspection. Today's action also changes the waiver cost requirements by extending the deadline for implementing the minimum expenditure to qualify for a waiver specified in the Clean Air Act; allowing the application of pre-inspection repairs toward meeting the waiver expenditure requirements under limited circumstances; allowing the cost of primary emission control components replaced by family or friends to apply toward the waiver cost requirement; and removing the bar against issuing hardship exemptions more than once per vehicle lifetime. EPA is also including revised regulatory language to change the population cutoff for basic I/M from 50,000 persons to 200,000 persons. Lastly, this rule makes clarifying amendments to the I/M requirements for areas undergoing redesignation. EPA will soon publish a separate Supplemental Notice of Proposed Rulemaking proposing an additional performance standard for attainment and moderate (with less than 200,000 population) ozone nonattainment areas not otherwise required to implement basic I/M programs in the Ozone Transport Region. That proposed standard is based on minimum statutory requirements for these particular areas and would afford them flexibility beyond that provided by this final action.

EFFECTIVE DATE: This rule will take effect on October 18, 1995.

ADDRESSES: Materials relevant to this rulemaking are contained in Public Docket No. A–95–08. The docket is located at the Air Docket, Room M–1500 (6102), Waterside Mall SW., Washington, DC 20460. The docket may be inspected between 8 a.m. to 4:30 p.m. on weekdays. A reasonable fee may be charged for copying docket material.

II. Summary of Rule

Under the Clean Air Act as amended in 1990 (the Act), 42 U.S.C. 7401 *et seq.*, the U.S. Environmental Protection Agency (EPA) published in the **Federal Register** on November 5, 1992 (40 CFR part 51, subpart S) rules related to plans for Motor Vehicle Inspection and Maintenance (I/M) programs (hereafter referred to as the I/M rule, see 57 FR 52950). EPA published a notice of proposed rule making proposing changes to the I/M rule in the **Federal Register** on April 28, 1995 (60 FR 20934). EPA today takes final action to revise the 1992 I/M rule to provide greater flexibility to states required to implement I/M programs.

Section 182 of the Act was prescriptive regarding the various elements that are required as part of an enhanced I/M performance standard. It also required that EPA provide states with flexibility in meeting the requirement for enhanced or basic I/M programs. States have requested additional flexibility in two areas: the timing of the Act's mandated minimum expenditure required to qualify for a waiver and a lower performance standard for areas that may not need an enhanced I/M program as effective as the one EPA adopted in 1992 to meet the Act's Reasonable Further Progress and attainment demonstration requirements. (These two standards are referred as the low enhanced and high enhanced performance standards, respectively.)

EPA is establishing an alternate, low enhanced I/M performance standard. This standard is designed for nonattainment areas that are required to implement enhanced I/M but which can obtain adequate emission reductions from other sources to meet emission reduction requirements, without the stringency of the high enhanced I/M performance standard. EPA will approve an enhanced I/M SIP meeting the low performance standard provided EPA has approved or is simultaneously approving the state's 1996 15% VOC reasonable further progress SIP and provided that the state's ozone or CO attainment SIP and its post-1996 VOC reasonable further progress SIPs have not been disapproved.

The low enhanced performance standard meets the Act's requirement that it be based on centralized, annual testing of light duty cars and trucks, and checks for tampering and exhaust emissions. Nevertheless, this standard can be met with a comprehensive decentralized, test-and-repair program.

EPA's opinion that states should have the flexibility to implement only the low enhanced I/M program if more is not needed to meet their air quality goals makes common sense for areas whose emissions affect only themselves. With respect to states in the Northeast Ozone Transport Region, however, there is the additional issue of the effect of one area's emissions on downwind areas' air quality, even if the first area's emissions result in achievement of all local goals for clean air. EPA believes that making the low enhanced performance standard available even within the OTR will result in needed reductions on both local and regional scales, while offering useful flexibility especially with respect to areas that themselves have no air quality problem. OTR states are required to submit attainment plans for their nonattainment areas, and these plans must address both local and transported emissions. In fact, EPA now believes that the low performance standard that EPA proposed and is finalizing today offers insufficient flexibility, in that it would require states to create all-new networks of emission testing stations in many cities currently without them, cities with no air quality problem of their own. EPA believes that the affected states will likely be able to find more cost-effective and publicly preferred ways to provide for region-wide attainment. However, EPA did not propose any more flexible policy for these areas, and cannot take final action at this time to provide more flexibility. Therefore, EPA will soon publish a Supplemental Notice of Proposed Rulemaking, which offers additional flexibility by proposing to establish a lower enhanced performance standard for qualified areas in the OTR. The Supplemental Notice will also explain the legal basis for this additional flexibility. The standard will allow attainment areas and marginal and moderate (with less than 200,000 population) ozone areas in the OTR, not otherwise required to implement basic I/M programs, to implement enhanced

programs which meet the requirements of the statute without establishing extensive emission test networks.

EPA published a Notice of Proposed Rulemaking (NPRM) on April 28, 1995 describing these and other proposed amendments to the I/M rule. Proposed changes in the waiver requirements, population cutoff for basic programs and requirements for basic areas which have been redesignated to attainment were designed to offer greater flexibility to the states in the implementation of their I/M programs. The NPRM also proposed the inclusion of visual checks as part of the test procedure for all vehicles subject to enhanced I/M. Readers should refer to the NPRM for a complete description of the background and rationale for the proposed amendments, which will not be restated here.

After receiving and considering public comment on the NPRM, EPA is today finalizing each of the proposed amendments as follows.

(1) EPA is establishing the alternative low enhanced performance standard.

(2) EPA is extending the deadline for the full implementation of the minimum expenditure required to be eligible for a waiver for both basic and enhanced I/M programs until January 1998. In the interim, a state can establish any minimum expenditure it chooses, as long as it accounts for the higher waiver rates that will occur between now and 1998 in its emission inventory forecasts in the Reasonable Further Progress plan.

(3) EPA is allowing states to include qualified repair cost expenditures that occur within 60 days of the initial test toward meeting the minimum waiver expenditure.

(4) Additionally, EPA is allowing the cost of specified emission control components replaced by persons other than recognized repair technicians to apply towards the waiver cost limit.

(5) EPA is deleting language from the November 5, 1992 I/M rule barring motorists from qualifying for more than one hardship exemption during the lifetime of a vehicle.

(6) EPA is adding a visual inspection of the positive crankcase ventilation (PCV) valve on all light-duty vehicles and light-duty trucks of model year 1968 through 1971, inclusive, and of the exhaust gas recirculation (EGR) valve on all light-duty vehicles and light-duty trucks of model year 1972 through 1983, inclusive to the high enhanced performance standard.

(7) In the proposed rule of April 28, 1995, EPA requested comment on whether or not it should change the minimum population cutoff for basic I/M programs. Based on the public comment received, EPA is revising the regulatory language in this rulemaking to increase the minimum threshold for basic I/M programs to 200,000 or more.

(8) Finally, EPA is clarifying the requirements for basic I/M areas that are eligible for redesignation to attainment. Consistent with EPA's original intent, EPA does not believe that a violation of the standard in an area that has been redesignated automatically requires the implementation or upgrade of an I/M program. EPA believes that, in the event of a violation, a state should have the flexibility to select whichever contingency measures are best suited to correcting the problem to bring the area to attainment as quickly as possible. The rule would continue to require, however, that such an upgraded basic I/M program be among the contingency measures from which the state will choose. Changes to remove extraneous language related to the requirements for an implementation schedule will also go into effect.

III. Authority

Authority for the action in this notice is granted to EPA by section 182 of the Clean Air Act as amended (42 U.S.C. 7401, *et seq.*).

IV. Public Participation

This section discusses the content of the most significant of the flexibility amendments, the submissions to the docket received during the comment period and EPA's response to those comments. Submissions were received from approximately 60 commenters including state governments and agencies, industry, environmental organizations and other organizations. Copies of the original comments can be obtained in their entirety for a reasonable copying fee from the docket for this rule. The docket also includes a complete Response to Comments document for this rule. Substantial comments were received on each of the amendments and were fully addressed in that document.

A. Low Enhanced Performance Standard

1. Summary of Proposal

EPA proposed to establish an alternate, less stringent I/M performance standard called the low enhanced performance standard. This low enhanced standard is designed for areas which are required to implement enhanced programs but which do not have a major mobile source component to the air quality problem, or which can obtain adequate reductions from other sources to meet the 15% VOC reduction requirement and demonstrate attainment.

The low enhanced standard differs from the original standard, now referred to as the high enhanced performance standard, in that it allows for idle testing. Although the standard is based on an annual, test-only network this can also be met with a biennial, test-and-repair network.

2. Summary of Comments

Commenters generally supported the notion of flexibility and the proposed low enhanced option, although most believe that it does not offer enough flexibility. The thrust of these comments was that the proposed flexibility will not be a viable option for most areas because credit discounts for test-and-repair networks and other mandated requirements preclude most states from implementing programs which they believe to be equivalent to required programs. One comment asked for clarification of an apparent inconsistency between the summary and the proposed rule: whether the low enhanced standard can be applied if attainment goals are met for either CO and/or ozone or both CO and ozone.

Several commenters strongly opposed the proposed low enhanced standard, claiming that it is inconsistent with Clean Air Act section 182(c)(3)(C)(vi), which mandates EPA to require centralized networks unless states can demonstrate equivalency of decentralized networks. They argue that these programs will be less effective and will result in failure to meet attainment goals. Comments were also made that EPA is mandated to establish "a" performance standard and that to establish more than one is contrary to law.

3. Response to Comments

EPA has designed this flexibility specifically for those areas which either do not have a major mobile source component to their air pollution problem or which do not require I/M programs which achieve substantial reductions in automotive emissions to achieve air quality goals. To lower the standard any further and make it available to more enhanced I/M areas by granting inappropriately large credits to test-and-repair programs would undermine the goals of I/M and the Clean Air Act. While the Act requires certain program parameters to ensure programs are both effective and enforceable, EPA is mandated to ensure that these programs meet their intended goals. EPA maintains that it offers the states flexibility to do so by making a case-by-case assessment of program effectiveness and assigning credits accordingly. EPA is, in fact, in the process of doing this with two test-and-repair states. EPA believes that to allow more credit for test-and-repair networks than is scientifically justified by the available data or make vital requirements optional would lead to failed programs and attainment goals. EPA supports its credit assessment for test-and-repair networks later in this document.

EPA believes that the low enhanced performance standard is consistent with the Act's requirement that a program be based on a centralized network unless the state demonstrates that a decentralized program is equally effective. EPA believes that low enhanced programs that opt for the decentralized network can make such a demonstration with the MOBILE5a model and a comprehensive program which includes annual testing of heavy duty vehicles, pressure testing, and full anti-tampering programs. EPA also maintains that the Act in no way bars it from establishing multiple performance standards. This is not a new interpretation, but rather one which EPA took in the case of El Paso which was subject to an alternate standard under the original I/M rule.

To clarify the apparent inconsistency between the summary and the rule: low enhanced I/M may be implemented only in those states that can meet all of the 1990 Clean Air Act requirements for Reasonable Further Progress (RFP) for ozone and attainment for both ozone and carbon monoxide, if the area is required to implement enhanced I/M for both pollutants. If an area is required to implement enhanced I/M for only one pollutant (regardless of a requirement to implement basic I/M for the other pollutant), then low enhanced may be implemented if RFP and attainment requirements are met for that pollutant.

B. Extended Deadline for Implementing the $450 Waiver

1. Summary of Proposal

The original I/M rule requires that for enhanced programs, states must implement the $450 minimum expenditure to qualify for a waiver when the I/M program starts in 1995.

EPA proposed to postpone full implementation of the enhanced I/M waiver requirement until January 1, 1998, to allow states time to reach the long-term goals of the Clean Air Act. This action aims to provide the short term regulatory relief states have been requesting and would give states additional time to develop programs to assist low-income vehicle owners to repair their vehicles.

Some states are in the process of developing programs to mitigate the impact of I/M-related repair costs on low-income motorists. Such efforts have generally involved either granting low-income motorists time extensions of up to one full test cycle (per the November 5, 1992 rule), repair subsidy programs for individuals on some form of public assistance, or scrappage programs for low value, high emitting vehicles. Repair subsidy and scrappage based efforts tend to vary most in the area of funding mechanism. In some programs, mitigation efforts are funded by way of late fees collected from motorists who have missed their scheduled testing deadline; in others, revenue is generated by allowing new car buyers to pay a on-time "mitigation fee" which exempts them from the first scheduled inspection. EPA is willing to work with states that wish to develop other creative ways to deal with the issue of repair costs for low-income motorists.

2. Summary of Comments

Comments were divided on the issue of whether EPA should extend the deadline for implementing the $450 waiver. Most of the parties unsatisfied by EPA's proposal argued that a CPI (Consumer Price Index) adjustment of the $450 waiver expenditure would increase the repair cost minimum to between $600–650 when the full waiver requirement would be implemented in 1998, leading to public acceptance problems. With respect to this issue, two parties made the following recommendations: The EPA was urged to allow states to maintain their current minimum waiver amounts until 1998, at which time the phase-in would begin. Once $450 was applied as the limit during 1998, the minimum waiver amount would be adjusted annually based on the CPI with 1998 as the base year. Another commenter asked for revision of the rule language to clearly state that the often-referenced CPI-adjusted $450 amount would be likely to exceed $600 in 1998. One comment claimed that lost credit would occur from extending the waiver and this would have to be made up elsewhere. Another commenter queried why EPA was still interested in identifying high emitters through enhanced test programs when the amendment would mean that individuals would not be required to make all the necessary repairs.

The general thrust of comments supporting the rule focused on the additional flexibility this amendment would give states to phase in the $450 minimum expenditure waiver and implement hardship waiver programs. One comment suggested that the additional time would allow states to work on building public acceptance of the program and improve technician training. Another comment supported the extension of the deadline but suggested that CPI adjustments be applied only to the full minimum expenditure waiver amount no sooner than one full test cycle following final implementation.

3. Response to Comments

For emissions-related repairs not covered by warranty, the Clean Air Act very clearly requires a minimum expenditure of $450 for vehicles to qualify for a waiver. It is also very clear that the waiver limit is to be adjusted annually based on the Consumer Price Index, with a base year of 1989. As the preamble to the original I/M rule states, (page 52964, **Federal Register**), EPA will annually notify states of the adjusted amount.

It is not the EPA's intention that states begin the phase-in in 1998. EPA maintains that states have more than enough flexibility to begin the phase-in now to maintain a minimal increment by 1998. EPA believes that the enhanced I/M program should be fully implemented by 1998, including the CPI adjusted $450 waiver, to enable areas to achieve the reductions contemplated by the program prior to the attainment deadline for serious areas (i.e., 11/15/99). Should areas need reductions between now and 1998 to meet reasonable further progress requirements, they would have to achieve them from other programs should they choose to delay full implementation of the $450 waiver amount.

EPA believes that the extension of the waiver deadline will give states the opportunity to improve technician training so that by 1998 the majority of vehicles would be repaired for well below the CPI-adjusted $450 minimum waiver amount. The additional time will also give states ample opportunity to set up hardship programs for low-income vehicle owners and scrappage programs for vehicles that are not economical to repair.

To clarify the apparent misunderstanding regarding the proposed amendment's effect on repairs: I/M programs will continue as scheduled, motorists will still be required to repair their vehicles, and real emissions reductions will be achieved. However, the minimum waiver amount will depend on the cost limit prescribed by the state's phase-in

program and the levels of emissions reductions will depend upon what waiver rates result.

C. Population Requirements for Basic I/M

1. Summary of Proposal

EPA requested comment on whether it should change the minimum population cut-off for basic I/M programs. Currently, basic I/M programs are required in moderate ozone and carbon monoxide non-attainment areas with a 1990 Census-defined population of 50,000 or more. EPA considered raising this threshold to 200,000 or more.

2. Summary of Comments

The majority of responses to the proposed amendment were generally supportive. Some commenters indicated that the issue did not affect them since they were in the OTR (Ozone Transport Region) and therefore required enhanced testing regardless of whether or not the population cut-off was increased. Many of the commenters who supported the change did so with a proviso: that the rule be applied only to areas that were not currently included in I/M and that were in moderate attainment areas. Two parties indicated that the proposed amendment should only apply if an area can demonstrate that the absence of I/M would not impact downwind areas. A few supported the change because they viewed it as added flexibility for the states.

Commenters opposed to the amendment suggested that EPA had not offered a reasonable explanation for this change and that areas with less than 200,000 people deserved clean air protection. They argued that the amendment would only serve to encourage states to opt-out of OTR to avoid compliance.

3. Response to Comments

EPA proposed this amendment to grant states further flexibility in designing I/M programs to meet local needs. Areas under 200,000 population which are still in nonattainment are required to achieve whatever ozone reductions are needed to meet reasonable further progress or attainment requirements. While exempted from the mandatory basis I/M requirement under this amendment, such areas would have to achieve those reductions from other programs, or implement an I/M program, at the state's discretion.

EPA concludes that the 200,000 population cut-off for basic programs is authorized by the Act because sections 182(a)(2)(B)(i) and 182(b)(4) require implementation only of an I/M program no less stringent than that required under pre-1990 EPA I/M guidance. EPA's pre-1990 I/M guidance required implementation of basic I/M programs only in urbanized areas of 200,000 population. It is true that some moderate areas would not be required to implement I/M programs if their population were under 200,000, despite the fact that section 182(b)(4) requires a basic I/M program in all moderate areas. However, the basic program that is required is a program that applies only to areas of 200,000 or more population. The issue of whether Congress meant to expand the geographic scope of basic I/M programs by requiring them in all moderate areas was presented to the court in litigation on the 1992 I/M rules. The court ruled that the statutory language "does not, in our view, compel the conclusion that Congress sought silently to alter any preexisting exclusions for basic I/M programs, particularly when Congress explicitly incorporated the preexisting guidance by reference." Further, the court concluded that "the requirement that states submit implementation plans for those moderate areas not covered in the previous statute does not by its term affect the scope of I/M programs *within* those areas". *Natural Resources Defense Council, Inc.* v. *EPA,* 22 F.3d 1125, 1141–2. Consequently, EPA believes that although basic I/M programs are required for all moderate areas, they need only be implemented in urbanized areas with populations of 200,000 or more within such moderate areas.

Basic I/M is prescribed to solve local problems. Questions arising from the transport of ozone and CO downwind across state boundaries may be answered by referring to section 184 of the Clean Air Act.

As to the effects on OTR areas, states will not be encouraged to opt out to avoid compliance. Rather, the SNPRM discussed previously outlines the OTR-low enhanced performance standard which gives states more flexibility and incentive to remain in the OTR.

D. Test-and-Repair Discount and Program Equivalency

1. Summary of the Issue

Although today's action does not address the credit allowances for test-and-repair networks and the question of equivalency with test-only networks, the issue has become a point of contention as some states seek more flexibility in program design. A notable quantity of the comments received on today's rulemaking dealt expressly with this issue.

2. Summary of Comments

Commenters in support of the default discount stressed that SIP credits must be based on real quantifiable emissions reductions and that they supported the default discount and would also support data that showed an even greater discount for a test-and-repair network. Another commenter strongly supported the default discount, adding that the undisputed performance disadvantage of "test-and repair" systems should persuade EPA to keep the current credit structure. Another group commented that their independent data analysis of two states, one with a test-only system and one with a test-and-repair system, showed conclusively that the test-and-repair system was achieving significantly less emission reductions than the test-only system and that the default discount used by the EPA accurately reflected the loss of emission reductions for the test-and-repair system.

Commenters opposed to the default discount claimed that test-only I/M does not work as well as EPA claims and that test-and-repair programs are unfairly discounted by their comparison to an inflated estimate of test-only effectiveness. Some commenters added that past performance has shown that test-and-repair could be as effective as test-only and should be credited accordingly. The California I/M Review Committee was frequently cited along with studies by Georgia Tech, and others as scientific evidence that the audit data upon which EPA studies were based was somehow flawed.

3. Response to Comments

It should first be noted that in the original I/M rule EPA had proposed granting "provisional equivalency" to test-and-repair programs for purposes of initial SIP submission and approval, requiring program evaluation to assure that programs meet the performance standard. Comments by state agencies and others at that time were compelling and strongly against provisional equivalency. They argued that because both state and EPA evidence showed that test-and-repair programs were inferior to test-only programs, in terms of emissions reductions, it would be inadequate and probably illegal for EPA to grant them full credit. They suggested that to grant provisional equivalency without proven success would be irresponsible and would allow ineffective and costly programs to continue while air quality improvement would suffer. EPA acknowledged these comments and eliminated provisional equivalency from the final I/M rule. Nevertheless, EPA included provisions in the final rule allowing states to make demonstrations based on local data that test-and-repair was more effective than the national default credits.

EPA's default discount for test-and-repair services is based on the best data from a broad set of indicators and across many programs. Cited studies have not shown evidence that would cause EPA to revoke the default discount. The most comprehensive study of test-and-repair effectiveness was conducted by the California I/M Review Committee in the early 1990s and showed that despite aggressive enforcement, the use of advanced technology, and a huge outlay of government oversight, the program still did not achieve more than half of what a test-only program could achieve. While EPA continues to believe that the default discount is appropriate as a national estimate when there is no local data to prove another level, EPA is willing to consider local data to determine whether it supports a higher or lower credit. EPA believes the I/M rule allows it to give prospective credit based on a retrospective analysis of such local data. EPA is working with Utah and Virginia at this time to analyze local data in an attempt to establish program specific credits.

EPA received only minor comment on all other proposals in the NPRM for this rule. A summary of those comments and of EPA's response may be found in the Response to Comments document included in the docket for this rule.

Based upon the public comment received and a reasoned analysis, EPA is proceeding with the adoption of each of the proposed amendments with no substantive changes.

V. Administrative Requirements

A. Administrative Designation

It has been determined that these amendments to the I/M rule are a significant regulatory action under the terms of Executive Order 12866 and are therefore subject to OMB review.

However, it does not create an annual effect on the economy of $100 million or more or otherwise adversely affect the economy or the environment. Any impacts associated with these revisions do not constitute additional burdens when compared to the existing I/M requirements published in the **Federal Register** on November 5, 1992 (57 FR 52950). It is not inconsistent with nor does it interfere with actions by other agencies. It does not alter budgetary impacts of entitlements or other programs, and it does not raise any new or unusual legal or policy issues.

B. Reporting and Recordkeeping Requirement

There are no information requirements in this final rule which require the approval of the Office of Management and Budget under the Paperwork Reduction Act 44 U.S.C. 3501 *et seq.*

C. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Administrator certifies that this final rule will not have a significant economic impact on a substantial number of small entities and, therefore, is not subject to the requirement of a Regulatory Impact Analysis. A small entity may include a small government entity or jurisdiction. A small government jurisdiction is defined as "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000." This certification is based on the fact that the I/M areas impacted by the rulemaking do not meet the definition of a small government jurisdiction, that is, "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000." Furthermore, the impact created by the action does not increase the pre-existing burden which this final rule seeks to amend.

D. Unfunded Mandates Act

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule where the estimated costs to State, local, or tribal governments, or to the private sector, will be $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objective of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly impacted by the rule.

To the extent that the rules being promulgated by this action would impose any mandate as defined in Section 101 of the Unfunded Mandates Act upon the state, local, or tribal governments, or the private sector, as explained above, this rule is not estimated to impose costs in excess of $100 million. Therefore, EPA has not prepared a statement with respect to budgetary impacts. As noted above, this rule offers opportunities to states that would enable them to lower economic burdens from those resulting from the currently existing I/M rule.

List of Subjects in 40 CFR Part 51

Environmental protection, Administrative practice and procedure, Air pollution control, Carbon monoxide, Transportation.

Dated: September 6, 1995.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, part 51 of title 40 of the Code of Federal Regulations is amended to read as follows:

1. The authority citation for part 51 continues to read as follows:

Authority: 42 U.S.C. 7401-7671q.

2. Section 51.350 is amended by revising paragraphs (a)(4), (a)(6), (a)(7), (a)(8), (a)(9) and (b)(4) and by removing and reserving paragraph (a)(5) to read as follows:

§ 51.350 Applicability.

* * * * *

(a) * * *

(4) Any area classified as moderate ozone nonattainment, and not required to implement enhanced I/M under paragraph (a)(1) of this section, shall implement basic I/M in any 1990 Census-defined urbanized area with a population of 200,000 or more.

(5) [Reserved]

(6) If the boundaries of a moderate ozone nonattainment area are changed pursuant to section 107(d)(4)(A)(i)-(ii) of the Clean Air Act, such that the area includes additional urbanized areas with a population of 200,000 or more, then a basic I/M program shall be implemented in these additional urbanized areas.

(7) If the boundaries of a serious or worse ozone nonattainment area or of a moderate or serious CO nonattainment area with a design value greater than 12.7 ppm are changed any time after enactment pursuant to section 107(d)(4)(A) such that the area includes additional urbanized areas, then an enhanced I/M program shall be implemented in the newly included 1990 Census-defined urbanized areas, if the 1980 Census-defined urban area population is 200,000 or more.

(8) If a marginal ozone nonattainment area, not required to implement enhanced I/M under paragraph (a)(1) of this section, is reclassified to moderate, a basic I/M program shall be implemented in the 1990 Census-defined urbanized area(s) with a

---

population of 200,000 or more. If the area is reclassified to serious or worse, an enhanced I/M program shall be implemented in the 1990 Census-defined urbanized area, if the 1980 Census-defined urban area population is 200,000 or more.

(9) If a moderate ozone or CO nonattainment area is reclassified to serious or worse, an enhanced I/M program shall be implemented in the 1990 Census-defined urbanized area, if the 1980 Census-defined population is 200,000 or more.

(b) * * *

(4) In a multi-state urbanized area with a population of 200,000 or more that is required under paragraph (a) of this section to implement I/M, any state with a portion of the area having a 1990 Census-defined population of 50,000 or more shall implement an I/M program. The other coverage requirements in paragraph (b) of this section shall apply in multi-state areas as well.

* * * * *

3. Section 51.351 is amended by revising paragraphs (a) introductory text, and (b), by removing and reserving paragraph (e) and by adding paragraphs (f) and (g) to read as follows:

§ 51.351 Enhanced I/M performance standards.

(a) Enhanced I/M programs shall be designed and implemented to meet or exceed a minimum performance standard, which is expressed as emission levels in area-wide average grams per mile (gpm), achieved from highway mobile sources as a result of the program. The emission levels achieved by the state's program design shall be calculated using the most current version, at the time of submittal, of the EPA mobile source emission factor model or an alternative model approved by the Administrator, and shall meet the minimum performance standard both in operation and for SIP approval. Areas shall meet the performance standard for the pollutants which cause them to be subject to enhanced I/M requirements. In the case of ozone nonattainment areas subject to enhanced I/M and subject areas in the Ozone Transport Region, the performance standard must be met for both oxides of nitrogen (NO_X) and volatile organic compounds (VOCs), except as provided in paragraph (d) of this section.

* * * * *

(b) *On-road testing.* The performance standard shall include on-road testing of at least 0.5% of the subject vehicle population, or 20,000 vehicles whichever is less, as a supplement to the periodic inspection required in paragraphs (f) and (g) of this section. Specific requirements are listed in § 51.371 of this subpart.

(e) [Reserved].

* * * * *

(f) *High Enhanced Performance Standard.* Except as provided in paragraph (g) of this section, the model program elements for the enhanced I/M performance standard shall be as follows:

(1) *Network type.* Centralized testing.

(2) *Start date.* For areas with existing I/M programs, 1983. For areas newly subject, 1995.

(3) *Test frequency.* Annual testing.

(4) *Model year coverage.* Testing of 1968 and later vehicles.

(5) *Vehicle type coverage.* Light duty vehicles, and light duty trucks, rated up to 8,500 pounds Gross Vehicle Weight Rating (GVWR).

(6) *Exhaust emission test type.* Transient mass-emission testing on 1986 and later model year vehicles using the IM240 driving cycle, two-speed testing (as described in appendix B of this subpart S) of 1981–1985 vehicles, and idle testing (as described in appendix B of this subpart S) of pre-1981 vehicles is assumed.

(7) *Emission standards.* (i) Emission standards for 1986 through 1993 model year light duty vehicles, and 1994 and 1995 light-duty vehicles not meeting Tier 1 emission standards, of 0.80 gpm hydrocarbons (HC), 20 gpm CO, and 2.0 gpm NO_X;

(ii) Emission standards for 1986 through 1993 light duty trucks less than 6000 pounds gross vehicle weight rating (GVWR), and 1994 and 1995 trucks not meeting Tier 1 emission standards, of 1.2 gpm HC, 20 gpm CO, and 3.5 gpm NO_X;

(iii) Emission standards for 1986 through 1993 light duty trucks greater than 6000 pounds GVWR, and 1994 and 1995 trucks not meeting the Tier 1 emission standards, of 1.2 gpm HC, 20 gpm CO, and 3.5 gpm NO_X;

(iv) Emission standards for 1994 and later light duty vehicles meeting Tier 1 emission standards of 0.70 gpm HC, 15 gpm CO, and 1.4 gpm NO_X;

(v) Emission standards for 1994 and later light duty trucks under 6000 pounds GVWR and meeting Tier 1 emission standards of 0.70 gpm HC, 15 gpm CO, and 2.0 gpm NO_X;

(vi) Emission standards for 1994 and later light duty trucks greater than 6000 pounds GVWR and meeting Tier 1 emission standards of 0.80 gpm HC, 15 gpm CO and 2.5 gpm NO_X;

(vii) Emission standards for 1981–1985 model year vehicles of 1.2% CO, and 220 gpm HC for the idle, two-speed tests and loaded steady-state tests (as described in appendix B of this subpart S); and

(viii) Maximum exhaust dilution measured as no less than 6% CO plus carbon dioxide (CO_2) on vehicles subject to a steady-state test (as described in appendix B of this subpart S); and

(viii) Maximum exhaust dilution measured as no less than 6% CO plus carbon dioxide (CO_2) on vehicles subject to a steady-state test (as described in appendix B of this subpart S).

(8) *Emission control device inspections.* (i) Visual inspection of the catalyst and fuel inlet restrictor on all 1984 and later model year vehicles.

(ii) Visual inspection of the positive crankcase ventilation valve on 1968 through 1971 model years, inclusive, and of the exhaust gas recirculation valve on 1972 through 1983 model year vehicles, inclusive.

(9) *Evaporative system function checks.* Evaporative system integrity (pressure) test on 1983 and later model year vehicles and an evaporative system transient purge test on 1986 and later model year vehicles.

(10) *Stringency.* A 20% emission test failure rate among pre-1981 model year vehicles.

(11) *Waiver rate.* A 3% waiver rate, as a percentage of failed vehicles.

(12) *Compliance rate.* A 96% compliance rate.

(13) *Evaluation date.* Enhanced I/M program areas shall be shown to obtain the same or lower emission levels as the model program described in this paragraph by 2000 for ozone nonattainment areas and 2001 for CO nonattainment areas, and for severe and extreme ozone nonattainment areas, on each applicable milestone and attainment deadline, thereafter. Milestones for NO_X shall be the same as for ozone.

(g) *Alternate Low Enhanced I/M Performance Standard.* An enhanced I/M area which is either not subject to or has an approved State Implementation Plan pursuant to the requirements of the Clean Air Act Amendments of 1990 for Reasonable Further Progress in 1996, and does not have a disapproved plan for Reasonable Further Progress for the period after 1996 or a disapproved plan for attainment of the air quality standards for ozone or CO, may select the alternate low enhanced I/M performance standard described below in lieu of the standard described in paragraph (f) of this section. The model program elements for this alternate low enhanced I/M performance standard are:

(1) *Network type.* Centralized testing.

(2) *Start date.* For areas with existing I/M programs, 1983. For areas newly subject, 1995.

(3) *Test frequency.* Annual testing.

(4) *Model year coverage.* Testing of 1968 and newer vehicles.

(5) *Vehicle type coverage.* Light duty vehicles, and light duty trucks, rated up to 8,500 pounds GVWR.

(6) *Exhaust emission test type.* Idle testing of all covered vehicles (as described in Appendix B of Subpart S).

(7) *Emission standards.* Those specified in 40 CFR Part 85, Subpart W.

(8) *Emission control device inspections.* Visual inspection of the positive crankcase ventilation valve on all 1968 through 1971 model year vehicles, inclusive, and of the exhaust gas recirculation valve on all 1972 and newer model year vehicles.

(9) *Evaporative system function checks.* None.

(10) *Stringency.* A 20% emission test failure rate among pre-1981 model year vehicles.

(11) *Waiver rate.* A 3% waiver rate, as a percentage of failed vehicles.

(12) Compliance rate. A 96% compliance rate.

(13) Evaluation date. Enhanced I/M program areas subject to the provisions of this paragraph shall be shown to obtain the same or lower emission levels as the model program described in this paragraph by 2000 for ozone nonattainment areas and 2001 for CO nonattainment areas, and for severe and extreme ozone nonattainment areas, on each applicable milestone and attainment deadline, thereafter. Milestones for NO_x shall be the same as for ozone.

4. Section 51.360 is amended by revising the introductory text and paragraphs (a)(1), (a)(5), (a)(6), (a)(7) introductory text, (a)(9) and (b) to read as follows:

§ 51.360 Waivers and compliance via diagnostic inspection.

The program may allow the issuance of a waiver, which is a form of compliance with the program requirements that allows a motorist to comply without meeting the applicable test standards, as long as the prescribed criteria described below are met.

(a) * * *

(1) Waivers shall be issued only after a vehicle has failed a retest performed after all qualifying repairs have been completed. Qualifying repairs include repairs of the emission control components, listed in paragraph (a)(5) of this section, performed within 60 days of the test date.

* * * * *

(5) General repairs shall be performed by a recognized repair technician (i.e., one professionally engaged in vehicle repair, employed by a going concern whose purpose is vehicle repair, or possessing nationally recognized certification for emission-related diagnosis and repair) in order to qualify for a waiver. I/M programs may allow the cost of parts (not labor) utilized by non-technicians (e.g., owners) to apply toward the waiver limit. The waiver would apply to the cost of parts for the repair or replacement of the following list of emission control components: oxygen sensor, catalytic converter, thermal reactor, EGR valve, fuel filler cap, evaporative canister, PCV valve, air pump, distributor, ignition wires, coil, and spark plugs. The cost of any hoses, gaskets, belts, clamps, brackets or other accessories directly associated with these components may also be applied to the waiver limit.

(6) In basic programs, a minimum of $75 for pre-81 vehicles and $200 for 1981 and newer vehicles shall be spent in order to qualify for a waiver. These model year cutoffs and the associated dollar limits shall be in full effect no later than January 1, 1998. Prior to January 1, 1998, states may adopt any minimum expenditure commensurate with the waiver rate committed to for the purposes of modeling compliance with the basic I/M performance standard.

(7) Beginning on January 1, 1998, enhanced I/M programs shall require the motorist to make an expenditure of at least $450 in repairs to qualify for a waiver. The I/M program shall provide that the $450 minimum expenditure shall be adjusted in January of each year by the percentage, if any, by which the Consumer Price Index for the preceding calendar year differs from the Consumer Price Index of 1989. Prior to January 1, 1998, states may adopt any minimum expenditure commensurate with the waiver rate committed to for the purposes of modeling compliance with the relevant enhanced I/M performance standard.

* * * * *

(9) A time extension, not to exceed the period of the inspection frequency, may be granted to obtain needed repairs on a vehicle in the case of economic hardship when waiver requirements have not been met. After having received a time extension, a vehicle must fully pass the applicable test standards before becoming eligible for another time extension. The extension for a vehicle shall be tracked and reported by the program.

(b) *Compliance via diagnostic inspection.* Vehicles subject to a transient IM240 emission test at the cutpoints established in §§ 51.351 (f)(7) and (g)(7) of this subpart may be issued a certificate of compliance without meeting the prescribed emission cutpoints, if, after failing a retest on emissions, a complete, documented physical and functional diagnosis and inspection performed by the I/M agency or a contractor to the I/M agency show that no additional emission-related repairs are needed. Any such exemption policy and procedures shall be subject to approval by the Administrator.

* * * * *

5. Section 51.372 is amended by revising paragraphs (c) introductory text, (c)(3), (c)(4), and (e) to read as follows:

§ 51.372 State implementation plan submissions.

* * * * *

(c) *Redesignation requests.* Any nonattainment area that EPA determines would otherwise qualify for redesignation from nonattainment to attainment shall receive full approval of a State Implementation Plan (SIP) submittal under Sections 182(a)(2)(B) or 182(b)(4) if the submittal contains the following elements:

* * * * *

(3) A contingency measure consisting of a commitment by the Governor or the Governor's designee to adopt or consider adopting regulations to implement an I/M program to correct a violation of the ozone or CO standard or other air quality problem, in accordance with the provisions of the maintenance plan.

(4) A contingency commitment that includes an enforceable schedule for adoption and implementation of the I/M program, and appropriate milestones. The schedule shall include the date for submission of a SIP meeting all of the requirements of this subpart. Schedule milestones shall be listed in months from the date EPA notifies the state that it is in violation of the ozone or CO standard or any earlier date specified in the state plan. Unless the state, in accordance with the provisions of the maintenance plan, chooses not to implement I/M, it must submit a SIP revision containing an I/M program no more than 18 months after notification by EPA.

* * * * *

(e) *SIP submittals to correct violations.* SIP submissions required pursuant to a violation of the ambient ozone or CO standard (as discussed in paragraph (c) of this section) shall address all of the requirements of this subpart. The SIP shall demonstrate that performance standards in either

§ 51.351 or § 51.352 shall be met using an evaluation date (rounded to the nearest January for carbon monoxide and July for hydrocarbons) seven years after the date EPA notifies the state that it is in violation of the ozone or CO standard or any earlier date specified in the state plan. Emission standards for vehicles subject to an IM240 test may be phased in during the program but full standards must be in effect for at least one complete test cycle before the end of the 5-year period. All other requirements shall take effect within 24 months of the date EPA notifies the state that it is in violation of the ozone or CO standard or any earlier date specified in the state plan. The phase-in allowances of § 51.373(c) of this subpart shall not apply.

BILLING CODE 6560-50-P

---

40 CFR Part 69

[FRL–5296–9]

Special Exemptions From Requirements of the Clean Air Act for the Territory of Guam

AGENCY: Environmental Protection Agency ("EPA").

ACTION: Direct final rulemaking.

SUMMARY: On July 14, 1995, the Governor of Guam filed a petition ("Petition") with the Administrator seeking a waiver of certain Clean Air Act ("CAA") requirements which apply to Guam Power Authority ("GPA"). The Petition was filed under Section 325(a) of the CAA. The waiver will help to ease a severe energy emergency on Guam. Based upon the information in the Petition and supplementary information from GPA and the Guam Environmental Protection Agency ("GEPA"), EPA is granting the waiver requested. EPA finds that there is good cause for a direct final rulemaking and that notice and public procedures are impracticable, unnecessary, and contrary to the public interest.

The waiver allows, with certain conditions, one baseload diesel electric generating facility to operate at the Cabras Power Plant prior to the receipt of a final Prevention of Significant Deterioration ("PSD") permit by GPA. The waiver also allows the construction, but not operation, of a second baseload diesel unit at the Cabras Power Plant prior to GPA's receipt of a final PSD permit.

EFFECTIVE DATE: This direct final rule is effective September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Norman Lovelace, Chief, Office of Pacific Islands and Native American Programs (E–4), Office of External Affairs, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, California 94105. Telephone: (415) 744–1599.

SUPPLEMENTARY INFORMATION:

Background

The Petition was submitted by Governor Gutierrez of Guam to the Administrator of EPA in a letter dated July 14, 1995. It is accompanied by supporting documentation, including newspaper accounts describing traffic safety, water supply, and political problems caused by the significant electrical energy shortage on Guam. The Petition incorporates an air quality analysis, based upon computer modeling, which demonstrates the effects of the waiver upon air quality, particularly in the offshore direction, from the generating facilities involved.

The Petition seeks a waiver of certain CAA requirements for the operation and construction by GPA of two baseload diesel electric generators. Both units are part of the Cabras Power Plant. The first facility involved is designated as Cabras Unit No. 3. This forty megawatt diesel generator was constructed, pursuant to 40 CFR 69.11(a)(1), prior to GPA's receipt of a final PSD permit. (This unit is designated Cabras Diesel No. 1 in 40 CFR 69.11(a)(1). Its designation has been changed since the 1993 promulgation of that rule.) The Petition asks EPA to waive CAA requirements as necessary to allow operation of Cabras Unit No. 3, subject to conditions, prior to receipt of a final PSD permit by GPA.

The waiver describes two conditions accompanying the operation of Cabras Unit No. 3. First, during operations under the waiver a lower sulfur fuel oil will be fired in the Cabras Power Plant and in the adjacent Piti Power Plant during certain periods. These power plants operate under a fuel switching intermittent control strategy, and the sulfur-in-fuel reduction in the waiver application applies to operations under offshore wind conditions. Second, the waiver will last only until August 15, 1996, or until issuance of a final PSD permit to GPA for this unit, whichever occurs first.

The Petition also seeks a waiver of CAA requirements as necessary to allow GPA to construct a second forty megawatt baseload unit at the Cabras Power Plant. This facility is designated as Cabras Unit No. 4. The waiver application seeks to allow construction of Cabras Unit No. 4 prior to a receipt by GPA of a PSD permit. Cabras Unit No. 4 will not operate prior to receipt of final PSD permit.

Guam has experienced a longstanding shortage of electrical energy, repeatedly leading to rotating blackouts of areas of the island. The background to this energy shortage is described in the 1993 waiver proceeding before EPA. 58 FR 15579, 15580. The Petition describes how the 1993 energy shortage has continued despite a substantial capital development program by GPA, and in some respects has grown worse. The energy shortage was created originally because of very rapid growth in energy demand due to increased residential electrical consumption and a boom in tourism. The Petition describes how energy shortfalls are now exacerbated as a result of substantial facility outages caused by equipment failures.

As EPA noted in the 1993 waiver proceeding, Guam is an isolated island. 58 FR 13580. GPA generates almost all electric power used on the island (other than power generated by the United States Navy). Unlike power authorities on the mainland United States, GPA does not have the option of purchasing power from other sources. Guam is, and must remain, self sufficient with regard to energy generation.

The Petition states that Guam's energy shortfall has worsened in recent months because of facility outages caused by planned and unplanned maintenance requirements. The longstanding nature of the energy shortage has required GPA to use its existing facilities at peak capacity for several years. GPA has also deferred planned maintenance, when safety considerations have allowed, to permit units to remain in service. Because of the length of time which has elapsed since the beginning of the emergency, the result is now substantially reduced reliability of GPA's electric generating units. The Petition describes several significant and unplanned recent maintenance outages.

The construction and operation of additional, reliable baseload generating units will enable GPA to satisfy electrical demand with an appropriate margin of safety, while at the same time allowing for planned maintenance outages of generating units. Once sufficient baseload capacity exists and can be operated, routine, as well as unplanned blackouts on the island will be ended. Cabras Units Nos. 3 and 4 are such baseload units.

The Petition states that Cabras Unit No. 3 will be ready to begin operation and electrical generation on approximately August 15, 1995. The building which houses Cabras Unit No.

3 and will house Cabras Unit No. 4 has already been constructed under 40 CFR 69.11. The remaining construction of Cabras Unit No. 4 can be carried out immediately pursuant to this rulemaking.

The Petition describes a second potential difficulty with PSD permitting for the operation of Cabras Unit No. 3 and the construction of Cabras Unit No. 4. Absent changes in the current operations of the Cabras and Piti Power Plants, GPA's computer modeling suggests that the operation of the new units, combined with existing facilities, may cause exceedences of sulfur dioxide National Ambient Air Quality Standards ("NAAQS") on Orote Point, a peninsula of elevated terrain located in the offshore direction from the power plants.

GPA is re-evaluating its computer modeling results using state of the art wind tunnel modeling. Preliminary results of wind tunnel modeling seem to confirm the possibility of the exceedences projected by computer models. If a final analysis upholds that result, significant changes to power plant operations likely will be necessary in order for PSD permits to be issued for Cabras Units Nos. 3 and 4.

Section 325(a) of the CAA allows a waiver of certain CAA requirements, based upon local factors, only if the waiver will not cause exceedences of the primary NAAQS or violations of the hazardous air pollutant provisions of the CAA. The hazardous air pollutant provisions of the CAA are not affected by the Petition. The Petition is accompanied by an air quality analysis, utilizing computer modeling, which demonstrates that all NAAQS will be protected if the requested waivers are granted and incorporate the operating conditions described below.

GPA operates the Cabras and Piti Power Plants under an intermittent control strategy which utilizes fuel switching. This intermittent control strategy is described in an EPA document entitled the "Cabras Area ICS." This strategy has required the use of fuel oil with a maximum sulfur content of 1.19 percent when winds blow in an onshore direction, and the use of fuel oil with a maximum sulfur content of 2.84 percent when winds blow in an offshore direction.

As a condition of the waiver sought, GPA is to reduce the sulfur content in the fuel oil fired in the Cabras Power Plant and the Piti Power Plant when winds blow in an offshore direction. The sulfur content of the fuel used will be reduced to a maximum content of 2.00 percent. The Petition describes how GPA will obtain and assure the use of such fuel oil prior to beginning the operation of Cabras Unit No. 3.

EPA is granting the Petition, with the conditions contained therein, and is issuing the requested waiver. Cabras Unit No. 3 will be allowed to operate prior to receipt of a PSD permit. This operation is subject to the use of fuel oil with a maximum sulfur content of 2.00 percent at the Cabras and Piti Power Plants during offshore wind conditions. Moreover, this waiver for Cabras Unit No. 3 is granted only until August 15, 1996, or until a final PSD permit is secured by GPA, whichever event occurs sooner. Cabras Unit No. 4 may be constructed, but not operated, prior to receipt of a PSD permit. Finally, a report on the results of GPA's Orote Point evaluation shall be filed with EPA by October 15, 1995.

Cabras Unit No. 3 is subject to a conditional permit to construct, issued by GEPA on May 12, 1994. GPA has filed an application to GEPA for authority to operate this unit. During the period of this waiver, GPA must comply with the requirements of these GEPA permits.

This rule is promulgated on a direct final basis. EPA is convinced that the energy emergency on Guam creates significant adverse consequences which require immediate action. As documented in the Petition, continuing planned and unplanned power outages on Guam create substantial public health and safety concerns. EPA has been furnished with descriptions of traffic intersections at which traffic lights cannot operate. The water supplies to areas on Guam are serviced by electric pumps, and EPA has also been furnished with descriptions of interruptions of water supplies due to power outages. Finally, as would be expected, significant and sustained citizen displeasure has been voiced regarding this problem. These factors constitute good cause for EPA to waive notice requirements. In this instance, a delay in the effectiveness of this waiver granted would be impracticable and contrary to the public interest. In addition, based on the lack of negative comments in the 1993 waiver proceeding, EPA believes that this is a noncontroversial rulemaking action. Therefore, EPA finds that there is good cause for a direct final rulemaking, pursuant to 5 U.S.C. 553(d)(3), and that notice and public procedures are impracticable, unnecessary, and contrary to the public interest.

GEPA has received and reviewed a copy of the Petition. It supports the issuance of this waiver.

Regulatory Analysis

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a Regulatory Flexibility Analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

This direct final rule applies only to large sources of air emissions used to generate electrical power on Guam. These sources of electrical power will be constructed, owned, and operated by GPA. This organization is not a small entity. Therefore, this rulemaking will not impact small entities.

This action has been classified as a Table 3 action for signature by the Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). The Office of Management and Budget has exempted this regulatory action from Executive Order 12866 review.

List of Subjects in 40 CFR Part 69

Air pollution control.

Dated: September 11, 1995.

Carol Browner,

Administrator.

Part 69 of chapter I, title 40 of the Code of Federal Regulations is amended to read as follows:

PART 69—[AMENDED]

1. The authority citation for part 69 continues to read as follows:

Authority: Section 325, Clean Air Act, as amended (42 U.S.C. 7625–1).

2. Section 69.11 is amended by adding paragraph (c) to read as follows:

§ 69.11 New exemptions.

* * * * *

(c) Pursuant to Section 325(a) of the CAA and a petition submitted by the Governor of Guam on July 14, 1995 ("1995 Petition"), the Administrator of EPA conditionally exempts Guam Power Authority ("GPA") from certain CAA requirements.

(1) A waiver of the requirement to obtain a PSD permit prior to construction is granted for the electric generating unit identified in the 1995 Petition as Cabras Unit No. 4, with the following conditions:

(i) Cabras Unit No. 4 shall not operate until a final PSD permit is received by GPA for this unit;

(ii) Cabras Unit No. 4 shall not operate until it complies with all requirements

of its PSD permit, including, if necessary, retrofitting with BACT;

(iii) If Cabras Unit No. 4 operates either prior to the issuance of a final PSD permit or without BACT equipment, Cabras Unit No. 4 shall be deemed in violation of this waiver and the CAA beginning on the date of commencement of construction of the unit.

(2) A waiver of the requirement to obtain a PSD permit prior to the operation of the unit identified in the 1995 Petition as Cabras Unit No. 3 is granted subject to the following conditions:

(i) The protocol to be followed for the ICS of fuel switching for electric generating units shall be modified to require the use of fuel oil with a sulfur content of 2.00 percent or less during offshore wind conditions. This fuel shall be fired in Cabras Power Plant Units Nos. 1 through 3 and in Piti Power Plant Units Nos. 4 and 5.

(ii) Cabras Unit No. 3 shall operate in compliance with all applicable requirements in its permits to construct and to operate as issued by Guam Environmental Protection Agency.

(iii) The waiver provisions allowing Cabras Unit No. 3 to operate prior to issuance of a PSD permit shall expire on August 15, 1996, or upon the receipt by GPA of a PSD permit for Cabras Unit No. 3, whichever event occurs first.

(3) On or before October 15, 1995, GPA shall submit to EPA, Region IX, a report concerning the operation of Cabras Unit No. 3 and the construction of Cabras Unit No. 4. The report shall contain:

(i) A summary of GPA's conclusions from its wind tunnel study;

(ii) A description of the alternatives available to assure compliance with all air quality requirements, including PSD requirements, during the operation of Cabras Units Nos. 3 and 4;

(iii) A description of the alternative GPA chooses to assure compliance with all air quality requirements, including PSD requirements, during the operation of Cabras Units Nos. 3 and 4; and

(iv) A plan of implementation by GPA.

[BPD–766–F]

RIN 0938–AG21

Medicare Program; Standards for Quality of Water Used in Dialysis and Revised Guidelines on Reuse of Hemodialysis Filters for End-Stage Renal Disease (ESRD) Patients

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule revises the Medicare conditions for coverage of suppliers of end-stage renal disease services. The revisions remove general language in the regulations regarding water quality; incorporate by reference standards for monitoring the quality of water used in dialysis as published by the Association for the Advancement of Medical Instrumentation (AAMI) in its document, "Hemodialysis Systems" (second edition); and update existing regulations to incorporate by reference the second edition of AAMI's voluntary guidelines on "Reuse of Hemodialyzers."

EFFECTIVE DATE: These regulations are effective on October 18, 1995. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 18, 1995.

FOR FURTHER INFORMATION CONTACT: Jackie Sheridan, (410) 966–4635.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1881 of the Social Security Act (the Act) authorizes Medicare coverage and payment for the treatment of end-stage renal disease (ESRD) in approved facilities that provide dialysis to ESRD patients. The Health Care Financing Administration (HCFA) grants approval of ESRD facilities after they have been surveyed by a State agency. The State survey agency determines the facility's compliance with the conditions specified in regulations at 42 CFR part 405, subpart U. Medicare payment is limited to ESRD services furnished by facilities meeting these conditions.

A. Water Quality

The existing regulation governing the quality of water used in dialysis (§ 405.2140(a)(5)) requires that the water be analyzed periodically and treated as necessary to maintain a continuous supply that is biologically and chemically compatible with acceptable dialysis techniques. The lack of specificity of these requirements makes it difficult for State agency surveyors to measure facility compliance with the standard.

Realizing that water quality is one of the most important aspects of health and safety in dialysis led us to consult with the Public Health Service and various other professionals in the dialysis industry to redefine the standards used by State surveyors in determining compliance with the regulations. As a result of these consultations, we concluded that there was a need to establish specific measurable standards regarding the quality of water used in dialysis. According to the Public Health Service's Center for Disease Control and Prevention, the Association for the Advancement of Medical Instrumentation (AAMI) standard on water quality is the only standard available, is accepted by the medical community and is currently used by most facilities.

The 1992 AAMI standard, "Hemodialysis Systems," reflects the collective expertise of a committee of health care professionals, in conjunction with device manufacturers and government representatives. This committee developed a standard of performance for manufacturers that will, at a minimum, promote the effective, safe performance of hemodialysis systems, devices, and related materials. The standard includes specific water quality requirements and has an appendix that provides a guideline for the device user with specific emphasis on water purity assurance and monitoring. This standard is outcome-oriented in that it stipulates only specific biological and chemical water purity levels and does not restrict the methods used by facilities to attain and maintain the acceptable levels.

Each AAMI standard or recommended practice is reviewed at least every 5 years because of constant changes in medical technology and to clarify or improve existing guidelines. The standard was originally published in 1982. In 1986, the AAMI Renal Disease and Detoxification Committee appointed task groups to carefully review specific areas of the standard. After review by the task groups and the full committee, a proposed revision was drafted. This document, "Hemodialysis Systems" (second edition), was voted on by the committee, reviewed by the public, and was approved on March 16, 1992.

B. Reuse of Hemodialyzers

Section 1881(f)(7) of the Act requires the Secretary to establish protocols for reuse of hemodialyzers for those facilities that voluntarily elect to reuse the filters. Reuse can be accomplished through a variety of techniques that involve the cleaning, disinfecting, and preparing of disposable hemodialysis devices for subsequent use by the same patient. Although the potential exists for adverse patient outcomes from reuse, reprocessing and reuse of dialyzers are safe when done properly.

Existing regulations at § 405.2150 require ESRD facilities reusing hemodialyzers to meet the voluntary guidelines and standards adopted by AAMI and issued in July 1986 as "Reuse of Hemodialyzers." The AAMI guidelines on reuse of hemodialyzers are based on the national consensus of physicians, other health care professionals, government representatives, patients, and industry. These guidelines (directed to health professionals) describe the details of reprocessing dialyzers and address various areas such as personnel qualifications and training, patient considerations, equipment, reprocessing supplies, monitoring during dialysis, quality assurance and quality control.

After review by the AAMI Renal Disease and Detoxification Committee and the public, the second edition of the "Reuse of Hemodialyzers" was approved. The second edition is directed to the physician in charge of hemodialyzer reprocessing (using a manual or automated method) and describes the essential elements of good practices for reprocessing dialyzers to help assure safety and effectiveness.

II. Provisions of the Proposed Regulations

We published in the **Federal Register** (59 FR 6937) on February 14, 1994, a proposed rule to amend the Medicare regulations to incorporate by reference the AAMI standard for water quality and the AAMI guidelines for monitoring purity of water for hemodialysis found in the following sections of "Hemodialysis Systems" (second edition):

- 3.2.1—Water Bacteriology
- 3.2.2— Maximum Level of Chemical Contaminants
- Appendix B, section B1 through B5— Guidelines for Monitoring Purity of Water Used for Hemodialysis.

We proposed that this incorporation by reference would replace the existing general language in § 405.2140(a)(5) which requires that water used for dialysis must be analyzed periodically and treated as necessary to maintain a continuous supply that is biologically and chemically compatible with acceptable dialysis techniques.

The February 14, 1994, proposed rule also specified the proposed incorporation by reference of the 1993 (second) edition of the AAMI guidelines on "Reuse of Hemodialyzers" to replace the previously incorporated 1986 edition. In addition, we proposed to amend § 405.2150 to remove paragraph (a)(2) concerning staff exposure to chemical germicides, paragraph (a)(3)(iii) concerning reporting adverse patient reactions to the manufacturer, and paragraph (b) concerning the standard for dialyzer caps. These topics (included in the three paragraphs previously mentioned) are covered in the following sections of the revised 1993 AAMI guidelines that are now being incorporated by reference:

- Section 8—Physical plant and environmental safety considerations
- Section 11—Reprocessing
- Section 13—Monitoring
- Annex A—Section A11.4—Germicide.

The proposed rule specified that copies of both AAMI publications may be purchased from AAMI and are available for inspection at the HCFA Information Resource Center or the Office of the Federal Register.

III. Analysis of and Responses to Public Comments

We received five timely public comments on the February 1994 proposed rule. All commenters were generally supportive of the proposed revisions. Their comments and our responses are discussed below.

A. General

Comment: One commenter noted that the Government's regulatory process is slower than the private sector's in making changes. They recommended that we develop a mechanism to automatically incorporate the most recent revision of AAMI guidelines into the regulation rather than revise the regulations each time the AAMI guideline is updated.

Response: We acknowledge that the process of issuing a revision to the regulations each time the AAMI guidelines are updated results in delay in giving the updated guidelines the force of law. It certainly would be simpler for us to merely adopt the most recent version of the AAMI guidelines automatically upon update as the commenter suggested. However, we have some concerns that such a system may not be consistent with our obligation to the ESRD facilities that would be affected.

Under the current system, we carefully review and consider the changes made in the AAMI updates and make a determination as to whether it is appropriate and necessary to incorporate the AAMI provisions in our regulations. Then we offer the public an opportunity to participate in the regulation process through a comment period.

If we were to adopt the commenter's suggestion, the industry would be required to comply with the AAMI guidelines regardless of whether changes are beneficial to Medicare beneficiaries or unduly burdensome to facilities.

In this regard, we note that we received a comment, which is discussed later in this document, expressing concern with the level of influence afforded to the reuse manufacturers under the process of adopting the AAMI guidelines.

We are in the process of preparing a proposed rule that would totally revise the conditions of coverage for ESRD facilities. We will solicit comment from the public on the merits of this proposal at that time. Until we have had an opportunity to hear form the facilities that would be impacted by this suggestion, we believe it is most appropriate to continue to pursue the rulemaking under the Administrative Procedure Act and provide an opportunity for participation by the affected entities.

B. Water Quality

Comment: Two commenters recommended that we also incorporate the AAMI provisions relating to sampling and testing methodologies contained in sections 4.2.1 and 4.2.2 of "Hemodialysis Systems." They noted that the sampling and testing protocols are essential to obtaining results that are meaningful and lead to the desired outcome of good patient health and safety. They presented examples of factors that can erroneously influence test results, such as leaving samples at room temperature, sampling only at one site, and shortened incubation periods.

Response: We note the commenters' concern and fully endorse the provisions contained in sections 4.2.1 and 4.2.2. of the AAMI "Hemodialysis Systems" document. However, we note that the subject provisions are exceedingly detailed and include not only point of water collection within the dialysis system, but also time of assay, storage temperatures, filter technique, and culture media. While we encourage facilities to utilize these guidelines, we

---

believe that they are overly prescriptive. Moreover, the subject provisions are procedure-oriented as opposed to outcome-oriented and not necessary for ensuring Medicare beneficiary health and safety. We believe that we can meet the statutory mandate for beneficiary health and safety while permitting facilities some flexibility in sampling and testing procedures.

In addition, the adopted provisions of AAMI water quality standard address specific bacteriological and chemical purity levels. We also adopted the AAMI Appendix guidelines with regard to monitoring frequency. The guidelines address monitoring practices similar to sections 4.2.1 and 4.2,2 but in a more general, less prescriptive nature. We feel confident that these provisions provide enough detail to permit surveyors to adequately determine appropriate water quality. Moreover, these new standards represent a significant improvement over the assurances contained in the existing regulation. We believe that it would be unnecessarily burdensome and prescriptive to specify minute details as to the sampling techniques. Further, such specificity would be inconsistent with the Administration's commitment to reduce Federal regulatory burden. Consequently, we are not adopting the commenters' suggestion at this time.

We are, however, currently developing a complete revision of the ESRD conditions of coverage. One of the principal goals of this project is to make the conditions patient-centered and outcome-oriented. Ultimately, we may choose an outcome-oriented set of conditions regulating sampling methodology more explicitly. We will consider these comments as we develop the new conditions.

Comment: One commenter recommended that we apply the water quality standards to water used for reprocessing as well as for dialysate, noting that contaminated water can adversely affect reprocessing through the water rinse phases.

Response: The AAMI water standards that we have adopted were prepared, in collaboration with the industry, exclusively for water used during hemodialysis. The guidelines were not intended for adoption to the reuse process. We have incorporated water standards specifically for the reuse process from the AAMI reuse standards. The reuse standards contain water requirements in sections 7.1.2. and 11.4.1. We believe these standards are adequate to meet our need to ensure beneficiary health and safety.

C. Hemodialyzer Reuse

Comment: One commenter took issue with the statement in the preamble of the proposed rule stating that, "Although the potential exists for adverse patient outcomes from reuse, reprocessing and reuse of dialyzers are safe when done properly." This commenter referenced the recent research indicating an association between increased mortality and reuse with certain germicides. The commenter concluded that it may be premature to state unequivocally that reprocessing and reuse of dialyzers are safe.

Response: We note that the sentence addressed by the commenter clearly includes the caveat that reprocessing is safe when done "properly". We do not believe the statement is misleading or erroneous in light of research findings.

Although the referenced research finds an association between increased mortality and reuse of certain germicides, it does not conclude that reuse is not safe. In addition, the Food and Drug Administration (FDA) has approved the product and its labelling, reviewed manufacturers' studies, and followed routine procedures that include product testing. Thus, we can conclude that the germicides currently marketed for reprocessing dialyzers do, in fact, work effectively to destroy bacteria.

HCFA and the FDA believe the research in question supports a conclusion that proper technique is essential for effective use of the germicides. Consequently, the FDA has been working with one manufacturer to strengthen product user education. In this regard, the manufacturer in question has taken several voluntary actions to promote proper use of the product, including issuing revised detailed instructions. In addition, the manufacturer has held numerous training sessions all over the nation to educate its customers regarding proper use of the product. Further, the manufacturer in question requires its customers to sign commitments to verify that they understand and will comply with product user instructions before further merchandise will be distributed.

Comment: Two commenters requested clarification of the requirement in § 405.2150(a)(2) that states that facilities may use only one germicide in reprocessing. Specifically, the commenters were concerned about the use of bleach and another germicide during reprocessing. One commenter specifically asked if it was necessary to discard all dialyzers currently being reused if the facility changes germicides.

Response: For purposes of reuse, bleach is considered a cleansing agent, not a germicide. Thus, many facilities use bleach as part of the reuse process to flush and clean blood deposits before the actual germicide soaking process is initiated. We do not intend to imply that this bleach cleansing process adversely affects the reprocessing. Since we do not consider bleach to be a germicide, the requirement to discard dialyzers treated with a different germicide does not apply to bleaching.

We do intend that a facility that changes germicides discard all those dialyzers reprocessed with the old germicide. We are concerned that exposing dialyzers to different germicides may cause membrane leaks. While we recognize that it may be expensive and considered wasteful by some facilities to discard dialyzers with test values that indicate they are still effective, we believe that this precaution is a necessary safety measure. Facilities should take this added expense into consideration when analyzing their alternatives and making a determination regarding the changing of germicides.

Comment: One commenter indicated that the prohibition against reuse of dialyzers for hepatitis B-positive patients that is contained in the AAMI guidelines is unjustified and costly to dialysis facilities. The commenter cited a report from the Centers for Disease Control that concluded that reuse of dialyzers was not associated with increased transmission of hepatitis B. Commenters supported measures other than a total ban against reuse for hepatitis B-positive patients, such as holding dedicated equipment in isolation areas, to eliminate the risk of cross-contamination of dialyzers.

Response: Hepatitis B is a highly contagious disease that has the potential to be extremely damaging to an ESRD patient. Given the highly contagious nature of the disease, the CDC has for many years strongly recommended extreme precaution and isolation of those patients who are hepatitis B-positive. Many physicians, nurses, and other professionals involved in the ESRD field have similarly supported the position of extreme caution in treating the hepatitis B-positive patient.

We want to point out that the AAMI provision related to banning reuse for hepatitis B-positive patients was developed in a public forum and reflects the views of many noted professionals. These guidelines were developed by a committee of national experts in a variety of ESRD-related fields. The committee's recommendations were then distributed to the AAMI membership at large for comment. Thus, the prohibition against reuse of dialyzers for hepatitis B positive patients was developed by the medical community and reflects the general concern of most professionals that extreme caution is necessary in treating patients with the disease.

While there may be no appreciable evidence to demonstrate that reuse would increase the spread of hepatitis B, there is no conclusive evidence that reuse in this population is safe. Given that hepatitis B is very contagious and that the industry generally supports the prohibition, we believe that permitting reuse for hepatitis B-positive patients would be an inappropriate risk to the health and safety of ESRD patients.

Comment: One commenter expressed concern that the AAMI reuse guidelines provide too much latitude to device manufacturers in establishing operating parameters for their equipment. The commenter was concerned that ESRD facilities are a captive audience to manufacturers, who could design expensive equipment or procedures. Under the reuse regulations, which require compliance with the manufacturer's guidelines, facilities may be forced to bear financial burdens with little recourse. The commenter suggested that HCFA develop a process to allow ESRD facilities to appeal the application of excessively restrictive guidelines for equipment.

Response: We do not support the commenter's recommendation for HCFA to develop an appeal process for application of equipment guidelines. It is not within the purview of the HCFA to become involved in manufacturers' guidelines. The FDA, not HCFA, is responsible for approval of devices, equipment, and labelling, including manufacturers' instructions.

Manufacturers' product guidelines are very technical and are developed only after considerable research and deliberation with respect to complex technical and scientific matters. HCFA does not have the appropriate staffing or expertise to adjudicate facilities' appeals of these scientific matters. However, the FDA does offer recourse to facilities through its Office of Compliance. Facilities may contact the FDA by writing to: Food and Drug Administration, Office of Compliance, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20850.

In addition, we note that the manufacture of reprocessing devices, germicides, and equipment takes place in the competitive market arena. ESRD facilities are free to choose among a number of alternative strategies for reprocessing dialyzers, or they may choose not to reuse at all. Thus, we do not believe that the facilities are a captive audience to the manufacturers given that there are a variety of dialyzer processing methods and reprocessing product manufacturers.

D. Impact on the Hemodialysis Community

We specifically solicited input from the commenters on our assumption that the adoption of the AAMI water and reuse standards would not represent a burden on the provider community as most are voluntarily complying with the AAMI guidelines.

Comment: Several commenters agreed with our conclusion that there would be little impact on facilities because most facilities already voluntarily comply with AAMI guidelines. Nonetheless, they voiced support for making the guidelines mandatory to force those few non-compliant facilities into appropriate practices.

Response: We appreciate the support for our proposal and are proceeding to publish the final regulations.

Comment: One commenter challenged our statement that the AAMI water standards are supported by scientific literature. The commenter also disagreed with the statement that the standards are based on industry consensus, since Government representatives participated in the AAMI guideline development.

Response: As noted earlier, the AAMI guidelines were developed by a committee of noted experts in hemodialysis. Once the committee formulated a draft document, it was circulated to AAMI membership for comment. The AAMI membership includes representatives of manufacturers, physicians, patients, technicians, and other fields. The committee seriously considered the comments and made appropriate revisions in the guidelines. Decisions reflected the majority of the committee members; no single member had authority to direct the decision or overrule the majority. While it is true that Government employees participated in the development of the guidelines, we do not believe that the fact that a Government representative participated in the process is an indication that the resulting guidelines are not representative of the industry consensus.

The AAMI committee utilized empirical data regarding microbial limits and epidemiological findings (among other things) in developing the guidelines. We acknowledge that by using the term "scientific literature" we may have inadvertently implied that the AAMI had performed clinical trials and controlled experimentation. The intent of the statement was to indicate that the water quality limits established in the guidelines reflected reasonable assumptions and available empirical data.

IV. Provisions of the Final Regulations

We are adopting the provisions of the February 14, 1994, proposed regulations as final regulations without change.

V. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

VI. Regulatory Impact Statement

A. Introduction

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a final rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all ESRD facilities are considered to be small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a final rule will have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

B. Water Quality Standards

This final rule incorporates industry standards on the quality of water used in dialysis into existing regulations thereby, enabling surveyors to accurately assess a facility's compliance with the standards on water quality. The AAMI standards are the results of a collaborative effort by health professionals and industry representatives to respond to clinical needs and to help ensure patient health and safety. The AAMI's recommended maximum levels for water contaminants have been clearly defined, reflect reasonable assumptions and available empirical data, and were developed through industry consensus. Under the AAMI water standard, the supplier/manufacturer of dialysis water treatment

equipment is responsible for ensuring that the water produced by the system routinely does not exceed the maximum allowable chemical contaminant levels. Because AAMI's acceptable contamination levels have been in effect since 1982 and are recognized as medically acceptable standards, we believe that manufacturers have been producing and facilities have been purchasing equipment capable of meeting these requirements. We understand that technology is in place for all facilities to meet the AAMI water standard. The public comments that we received on the proposed rule support this conclusion. Changes in water quality will be handled through consultation with State and local water authorities. Safe purity levels will be ensured through continued monitoring by the physician in charge of dialysis. Although contaminants in water used in dialysate may cause adverse patient reactions, actual documented adverse incidents are rare when the water is monitored properly. Because the AAMI water quality standard represents long-standing acceptable medical practice, we believe the vast majority of facilities already comply with this standard. Incorporation of the AAMI standard into the regulations will help ensure patient health and safety by providing surveyors with a measurable standard with which they may assess facility compliance, especially in the few facilities that do not voluntarily conform to the water quality guidelines adopted by the industry.

C. Reuse of Hemodialyzers

The AAMI "Reuse of Hemodialyzers" does not promote either single use or reuse of dialyzers. The guidelines were developed to acknowledge the widespread practice of reprocessing and provide recommendations for optimal hemodialyzer reprocessing. In January 1993, HCFA's Health Standards and Quality Bureau canvassed the 2,345 Medicare-certified ESRD facilities to determine if they practiced reuse, and, if so, the disinfecting protocols used. Sixty-five percent (1,532) of the facilities reported practicing reuse. Of these facilities, approximately 51 percent use renalin as the germicide; two-thirds of these facilities use an automated disinfecting system. Approximately 40 percent of the facilities reported using formalin/formaldehyde as the germicide, with manual and automated systems receiving equal use. Approximately 9 percent of the facilities practicing reuse reported using glutaraldehyde as the germicide, with the majority of these facilities using an automated disinfecting system. Less than 1 percent of the facilities use other disinfecting methods.

Because the 1993 AAMI guidelines do not differ significantly from the 1986 guidelines (which all Medicare participating facilities practicing reuse already must meet) we believe that the great majority of the facilities practicing reuse will be in compliance with the new standards in this final regulation. The 1993 AAMI standards were developed through a public forum and their adoption was well publicized. They reflect the most up-to-date reuse procedures already practiced by many of the facilities. Moreover, we do not believe that incorporating the 1993 guidelines into our regulations, in and of itself, will prompt any facility to begin or discontinue reuse.

We expect that each facility will respond to these new standards based on the relationship of these standards to its current reuse practices and to factors such as whether or not the facility can buy new filters in quantity less expensively than it can upgrade its reuse practices. As we indicated earlier, 65 percent of the facilities are already reusing dialyzers. The major effect of this final rule will be to ensure that Medicare standards for reuse reflect safe and effective practices.

D. Conclusion

Because we are unable to predict the decisions facilities will make in response to this regulation, we are unable to quantify the potential effect it will have. All five public responses to the February 1994 proposed rule were favorable.

Beneficiaries may be reassured that HCFA has adopted specific water quality standards and updated its standards for reuse of hemodialyzers to ensure their health and safety. However, we expect that there will be a negligible effect on most beneficiaries and facilities since we believe these revisions will make no major changes in current facility operation or patient experience. This final rule is not expected to result directly in any increases or reductions in Medicare program expenditures.

For these reasons, we have determined, and the Secretary certifies, that this final rule will not have a significant economic impact on a substantial number of small entities and will not have a significant economic impact on the operations of a substantial number of small rural hospitals. Therefore, we are not preparing analyses for either the RFA or section 1102(b) of the Act.

In accordance with the provisions of Executive Order 12866, this final rule was not reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Incorporation by reference, Kidney diseases, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Chapter IV, Part 405, Subpart U is amended as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart U—Conditions for Coverage of Suppliers of End-Stage Renal Disease (ESRD) Services

A. The authority citation for part 405, Subpart U continues to read as follows:

Authority: Secs. 1102, 1861, 1862(a), 1871, 1874, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, and 1395rr), and sec. 353 of the Public Health Service Act (42 U.S.C. 263a), unless otherwise noted.

B. In § 405.2140, the heading of paragraph (a) is republished, and paragraph (a)(5) is revised to read as follows:

§ 405.2140 Condition: Physical environment.

* * * * *

(a) *Standard: building and equipment.* * * *

(5)(i) The ESRD facility must employ the water quality requirements listed in paragraph (a)(5)(ii) of this section developed by the Association for the Advancement of Medical Instrumentation (AAMI) and published in "Hemodialysis Systems," second edition, which is incorporated by reference.

(ii) Required water quality requirements are those listed in sections 3.2.1, Water Bacteriology; 3.2.2, Maximum Level of Chemical Contaminants; and in Appendix B: Guideline for Monitoring Purity of Water Used for Hemodialysis as B1 through B5.

(iii) Incorporation by reference of the AAMI's "Hemodialysis Systems," second edition, 1992, was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51.[1] If any changes in

---

[1] The publication entitled "Hemodialysis Systems," second edition, 1992, is available for inspection at the HCFA Information Resource Center, 7500 Security Boulevard, Baltimore, MD

Continued

"Hemodialysis Systems," second edition, are also to be incorporated by reference, a notice to that effect will be published in the **Federal Register**.

* * * * *

C. In § 405.2150, the undesignated introductory text and paragraph (a) are revised, paragraph (b) is removed, paragraphs (c) and (d) are redesignated as paragraphs (b) and (c), respectively, and redesignated paragraph (c)(1) is revised to read as follows:

§ 405.2150 Condition: Reuse of hemodialyzers and other dialysis supplies.

An ESRD facility that reuses hemodialyzers and other dialysis supplies meets the requirements of this section. Failure to meet any of paragraphs (a) through (c) of this section constitutes grounds for denial of payment for the dialysis treatment affected and termination from participation in the Medicare program.

(a) *Standard: Hemodialyzers*. If the ESRD facility reuses hemodialyzers, it conforms to the following:

(1) *Reuse guidelines*. Voluntary guidelines adopted by the AAMI ("Reuse of Hemodialyzers," second edition). Incorporation by reference of the AAMI's "Reuse of Hemodialyzers," second edition, 1993, was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51.[2] If any changes in "Reuse of Hemodialyzers," second edition, are also to be incorporated by reference, a notice to that effect will be published in the **Federal Register**.

(2) *Procedure for chemical germicides*. To prevent any risk of dialyzer membrane leaks due to the combined action of different chemical germicides, dialyzers are exposed to only one chemical germicide during the reprocessing procedure. If a dialyzer is exposed to a second germicide, the dialyzer must be discarded.

(3) *Surveillance of patient reactions*. In order to detect bacteremia and to maintain patient safety when unexplained events occur, the facility—

(i) Takes appropriate blood cultures at the time of a febrile response in a patient; and

(ii) If pyrogenic reactions, bacteremia, or unexplained reactions associated with ineffective reprocessing are identified, terminates reuse of hemodialyzers in that setting and does not continue reuse until the entire reprocessing system has been evaluated.

(b) * * *

(c) * * *

(1) Limit the reuse of bloodlines to the same patient;

* * * * *

RIN 2115–AF03

Inspected and Uninspected Commercial Vessels; Removal of Obsolete and Unnecessary Regulations

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is modifying its regulations for both inspected and uninspected commercial vessels by removing and revising obsolete and unnecessary provisions. The Coast Guard expects that this final rule will reduce the administrative burden to government and industry, reduce government printing costs, and provide a more concise and useful Title 46, Code of Federal Regulations.

DATES: This rule is effective on October 18, 1995.

ADDRESSES: Unless otherwise indicated, documents referred to in this preamble are available for inspection or copying at the office of the Executive Secretary, Marine Safety Council (G-LRA/3406), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001 between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

FOR FURTHER INFORMATION CONTACT: LCDR R. K. Butturini, Design and Engineering Standards Division, Office of Marine Safety, Security, and Environmental Protection, (202) 267–2206.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal persons involved in drafting this final rule are LCDR R. K. Butturini, Project Manager, Ms. Shereen Bell, Project Assistant and LT Rachel Goldberg, Project Counsel, Office of Chief Counsel.

Regulatory History

On May 9, 1995, the Coast Guard published a notice of proposed rulemaking (NPRM) entitled "Removal of Obsolete and Unnecessary Regulations" (60 FR 24748). The Coast Guard received one letter commenting on the NPRM. No public meeting was requested, and none was held specifically for this project. A public meeting was held on April 20, 1995 (60 FR 16423) to discuss the Coast Guard's regulatory process and regulatory reform. Relevant comments made at that meeting have been considered in this final rule.

Background and Purpose

On March 4, 1995, the President issued a memorandum calling on executive agencies to review regulations with the goals of—

(1) Cutting obsolete regulations;

(2) Focusing on results instead of process and punishment;

(3) Convening meetings with the regulated community; and,

(4) Expanding efforts to promote consensual rulemaking.

At an April 20, 1995 public meeting announced in the March 30, 1995 **Federal Register** (60 FR 16423) and in another notice published in the May 31, 1995 **Federal Register** (60 FR 28376), the Coast Guard declared its commitment to eliminating Coast Guard induced differences between the requirements that apply to U.S. vessels in international trade and those requirements that apply to similar vessels in international trade that fly the flag of responsible foreign nations. The purpose of this final rule is to begin the process of achieving this goal by removing or revising regulations that the Coast Guard has found to be obsolete and unnecessary.

In compiling the list of CFR sections included in this final rule, the Coast

Guard did not consider parts of 46 CFR that are under review as part of other, ongoing regulatory projects. Additional rulemaking projects are expected to adopt accepted industry standards, remove other obsolete or unnecessary Coast Guard regulations and solicit public comment on additional provisions which should be modified or eliminated. Sections were identified for revision or removal by this rule for the following reasons:

(a) A regulation includes citation to a long-passed compliance date;

(b) Vessels or equipment covered under certain regulations have become impractical due to social or economic changes;

(c) Equipment mandated by regulation is no longer manufactured or used;

(d) Requirements imposed by regulations are repeated in another section;

(e) The law cited as authority has been repealed or revoked; or,

(f) The text of the regulation merely repeats statutory language.

Discussion of Comments and Changes

In response to the notice of proposed rulemaking one comment letter was received. The letter was supportive of the overall efforts by the Coast Guard to remove and revise obsolete and unnecessary provisions.

The following discussion summarizes the changes being made by this final rule to Title 46 of the CFR.

1. Passed Compliance Dates

The following regulations are being removed or revised because they include a reference to a compliance date which has passed. For example, 46 CFR 25.40–1(c) states that modifications for the purposes of complying with ventilation requirements must be completed by June 1, 1966. These types of references are no longer needed in the regulations and are being removed.

Cite (46 CFR)	Change made	Subject addressed by regulation
§ 25.40–1(c)	Removed	Motorboat ventilation.
§ 28.110(a)	Date removed	Life preservers
§ 28.115(a)	Date removed	Ring life buoys.
§ 28.135(a)	Date removed	Lifesaving equipment markings.
§ 28.145	Date removed	Distress signals.
§ 28.210 (c), (d) and (e)	Dates removed	First aid equipment and training.
§ 28.240(a)	Date removed	General alarm systems.
§ 28.270(c)	Date removed	Instructions, drills, and safety orientation.

2. Impractical Vessels, Equipment, or Arrangements

Some sections are being removed or revised because they apply to vessels or equipment that have become impractical due to changes in the world economy or social values. For example, most of the following listed regulations concern nuclear-powered vessels, vessels intended to incinerate waste at sea, and facilities and ships intended for energy production from differences in seawater temperature. However, no vessel or facility designed for any of these purposes is currently operating, and construction of any of these types of vessels or facilities is not likely in the foreseeable future. Therefore, these regulations are no longer necessary.

The Coast Guard's regulations concerning ocean thermal energy conversion vessels were issued as a result of a Congressional mandate stated in the Ocean Thermal Conversion Act of 1980 (The Act), codified at 42 U.S.C. 9101 *et seq.* The Act required the Coast Guard, in conjunction with the Department of Energy and the National Oceanic and Atmospheric Administration (NOAA), to promulgate regulations concerning ocean thermal energy conversion (OTEC) facilities and plantships. In the fifteen years since Congress passed the Act, there have been no OTEC facilities or plantships constructed, nor has there been any indication of any future activity in this area. Therefore, as part of its effort to cut obsolete and unnecessary regulations, the Coast Guard after consultation with both the Department of Energy and NOAA, has decided to remove all of its regulations concerning OTEC facilities and plantships.

During internal staff review, additional regulations concerning nuclear vessels and OTEC facilities and plantships were found which had not been identified for removal in the NPRM. These additional regulations are also being removed by this rule since they are no longer necessary. These additional sections being removed from Title 46 CFR are: 31.05–10, 31.40–1, 50.01–10, 50.05–15, 50.20–5, 50.30–10, 54.01–10, 56.01–2, 56.04–1, 56.07–10, 56.20–9, 56.50–25, 56.50–85, 56.60–2, 56.70–15, 57.02–2, 57.06–1, 57.06–4, 57.06–5, 58.03–1, 67.3, 71.01–10, 71.20–15, 71.25–10, 71.75–10, 71.75–20, 91.01–10, 91.20–15, 91.25–10, 91.60–1, 91.60–40, 171.001, 174.005, 189.01–10, 189.20–15, 189.25–10, 189.60–1, 189.60–40.

Another regulation falling into this category concerns steerage passengers. The Steerage Passenger Act of 1882 (ch. 374, 22 Stat. 186 (1882))(The Steerage Act) established accommodation requirements for steerage passengers. Steerage passengers historically were passengers paying the lowest fares for the poorest accommodations and the Steerage Act was written primarily for the safety of immigrants travelling by sea to the United States. The Steerage Act was repealed by Congress in 1983 when Subtitle II of 46 U.S.C. (Pub. L. 98–89, 97 Stat. 500) was revised and consolidated. As a result, regulations addressing carriage of steerage passengers are no longer necessary.

Part 174, Subpart F	Removed	Requirements for ocean thermal energy conversion facilities and plantships.
§188.05–15	Removed	Nuclear vessels.
§188.10–47	Removed	Nuclear vessel inspection.
§189.01–10	Revised	Nuclear vessel inspection.
§189.20–15(c)	Removed	Nuclear vessels.
§189.25–10(b)	Removed	Nuclear vessel inspection.
§189.60–1	Revised	Nuclear vessels.
§189.60–30	Removed	Nuclear vessel inspection.
§189.60–40(e)	Removed	Nuclear vessels.

3. Equipment No Longer Manufactured or Used

Section 35.30–5(c), which pertains to maintaining galley fires, is being removed because it addresses equipment that is no longer manufactured or used.

4. Repeated Provisions

The following regulations are being removed because the requirements they impose are repeated in other, more logical locations in Title 46 of the CFR. For example, requirements for carriage of vinyl chloride monomer are contained in 46 CFR part 40, Special Construction, Arrangement, and Other Provisions for Carrying Certain Flammable or Combustible Dangerous Cargoes in Bulk. More up-to-date requirements are also located in 46 CFR 151.50–34 in subchapter O, Certain Bulk Dangerous Cargoes. Also, 46 CFR 56.50–101 and 56.50–102 contain unnecessary references to refrigeration and liquefied petroleum gas piping systems, topics discussed in detail in 46 CFR part 58, Main and Auxiliary Machinery and Related Systems.

In the following list, the citation to the regulations where the repeated requirements are being retained in Title 46 CFR is indicated in square brackets below the section being removed.

Cite (46 CFR)	Change made	Subject addressed by regulation
Part 40 (§151.50–34)	Removed	Requirements for vinyl chloride monomer.
§56.50–101 (Subpart 58.20)	Removed	Refrigeration systems.
§56.50–102 (Subpart 58.16)	Removed	Liquefied petroleum gas for domestic service.
§76.10–10(l)(2) (§76.10–10(l)(3))	Removed	Lined fire hose in the engine room.
§95.10–10(l)(2) (§95.10–10(l)(4))	Removed	Lined fire hose in the engine room.
§154.1745 (§151.50–34)	Revised	Requirements for vinyl chloride.

5. Outdated Authority Citations

The authority citations for parts 25, 30, 31, 35, 50, 54, 56, 71, 72, 78, 91, 97, 171, 174, 188 and 189 are being updated because they either cite statutory provisions which have been repealed or an executive order which has been revoked. Specifically, the majority of these provisions delete references to 46 U.S.C. 4104 and 5115 which were repealed on November 16, 1990 (Pub. L. 101–595, 104 Stat. 2993), E.O. 11735 which was revoked by E.O. 12777 (56 FR 54757, 3 CFR, 1991 Comp., p. 351) and 49 U.S.C. 1804 which was repealed on July 5, 1994 (Pub. L. 103–272, 108 Stat. 1379).

6. Statutory Language Repeated

The regulatory text of the following provisions repeats exactly the statutory language without any further requirements. Regulations which do not add to self-executing statutes are not useful. Therefore, these regulations which only repeat statutory language are being removed.

Cite (46 CFR)	Change made	Subject addressed by regulation
§35.01–30	Removed	Reckless or negligent operation.
§78.30–30	Removed	Reckless or negligent operation.
§97.27–10	Removed	Reckless or negligent operation.

Regulatory Evaluation

This final rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11034; February 26, 1979). The Coast Guard expects the economic impact of this final rule to be so minimal that a full Regulatory Assessment is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider the economic impact on small entities of a rule for which a general notice of proposed rulemaking is required. "Small entities" may include—(1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields; and, (2) governmental jurisdictions with populations of less than 50,000.

This final rule will have no economic impact on small entities because it amends portions of regulations that—(1) are purely administrative; (2) do not reflect common marine industry practice; (3) apply to vessels that no longer exist; or, (4) are repeated in other sections. Therefore, the Coast Guard finds that this final rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This final rule imposes on the public no new or added requirements for collecting information under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this final rule in accordance with the principles and criteria of Executive Order 12612 and has determined that this rule does not have sufficient implications for federalism to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has considered the environmental impact of this final rule and concluded that, under section 2.B.2.c of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under ADDRESSES.

List of Subjects

46 CFR Part 25

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 28

Fire prevention, Fishing vessels, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 30

Cargo vessels, Foreign relations, Hazardous materials transportation, Penalties, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 31

Cargo vessels, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 35

Cargo vessels, Marine safety, Navigation (water), Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 37

Cargo vessels, Marine safety, Nuclear vessels, Radiation protection.

46 CFR Part 40

Cargo vessels, Hazardous materials transportation, Marine safety, Occupational safety and health, Seamen, Vinyl chloride.

46 CFR Part 50

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 54

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 55

Nuclear vessels, Reporting and recordkeeping requirements.

46 CFR Part 56

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 57

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 61

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 67

Vessels.

46 CFR Part 70

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 71

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 72

Fire prevention, Marine safety, Occupational safety and health, Passenger vessels, Seamen.

46 CFR Part 76

Fire prevention, Marine safety, Passenger vessels.

46 CFR Part 78

Marine safety, Navigation (water), Passenger vessels, Penalties, Reporting and recordkeeping requirements.

46 CFR Part 79

Marine safety, Nuclear vessels, Passenger vessels, Radiation protection, Reporting and recordkeeping requirements.

46 CFR Part 90

Cargo vessels, Marine safety.

46 CFR Part 91

Cargo vessels, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 95

Cargo vessels, Fire prevention, Marine safety.

46 CFR Part 97

Cargo vessels, Marine safety, Navigation (water), Reporting and recordkeeping requirements.

46 CFR Part 99

Cargo vessels, Marine safety, Nuclear vessels, Radiation protection, Reporting and recordkeeping requirements.

46 CFR Part 106

Energy, Environmental protection, Hazardous substances, Intergovernmental relations, Marine resources, Marine safety, Vessels.

46 CFR Part 150

Hazardous materials transportation, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements.

46 CFR Part 154

Cargo vessels, Gases, Hazardous materials transportation, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 171

Marine safety, Passenger vessels.

46 CFR Part 174

Marine safety, Vessels.

46 CFR Part 188

Marine safety, Oceanographic research vessels.

46 CFR Part 189

Marine safety, Oceanographic research vessels, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, the Coast Guard amends 46 CFR parts 25, 28, 30, 31, 35, 37, 40, 50, 54, 55, 56, 57, 61, 67, 70, 71, 72, 76, 78, 79, 90, 91, 95, 97, 99, 106, 150, 154, 171, 174, 188 and 189 as follows:

PART 25—REQUIREMENTS

1. The authority citation for Part 25 is revised to read as follows:

Authority: 33 U.S.C. 1903(b); 46 U.S.C. 3306, 4302; 49 CFR 1.46.

§ 25.40–1 [Amended]

2. Section 25.40–1 is amended by removing paragraph (c) and redesignating paragraphs (d) and (e) as paragraphs (c) and (d), respectively.

PART 28—REQUIREMENTS FOR COMMERCIAL FISHING INDUSTRY VESSELS

3. The authority citation for part 28 is revised to read as follows:

Authority: 46 U.S.C. 3316, 4502, 4506, 6104, 10603; 49 U.S.C. 5103, 5106; 49 CFR 1.46.

§ 28.110 [Amended]

4. In § 28.110, paragraph (a) is amended by removing the words "after November 15, 1991,".

§ 28.115 [Amended]

5. In § 28.115, paragraph (a) is amended by removing the words "after November 15, 1991,".

§ 28.135 [Amended]

6. In § 28.135, paragraph (a) is amended by removing the words "after September 1, 1992,".

§ 28.145 [Amended]

7. Section 28.145 is amended by removing the words "after November 15, 1991,".

8. In § 28.210, paragraphs (c), (d), and (e) are revised to read as follows:

§ 28.210 First aid equipment and training.

* * * * *

(c) Each vessel that operates with more than 2 individuals on board must have at least 1 individual certified in first aid and at least 1 individual certified in CPR. An individual certified in both first aid and CPR will satisfy both of these requirements.

(d) Each vessel that operates with more than 16 individuals on board must have at least 2 individuals certified in first aid and at least 2 individuals certified in CPR. An individual certified in both first aid and CPR may be counted for both requirements.

(e) Each vessel that operates with more than 49 individuals on board must have at least 4 individuals certified in first aid and at least 4 individuals certified in CPR. An individual certified in both first aid and CPR may be counted for both requirements.

§ 28.240 [Amended]

9. In § 28.240, paragraph (a) is amended by removing the words "after September 1, 1992,".

10. In § 28.270, paragraph (c) is revised to read as follows:

§ 28.270 Instructions, drills, and safety orientation.

* * * * *

(c) *Training.* No individual may conduct the drills or provide the instructions required by this section unless that individual has been trained in the proper procedures for conducting the activity. An individual licensed for operation of inspected vessels of 100 gross tons or more need not have additional training to comply with this requirement.

* * * * *

PART 30—GENERAL PROVISIONS

11. The authority citation for part 30 is revised to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; 49 U.S.C. 5103, 5106; 49 CFR 1.45, 1.46; Section 30.01–2 also issued under the authority of 44 U.S.C. 3507; Section 30.01–5 also issued under the authority of Sect. 4109, Pub. L. 101–380, 104 Stat. 515.

§ 30.01–25 [Removed]

12. Section 30.01–25 is removed.

§ 30.10–44 [Removed]

13. Section 30.10–44 is removed.

PART 31—INSPECTION AND CERTIFICATION

14. The authority citation for part 31 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3306, 3703; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46. Section 31.10–21a also issued under the authority of Sect. 4109, Pub. L. 101–380, 104 Stat. 515.

§ 31.01–5 [Amended]

15. Section 31.01–5 is amended by removing the designation "(a)" from paragraph (a) and removing paragraph (b).

16. In § 31.05–10, paragraph (b) is amended by removing the words "For nuclear vessels see part 37 of this subchapter.", and paragraph (a) is revised to read as follows:

§ 31.05–10 Period of validity of certificate of inspection —TB/ALL.

(a) Certificates of inspection will be issued for periods of either 1 or 2 years.

* * * * *

§ 31.10–15 [Amended]

17. Section 31.10–15 is amended by removing paragraph (c).

18. Section 31.40–1 is revised to read as follows:

§ 31.40–1 Application—T/ALL.

The provisions of this subpart shall apply to all tankships on an international voyage.

§ 31.40–30 [Removed]

19. Section 31.40–30 is removed.

§ 31.40–40 [Amended]

20. Section 31.40–40 is amended by removing paragraph (e) and redesignating paragraph (f) as paragraph (e).

PART 35—OPERATIONS

21. The authority citation for part 35 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 3703, 6101; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

§ 35.01–30 [Removed]

22. Section 35.01–30 is removed.

§ 35.30–5 [Amended]

23. Section 35.30–5 is amended by removing paragraph (c) and redesignating paragraphs (d) and (e) as paragraphs (c) and (d), respectively.

PART 37—[REMOVED]

24. Part 37 is removed.

PART 40—[REMOVED]

25. Part 40 is removed.

PART 50—[AMENDED]

26. The authority citation for part 50 is revised to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.45, 1.46; Section 50.01–20 also issued under the authority of 44 U.S.C. 3507.

§ 50.01–10 [Amended]

27. In § 50.01–10, paragraph (b) is amended by removing the words "nuclear pressure vessels,".

§ 50.05–15 [Amended]

28. In § 50.05–15, the introductory text in paragraph (a) is amended by removing the words "nuclear vessels," and paragraph (c) is removed.

29. In § 50.20–5, paragraph (c) is removed, paragraph (d) is redesignated as paragraph (c) and paragraph (b) is revised to read as follows:

§ 50.20–5 Procedures for submittal of plans.

* * * * *

(b) The plans may be submitted in duplicate to the Officer in Charge, Marine Inspection, at or nearest the place where the vessel is to be built. Alternatively, the plans may be submitted in triplicate to the Marine Safety Center.

* * * * *

30. Section 50.30–10 is revised to read as follows:

§ 50.30–10 Class I, I–L and II–L pressure vessels.

(a) Classes I, I–L and II–L pressure vessels shall be subject to shop inspection at the plant where they are being fabricated, or when determined necessary by the Officer in Charge, Marine Inspection.

(b) The manufacturer shall submit Class I, I–L and II–L pressure vessels, as defined in Parts 54 and 56 of this subchapter for shop inspection at such stages of fabrication as may be requested by the Officer in Charge, Marine Inspection.

PART 54—PRESSURE VESSELS

31. The authority citation for Part 54 is revised to read as follows:

Authority: 33 U.S.C. 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 54.01–10 [Amended]

32. In § 54.01–10, paragraph (a) is amended by removing the words ", such as steam generators in the secondary system of a nuclear plant,".

§ 54.15–5 [Amended]

33. In § 54.15–5, the colon at the end of paragraph (i) is removed and replaced with a period and the note following paragraph (i) is removed.

PART 55—[REMOVED]

34. Part 55 is removed.

PART 56—PIPING SYSTEMS AND APPURTENANCES

35. The authority citation for part 56 is revised to read as follows:

Authority: 33 U.S.C. 1321(j), 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

§ 56.01–2 [Amended]

36. In § 56.01–2, paragraph (b) is amended by removing the entry for American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code: Section III, Rules for the Construction of Nuclear Power Plants, 1986 with addenda.

§ 56.01–10 [Amended]

37. Section 56.01–10 is amended by removing paragraph (c)(2)(ii) and redesignating paragraphs (c)(2)(iii) and (c)(2)(iv) as paragraphs (c)(2)(ii) and (c)(2)(iii), respectively.

§ 56.04–1 [Amended]

38. In § 56.04–1, Table 56.04–1—Piping Classifications is amended by removing the entry "Nuclear" in the Service column and the corresponding entry "See part 55 of this subchapter." in the Class column.

§ 56.07–10 [Amended]

39. In § 56.07–10, paragraph (e) is amended by removing the words "and nuclear".

§ 56.20–9 [Amended]

40. In § 56.20–9, paragraph (b) is amended by removing the words "nuclear and".

§ 56.30–5 [Amended]

41. In § 56.30–5, paragraph (b)(4) is amended by removing the words "and nuclear."

§ 56.50–25 [Amended]

42. In § 56.50–25, paragraph (a) is amended by removing the words "Other arrangements may be permitted for nuclear systems when specifically authorized by the Commandant.".

§ 56.50–85 [Amended]

43. In § 56.50–85, paragraph (a)(1) is amended by removing the words "Tanks in nuclear systems shall be provided with means for preventing uncontrolled release of hazardous amounts of radioactive materials.".

§ 56.50–101 [Removed]

44. Section 56.50–101 is removed.

§ 56.50–102 [Removed]

45. Section 56.50–102 is removed.

§ 56.60–2 [Amended]

46. Section 56.60–2 is amended by removing the note at the end of the section.

47. In § 56.70–15, paragraph (a)(3) is revised to read as follows:

§ 56.70–15 Procedure.

(a) * * *

(1) * * *

(3) Sections of pipe shall be welded insofar as possible in the fabricating shop. Prior to welding Class I piping or low temperature piping, the fabricator shall request a marine inspector to visit his plant to examine his fabricating equipment and to witness the qualification tests required by part 57 of this subchapter. One test specimen shall be prepared for each process and welding position to be employed in the fabrication.

* * * * *

PART 57—WELDING AND BRAZING

48. The authority citation for part 57 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 57.02–2 [Amended]

49. In § 57.02–2, paragraph (a)(1) is amended by removing the words "nuclear vessels,".

50. In § 57.06–1, paragraphs (b) and (c) are revised to read as follows:

§ 57.06–1 Production test plate requirements.

* * * * *

(b) Main power boilers shall meet the test plate requirements for Class I pressure vessels.

(c) Test plates are not required for heating boilers or Class III pressure vessels. Test plates are not required for main power boilers or pressure vessels constructed of P–1 material as listed in QW 422 of the ASME Code whose welded joints are fully radiographed as required by Part 52 or 54 of this subchapter as applicable except when toughness tests are required in accordance with § 57.06–5. When toughness tests are required all prescribed production tests shall be performed.

§ 57.06–4 [Amended]

51. In § 57.06–4, paragraph (a) is amended by removing the words "and Classes A and B nuclear vessels".

52. In § 57.06–5, paragraph (a) is revised to read as follows:

§ 57.06–5 Production toughness testing.

(a) In addition to the test specimens required by § 57.06–4(a), production toughness test plates shall be prepared for Classes I–L and II–L pressure vessels in accordance with subpart 54.05 of this subchapter.

* * * * *

PART 58—MAIN AND AUXILIARY MACHINERY AND RELATED SYSTEMS

53. The authority citation for part 58 is revised to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 58.03–1 [Amended]

54. In § 58.03–1, paragraph (b) is amended by removing the entry for American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code, Section III, Division 1, Rules for Construction of Nuclear Power Plant Components, July 1989 with 1989 addenda.

PART 61—PERIODIC TESTS AND INSPECTIONS

55. The authority citation for part 61 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 61.01–1 [Amended]

56. In § 61.01–1, paragraph (a) is amended by removing the words "nuclear pressure vessels,".

§ 61.10–1 [Amended]

57. Section 61.10–1 is amended by removing the designation "(a)" from paragraph (a) and removing paragraph (b).

§ 61.15–1 [Amended]

58. Section § 61.15–1 is amended by removing the designation "(a)" from paragraph (a) and removing paragraph (b).

Subpart 61.25—[Removed]

59. Subpart 61.25 is removed.

PART 67—DOCUMENTATION OF VESSELS

60. The authority citation for part 67 continues to read as follows:

Authority: 14 U.S.C. 664; 31 U.S.C. 9701; 42 U.S.C. 9118; 46 U.S.C. 2103, 2107, 2110; 46 U.S.C. app. 841a, 876; 49 CFR 1.46.

61. Section 67.3 is amended by removing the definitions for *Ocean thermal energy conversion facility* and *Ocean thermal energy conversion plantship* and by revising the definition for *Vessel* to read as follows:

§ 67.3 Definitions.

* * * * *

Vessel includes every description of watercraft or other contrivance capable of being used as a means of transportation on water, but does not include aircraft.

* * * * *

PART 70—GENERAL PROVISIONS

62. The authority citation for part 70 is amended to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.45, 1.46; Section 70.01–15 also issued under the authority of 44 U.S.C. 3507.

§ 70.05–12 [Removed]

63. Section 70.05–12 is removed.

§ 70.10–30 [Removed]

64. Section 70.10–30 is removed.

PART 71—INSPECTION AND CERTIFICATION

65. The authority citation for part 71 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

§ 71.01–10 [Amended]

66. In § 71.01–10, paragraph (a) is amended by removing the words "For nuclear vessels see also § 79.10–1 of this subchapter.".

§ 71.20–15 [Amended]

67. Section 71.20–15 is amended by removing the paragraph designation "(a)" from paragraph (a) and removing paragraph (b).

§ 71.25–10 [Amended]

68. Section 71.25–10 is amended by removing the paragraph designation "(a)" from paragraph (a) and removing paragraph (b).

69. In § 71.75–5, the section heading and paragraph (a) are amended to read as follows:

§ 71.75–5 Passenger Ship Safety Certificate.

(a) All vessels on an international voyage are required to have a "Passenger Ship Safety Certificate."

* * * * *

§ 71.75–10 [Amended]

70. Section 71.75–10 is amended by removing paragraph (c).

§ 71.75–20 [Amended]

71. In § 71.75–20, paragraph (c) is amended by removing the words "or the Nuclear Passenger Ship Safety Certificate".

PART 72—CONSTRUCTION AND ARRANGEMENT

72. The authority citation for part 72 is revised to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 72.25–5 [Removed]

73. Section 72.25–5 is removed.

PART 76—FIRE PROTECTION EQUIPMENT

74. The authority citation for part 76 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 76.10–10 [Amended]

75. Section 76.10–10 is amended by removing paragraph (l)(2) and redesignating paragraph (l)(3) as paragraph (l)(2).

PART 78—OPERATIONS

76. The authority citation for part 78 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3306, 6101; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

§ 78.30–30 [Removed]

77. Section 78.30–30 is removed.

PART 79—[REMOVED]

78. Part 79 is removed.

PART 90—GENERAL PROVISIONS

79. The authority citation for part 90 is revised to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 90.05–40 [Removed]

80. Section 90.05–40 is removed.

§ 90.10–24 [Removed]

81. Section 90.10–24 is removed.

PART 91—INSPECTION AND CERTIFICATION

82. The authority citation for part 91 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

83. In § 91.01–10, paragraph (a) is revised to read as follows:

§ 91.01–10 Period of validity.

(a) Certificates of inspection will be issued for periods of either 1 or 2 years. Application may be made by the master, owner, or agent for inspection and issuance of a new certificate of inspection at any time during the period of validity of the current certificate.

* * * * *

§ 91.20–15 [Amended]

84. Section 91.20–15 is amended by removing paragraph (c).

§ 91.25–10 [Amended]

85. Section 91.25–10 is amended by removing the paragraph designation "(a)" from paragraph (a) and removing paragraph (b).

86. Section 91.60–1 is revised to read as follows:

§ 91.60–1 Application.

The provisions of this subpart shall apply to all cargo vessels on an international voyage.

§ 91.60–30 [Removed]

87. Section 91.60–30 is removed.

§ 91.60–40 [Amended]

88. Section 91.60–40 is amended by removing paragraph (e) and redesignating paragraph (f) as paragraph (e).

PART 95—FIRE PROTECTION EQUIPMENT

89. The authority citation for part 95 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 95.10–10 [Amended]

90. Section 95.10–10 is amended by removing paragraph (l)(2) and redesignating paragraphs (l)(3) and (l)(4) as paragraphs (l)(2) and (l)(3), respectively.

PART 97—OPERATIONS

91. The authority citation for Part 97 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 2103, 3306, 6101; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

§ 97.27–10 [Removed]

92. Section 97.27–10 is removed.

PART 99—[REMOVED]

93. Part 99 is removed.

PART 106—[REMOVED]

94. Part 106 is removed.

PART 150—COMPATIBILITY OF CARGOES

95. The authority citation for part 150 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.45, 1.46. Section 150.105 issued under 44 U.S.C. 3507; 49 CFR 1.45.

Subpart A—[Amended]

96. The designation "Subpart A—Compatibility of Cargoes" for § 150.105 through § 150.170 is removed.

Subpart B—[Removed]

97. Subpart B of Part 150 is removed.

PART 154—SAFETY STANDARDS FOR SELF-PROPELLED VESSELS CARRYING BULK LIQUEFIED GASES

98. The authority citation for part 154 continues to read as follows:

Authority: 46 U.S.C. 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

99. Section 154.1745 is revised to read as follows:

§ 154.1745 Vinyl chloride: Transferring operations.

A vessel carrying vinyl chloride must meet the requirements of § 151.50–34(g) through (k) of this chapter.

PART 171—SPECIAL RULES PERTAINING TO VESSELS CARRYING PASSENGERS

100. The authority citation for part 171 is revised to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46.

101. In § 171.001, paragraph (b) is revised to read as follows:

§ 171.001 Applicability.

* * * * *

(b) Specific sections of this part also apply to nautical school ships, sailing school vessels and oceanographic vessels. The applicable sections are listed in subparts C and D of part 173 of this chapter.

PART 174—SPECIAL RULES PERTAINING TO SPECIFIC VESSEL TYPES

102. The authority citation for part 174 is revised to read as follows:

Authority: 42 U.S.C. 9118, 9119, 9153; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

103. Section 174.005 is revised to read as follows:

§ 174.005 Applicability.

Each of the following vessels must comply with the applicable provisions of this part:

(a) Deck Cargo Barge.

(b) Mobile offshore drilling unit (MODU) inspected under Subchapter IA of this chapter.

(c) Tugboat and towboat inspected under Subchapter I of this chapter.

(d) Self-propelled hopper dredge having an assigned working freeboard.

(e) Oceangoing ships of 500 gross tons or over, as calculated by the International Convention on Tonnage Measurement of Ships, 1969, designed primarily for the carriage of dry cargoes, including roll-on/roll-off ships.

Subpart D—[Removed and Reserved]

104. Subpart D of part 174 is removed and reserved.

Subpart F—[Removed and Reserved]

105. Subpart F of part 174 is removed and reserved.

PART 188—GENERAL PROVISIONS

106. The authority citation for part 188 is revised to read as follows:

Authority: 46 U.S.C. 2113, 3306; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 188.05–15 [Removed]

107. Section 188.05–15 is removed.

§ 188.10–47 [Removed]

108. Section 188.10–47 is removed.

PART 189—INSPECTION AND CERTIFICATION

109. The authority citation for part 189 is revised to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1890 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; 49 CFR 1.46.

110. In § 189.01–10, paragraph (a) is revised to read as follows:

§ 189.01–10 Period of validity.

(a) Certificates of Inspection will be issued for periods of either 1 or 2 years. Application may be made by the master, owner, or agent for inspection and issuance of a new certificate of inspection at any time during the period of validity of the current certificate.

* * * * *

§ 189.20–15 [Amended]

111. Section 189.20–15 is amended by removing paragraph (c).

§ 189.25–10 [Amended]

112. Section 189.25–10 is amended by removing paragraph (b) and redesignating paragraph (c) as paragraph (b).

113. Section 189.60–1 is revised to read as follows:

§ 189.60–1 Application.

The provisions of this subpart shall apply to all oceanographic research vessels on an international voyage. (See § 188.05–10 of this subchapter.)

§ 189.60–30 [Removed]

114. Section 189.60–30 is removed.

§ 189.60–40 [Amended]

115. Section 189.60–40 is amended by removing paragraph (e) and redesignating paragraph (f) as paragraph (e).

Dated: September 5, 1995.

J.C. Card,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[I.D. 091295D]

Atlantic Tuna Fisheries; Bluefin Tuna Closure and Quota Reallocation

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure and reallocation.

SUMMARY: NMFS has determined that the Atlantic bluefin tuna (ABT) General category quota and Angling category quota for 1995 have been reached. Therefore, the General category fishery will be closed effective at 11:59 p.m. on September 12, 1995, and the Angling category fishery will be closed effective at 11:59 p.m. on September 17, 1995. This action is being taken to prevent further overharvest of these categories. NMFS also announces a transfer of 15 mt of ABT from the longline-south Incidental subcategory to the longline-north Incidental subcategory. NMFS has determined that the fisheries landing ABT under the longline-south Incidental subcategory will not achieve the full 1995 allocation. NMFS also transfers from the Reserve category to account for overharvest in the General, Harpoon, and Angling categories. These actions are being taken to extend the season for the longline-north Incidental subcategory, ensure additional collection of biological assessment and monitoring data, and prevent waste of bluefin tuna that might otherwise be discarded dead.

EFFECTIVE DATE: The General category closure is effective 11:59 p.m. local time on September 12, 1995, through December 31, 1995. The Angling category closure is effective 11:59 p.m. local time on September 17, 1995, through December 31, 1995. The longline and reserve inseason transfers are effective September 12, 1995.

FOR FURTHER INFORMATION CONTACT: John Kelly, 301–713–2347, or Kevin B. Foster, 508–281–9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) governing the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 285. Section 285.22 subdivides the U.S. quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories.

Closure

Implementing regulations for the Atlantic tuna fisheries at 50 CFR 285.22 provide for a total annual quota of 438 mt of large medium and giant Atlantic bluefin tuna to be harvested from the regulatory area by vessels permitted in the General category. To date, over 527 mt have been harvested. Regulations also provide for an annual quota of 324 mt for the Angling category. Best available estimates indicate that the Angling category quota has been harvested for 1995.

NMFS is required, under 285.20(b)(1), to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the catch of ABT will equal the quota applicable to any period and publish a **Federal Register** announcement stating that fishing for, retaining, possessing or landing ABT must cease on a date and at a specified hour, and not recommence until the opening of the subsequent quota period.

Fishing for, retention, possessing, or landing large medium or giant ABT by vessels in the General category must cease at 11:59 p.m. local time September 12, 1995. Fishing for, retention, possessing, or landing schools, large schools, small medium, large medium, or giant ABT by vessels in the Angling category must cease at 11:59 p.m. local time September 17, 1995. The intent of this action is to prevent further overharvest of the quota established for these categories.

The Harpoon category was previously closed on August 11, 1995 (60 FR 42469, August 16, 1995). The Incidental and Purse Seine categories will remain open until quotas for these categories are reached.

Inseason Transfers

Under the implementing regulations at 50 CFR 285.22(f), the Assistant Administrator for Fisheries, NOAA (AA), has the authority to make adjustments to quotas involving transfers between vessel categories or, as appropriate, subcategories if, during a single year quota period or the second year of a biannual quota period as defined by ICCAT, the AA determines, based on landing statistics, present year catch rates, effort, and other available information, that any category, or as appropriate, subcategory, is not likely to take its entire quota as previously allocated for that year. Given that determination, the AA may transfer inseason any portion of the quota of any fishing category to any other fishing category or to the reserve after considering the following factors: (1) The usefulness of information obtained from catches of the particular category of the fishery for biological sampling and monitoring the status of the stock; (2) the catches of the particular gear segment to date and the likelihood of closure of that segment of the fishery if no allocation is made; (3) the projected ability of the particular gear segment to harvest the additional amount of Atlantic bluefin tuna before the anticipated end of the fishing season; (4) the estimated amounts by which quotas established for other gear segments of the fishery might be exceeded.

The bluefin have migrated to their summer feeding grounds in New England waters and incidental catch by longline vessels operating south of 34° N. lat. is no longer expected to occur. A total of 60 mt currently remain of the amount allocated to this southern subcategory. The Incidental category longline-north has exceeded its allocation of 23 mt for vessels fishing north of 34° N. lat. Once the quota is reached for this northern subcategory, any bluefin tuna incidentally taken by longline vessels must be discarded at sea. In order to prevent waste of bluefin tuna that might otherwise be discarded dead, it is reasonable to transfer quota from the southern to the northern subcategory.

Reallocating 15 mt from the Incidental longline-south category responds to the criteria listed above as follows: Incidental category landings are a major contributor to the collection of biological data on this fishery; incidental catches by longline vessels in 1995 have been high, and it would be necessary to close this subcategory of the fishery unless additional quota allocation were made.

NMFS also transfers from the Reserve to the General, Harpoon, and Angling categories. The purpose of these transfers is to cover overharvest in these categories.

Classification

This action is taken under 50 CFR 285.20(b) and 50 CFR 285.22 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 971 *et seq.*

Dated: September 12, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

50 CFR Part 672

[Docket No. 950206041–5041–01; I.D. 090895A]

Groundfish of the Gulf of Alaska; Prohibit Retention of Sablefish in the West Yakutat District

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting retention of sablefish by vessels using trawl gear in the West Yakutat district of the Gulf of Alaska (GOA). NMFS is requiring that catches of sablefish by vessels using trawl gear in this area be treated in the same manner as prohibited species and discarded at sea with a minimum of injury. This action is necessary because the share of the sablefish total allowable catch (TAC) assigned to trawl gear in the West Yakutat district of the GOA has been reached.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), October 1, 1995, until 12 midnight, A.l.t., December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Thomas Pearson, 907–486-6919.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for the Groundfish Fishery of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the [illegible] 50 CFR parts 620 and 672.

In accordance with § 672.24(c)(2), the share of the sablefish TAC assigned to trawl gear in the West Yakutat district of the GOA was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8470, February 14, 1995), as 205 metric tons.

The Director, Alaska Region, NMFS, has determined, in accordance with § 672.24(c)(3)(ii), that the share of the sablefish TAC assigned to trawl gear in the West Yakutat district of the GOA has been reached. Therefore, NMFS is requiring that further catches of sablefish by vessels using trawl gear in the West Yakutat district of the GOA be treated as prohibited species in accordance with § 672.20(e).

Classification

This action is taken under 50 CFR 672.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 11, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[Docket No. 950414105–5227–03; I.D. 082495D]

Groundfish of the Bering Sea and Aleutian Islands; Observer Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Atmospheric and Oceanic Administration (NOAA), Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NMFS issues a technical amendment to the final rule implementing Amendment 35 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands (FMP). This action clarifies observer coverage requirements established for shoreside processing facilities and mothership processor vessels during the second pollock season.

EFFECTIVE DATE: September 18, 1995.

FOR FURTHER INFORMATION CONTACT: Kaja Brix, 907–586–7228.

SUPPLEMENTARY INFORMATION: The final rule implementing Amendment 35 to the FMP was published in the **Federal Register** on July 5, 1995 (60 FR 34904). The preamble to that rule explains that regulatory amendments were implemented that "would increase 1995 observer coverage for mothership processor vessels and for some shoreside processors receiving pollock harvested in the catcher vessel operational area (CVOA)* * *." This technical amendment clarifies the regulatory language of that final rule to more accurately reflect the original purpose and intent of that rule.

The final rule requires a second NMFS-certified observer for mothership processor vessels and certain shoreside processing facilities during the second pollock season, which begins August 15. The intent of the rule is to ensure that processors receiving pollock harvested from the CVOA have adequate observer coverage in order to count accurately the number of nonchinook salmon taken as bycatch in the pollock fishery. Amendment 35 established a bycatch limit of 42,000 nonchinook salmon for the second pollock season.

The preamble to the final rule explains that shoreside processing plants that "receive pollock harvested from the CVOA during the 1995 nonroe season and that offload fish at two locations on the same dock and have distinct and separate equipment to process those fish will also be required to have an extra observer" (60 FR 34905). A second observer is necessary because of the large volume of pollock that could be offloaded at these facilities and the additional time required by observers to count salmon bycatch. While the regulation uses the term "fish," the intent was to require an additional observer only for those shoreside processors that offload and process pollock at more than one location.

NMFS is clarifying the regulation at § 675.25(b)(2) by changing the word "fish" in § 675.25(b)(2) to "pollock." Thus, it will now be clear that two observers are required only at facilities that meet all three of the following criteria: (1) Receive pollock harvested by catcher vessels in the CVOA during the second pollock season, (2) offload pollock at more than one location on the same dock of that facility, and (3) have distinct and separate equipment at each location to process those pollock. Regulations at § 675.25(b)(1) also require an additional observer on mothership processor vessels that receive pollock from catcher vessels harvesting in the CVOA during the second pollock season. The second observer at shoreside processor facilities and on mothership processor vessels is required until the chum salmon savings area (CSSA) is closed due to attainment of the 42,000 nonchinook bycatch limit. The intent of the regulation is to have the additional observer present at the processor to count the salmon to be counted toward the salmon bycatch limit.

Under the final rule, salmon bycatch during the second pollock season is counted through October 14 or until the bycatch limit is reached, whichever occurs first. The additional observer is not necessary once the bycatch limit is reached or after October 14. NMFS is clarifying the intent of the regulations to require the additional observer to be present until either the CSSA is closed (i.e., the bycatch limit has been reached) or October 15, whichever occurs first.

Classification

This technical amendment clarifies the regulations requiring observer coverage in shoreside processing facilities and on mothership processor vessels and relieves a regulatory restriction. The requirement for additional observers to monitor the offloading or processing of fish other than pollock during the second pollock season does not provide accurate salmon bycatch data for the pollock fishery and does not provide any other significant benefits. Similarly, additional observers are not needed once the nonchinook bycatch limit has been reached. These requirements impose a burden that is unnecessary and additional delay in removing that requirement would result in additional observer expense without providing any significant public benefit. Consequently, the Assistant Administrator for Fisheries, NOAA, finds that there is good cause to waive prior notice and opportunity to comment on this action. Because this action relieves a restriction, under U.S.C. 533(d)(1), a delay in the effective date is not necessary.

This rule is exempt from procedures of the Regulatory Flexibility Act to prepare a regulatory flexibility analysis because the rule is issued without opportunity for prior public comment. No analysis has been prepared.

This rule is exempt from review under E.O. 12866.

List of Subjects in 50 CFR Part 675

Fisheries, Reporting and recordkeeping requirements.

Dated: September 11, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For reasons set out in the preamble 50 CFR part 675 is amended to read as follows:

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

1. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 et *seq.*

2. In § 675.25, paragraph (b) is revised to read as follows:

§ 675.25 Observer requirements.

* * * * *

(b) *Additional observer coverage requirements applicable through December 31. 1995.* (1) Each mothership processor vessel that receives pollock harvested by catcher vessels in the catcher vessel operational area, defined at § 675.22(g), during the second pollock season that starts on August 15 under § 675.23(e), is required to have a second NMFS-certified observer aboard, in addition to the observer required under § 677.10(a)(1)(i) of this chapter, for each day of the second pollock season until the chum salmon savings area is closed under § 675.22(h)(2) or October 15, whichever occurs first.

(2) Each shoreside processor that offloads pollock at more than one location on the same dock and has distinct and separate equipment at each location to process those pollock and that receives pollock harvested by catcher vessels in the catcher vessel operational area, defined at § 675.22(g), during the second pollock season that starts on August 15, under § 675.23(e), is required to have a NMFS-certified observer, in addition to the observer required under § 677.10(a)(1)(i) of this chapter, at each location where pollock is offloaded, for each day of the second pollock season until the chum salmon savings area is closed under § 675.22(h)(2) of this chapter, or until October 15, whichever occurs first.

Proposed Rules

Federal Register
Vol. 60, No. 180
Monday, September 18, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Parts 353 and 354

[Docket No. 90–117–2]

Export Certificates

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of reopening and extension of comment period.

SUMMARY: We are reopening and extending the comment period for our proposed rule that would revise completely the "Phytosanitary Export Certification" regulations, which concern inspection and phytosanitary certification of plants and plant products offered for export.

DATES: Consideration will be given only to written comments on Docket No. 90–117–1 that are received on or before October 16, 1995.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 90–117–1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 90–117–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Ave., SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Mr. Leonard M. Crawford, Senior Operations Officer, Plant Protection and Quarantine, Port Operations, PPQ, APHIS, Suite 4C03, 4700 River Road Unit 139, Riverdale, MD 20737–1228; (301) 734–8537.

SUPPLEMENTARY INFORMATION:

Background

On August 16, 1995, we published in the **Federal Register** (60 FR 42472–42479, Docket No. 90–117–1) a proposal to revise completely the "Phytosanitary Export Certification" regulations in 7 CFR 353, which concern inspection and phytosanitary certification of plants and plant products offered for export.

Comments on the proposed rule were required to be received on or before September 15, 1995. We are extending the comment period on Docket No. 90–117–1 for an additional 30 days. This action will allow interested persons additional time to prepare and submit comments.

Authority: 7 U.S.C. 147a; 21 U.S.C. 136 and 136a; 44 U.S.C. 35; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, this 11th day of September 1995.

Terry L. Medley,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 95–23031 Filed 9–15–95; 8:45 am]

BILLING CODE 3410–34–P

FEDERAL TRADE COMMISSION

16 CFR Part 24

Guides for Select Leather and Imitation Leather Products

AGENCY: Federal Trade Commission.

ACTION: Request for public comment on proposed Guides for Select Leather and Imitation Leather Products.

SUMMARY: The Federal Trade Commission (the "Commission"), as part of its periodic review of its rules and guides, announces that it has concluded a review of its Guides for the Luggage and Related Products Industry ("Luggage Guides"); Guides for Shoe Content Labeling and Advertising ("Shoe Content Guides"); and Guides for the Ladies' Handbag Industry ("Handbag Guides"). The Commission rescinds these three Guides in a document published elsewhere in this issue of the **Federal Register**. The Commission now seeks public comment on proposed Guides for Select Leather and Imitation Leather Products. The proposed Guides combine relevant portions of the three Guides, update certain language used in the Guides, and make other modifications to clarify and streamline the provisions of the Guides. The Commission has included within the coverage of the proposed combined Guides the provisions of the Commission's Trade Regulation Rule Concerning Misbranding and Deception as to Leather Content of Waist Belts ("Waist Belt Rule").

DATES: Written comments on the proposed Guides for Select Leather and Imitation Leather Products must be submitted by October 18, 1995.

ADDRESSES: Written comments should be submitted to the Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580, telephone number (202) 326–2506. Comments should be identified as "16 CFR Part 24—Comment—Proposed Guides for Select Leather and Imitation Leather Products".

FOR FURTHER INFORMATION CONTACT: Susan E. Arthur, Attorney, (214) 767–5503, Federal Trade Commission, Dallas Regional Office, 100 N. Central Expressway, Suite 500, Dallas, Texas 75201.

SUPPLEMENTARY INFORMATION:

I. Background

The Luggage Guides, promulgated on February 27, 1979, address potential deception in the sale, offering for sale, and distribution of luggage and related products. Specific industry guidance is provided by the Guides in connection with the following:

—disclosures to be made for products made of split leather, imitation leather or processed leather, or products which contain backing material;
—representations that products are made from the skin of a fictitious animal;
—the use of words, terms, depictions or devices that may indicate that a product is made of any material when it is not;
—representations that a product is wholly of a particular composition;
—representations that a product is leather when it contains ground, pulverized or shredded leather;
—representations that a product is colored, finished or dyed with aniline dye or otherwise dyed, embossed, grained, processed, finished or stitched in a certain manner;

—representations about the hardware, box or frame of products; and
—use of the terms "waterproof," "dustproof," "warpproof," "scuffproof," and "scratchproof."

The Shoe Content Guides were adopted by the Commission on October 2, 1962. They contain industry guidance for the labeling and advertising of shoe content with respect to the following:

—use of the term "leather" on labels and in advertisements;
—disclosures on labels concerning simulated or imitation leather, concealed innersoles, split leather, embossed or processed leather, and ground or shredded leather;
—disclosures in advertisements that depict non-leather parts of shoes or slippers which appear to be made of leather;
—disclosures to be used with terms that are suggestive of leather (*e.g.*, "Duraleather"); and
—use of words or terms which would convey the impression that shoes or slippers are made of a certain material when they are not.

The Handbag Guides were promulgated on June 27, 1969, and address potential misrepresentations regarding ladies' handbags and similar articles. These Guides specifically address misrepresentations as to the composition and other characteristics of such products and provide specific industry guidance regarding the following:

—disclosures to be made with respect to a product's composition;
—representations that a product is colored, finished or dyed with aniline dye or otherwise dyed, embossed, grained, processed, finished or stitched in a certain manner;
—use of the terms "scuffproof," "scratchproof," "scuff resistant," and "scratch resistant;" and
—deceptive pricing of products.

In addition, the Handbag Guides address price discrimination, advertising and promotional allowances, and the providing of promotional services and facilities. The Guides also discuss inducing or receiving a discrimination in price, advertising allowance or promotional service or facility.

The Waist Belt Rule, promulgated on June 27, 1964, regulates representations made in the sale, offering for sale, and distribution of men's and boy's belts, and women's and children's belts when not offered for sale as part of a garment. The Rule states that it is an unfair method of competition and an unfair or deceptive act or practice to:

—represent that a belt not made from the hide of an animal is leather;
—represent that a belt is "leather" when it contains ground, pulverized, or shredded leather;
—represent that a product is "leather" when it contains split leather;
—represent that a belt is made from a specified animal hide when it is not
—represent that a product is wholly of a particular composition when it is not;
—sell or distribute belts which have the appearance of leather, but which are made of split leather or ground, pulverized or shredded leather or of non-leather material, unless proper disclosure is made;
—sell or distribute belts which have been processed so as to have the appearance of a different type of leather, unless proper disclosure is made; and
—sell or distribute belts having an outer surface of leather or other material, which are backed with a different kind of leather or non-leather material having the appearance of leather, unless proper disclosure is made.

In response to a request for public comment on the Luggage Guides, the Shoe Content Guides and the Ladies' Handbag Guides, the Commission received 12 comments. The Commission received 10 comments regarding the Waist Belt Rule. Only three of the Waist Belt Rule comments were not also submitted in response to the request for comments on the three Guides.[1]

The **Federal Register** notice requesting comments on the three sets of Guides contained a list of questions designed to assist the Commission in determining whether the Guides should be maintained, amended or rescinded. Ten of the comments supported retaining the Guides in some form,[2] one expressed no opinion on the issue,[3] and one comment merely asked a question.[4] Six of the comments were from consumers,[5] one was from a leather tanning company,[6] one was from a manufacturer of wallets,[7] and four were from trade associations.[8] The following discussion regarding the comments received is grouped according to the questions posed in the notice. A number of the comments dealt with issues common to all of the Guides and the Rule. The comments for all four are addressed together.

(1) Is there a continuing need for the Guides? Ten of the comments indicated that there is a continuing need for the Guides.[9]

(a) What benefits have the Guides provided to purchasers of the products or services affected by the Guides?

The comments received indicate that the Guides provide a number of benefits to consumers. Two comments suggested that consumers benefit from the Guides because the Guides require identification of imitation leather content, which, when used in shoes, may cause feet to sweat excessively.[10] Another comment stated that the disclosure requirements in the Guides benefit consumers because leather has special properties of durability, breathability, and flexibility.[11] One comment indicated that animal lovers, vegetarians and others who do not wish to wear leather need to know what they are buying.[12] Four comments indicated that the requirements of the Guides otherwise assist consumers in making purchasing decisions.[13]

(b) Have the Guides imposed costs on purchasers? The comments indicated that costs to purchasers are minimal.[14]

(2) What changes, if any, should be made to the Guides to increase the benefits of the Guides to purchasers?

A number of the comments suggested that certain changes be made to the Guides. Generally, these suggestions fall into the following categories: Definitions and use of the term "Leather," Disclosure Requirements, Scope of the Guides, and Use of the term "Bonded Leather."

—Definitions and Use of the Term "Leather"

One comment suggested that the Guides incorporate definitions of the terms "Leather," "Bonded Leather," and "Manmade." [15] Another comment suggested that a section should be added stating what materials are covered and giving a definition of each.[16] These additional definitions are not necessary because the Guides clearly cover all types of leather and all materials with the appearance of leather.

Three comments suggested that "man-made" should be used to describe certain non-leather products rather than "simulated leather" and similar terms using the word "leather." [17] One comment suggested that "man-made" be added to the list of examples of non-leather products and that "urethane" be recognized as a material which is often used in industry products.[18] The terms listed in the Guides as examples of appropriate disclosures for non-leather materials are adequate and would clearly indicate to consumers that a particular material is not leather. Because these terms are merely examples, it is not necessary to make additions to the list.

Two comments urged that the Guides be amended to allow split leather to be called "leather" because the European Union countries allow that term to be used without qualification to describe split leather.[19] However, insufficient support was presented to justify modification of this aspect of the Guides. In support of preservation of the Guides' distinction between top grain and split leather, one comment stated that split grain is less expensive, less attractive, and less durable than top grain leather, and that split leather is subject to "crocking." [20] Another comment stated that the Guides should continue to permit only top grain leather to be called "leather" or "genuine leather" and that other forms of leather should include qualifying words.[21] The apparent differences between the performance and appearance of top grain leather and that of split leather, as well as possible consumer expectations with regard to these materials, indicate that the Guides should continue to state that only top grain leather products should be called "leather" without qualification.

—Disclosure Requirements

The Guides contain a section specifically setting forth a method of making disclosures. Regarding the form of disclosures, one comment suggested that the Luggage Guides should be amended to state that the type of outer material used in the product must be permanently stamped on the product or on a label sewn into the product and that composition information regarding any other part of the product may be stamped either on the product, or on a tag, label, or card attached thereto.[22] There is insufficient justification for this amendment because consumers are adequately protected by the current provision which provides that disclosures should be stamped either on the product or on a tag, label, or card attached to the product until the consumer receives the item. A comment regarding the Waist Belt Rule suggested that using abbreviations in disclosures may be deceptive.[23] Some abbreviations that might be used may not be readily understood by consumers; however, the current disclosure provisions in the Guides already discourage deceptive abbreviations.

A suggestion was made in one comment to adopt the "present industry practice" of identifying embossed products by the name of the animal skin and by the name of the animal which is imitated in the appearance of the material, for example, "pigskin grain cowhide." [24] This method may be deceptive because it may be unclear which term describes the composition and which term describes the imitated grain. The Guides are not changed with regard to this type of disclosure.

One comment urged the Commission to delete the disclosure provision relating to composition of backing material because it was alleged that the provision was confusing and did not reflect current industry practice. It was further alleged that disclosures were unnecessary because backing material is not visible and is only used as support for the outer covering.[25] Because no substantiation was provided for these allegations, this change has not been made.

A suggestion was made that, due to a change in consumer preferences, the Commission should delete the provision regarding affirmative disclosure of manmade materials.[26] This comment stated that great strides have been made in the manufacture of synthetic materials and that such materials are often preferred. However, as discussed above, it appears that consumers believe that the Guides' suggested disclosures relating to manmade materials provide important information. Therefore, the Commission is not making the recommended change. The same comment stated that the Guides should be "clarified" with regard to multi-material uppers, and that a disclosure such as "leather upper with manmade materials" should be allowed. The Guides currently indicate that disclosure as to individual components should be made; therefore, a broad, non-specific disclosure would not be in accordance with the Guides. The recommended change has not been made.

An additional comment argued that the Guides should require country of origin disclosures.[27] Country of origin labeling for imported products is addressed by statute and U.S. Customs Service regulations.[28] The FTC Guides address the nature of the product, not its source. Therefore, incorporation of such a requirement in these Guides would be inappropriate. Another comment stated that efforts to acquaint foreign manufacturers with the Guides should be made.[29] While this suggestion has merit, it is not appropriate to address it in the Guides.

—Scope of the Guides

Several of the comments argued that the scope of the Guides should be modified. One comment concerning the Luggage Guides suggested that Parts 24.3 (deceptive practices as to aniline finish, graining, embossing and processing), 24.4 (deception as to hardware, frame or box) and 24.5 (misuse of the terms "waterproof," "dustproof," "warpproof," "scuffproof," and "scratchproof") should be deleted because they deal with specific deceptive claims that are covered by the general deception paragraph, 24.1.[30] Part 24.4 is deleted because it does not deal with the nature of leather and imitation-leather materials and is appropriately handled in the general deception paragraph. However, the other two sections, which deal primarily with the processing and manufacturing of materials used in leather and imitation-leather products, provide useful guidance for industry members and are retained.

A suggestion was made that the Shoe Content Guides should apply only to shoe uppers and outersoles because those are the parts of a shoe upon which consumers base decisions, and there is limited space on a shoe for markings.[31] Another comment urged that the Guides should not apply to concealed innersoles because consumers expect that the concealed portions of footwear bottoms, particularly innersoles, are made of synthetic material.[32] However, no supporting evidence of consumer beliefs was supplied for either of these comments. Since it appears that useful information regarding other components of industry products is provided pursuant to the Guides, the Guides will remain as they are with respect to this issue.

—Use of the Term "Bonded Leather"

Several of the comments received dealt with the issue of "bonded leather," which generally refers to material made of leather fibers held together with a bonding agent. Several comments suggested permitting use of the term "bonded leather" for materials containing at least 75% leather fiber.[33] This, it was argued, would allow limited addition of non-leather fibers to improve strength, humidity expansion and heat resistance.[34] One comment stated that this 75% figure reflects a "widespread consensus" in the leather tanning and manufacturing industries.[35] Another called 75% an "industry practice." [36] However, insufficient evidence was submitted to establish that the 75% figure is an industry standard.

Even if the 75% figure were an industry practice or standard, it would not prevent deception. In a comment regarding the Waist Belt Rule, consumer survey evidence was provided in support of use of the term "bonded leather." [37] However, this survey indicated that 23.2% of the people surveyed believe the term means genuine cowhide leather. 57.2% believe the term means reprocessed leather scrap.[38] Although the submitters of the survey asserted that "reprocessed leather scrap" was the correct response, if other fibers have been added to leather fibers, it would be deceptive to refer to the entire mixture of materials as leather scrap. Use of the term "bonded leather" standing alone violates the Guides as they existed prior to this time. Without further qualification, the term would not appear to inform consumers that non-leather fibers are contained in the material. Further, some consumers may interpret the term "bonded" to mean material of a greater quality than leather,[39] or strengthened or reinforced leather.

A final comment suggested adding the term "bonded leather" to that section of the Guides which addresses use of the terms "ground, pulverized or shredded leather." [40] This suggestion has merit. Currently, two of the Guides and the Rule would allow use of terms such as "pulverized leather" to describe the content of materials. However, the Luggage Guides appear to suggest that disclosure be made of all materials contained in ground, pulverized or shredded leather. Such disclosures are useful, but may be lengthy. The proposed Guides now state that manufacturers should only use terms such as "ground leather," "pulverized leather," "shredded leather" or "bonded leather" to identify the products made of such materials if there is a disclosure of the amount of leather fibers and of the amount of non-leather substances contained in the material.

One comment specifically opposed use of the term "bonded leather," and suggested that ground, pulverized or shredded leather should continue to be identified as non-leather material, with disclosures such as "simulated leather containing leather fibers." [41] Another comment stated that calling a product leather if it contains little leather is deceptive.[42] The Commission believes that the term "bonded leather" could be confusing to consumers who do not know that "bonded leather" may include substances other than leather. This is equally true with respect to ground, pulverized or shredded leather. However, a disclosure of the amount of leather fiber and of the amount of non-leather materials in a product is an effective way of preventing this deception. Further, providing a means by which a product which contains substantial amounts of leather can be distinguished in some way from totally simulated leather would be in the best interest of consumers. Thus, the proposed Guides state that if the terms "ground leather," "pulverized leather," "shredded leather" or "bonded leather" are used to describe materials, then a disclosure of the percentage of leather fiber and of the percentage of other substances contained should be made.

(a) How would these changes affect the costs the Guides impose on firms subject to their requirements?

The comment suggesting country of origin labeling stated that such a requirement would impose no additional cost on firms.[43] One of the comments urging that the definition of leather include split leather stated that costs would be reduced by permitting a single standard for labeling in this country and in the European Union. No other comments addressed this question.

(b) Would it be useful to the affected industries if the Luggage Guides, the Shoe Content Guides, and the Handbag Guides were combined into one set of industry guides that address all of these products or leather products in general?

One comment recommended that all Guides concerning leather be consolidated.[44] Another said that one set of guides should be made to cover all leather-using industries.[45] One comment stated that the Guides could be generalized to many if not all industries.[46] One comment urged the Commission to maintain separate Guides because the manufacturing processes are separate and distinct.[47] The Luggage and Leather Goods Manufacturers of America stated that it did not endorse combining the Guides.[48] A final comment suggested that a set of leather definitions be developed to apply to all finished goods.[49]

The Commission believes that the three Guides should be combined because of the similarity of the composition issues addressed by each of the Guides. Further, the Commission believes it is appropriate to include in the combined Guides the provisions of the Waist Belt Rule. However, the Commission seeks further comments on the issue of whether the Guides should be expanded to cover other products containing leather and imitation leather. These products would include, for example, clothing, furniture,[50] watchbands, and equestrian items such as saddles. In particular, the Commission seeks comment as to whether there are special considerations for these different products which are not addressed by the proposed Guides.

(3) What significant burdens or costs, including costs of adherence, have the Guides imposed on firms subject to their requirements?

The comments indicated that the costs are minimal.[51]

(a) Have the Guides provided benefits to such firms?

One comment said that the Guides give industry members some assurance that all companies are labeling their products consistently and that valid comparisons can be made by consumers.[52]

(4) What changes, if any, should be made to the Guides to reduce the burdens or costs imposed on firms subject to their requirements?

One comment indicated that if the Guides cannot realistically be enforced, then eliminating the regulation would reduce costs.[53] The same comment supported simple, less complex regulation.[54] One of the comments stated that costs would be reduced by permitting a single standard for labeling in this country and in the European Union. Another comment stated that no changes to the Guides need be made specifically to reduce costs of compliance.[55]

(a) How would these changes affect the benefits provided by the Guides?

No comments were received regarding this question.

(5) Do the Guides overlap or conflict with other federal, state, or local laws or regulations?

One comment indicated that there is no overlap with other laws or regulations.[56] Another comment suggested that the Commission examine the labeling practices in the European Union and review the North American Free Trade Agreement and the Caribbean Basin Initiative.[57] A review of information provided by one commenter regarding the European Union Directive on Footwear Labeling revealed little similarity between it and the Guides. The calculation of shoe material area used in the directive (if two materials are present, they must be listed in descending order of area or volume) and the differences in terminology may serve to make the Guides more, rather than less, complex. Further, unlike the Guides, the directive allows use of symbols to indicate type of material. While symbols might be an effective, simpler way of providing information to consumers, symbols have not been used before in this country in this context. An extensive consumer education program would be required to implement the use of such symbols. Further, the Guides currently provide consumers with more information than does the use of the symbols adopted by the European Union. A review of NAFTA and CBI revealed no conflicts with the Guides.

(6) Since the Guides were issued, what effects, if any, have changes in relevant technology or economic conditions had on the Guides?

Two comments suggested that today's ecological concerns dictate that leather scraps be used in "bonded leather" rather than disposed of as waste.[58] While not designed to address ecological concerns, the Guides may encourage the use of leather scraps because they provide that, if the term "bonded leather" is used, a disclosure regarding the percentage of leather fibers in the material should be made.

As discussed above, two comments urged that the Guides be amended to allow split leather to be called "leather." One of the reasons given for suggesting this change is that technological advances have resulted in a split leather which is superior to that produced years ago.[59] However, another comment encouraged retaining the distinction because split leather is less expensive, less attractive, and less durable than top grain leather, and split leather is subject to "crocking."[60] Insufficient support was presented to justify modification of this aspect of the Guides.

As discussed above, one comment urged the Commission to delete the requirement that the presence of manmade materials be affirmatively disclosed.[61] The comment stated that great strides have been made in the manufacture of synthetic materials and that such materials are often preferred. This recommended change has not been made because it appears that consumers obtain important information from this disclosure and may use this information to select the material of their choice.

(7) Do members of the ladies' handbag industry require these industry-specific Guides for information about the standards applicable to price discrimination and discriminatory promotional allowances, or could equally helpful guidance be obtained from more general sources such as the Fred Meyer Guides?

No comments were received regarding this question. These interpretive statements are duplicative of Sections (a) and (f) of the Robinson-Patman Act with respect to price discrimination, and duplicative of the Guides for Advertising Allowances and Other Merchandising Payments and Services, 16 CFR Part 240 (commonly known as the "Fred Meyer Guides"), which interpret Sections (d) and (e) of the Robinson-Patman Act, and Section 5 of the Federal Trade Commission Act with respect to discriminatory promotional allowances and services. A general statement of policy, such as that contained in the Fred Meyer Guides, is preferable to industry-specific Guides. Therefore, these sections of the Ladies' Handbag Guides have not been incorporated into the proposed Guides.

II. Conclusion

A review of the comments and of the three Guides indicates that retention and consolidation of their basic principles into one set of Guides is clearly warranted. Furthermore, the provisions of the Waist Belt Rule should be incorporated into the consolidated Guides. The Guides and the Waist Belt Rule deal with very similar issues. The nature of the covered products and the related concerns regarding composition are such that combining their provisions would be an efficient and effective way to prevent deception in this area. The Commission also believes that the Guides probably should cover other products made of leather or imitation leather. However, it is seeking additional comment before deciding whether to include such products within the scope of the Guides.

The proposed Guides consolidate 16 CFR Parts 24, 231, and 247. The language of the proposed Guides has been simplified and clarified, as well as updated to reflect current Commission legal standards.

In addition, the proposed Guides incorporate the following modifications:

—The Guides now include all products formerly covered by the three Guides and the Rule; boots were added as well.

—The scope of the Guides has been broadened to include deception in the marketing and advertising of industry products.

—A sentence setting forth the circumstances under which the unqualified term "leather" may be used is included for clarity. A similar provision was contained in the Shoe Guides.

—With regard to ground, pulverized, shredded, or bonded leather, the proposed Guides state that manufacturers of such materials may choose to identify the material as non-leather, or as ground, pulverized, shredded, or bonded leather. The Guides state that if the terms "ground leather," "pulverized leather," "shredded leather," or "bonded leather" are used, a disclosure of the percentages of leather fibers and non-leather substances in the material should be made. The section regarding visible backing material has been clarified with regard to the use of the terms "ground leather," "pulverized leather," "shredded leather," or "bonded leather" to describe backing materials.

—Provisions relating to the terms "scuffproof" and "scratchproof" have been amended to include other terms indicating that the product is resistant to wear. Use of terms such as "scuff resistant" and "scratch resistant" are addressed in an added section. This provision was taken from the Ladies' Handbag Guides.

—The section specifically dealing with deception as to the hardware, frame, or box of luggage has been deleted as unnecessary. This is covered by the general deception section.

—The Shoe Guides have a specific section relating to concealed innersoles. To avoid being too industry-specific, concealed innersoles are addressed in the proposed Guides in a footnote in the section concerning misrepresentations that a product is wholly of a particular composition.

—The Ladies' Handbag Guides included a section regarding deceptive pricing. Deceptive pricing is specifically covered by the general deception section; a separate section is not necessary and is therefore not included in the proposed Guides.[62]

—Finally, for the reasons discussed above, the price discrimination and related areas are not addressed in the proposed Guides.

III. Questions for Comment

The Commission seeks public comment on the following questions:

1. Should the proposed Guides for Select Leather and Imitation Leather Products be expanded in scope to include other products made of leather or imitation leather? Such products might include, but are not limited to, clothing, furniture, watchbands, and equestrian items.

2. Are there special considerations for these or other leather or imitation-leather goods which are not addressed by the proposed Guides? How could any such special considerations be addressed by the Guides?

List of Subjects in 16 CFR Part 24

Advertising, Distribution, Imitation-leather products, Labeling, Ladies' handbags, Leather and leather products industry, Luggage and related products, Shoes, Trade practices, Waist belts.

The Commission proposes to amend Title 16 of the Code of Federal Regulations by adding a new Part 24 to read as follows:

PART 24—GUIDES FOR SELECT LEATHER AND IMITATION LEATHER PRODUCTS

Sec.
24.0 Scope of Guides.
24.1 Deception (general).
24.2 Deception as to composition.
24.3 Deceptive practices as to aniline finish, graining, embossing and processing.
24.4 Misuse of the terms "waterproof," "dustproof," "warpproof," "scuffproof," "scratchproof," "scuff resistant," or "scratch resistant."

Authority: 15 U.S.C. 45, 46.

§ 24.0 Scope of Guides.

These Guides apply to the manufacture, sale, distribution, marketing, or advertising of all kinds or types of leather or simulated-leather trunks, suitcases, traveling bags, sample cases, instrument cases, brief cases, ring binders, billfolds, wallets, key cases, coin purses, card cases, french purses, dressing cases, stud boxes, tie cases, jewel boxes, travel kits, gadget bags, camera bags, ladies' handbags, shoulder bags, purses, pocketbooks, shoes, boots, slippers, belts (when not sold as part of a garment) and similar articles (hereinafter, "industry product").

§ 24.1 Deception (general).

It is unfair or deceptive to misrepresent, directly or by implication, the kind, grade, quality, quantity, material content, thickness, finish, serviceability, durability, price, origin, size, weight, ease of cleaning, construction, manufacture, processing, distribution, or any other material aspect of an industry product.

§ 24.2 Deception as to composition.

It is unfair or deceptive to misrepresent, directly or by implication, the composition of any industry product or part thereof. It is unfair or deceptive to use the unqualified term "leather" or other unqualified terms suggestive of leather unless the industry product so described is composed in all substantial parts of top grain leather.[1] This section includes, but is not limited to, the following:

(a) *Split leather.* If all or part of an industry product is made of split leather and the split leather is visible or if any representation is made as to the product's composition, then the presence of the split leather should be disclosed. For example:

Split Cowhide.

Note: For purposes of these Guides, leather from portions of hides or skins that have been split into two or more thicknesses, other than the grain or hair side, shall be considered split leather.

(b) *Imitation or simulated leather.* If all or part of an industry product is made of non-leather material that appears to be leather, the fact that the material is not leather, or the general nature of the material as something other than leather, should be disclosed. For example:

Not leather;
Imitation leather;
Simulated leather;
Vinyl;
Vinyl coated fabric; or
Plastic.

(c) *Embossed or processed leather.* The kind and type of leather from which an industry product is made should be disclosed when all or part of the product has been embossed, dyed, or otherwise processed so as to simulate the appearance of a different kind or type of leather. For example:

(1) An industry product made wholly of top grain cowhide that has been processed so as to imitate pigskin may be represented as being made of Top Grain Cowhide.

(2) Any additional representation concerning the simulated appearance of an industry product composed of leather should be immediately accompanied by a disclosure of the kind and type of leather in the product. For example:

Top Grain Cowhide With Simulated Pigskin Grain.

(d) *Backing material.* (1) The backing of any material in an industry product with another kind of material should be disclosed when the backing is not apparent upon casual inspection of the product, or when a representation is made which, absent such disclosure, would be misleading as to the product's composition. For example:

---

[50] Representations concerning leather and imitation-leather furniture currently are covered by the Commission's Guides for the Household Furniture Industry, 16 CFR 250.4.

[51] FIA, #7 at 2; LIA, #8 at 2; EK, #11 at 1.

[52] EK, #11 at 2.

[53] LIA, #8 at 2.

[54] LIA, #8 at 3.

[55] EK, #11 at 2.

[56] EK, #11 at 2.

[57] LIA, #8 at 2.

[58] LIA, #8 at 4; CL, #10 at 2.

[59] LIA, #8 at 4; FDRA, #12 at 3.

[60] FIA, #7 at 2.

[61] FDRA, #12 at 3.

[62] Additional guidance regarding this issue is provided by the Commission's Guides Against Deceptive Pricing, 16 CFR Part 233.

[1] The composition of heels, stiffenings, and ornamentation are not considered when making the determination of whether a shoe, boot, or slipper may be called "leather".

Top Grain Cowhide Backed With Split Cowhide; or
Split Cowhide Backed With Simulated Leather.

(2) The composition of the different backing material should be disclosed if it is visible and consists of split leather, non-leather material with the appearance of leather, or leather processed so as to simulate a different kind of leather.

(e) *Fictitious animal designations.* A representation should not be made, directly or by implication, that an industry product is made in whole or in part from the skin or hide of an animal that does not exist.

(f) *Misuse of trade names, etc.* A trade name, coined name, trademark, or other word or term, or any depiction or device should not be used if it misrepresents, directly or by implication, that an industry product is made in whole or in part from animal skin or hide, or that material in an industry product is leather, top grain leather, split leather, or other material. This includes, among other practices, the use of a stamp, tag, label, card, or other device in the shape of a tanned hide or skin or in the shape of a silhouette of an animal, in connection with any industry product that has the appearance of leather but that is not made wholly or in substantial part from animal skin or hide.

(g) *Misrepresentation that product is wholly of a particular composition.* A misrepresentation should not be made, directly or by implication, that an industry product is made wholly of a particular composition. A representation as to the composition of a particular part of a product should clearly indicate the part to which the representation applies.

(1) Where a product is made principally of top grain leather or of split leather but has certain non-leather parts that appear to be leather, the product may be described as made of top grain leather or split leather so long as accompanied by clear disclosure of the non-leather parts.[2] For example:

(i) An industry product made of top grain cowhide except for frame covering, gussets, and partitions that are made of plastic but have the appearance of leather may be described as:

Top Grain Cowhide With Plastic Frame Covering, Gussets and Partitions; or Top Grain Cowhide With Gussets, Frame Covering and Partitions Made of Non-Leather Material.

(ii) An industry product made throughout, except for hardware, of vinyl backed with split cowhide may be described as:

Vinyl Backed With Split Cowhide (See also disclosure provision concerning use of backing material in paragraph (d) of this section).

(iii) An industry product made of top grain cowhide except for partitions and stay, which are made of plastic-coated fabric but have the appearance of leather, may be described as:

Top Grain Cowhide With Partitions and Stay Made of Non-leather Material; or
Top Grain Cowhide With Partitions and Stay Made of Plastic-Coated Fabric.

(2) Where a product is made principally of top grain leather and its only other parts that appear to be leather are made of split leather, the product may be described as made of top grain leather so long as accompanied by adequate disclosure of the split leather parts. For example: An industry product made of top grain cowhide except for frame covering, gussets, and partitions made of split cowhide may be described as:

Top Grain Cowhide With Split Cowhide Frame Covering, Gussets, and Partitions.

(h) *Ground, pulverized, shredded, or bonded leather.* A material in an industry product that contains ground, pulverized, shredded, or bonded leather and thus is not wholly the hide of an animal should not be represented, directly or by implication, as being leather. This provision does not preclude an accurate representation as to the ground, pulverized, shredded, or bonded leather content of the material. However, if the material appears to be leather, it should be accompanied by either:

(1) An adequate disclosure as described by paragraph (b) of this section; or

(2) If the terms "ground leather," "pulverized leather," "shredded leather," or "bonded leather" are used, a disclosure of the percentage of leather fibers and the percentage of non-leather substances contained in the material. For example: An industry product made of a composition material consisting of 60% shredded leather fibers may be described as:

Bonded Leather Containing 60% Leather Fibers and 40% Non-leather Substances.

(i) *Form of disclosures under this section.* All disclosures described in this section should appear in the form of a stamping on the product, or on a tag, label, or card attached to the product, and should be affixed so as to remain on or attached to the product until received by the consumer purchaser. All such disclosures should also appear in all advertising of such products irrespective of the media used whenever statements, representations, or depictions appear in such advertising which, absent such disclosures, serve to create a false impression that the products, or parts thereof, are of a certain kind of composition. The disclosures affixed to products and made in advertising should be of such conspicuousness and clarity as to be noted by purchasers and prospective purchasers casually inspecting the products or casually reading, or listening to, such advertising. A disclosure necessitated by a particular representation should be in close conjunction with the representation.

§ 24.3 Deceptive practices as to aniline finish, graining, embossing and processing.

It is unfair or deceptive to misrepresent, directly or by implication:

(a) That any industry product is colored, finished, or dyed with aniline dye; or

(b) That all or part of any product is dyed, embossed, grained, processed, finished or stitched in a certain manner.

§ 24.4. Misuse of the terms "waterproof," "dustproof," "warpproof," "scuffproof," "scratchproof," "scuff resistant," and "scratch resistant."

It is unfair or deceptive to:

(a) Use the term "Waterproof" to describe all or part of an industry product unless the designated product or material is impermeable to water and moisture.

(b) Use the term "Dustproof" to describe an industry product unless the product is so constructed that when it is closed dust cannot enter it.

(c) Use the term "Warpproof" to describe all or part of an industry product unless the designated product or part is such that it cannot warp.

(d) Use the term "Scuffproof," "Scratchproof," or other terms indicating that the product is not subject to wear in any other respect, to describe an industry product unless the outside surface of the product is immune to scratches or scuff marks, or is not subject to wear as represented.

(e) Use the term "Scuff Resistant," "Scratch Resistant," or other terms indicating that the product is resistant to wear in any other respect, unless there is a basis for the representation and the outside surface of the product is meaningfully and significantly resistant to scuffing, scratches, or to wear as represented.

By direction of the Commission.

Donald S. Clark,
Secretary.

[FR Doc. 95–23039 Filed 9–15–95; 8:45 am]

BILLING CODE 6750-01-P

---

[2] In the case of shoes, boots, slippers, and related industry products that have visible parts with the appearance of leather, the composition of concealed innersoles should be disclosed unless the term "leather" can be used to describe the innersole material under these Guides.

---

16 CFR Part 400

Rule Concerning Advertising and Labeling of Sleeping Bags

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: the Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning Advertising and Labeling of Sleeping Bags ("Sleeping Bag Rule" or "Rule"), 16 CFR Part 400. The proceeding will address whether or not the Sleeping Bag Rule should be repealed. The Commission invites interested parties to submit written data, views, and arguments on how the rule has affected consumers, businesses and others, and on whether there currently is a need for the rule. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

Notifications of interest must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice in the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interested parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–2506. Comments and requests to testify should be identified as "16 CFR Part 400—Comment—Sleeping Bag Rule" and "16 CFR Part 400—Request to Testify—Sleeping Bag Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Work Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: John A. Crowley, Attorney, Bureau of Consumer Protection, Division of Service Industry Practices, Room H–200, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–3280.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") seeking comment on the proposed repeal of the Sleeping Bag Rule, 60 FR 27240. In accordance with mandates of section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 57a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives. The ANPR comment period closed on June 22, 1995. The Commission received no public comments.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Sleeping Bag Rule should be repealed or remain in effect, and solicits public comments.[1] The Commission is also interested in comments on whether the Rule should be streamlined or otherwise amended. If the Commission determines, based on the data, views and arguments submitted, that the Commission should consider additional alternatives, it will publish a supplemental notice of proposed rulemaking and will request public comments on those alternatives.

The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Sleeping Bag Rule regulates the advertising, labeling and marking of the dimensions of sleeping bags. The Commission had found that the practice of labeling sleeping bags by the dimensions of the unfinished material used in their construction (cut size) was misleading consumers about the actual size of the sleeping bag. To correct this misconception, the Commission in 1963 promulgated the Sleeping Bag Rule which provides that it is an unfair method of competition and an unfair or deceptive act or practice to use the "cut size" of the materials from which a sleeping bag is made to describe the size of a sleeping bag in advertising, labeling or marking unless:

(1) "The dimensions of the cut size are accurate measurements of the yard goods used in construction of the sleeping bags"; and

(2) "Such 'cut size' dimensions are accompanied by the words 'cut size' "; and

(3) The reference to "cut size" is "accompanied by a clear and conspicuous disclosure of the length and width of the finished products and by an explanation that such dimension constitute the finished size".[2]

The Commission, as part of its oversight responsibilities, reviews rules and guides periodically. These reviews seek information about the costs and benefits of the Commission's rules and guides and their regulatory and economic impact. The information obtained assists the Commission in identifying rules and guides that warrant modification or rescission. Accordingly, on April 19, 1993, the Commission published in the Federal register a request for public comments on its Trade Regulation Rule on Advertising and Labeling as to Size as to Size of Sleeping Bags, 16 CFR 400 ("Rule").

---

[1] In accordance with mandates of section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives 30 days prior to publication of the NPR.

[2] The rule then gives an example of proper size marking: "Finished size 33" × 68"" cut size 36" × 72"."

In its Request for Comment, the Commission asked commenters to address the costs and benefits of the rule, whether there was a continuing need for this regulation, the burdens placed on businesses subject to this regulation, whether changes should be made, any conflicts with other laws, and whether changes in technology affected the rule.

Only one specific comment relating to the Sleeping Bag Rule was received, which generally supported a continuation of this regulation.

In addition to this specific comment, one general comment, applicable to several rules being reviewed was received from an advertising agency association. The organization recommended rescission of the Sleeping Bag Rule, because the general prohibitions of the FTC Act covering false and deceptive advertising apply to the sleeping bag industry and the Rule creates unnecessary administrative costs for the government, industry members and consumers.

Commission staff also conducted an informal inquiry and inspected sleeping bags at several national chain stores. This inquiry found no violations of the Rule on either the sleeping bag packaging materials or the labels affixed to the product itself. In fact, it appeared from that limited inquiry that industry products were marked with only the finished size. Additionally, the Commission has no record of receiving any complaints regarding non-compliance with the rule, or of initiating any law enforcement actions alleging violation of the rule's requirements, 60 FR 2724–41. Finally, the Uniform Packaging and Labeling Regulation, which has been adopted by 47 states, regulates the labeling of sleeping bags, and appears to provide that these items must be labeled with their finished size, 60 FR 27241.

On May 23, 1995, the Commission issued an Advance notice of proposed rulemaking (ANPR) based on a review of the submissions received in response to the aforementioned request for comments. The Commission determined that there may no longer be a need to continue the Rule in light of the apparent changes in industry practices and the existence of laws in nearly all of the states that appear to mandate point-of-sale disclosures similar to those required by the Rule. No comments were received in response to this request.

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission, therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) Publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation to Comment and Questions for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experience are relevant to the extent they typify industry experience in general or the experience of similar-size firms. Commenters opposing the proposed repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this Notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Public Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–2222.

Questions

(1) Do manufacturers and sellers of sleeping bags currently use "cut size" as a means of marking the size of their products for sale at retail to customers?

(2) Does the fact that nearly all of the states have adopted the Uniform Packaging and Labeling Regulation, which governs the labeling of sleeping bags, eliminate or greatly lessen the need for the Sleeping Bag Rule?

(3) Are there other federal or state laws or regulations, or private industry standards that eliminate a need for the Rule?

(4) What are the benefits and costs of the Rule to consumers?

(5) What are the benefits and the costs of the Rule to firms subject to the Rule's requirements?

(6) Does this Rule overlap or conflict with other federal, state, or local government laws or regulations?

(7) Is there a continuing need for the Rule or should the Rule be repealed?

V. Requests for Public Hearings

Because there does not appear to be any dispute as to the material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the DATES and ADDRESSES sections of this Notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601–11, requires an analysis of the anticipated impact of the proposed repeal of the Rule on small businesses.[3] The analysis must contain,

as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. The Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

In light of these reasons, the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that if the Commission determines to repeal the Rule that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Sleeping Bag Rule does not impose "information collection requirements" under the Paperwork Reduction Act ("PRA"), 44 U.S.C. 3501 *et seq.* The Rule, however, does contain disclosure requirements, which specify that certain additional information must be given whenever the words "cut-size" are used to describe the dimensions of a sleeping bag.[4] Accordingly, repeal of the Rule would eliminate any burdens on the public imposed by these disclosure requirements.

VIII. Additional Information for Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners or Their Advisors

Pursuant to Rule 1.18(c) of the Commission's Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

16 CFR Part 402

Rule Concerning Deception as to Non-Prismatic and Partially Prismatic Instruments Being Prismatic Binoculars

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning deception as to non-prismatic and partially prismatic instruments being prismatic binoculars ("Binocular Rule"), 16 CFR Part 402. The proceeding will address whether or not the Binocular Rule should be repealed. The Commission invites interested parties to submit written data, views, and arguments on how the Rule has affected consumers, businesses and others, and on whether there currently is a need for the Rule. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

Notifications of interest in testifying must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice in the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interested parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue NW., Washington, DC 20580, telephone number (202) 326–2506. Comments and requests to testify should be identified as "16 CFR Part 402—Comment—Binocular Rule" and "16 CFR Part 402—Request to Testify—Binocular Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Word Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: Phillip Priesman, Attorney, Bureau of Consumer Protection, Division of Advertising Practices, Sixth Street and Pennsylvania Avenue NW., Washington,

---

[3] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to perform "regulatory impact analyses" of a proposed rule, but only if the rule will have certain "significant" economic or regulatory effects. The Commission has determined that a preliminary regulatory analysis is not required by section 22 in this proceeding because the Commission has no reason to believe that repealing the Rule will have a "significant" economic or regulatory impact, either beneficial or detrimental, upon persons subject to the Rule or upon consumers.

[4] Under amendments to the P.R.A. in the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 109 Stat. 163, to be codified at 44 U.S.C. 3501–20), which will become effective on October 1, 1995, these third-party disclosures may constitute a "collection of information" for which OMB clearance must be sought.

DC 20580, telephone number (202) 326–2484.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") seeking comment on the proposed repeal of the Binocular Rule, 60 FR 27240. In accordance with mandates of section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 57a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of representatives. The ANPR comment period closed on June 22, 1995. The Commission received one public comment.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Binocular Rule should be repealed or remain in effect, and solicits public comments.[1] The Commission is also interested in comments on whether the Rule should be streamlined or otherwise amended. If the Commission determines, based on the data, views and arguments submitted, that the Commission should consider additional alternatives, it will publish a supplemental notice of proposed rulemaking and will request public comments on those alternatives.

The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Binocular Rule was published in final form in the **Federal Register** on June 5, 1964, and became effective on December 2, 1964. The Rule requires a clear and conspicuous disclosure on any advertising or packaging for non-prismatic or partially prismatic binoculars that the instruments are not fully prismatic. Fully prismatic binoculars rely on a prism within the instrument to reverse the visual image entering the lens so that it appears right-side up to the user. Other binoculars rely partially or entirely on mirrors to reverse the visual image. When the rule was promulgated, the Commission was concerned that consumers could be misled into believing that non-prismatic binoculars were in fact prismatic, absent such a disclosure.

To prevent consumer deception, the rule proscribed the use of the term "binocular" to describe anything other than a fully prismatic instrument, unless the term was modified to indicate the true nature of the item. Under the Rule, non-prismatic instruments could be identified as binoculars only if they incorporated a descriptive term such as "binocular-nonprismatic," "binocular-mirror prismatic," or "binocular-nonprismatic mirror."

Following publication of the ANPR, the Commission received one public comment regarding the Binocular Rule. The comment, from an importer and manufacturing company, suggested that there may be a continuing need for the Rule because field glasses and opera glasses, both of which are non-prismatic, are still advertised and sold today. The comment acknowledged, however, that present-day binoculars are fully prismatic, while the non-prismatic instruments are identified as either field glasses or opera glasses rather than binoculars. Thus, since it appears that all instruments sold as binoculars are prismatic, the Commission believes that the Binocular Rule may no longer be needed. Repeal of the Rule will also further the objectives of reducing obsolete government regulation.

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the Rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission, therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff; and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation To Comment and Questions for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experiences are relevant to the extent they typify industry experience in general or the experience of similar-sized firms. Commenters opposing the proposed repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this Notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Public Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number (202) 326–2222.

---

[1] In accordance with mandates of section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives, 30 days prior to publication of the NPR.

Questions

(1) Is any manufacturer currently manufacturing non-prismatic or partially-prismatic binoculars?

(2) Is any individual or business entity currently marketing non-prismatic or partially-prismatic binoculars?

(3) Do any retail stores or suppliers still maintain stocks of non-prismatic or partially-prismatic binoculars?

(4) Is any manufacturer or marketer identifying non-prismatic field glasses or opera glasses as binoculars?

(5) Has technology changed so that the Rule is no longer needed?

(6) Are there any other federal or state laws or regulations, or private industry standards, that eliminate the need for the Rule?

(7) What are the benefits and costs of the rule to consumers?

(8) What are the benefits and costs of the Rule to firms subject to the Rule's requirements?

(9) Should the Rule be kept in effect or should it be repealed?

V. Requests for Public Hearings

Because there does not appear to be any dispute as to the material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the **DATES** and **ADDRESSES** section of this notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act ("FRA") 5 U.S.C. 601–11, requires an analysis of the anticipated impact of the proposed repeal of the Rule on small business.[2] The analysis must contain, as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action, any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. The Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

In light of these reasons, the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that if the Commission determines to repeal the Rule that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Binocular Rule does not impose "information collection requirements" under the Paperwork Reduction Act ("PRA"), 44 U.S.C. 3501 *et seq*. The Rule, however, does contain a disclosure requirement, which calls for a clear and conspicuous disclosure on any advertising or packaging for non-prismatic or partially prismatic binoculars that the instruments are not fully prismatic.[3] Accordingly, repeal of the Rule would eliminate any burdens on the public imposed by those disclosure requirements.

VIII. Additional Information for Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners or Their Advisors

Pursuant to Rule 1.18(c) of the Commission's Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

16 CFR Part 404

Rule Concerning Deceptive Advertising and Labeling as to Size of Tablecloths and Related Products

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning Deceptive Advertising and Labeling as to Size of Tablecloths and Related Products ("Tablecloth Rule" or "Rule"), 16 CFR Part 404. The proceeding will address whether or not the Tablecloth Rule should be repealed. The Commission invites interested parties to submit written data, views, and arguments on how the Rule has affected consumers, businesses and others, and on whether there currently is a need for the Rule. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires

---

[2] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to perform "regulatory impact analyses" of a proposed rule, but only if the rule will have certain "significant" economic or regulatory effects. The Commission has determined that a preliminary regulatory analysis is not required by section 22 in this proceeding because the Commission has no reason to believe that repealing the Rule will have a "significant' economic or regulatory impact, either beneficial or detrimental, upon persons subject to the Rule or upon consumers.

[3] Under amendments to the PRA in the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 109 Stat. 163, to be codified at 44 U.S.C. 3501–20), which will become effective on October 1, 1995, these third-party disclosures may constitute a "collection of information" for which OMB Clearance must be sought.

comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

Notifications of interest in testifying must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice in the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interested parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, N.W., Washington, DC 20580, telephone number 202–326–2506. Comments and requests to testify should be identified as "16 CFR Part 404—Comment—Tablecloth Rule" and "16 CFR Part 404—Request to Testify—Tablecloth Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Word Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: John A. Crowley, Attorney, Bureau of Consumer Protection, Division of Service Industry Practices, Room H–200, Sixth Street and Pennsylvania Avenue, N.W., Washington, DC 20580, telephone number 202–326–3280.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") seeking comment on the proposed repeal of the Tablecloth Rule, 60 FR 27242. In accordance with mandates of section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 47a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives. The ANPR comment period closed on June 22, 1995. The Commission received no public comments.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Tablecloth Rule should be repealed or remain in effect, and solicits public comments.[1] The Commission is also interested in comments on whether the Rule should be streamlined or otherwise amended. If the Commission determines, based on the data,views and arguments submitted, that the Commission should consider additional alternatives, it will publish a supplemental notice of proposed rulemaking and will request public comments on those alternatives.

The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Tablecloth Rule regulates the advertising, labeling and marking of the dimensions of tablecloths and related products. The Commission had found that the practice of labeling tablecloths and related products by the dimensions of the unfinished material used in their construction (cut size) was misleading consumers about the actual size of tablecloths and related products. To correct this misconception, the Commission in 1964 promulgated the Tablecloth Rule which provides that it is an unfair method of competition and an unfair and deceptive act or practice to use the "cut size" of the materials from which a tablecloth or related product is made to describe the size of a tablecloth or related product unless:

(a) "Such 'cut size' dimensions are accompanied by the words 'cut size' "; and

(b) "The 'cut size' is accompanied by a clear and conspicuous disclosure of the dimensions of the finished products and by an explanation that such dimensions constitute the finished size".[2]

The Commission, as part of its oversight responsibilities, reviews rules and guides periodically. These reviews seek information about the costs and benefits of the Commission's rules and guides and their regulatory and economic impact. The information obtained assists the Commission in identifying rules and guides that warrant modification or rescission. Accordingly on April 19, 1993, the Commission published in the **Federal Register** a request for public comments on its Trade Regulation Rule on Deceptive Advertising and labeling as to Size of Tablecloths and Related Products, 16 CFR 404 ("Rule").

In its Request for Comment, the Commission asked commenters to address the costs and benefits of the rule, whether there was a continuing need for this regulation, the burdens placed on businesses subject to this regulation, whether changes should be made, any conflicts with other laws and whether changes in technology affected the rule.

Only one specific comment relating to the Tablecloth Rule was received, which generally supported a continuation of this regulation.

In addition to this specific comment, one general comment, applicable to several rules being reviewed was received from an advertising agency association. This organization recommended rescission of the Tablecloth Rule, because the general prohibitions of the FTC Act covering false and deceptive advertising apply to the tablecloth and related products industry and the Rule creates unnecessary administrative costs for the government, industry members and consumers.

Commission staff also engaged in an informal review of industry practices by examining the marking of dimensions on tablecloths and other items subject to the rule available for retail sale at several national chain stores. This informal review revealed no instances of rule violations. In fact, it appeared from that limited review that industry products were marked with only the finished size. Additionally, the Commission has no record of receiving any complaint regarding non-compliance with the rule or of initiating any law enforcement actions alleging violations of the rule's requirements, 60 FR 27242. Finally, the Uniform Packaging and Labeling Regulation, which has been adopted by 47 states, regulates the labeling of tablecloths and related products, and appears to provide that these items must be labeled with their finished size, 60 FR 27242.

On May 23, 1995, the Commission issued an Advance Notice of Proposed Rulemaking (ANPR) based on a review of the submissions received in response to the aforementioned request for comments. The Commission determined that there may no longer be a need to continue the Rule in light of the apparent changes in industry practices and the existence of laws in nearly all of the states that appear to mandate point-of-sale disclosures similar to those required by the Rule. No comments were received in response to this request.

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the Rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission, therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) Publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation to Comment and Questions for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experiences are relevant to the extent they typify industry experience in general or the experience of similar-sized firms. Commenters opposing the proposed repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this Notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Public Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–2222.

Questions

(1) Do manufacturers and sellers of tablecloths currently use "cut size" as a means of marking the size of their products for sale at retail to customers?

(2) Does the fact that nearly all of the states have adopted the Uniform Packaging and Labeling Regulation, which governs the labeling of tablecloths, eliminate or greatly lessen the need for the Tablecloth Rule?

(3) Are there other federal or state laws or regulations, or private industry standards that eliminate a need for the Rule?

(4) What are the benefits and the costs of the Rule to consumers?

(5) What are the benefits and the costs of the Rule to firms subject to the Rule's requirements?

(6) Does this Rule overlap or conflict with other federal, state, or local government laws or regulations?

(7) Is there a continuing need for the Rule or should the Rule be repealed?

V. Requests for Public Hearings

Because there does not appear to be any dispute as to the material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the **DATES** and **ADDRESSES** sections of this Notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601–11, requires an analysis of the anticipated impact of the proposed repeal of the Rule on small businesses.[3] The analysis must contain, as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. The Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

In light of these reasons, the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that if the Commission determines to repeal the Rule that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Tablecloth Rule does not impose "information collection requirements" under the Paperwork Reduction Act

---

[1] In accordance with mandates of section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives 30 days prior to publication of the NPR.

[2] The rule then gives an example of proper size marking: "Finished size 50" x 68"; Cut size 52" x 70"."

[3] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to perform "regulatory impact analyses" of a proposed rule, but only if the rule will have certain "significant" economic or regulatory effects. The Commission has determined that a preliminary regulatory analysis is not required by section 22 in this proceeding because the Commission has no reason to believe that repealing the Rule will have a "significant" economic or regulatory impact, either beneficial or detrimental, upon persons subject to the Rule or upon consumers.

("PRA"), 44 U.S.C. 3501 *et seq.* The Rule, however, does contain disclosure requirements, which specify that certain additional information must be given whenever the words "cut size" are used to describe the dimensions of a tablecloth or other product.[4] Accordingly, repeal of the Rule would eliminate any burdens on the public imposed by these disclosure requirements.

VIII. Additional Information for Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners or Their Advisors

Pursuant to Rule 1.18(c) of the Commission's Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

16 CFR Part 405

Trade Regulation Rule on Misbranding and Deception as to Leather Content of Waist Belts

AGENCY: Federal Trade Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission (the "Commission") proposes to commence a rulemaking proceeding to repeal its Trade Regulation Rule on Misbranding and Deception as to Leather Content of Waist Belts ("the Leather Belt Rule" or "the Rule"). The proceeding will address whether the Leather Belt Rule should be repealed or remain in effect. The Commission is soliciting written comment, data, and arguments concerning this proposal.

DATES: Written comments must be submitted on or before October 18, 1995.

ADDRESSES: Written comments should be identified as "16 CFR Part 405" and sent to Secretary, Federal Trade Commission, Room 159, Sixth Street and Pennsylvania Ave., N.W., Washington DC 20580.

FOR FURTHER INFORMATION CONTACT: Lemuel Dowdy or Edwin Rodriguez, Attorneys, Federal Trade Commission, Division of Enforcement, Bureau of Consumer Protection, 601 Pennsylvania, Ave., NW., S–4302, Washington, DC 20580, (202) 326–2981 or (202) 326–3147.

SUPPLEMENTARY INFORMATION:

Part A—Background Information

This notice is being published pursuant to Section 18 of the Federal Trade Commission ("FTC") Act, 15 U.S.C. 57a *et seq.*, the provisions of Part 1, Subpart B of the Commission's Rules of Practice, 16 CFR 1.7, and 5 U.S.C. 551 *et eq.* This authority permits the Commission to promulgate, modify, and repeal trade regulation rules that define with specificity acts or practices that are unfair or deceptive in or affecting commerce within the meaning of section 5 (a)(1) of the FTC Act, 15 U.S.C. 45(a)(1).

The Leather Belt Rule was promulgated on June 27, 1964, to remedy deceptive practices involving misrepresentations about the leather content of waist belts that are not offered for sale as part of a garment. The Rule prohibits representations that belts not made from the hide or skin of an animal are made of leather or that belts are made of a specified animal hide or skin when such is not the case. In addition, it requires that belts made of split leather, and ground, pulverized or shredded leather bear a label or tag disclosing the kind of leather of which the belt is composed. The Rule also requires that non-leather belts having the appearance of leather bear a tag or label disclosing their composition or disclosing that they are not leather.

As part of its continuing review of its trade regulation rules to determine their current effectiveness and impact, the Commission published a **Federal Register** notice on March 27, 1995, asking questions about the benefits and burdens of the Rule to consumers and industry.[1] The request for comments elicited ten comments. Six comments were submitted by consumers and four by leather or leather goods manufacturers. Three comments recommend that the Commission amend the Rule to allow the use of the term "bonded leather" when a leather good is made of ground, pulverized, or shredded leather that is bonded with an adhesive. Seven comments support the continuation of the Leather Belt Rule as it currently exists. Two comments, from industry members, support guidelines for leather goods as a whole, as opposed to piecemeal regulation of individual leather products.

The consumer comment express continuing support for the Rule, contending that its disclosure requirements help consumers make informed purchasing decisions. One industry comment supports the Rule for the same reason. These commenters state that the rule helps consumers identify belts made of different types of cowhide leather, such as top grain leather, and split leather. In addition, they believe that the disclosures required by the Rule allow consumers to identify belts made of vinyl, plastic, polyurethane, paper and other synthetic materials that can be made to look like leather. Without these disclosures, the consumer commenters believe, consumers cannot be certain of the quality of the leather used in belts, or that belts are made of leather at all. Two

---

[4] Under amendments to the P.R.A. in the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 109 Stat. 163, to be codified at 44 U.S.C. 3501–20), which will become effective on October 1, 1995, these third-party disclosures may constitute a "collection of information" for which OMB clearance must be sought.

[1] 60 FR 15725. On the same date, the Commission published a **Federal Register** notice soliciting comments on its Industry Guides for luggage, shoes, and ladies' handbags. 60 FR 15724. *See* Guides for the Luggage and Related Products Industry, 16 CFR Part 24; Guides for Shoe Content Labeling and Advertising, 16 CFR Part 231; and Guides for the Ladies' Handbag Industry, 16 CFR Part 247.

of the comments express support for consolidating the Rule and the Guides into one set of guidelines for leather goods, which would set out definitions for leather that apply to all finished leather goods.

In two separate documents published elsewhere in this issue of the **Federal Register**, the Commission has announced that, to eliminate unnecessary duplication, it has rescinded the three separate guides for various leather products and seeks public comment on one set of proposed, consolidated guidelines: the Guides for Select Leather and Imitation Leather Products.[2] Accordingly, the Commission has tentatively determined that a separate Leather belt Rule is no longer necessary, and seek comments on he proposed repeal of the Rule.

Part B—Objectives

Based on this review, the Commission has tentatively determined that the Leather Belt Rule may not be necessary and in the public interest. The Commission believe that a single set of industry guides for leather products serves the public interest better than a Rule for leather belts and miscellaneous guides for other leather products. The objective of this notice is to solicit comment on whether the Commission should initiate a rulemaking proceeding to repeal the Leather Belt Rule.

Part C—Alternative Actions

The Commission is not considering any alternative other than the possibility of repealing the Leather Belt Rule.

Part D—Request for Comments

Members of the public are invited to comment on any issues or concerns they believe are relevant or appropriate to the Commission's review of the Leather Belt Rule. The Commission requests that factual data upon which the comments are based be submitted with the comments. In this section, the Commission identifies the issues on which it solicits public comments. The identification of issues is designed to assist the public and should not be construed as a limitation on the issues on which public comment may be submitted.

Questions

(1) Is the misrepresentation of the leather contents of belts by manufacturers and distributors of belts still a significant problem in the marketplace?

(2) What benefits do consumers derive from the Rule?

(3) Should the Rule be kept in effect or should it be repealed?

(4) How would repealing the Rule affect the benefits experienced by consumers?

(5) How would repealing the Rule affect the benefits and burdens experienced by firms subject to the Rule's requirements?

(6) Are there any other federal or state laws or regulations, or private industry standards, that eliminate the need for the Rule?

(7) Are the proposed Guides for Select Leather and Imitation Leather Products likely to provide all or most of the benefits now provided by the Rule?

Authority: Section 18(d)(2)(B) of the Federal Trade Commission Act, 15 U.S.C. 57a(d)(2)(B).

16 CFR Part 413

Rule Concerning Failure to Disclose That Skin Irritation May Result From Washing or Handling Glass Fiber Curtains and Draperies and Glass Fiber Curtain and Drapery Fabrics

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning the "Failure to Disclose that Skin Irritation May Result from Washing or Handling Glass Fiber Curtains and Draperies and Glass Fiber Curtain and Drapery Fabrics" ("Fiberglass Curtain Rule" or "Rule"), 16 CFR Part 413. The proceeding will address whether or not the Fiberglass Curtain Rule should be repealed. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

Notifications of interest in testifying must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice in the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interested parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number (202) 326–2506. Comments and requests to testify should be identified as "16 CFR Part 413—Comment—Fiberglass Curtain Rule" and "16 CFR Part 413—Request to Testify—Fiberglass Curtain Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Word Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: Edwin Rodriguez or Janice Podoll Frankle, Attorneys, Bureau of Consumer Protection, Division of Enforcement, 601 Pennsylvania, NW., Washington, DC 20004, (202) 326–3147 or (202) 326–3022.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") seeking comment on the proposed repeal of the Fiberglass Curtain Rule (60 FR 27243). In accordance with section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 57a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives. The ANPR comment period closed on June 22, 1995. The Commission did not receive any public comments.

---

[2] Repealing the rule would eliminate the Commission's ability to obtain civil penalties for any future misrepresentations of the leather content of belts. However, the Commission has tentatively determined that repealing the rule would not seriously jeopardize the Commission's ability to act effectively. Any significant problems that might arise could be addressed on a case-by-case basis, administratively under Section 5 of the FTC Act, 15 U.S.C. 45, or through Section 13(b) actions, 15 U.S.C. 53(b), filed in federal district court. Prosecuting serious misrepresentations in district court allows the Commission to obtain injunctive relief as well as equitable remedies, such as redress or disgorgement.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Fiberglass Curtain rule should be repealed or remain in effect.[1] The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Fiberglass Curtain Rule requires marketers of fiberglass curtains or draperies and fiberglass curtain or drapery cloth to disclose that skin irritation may result from handling fiberglass curtains or curtain cloth and from contact with clothing or other articles which have been washed (1) with such glass fiber products, or (2) in a container previously used for washing such glass fiber products unless the glass particles have been removed from such container by cleaning.

The Rule was promulgated on July 28, 1967 (32 FR 11023). The Statement of Basis and Purpose for the Rule stated that members of the consuming public had made statements that they had experienced skin irritation after washing or handling glass fiber curtains and draperies and glass fiber curtain and drapery fabrics. Consequently, the Commission concluded that it was in the public interest to caution consumers that skin irritation could result from the direct handling of fiberglass curtains, drapes, and yard goods, and from body contact with clothing or other articles that had been contaminated with fiberglass particles when they were washed with fiberglass products when the container had not been cleaned of all glass particles.

As part of its continuing review of its trade regulation rules to determine their current effectiveness and impact, the Commission recently obtained information bearing on the need for this Rule. Based on this review, the Commission has determined that fiberglass curtains and drapes and fiberglass curtain or drape fabric no longer present a substantial threat of skin irritation to the consumer. Fiberglass was used in curtains primarily because of its fire retardant characteristics. Technological developments in fire retardant fabrics have caused fiberglass fabric to be displaced by polyester and modacrylics in the curtain and drapery industry.[2] Fiberglass fabrics are now used almost exclusively for very specialized industrial uses.[3]

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the Rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission, therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) Publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff; and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation to Comment and Questions for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experiences are relevant to the extent they typify industry experience in general or the experience of similar-sized firms. Commenters opposing the proposed repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this Notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Public Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number (202) 326–2222.

Questions

(1) Is any manufacturer currently manufacturing glass fiber curtains or draperies or glass fiber curtain or drapery fabric?

(2) Is any individual or business entity currently marketing glass fiber curtains or draperies or glass fiber curtain or drapery fabric?

(3) Do any retail stores or suppliers still maintain stocks of glass fiber curtains or draperies or glass fiber curtain or drapery fabric for resale?

(4) What are the benefits and the costs of the Rule to consumers?

(5) What are the benefits and the costs of the Rule to firms subject to the Rule's requirements?

(6) Has technology changed so that the Rule is no longer needed?

(7) Are there any other federal or state laws or regulations, or private industry standards, that eliminate the need for the Rule?

(8) Should the Rule be kept in effect or should it be repealed?

---

[1] In accordance with section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives 30 days prior to its publication in the **Federal Register**.

[2] *See* Rulemaking Record, Category B, Staff Submissions.

[3] *Id.*

V. Requests for Public Hearings

Because there does not appear to be any dispute as to the material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the **DATES** and **ADDRESSES** sections of this Notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act ("RFA", 5 U.S.C. 601–11) requires an analysis of the anticipated impact of the proposed repeal of the Rule on small businesses.[4] The analysis must contain, as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. Further, the Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

For all these reasons, the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that if the Commission determines to repeal the Rule, that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Fiberglass Curtain Rule does not impose "information collection requirements" under the Paperwork Reduction Act ("PRA"), 44 U.S.C. 3501 *et seq.* Although the Rule contains disclosure requirements, these disclosures are not covered by the Act because the disclosure language is mandatory and provided by the government. Repeal of the Rule, however, would eliminate any burdens on the public imposed by these disclosure requirements.

VIII. Additional Information for Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners or Their Advisors

Pursuant to Rule 1.18(c) of the Commission's Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

BILLING CODE 6750–01–M

---

[4] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to issue a preliminary regulatory analysis relating to proposed rules when the Commission publishes a notice of proposed rulemaking. The Commission has determined that a preliminary regulatory analysis is not required by section 22 and this proceeding because the Commission has no reason to believe that repeal of the Rule: (1) Will have an annual effect on the national economy of $100,000,000 or more; (2) will cause a substantial change in the cost or price of goods or services that are used exclusively by particular industries, that are supplied extensively in particular geographical industries, or that are acquired in significant quantities by the Federal Government; or (3) otherwise will have a significant impact upon persons subject to regulation under the Rule or upon consumers.

16 CFR Part 417

Trade Regulation; Rule Concerning the Failure to Disclose the Lethal Effects of Inhaling Quick-Freeze Aerosol Spray Products Used for Frosting Cocktail Glasses

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning the "Failure to Disclose the Lethal Effects of Inhaling Quick-Freeze Aerosol Spray Products Used for Frosting Cocktail Glasses" ("Quick-Freeze Spray Rule" or "Rule"), 16 CFR Part 417. The proceeding will address whether or not the Quick-Freeze Spray Rule should be repealed. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

Notifications of interest in testifying must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice of the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interested parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number (202) 326–2506. Comments and requests to testify should be identified as "16 CFR Part 417—Comment—Quick

Freeze Spray Rule" and "16 CFR Part 417—Request to Testify—Quick Freeze Spray Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Word Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: Lemuel W. Dowdy or George Brent Mickum IV, Attorneys, Federal Trade Commission, Bureau of Consumer Protection, Division of Enforcement, 601 Pennsylvania Ave., NW., Washington, DC 20004, (202) 326–2981 or (202) 326–3132.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANR") seeking comment on the proposed repeal of the Quick-Freeze Spray Rule (60 FR 27244). In accordance with section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 57a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate, and the Chairman of the Subcommittee of Commerce, Trade and Hazardous Materials, United States House of Representatives. The ANR comment period closed on June 22, 1995. The Commission received no public comments.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Quick-Freeze Spray Rule should be repealed or remain in effect.[1] The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Quick-Freeze Spray Rule requires a clear and conspicuous warning on aerosol spray products used for frosting beverage glasses. The warning states that the contents should not be inhaled in concentrated form and that doing so may cause injury or death. Glass frosting products contain a compound known as Fluorocarbon 12 (dichlorodifluoromethane).

The Rule was promulgated on February 20, 1969 (34 FR 2417). The Statement of Basis and Purpose for the Rule stated that, although the product is not harmful when used as directed, there has been several instances where the intentional misuse of this product by inhaling its vapors resulted in death. Consequently, the Commission concluded that it was in the public interest to caution purchasers who may not otherwise be aware of the lethal effects of inhaling the product.

On October 25, 1989, the Commission published a notice in the **Federal Register** soliciting public comments on the Rule's impact on small entities (54 FR 43435). No comments were received in response to the notice. The Commission determined, however, that a small amount of quick-freeze aerosol products are still available for sale. Therefore, the Commission determined that because the Rule's safety warnings, if followed, could prevent physical harm and loss of life, the Rule should be retained.

Earlier in 1995, the Commission conducted an investigation to determine if there was a continuing need for the Rule. Based on this investigation, which was conducted prior to the issuance of the ANPR, the Commission determined that glass frosting products are no longer produced, can no longer be found in the marketplace, and are precluded by the Clean Air Act from being reintroduced into the market place.[2]

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the Rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) Publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff; and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation to Comment and Question for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experiences are relevant to the extent they typify industry experience in general or the experience of similar-sized firms. Commenters opposing the proposed repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Pubic Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number (202) 326–2222.

Questions

(1) Is any manufacturer currently manufacturing quick-freeze spray products?

(2) Is any individual or business entity currently marketing quick-freeze spray products?

(3) Do any retail stores or suppliers still maintain stocks of quick-freeze spray products for resale?

(4) What are the benefits and the costs of the Rule to firms subject to the Rule's requirements?

(5) What are the benefits and the costs of the Rule to consumers?

(6) Has technology changed so that the Rule is no longer needed?

(7) Does regulation of this product by the Environmental Protection Agency render the Rule unnecessary?

(8)Are there any other federal or state laws or regulations, or private industry standards, that eliminate the need for the Rule?

(9) Should the Rule be kept in effect or should it be repealed?

V. Request for Public Hearings

Because there does not appear to be any dispute as to the material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the **DATES** and **ADDRESSES** sections of this Notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601–11, requires an analysis of the anticipated impact of the proposed repeal of the Rule on small businesses.[3] The analysis must contain, as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. The Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

For all these reasons the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that, if the Commission determines to repeal the Rule, that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Quick-Freeze Spray Rule does not impose "information collection requirements" under the Paperwork Reduction Act ("PRA"), 44 U.S.C. 3501 *et seq.* Although the Rule contains disclosure requirements, these disclosures are not covered under the Act because the disclosure language is mandatory and provided by the government. Repeal of the Rule, however, would eliminate any burdens on the public imposed by these disclosure requires.

VIII. Additional Information For Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners or Their Advisors

Pursuant to Rule 1.18(c) of the Commission Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

16 CFR Part 418

Rule Concerning Deceptive Advertising and Labeling as to Length of Extension Ladders

AGENCY: Federal Trade Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Trade Commission ("Commission") announces the commencement of a rulemaking proceeding for the trade regulation rule concerning Deceptive Advertising and Labeling as to Length of Extension Ladders ("Extension Ladder Rule" or "Rule"), 16 CFR Part 418. The proceeding will address whether or not the Extension Ladder Rule should be repealed. The Commission invites interested parties to submit written date, views, and arguments on how the Rule has affected consumers, businesses and others, and on whether there currently is a need for the Rule. This notice includes a description of the procedures to be followed, an invitation to submit written comments, a list of questions and issues upon which the Commission particularly desires comments, and instructions for prospective witnesses and other interested persons who desire to participate in the proceeding.

DATES: Written comments must be submitted on or before October 18, 1995.

---

[1] In accordance with section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate, and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives, 30 days prior to its publication.

[2] 42 U.S.C.A. 7401, 7671i (West Supp. 1995). Regulations promulgated by the Environmental Protection Agency implementing the Clean Air Act ban chlorofluorocarbons in aerosols and foams for non-essential uses. 40 CFR 82.64 (1994). The ban, which includes fluorocarbon 12, became effective on January 17, 1994. *See also* Rulemaking Record, Category B, Staff Submissions.

[3] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to perform "regulatory impact analyses" of proposed rule, but only if the rule will have certain "significant" economic or regulatory effects. The commission has determined that a preliminary regulatory analysis is not required by section 22 in this proceeding because the Commission has no reason to believe that repealing the Rule will have a "significant" economic or regulatory impact, either beneficial or detrimental, upon persons subject to the Rule or upon consumers.

Notifications of interest in testifying must be submitted on or before October 18, 1995. If interested parties request the opportunity to present testimony, the Commission will publish a notice in the **Federal Register** stating the time and place at which the hearings will be held and describing the procedures that will be followed in conducting the hearings. In addition to submitting a request to testify, interest parties who wish to present testimony must submit, on or before October 18, 1995, a written comment or statement that describes the issues on which the party wishes to testify and the nature of the testimony to be given.

ADDRESSES: Written comments and requests to testify should be submitted to Office of the Secretary, Federal Trade Commission, Room H–159, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–2506. Comments and requests to testify should be identified as "16 CFR Part 418—Comment—Extension Ladder Rule" and "16 CFR Part 418—Request to Testify—Extension Ladder Rule," respectively. If possible, submit comments both in writing and on a personal computer diskette in Word Perfect or other word processing format (to assist in processing, please identify the format and version used). Written comments should be submitted, when feasible and not burdensome, in five copies.

FOR FURTHER INFORMATION CONTACT: John A. Crowley, Attorney, Bureau of Consumer Protection, Division of Service Industry Practices, Room H–200, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–3280.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 23, 1995 the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") seeking comment on the proposed repeal of the Extension Ladder Rule, 60 FR 27245. In accordance with mandates of section 18 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 57a, the ANPR was sent to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives. The ANPR comment period closed on June 22, 1995. The Commission received no public comments.

Pursuant to the FTC Act, 15 U.S.C. 41–58, and the Administrative Procedure Act, 5 U.S.C. 551–59, 701–06, by this Notice of Proposed Rulemaking ("NPR") the Commission initiates a proceeding to consider whether the Extension Ladder Rule should be repealed or remain in effect, and solicits public comments.[1] The Commission is also interested in comments on whether the Rule should be streamlined or otherwise amended. If the Commission determines, based on the data, views and arguments submitted, that the Commission should consider additional alternatives, it will publish a supplemental notice of proposed rulemaking and will request public comments on those alternatives.

The Commission is undertaking this rulemaking proceeding as part of the Commission's ongoing program of evaluating trade regulation rules and industry guides to determine their effectiveness, impact, cost and need. This proceeding also responds to President Clinton's National Regulatory Reinvention Initiative, which, among other things, urge agencies to eliminate obsolete or unnecessary regulations.

II. Background Information

The Extension Ladder Rule regulates the advertising, labeling and marking of extension ladders. The Commission had found that the industry practice of representing the sizes or lengths of their products in terms of the total length of their component sections, e.g., a "20-foot" or "20-foot size" extension ladder consisting of two 10-foot sections, tended to mislead the general public into the erroneous belief that such represented sizes or lengths were the maximum working or useful lengths of the products so described. To correct this misconception, the Commission in 1969 promulgated the Extension Ladder Rule, which makes it an unfair or deceptive act or practice and an unfair method of competition to represent the size or length of such product, in terms of the total length of the component sections thereof, unless:

(a) Such size or length representation is accompanied by the words "total length of sections" or words with similar meanings which clearly indicate the basis of the representation; and,

(b) Such size or length representation is accompanied by a statement in close proximity to the size or length representation which clearly and conspicuously shows the maximum length of the product when fully extended for use (i.e., excluding the footage lost in overlapping) along with an explanation for the basis of such representation.[2]

The Commission, as part of its oversight responsibilities, reviews rules and guides periodically. These reviews seek information about the costs and benefits of the Commission's rules and guides and their regulatory and economic impact. The information obtained assists the Commission in identifying rules and guides that warrant modification or rescission. Accordingly, on April 19, 1993, the Commission published in the **Federal Register** a request for public comments on its Trade Regulation Rule on Advertising and Labeling As To Length of Extension Ladders, 16 C.F.R. Part 418. 58 FR 21125.

In its Request for Comment, the Commission indicated that if this rule is retained, the Commission intended to revise the examples contained in the rule to include "metric" measurements. The Commission then asked commenters to address questions relating to the costs and benefits of the Rule, the burdens it imposes, and the basis for assessing whether it should be retained, or amended.

Six specific comments were received. One commenter, a consumer, opined that the only label that should be on ladders is the "maximum working length" since consumers should not have to do any figuring to determine the length of the ladder that would meet their needs.

Of the other five commenters, four are manufacturers or suppliers of ladders and one is a trade association. A number of these comments refer to the American National Standards Institute (ANSI) standard A14, which governs the labeling of ladders. ANSI standard A14 details the requirements for labeling portable wood ladders, portable metal ladders, fixed ladders, job made ladders and portable reinforced plastic ladders. The ANSI standard requires specification of the maximum working length of extension ladders, as well as several other pieces of information not required by the Extension Ladder Rule, including the total length of the ladder's sections and the highest standing level of the ladder. Compliance with the ANSI standard therefore ensures compliance with the labeling requirements of the Extension Ladder Rule. Several commenters noted this overlap in coverage of the Extension Ladder Rule and ANSI standard, A14, and recommended that the Rule be retained unchanged.

Another commenter stated that the Rule has imposed minor, incremental costs, but opined that the benefits have been significant in that consumers have a better understanding of extension ladder length. The commenter questioned whether there was a continuing need for this Rule given the existence of ANSI standard A14 and UL Standard 184.

In addition to these specific comments, one general comment, applicable to several rules being reviewed, was received from an advertising agency association. This organization recommended rescission of the Extension Ladder Rule because the general prohibitions of Section 5 of the FTC Act covering false and deceptive advertising apply to the ladder industry, and thus the Rule creates unnecessary administrative costs for the government, industry members and consumers. This commenter did not submit any analysis or data relating to the imposition of unnecessary administrative costs on affected industry members, government or consumers.

Commission staff also engaged in an informal review of industry practices by examining the marking of length on extension ladders available for retail sale at several chain stores. That review indicated general compliance with the requirements of the Rule. Additionally, a check of Commission records failed to find any complaints regarding non-compliance with the Rule, or any initiation of law enforcement actions alleging violations of the Rule's requirements. 60 FR 27245.

On May 23, 1995, the Commission issued an Advance Notice of Proposed Rulemaking ("ANPR") based on a review of the submissions received in response to the Request for Comment. The Commission determined that there may no longer be a need to continue the Extension Ladder Rule in light of the apparent changes in industry practices and the existence of standards mandating the point-of-sale disclosures required by the Rule. 60 FR 27246. No comments were received in response to this request.

III. Rulemaking Procedures

The Commission finds that the public interest will be served by using expedited procedures in this proceeding. First, there do not appear to be any material issues of disputed fact to resolve in determining whether to repeal the Rule. Second, the use of expedited procedures will support the Commission's goal of eliminating obsolete or unnecessary regulations without an undue expenditure of resources, while ensuring that the public has an opportunity to submit data, views and arguments on whether the Commission should repeal the Rule.

The Commission, therefore, has determined, pursuant to 16 CFR 1.20, to use the procedures set forth in this notice. These procedures include: (1) Publishing this Notice of Proposed Rulemaking; (2) soliciting written comments on the Commission's proposal to repeal the Rule; (3) holding an informal hearing, if requested by interested parties; (4) obtaining a final recommendation from staff and (5) announcing final Commission action in a notice published in the **Federal Register**.

IV. Invitation to Comment and Questions for Comment

Interested persons are requested to submit written data, views or arguments on any issue of fact, law or policy they believe may be relevant to the Commission's decision on whether to repeal the Rule. The Commission requests that commenters provide representative factual data in support of their comments. Individual firms' experiences are relevant to the extent they typify industry experience in general or the experience of similar-sized firms. Commenters opposing the proposal repeal of the Rule should explain the reasons they believe the Rule is still needed and, if appropriate, suggest specific alternatives. Proposals for alternative requirements should include reasons and data that indicate why the alternatives would better protect consumers from unfair or deceptive acts or practices under section 5 of the FTC Act, 15 U.S.C. 45.

Although the Commission welcomes comments on any aspect of the proposed repeal of the Rule, the Commission is particularly interested in comments on questions and issues raised in this Notice. All written comments should state clearly the question or issue that the commenter is addressing.

Before taking final action, the Commission will consider all written comments timely submitted to the Secretary of the Commission and testimony given on the record at any hearings scheduled in response to requests to testify. Written comments submitted will be available for public inspection in accordance with the Freedom of Information Act, 5 U.S.C. 552, and Commission regulations, on normal business days between the hours of 8:30 a.m. to 5:00 p.m. at the Federal Trade Commission, Public Reference Room, Room H–130, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, telephone number 202–326–2222.

Questions

(1) Does the existence of the ANSI standard governing the labeling of extension ladders eliminate or greatly lessen the need for the Rule?

(2) What are the benefits and the costs of the Rule to consumers?

(3) What are the benefits and the costs of the Rule to firms subject to the Rule's requirements?

(4) Are there other federal or state laws or regulations, or private industry standards, that eliminate a need for the Rule?

(5) Does the Rule overlaps or conflict with other federal, state, or local government laws or regulations?

(6) Is there a continuing need for the Rule or should the Rule be repealed?

V. Requests for Public Hearings

Because there does not appear to be any dispute as to material facts or issues raised by this proceeding and because written comments appear adequate to present the views of all interested parties, a public hearing has not been scheduled. If any person would like to present testimony at a public hearing, he or she should follow the procedures set forth in the DATES and ADDRESSES sections of this Notice.

VI. Preliminary Regulatory Analysis

The Regulatory Flexibility Act (RFA"), 5 U.S.C. 601–11, requires an analysis of the anticipated impact of the proposed repeal of the Rule on small businesses.[3] The analysis must contain, as applicable, a description of the reasons why action is being considered, the objectives of and legal basis for the proposed action, the class and number of small entities affected, the projected reporting, recordkeeping and other compliance requirements being proposed, any existing federal rules which may duplicate, overlap or conflict with the proposed action, and any significant alternatives to the proposed action that accomplish its objectives and, at the same time, minimize its impact on small entities.

---

[1] In accordance with mandates of section 18 of the FTC Act, 15 U.S.C. 57a, the Commission submitted this NPR to the Chairman of the Committee on Commerce, Science, and Transportation, United States Senate, and the Chairman of the Subcommittee on Commerce, Trade and Hazardous Materials, United States House of Representatives, 30 days prior to publication of the NPR.

[2] The rule then gives an example of proper length representation when the product consists of two ten foot sections: "maximum working length 17', total length of sections 20'" or "17' extension ladder".

[3] Section 22 of the FTC Act, 15 U.S.C. 57b–3, also requires the Commission to perform "regulatory impact analyses" of a proposed rule, but only if the rule will have certain "significant" economic or regulatory effects. The Commission has determined that a preliminary regulatory analysis is not required by section 22 in this proceeding because the Commission has no reason to believe that repealing the Rule will have a "significant" economic or regulatory impact, either beneficial or detrimental, upon persons subject to the Rule or upon consumers.

A description of the reasons why action is being considered and the objectives of the proposed repeal of the Rule have been explained elsewhere in this Notice. Repeal of the Rule would appear to have little or no effect on any small business. The Commission is not aware of any existing federal laws or regulations that would conflict with repeal of the Rule.

In light of these reasons, the Commission certifies, pursuant to section 605 of RFA, 5 U.S.C. 605, that if the Commission determines to repeal the Rule that action will not have a significant impact on a substantial number of small entities. To ensure that no substantial economic impact is being overlooked, however, the Commission requests comments on this issue. After reviewing any comments received, the Commission will determine whether it is necessary to prepare a final regulatory flexibility analysis.

VII. Paperwork Reduction Act

The Extension Ladder Rule does not impose "information collection requirements' under the Paperwork Reduction Act ("PRA"), 44 U.S.C. 3501 *et seq*. The Rule, however, does contain disclosure requirements, which specify that when the size or length of an extension ladder is represented in terms of the total length of the component section such fact must be noted and a statement must be placed in close proximity to the notation which clearly and conspicuously discloses the maximum length of the product when fully extended for use.[4] Accordingly, repeal of the Rule would eliminate any burdens on the public imposed by these disclosure requirements.

VIII. Additional Information for Interested Persons

A. Motions or Petitions

Any motions or petitions in connection with this proceeding must be filed with the Secretary of the Commission.

B. Communications by Outside Parties to Commissioners of Their Advisors

Pursuant to Rule 1.18(c) of the Commission's Rules of Practice, 16 CFR 1.18(c), communications with respect to the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor during the course of this rulemaking shall be subject to the following treatment. Written communications, including written communications from members of Congress, shall be forwarded promptly to the Secretary for placement on the public record. Oral communications, not including oral communications from members of Congress, are permitted only when such oral communications are transcribed verbatim or summarized at the discretion of the Commissioner or Commissioner's advisor to whom such oral communications are made, and are promptly placed on the public record, together with any written communications relating to such oral communications. Memoranda prepared by a Commissioner or Commissioner's advisor setting forth the contents of any oral communications from members of Congress shall be placed promptly on the public record. If the communication with a member of Congress is transcribed verbatim or summarized, the transcript or summary will be placed promptly on the public record.

L. 104–13, 109 Stat. 163, to be codified at 44 U.S.C. 3501–20), which will become effective on October 1, 1995, these third-party disclosures may constitute a "collection of information" for which OMB clearance must be sought.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–36213, International Series Release No. 852, File No. S7–26–95]

RIN 3235–AG65

Exemption of the Securities of the United Mexican States Under the Securities Exchange Act of 1934 for Purposes of Trading Futures Contracts on Those Securities

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule amendment and solicitation of public comments.

SUMMARY: The Commission proposes for comment an amendment to Rule 3a12–8 that would designate debt obligations issued by the United Mexican States ("Mexico") as "exempted securities" for the purpose of marketing and trading of futures contracts on those securities in the United States. The amendment is intended to permit futures on Mexican government debt to be traded in the U.S. This change is not intended to have any substantive effect on the operation of the Rule.

DATES: Comments should be submitted by October 18, 1995.

ADDRESSES: All comments should be submitted in triplicate and addressed to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. All comments should refer to File No. S7–26–95, and will be available for public inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: James T. McHale, Attorney, Office of Market Supervision, Division of Market Regulation, Securities and Exchange Commission (Mail Stop 5–1), 450 Fifth Street, NW., Washington, DC 20549, at 202/942–0190.

SUPPLEMENTARY INFORMATION:

I. Introduction

Under the Commodity Exchange Act ("CEA"), it is unlawful to trade a futures contract on any individual security unless the security in question is an exempted security (other than a municipal security) under the Securities Act of 1933 ("Securities Act") or the Securities Exchange Act of 1934 ("Exchange Act"). Debt obligations of foreign governments are not exempted securities under either of these statutes. The Securities and Exchange Commission ("SEC" or "Commission"), however, has adopted Rule 3a12–8 under the Exchange Act to designate debt obligations issued by certain foreign governments as exempted securities under the Exchange Act solely for the purpose of marketing and trading futures contracts on those securities in the United States. As amended, the foreign governments currently designated in the Rule are Great Britain, Canada, Japan, Australia, France, New Zealand, Austria, Denmark, Finland, the Netherlands, Switzerland, Germany, the Republic of Ireland, Italy, and the Kingdom of Spain (the "Designated Foreign Governments"). As a result, futures contracts on the debt obligations of these countries may be sold in the United States, as long as the other terms of the Rule are satisfied.

The Commission today is soliciting comments on a proposal to amend Rule 3a12–8 (17 CFR 240.3a12–8) to add the debt obligations of Mexico to the list of Designated Foreign Government securities that are exempted by Rule 3a12–8. To qualify for the exemption,

futures contracts on debt obligations of Mexico would have to meet all the other existing requirements of the Rule.

II. Background

Rule 3a12–8 was adopted in 1984[1] pursuant to the exemptive authority in Section 3(a)(12) of the Exchange Act in order to provide limited relief from the CEA's prohibition on futures overlying individual securities.[2] As originally adopted, the Rule provided that the debt obligations of Great Britain and Canada would be deemed to be exempted securities, solely for the purpose of permitting the offer, sale, and confirmation of "qualifying foreign futures contracts" on such securities, so long as the securities in question were neither registered under the Securities Act nor the subject of any American depositary receipt so registered. A futures contract on such a debt obligation is deemed under the Rule to be a "qualifying foreign futures contract" if the contract is deliverable outside the United States and is traded on a board of trade.[3]

The conditions imposed by the Rule were intended to facilitate the trading of futures contracts on foreign government securities in the United States while requiring offerings of foreign government securities to comply with the federal securities laws. Accordingly, the conditions set forth in the Rule were designed to ensure that, absent registration, a domestic market in unregistered foreign government securities would not develop, and that markets for futures on these instruments would not be used to avoid the securities law registration requirements.

Subsequently, the Commission amended the Rule to include the debt securities issued by Japan, Australia, France, New Zealand, Austria, Denmark, Finland, the Netherlands, Switzerland, Germany, the Republic of Ireland, Italy, and the Kingdom of Spain.[4]

III. Discussion

The Chicago Mercantile Exchange ("CME") has proposed that the Commission amend Rule 3a12–8 to include the sovereign debt of Mexico.[5] The CME intends to develop a contract market in Mexican Certificados de la Tesoreria de la Federacion ("Cetes"), which are short-term Mexican government securities, and in Mexican Brady bonds, a class of longer term sovereign Mexican debt issues.[6] Brady bonds are issued pursuant to the Brady plan which allowed developing countries to restructure their commercial bank debt by issuing long-term dollar denominated bonds.[7] The Commission understands that Mexican Brady bonds are currently traded primarily in the over-the-counter market in the United States.

Under the proposed amendment, the existing conditions set forth in the Rule (*i.e.*, that the underlying securities not be registered in the United States,[8] the futures contracts require delivery outside the United States,[9] and the contracts be traded on a board of trade) would continue to apply.

There appears to be an active and liquid market in Mexican debt instruments. As of March 31, 1995, there was approximately US $87.5 billion face amount Mexican government debt issued and outstanding.[10] There are numerous classes of debt instruments with varying maturities. According to the CME petition, the cash market for Cetes evidences active trading; between 1993 and 1994, the monthly trading volume (in principal amount) of Cetes ranged from a low of approximately US $18.5 billion to a high of US $1.1 trillion.[11] There are, of course, less actively traded Mexican debt issues.

The Commission preliminarily believes that the trading of futures on Mexican sovereign debt would provide U.S. investors with a vehicle for hedging the risks involved in the trading of

---

[1] *See* Securities Exchange Act Release Nos. 20708 ("Adopting Release") (March 2, 1984), 49 FR 8595 (March 8, 1984) and 19811 ("Proposing Release") (May 25, 1983), 48 FR 24725 (June 2, 1983).

[2] In approving the Futures Trading Act of 1982, Congress expressed its understanding that neither the SEC nor the Commodity Futures Trading Commission ("CFTC") had intended to bar the sale of futures on debt obligations of the United Kingdom of Great Britain and Northern Ireland to U.S. persons, and its expectation that administrative action would be taken to allow the sale of such futures contracts in the United States. *See* Proposing Release, *supra* note 1, 48 FR at 24725 (citing 128 Cong. Rec. H7492 (daily ed. September 23, 1982)(statements of Representatives Daschle and Wirth)).

[3] As originally adopted, the Rule required that the board of trade be located in the country that issued the underlying securities. This requirement was eliminated in 1987. *See* Securities Exchange Act Release No. 24209 (March 12, 1987), 52 FR 8875 (March 20, 1987).

[4] As originally adopted, the Rule applied only to British and Canadian government securities. *See* Adopting Release, *supra* note 1. In 1986, the Rule was amended to include Japanese government securities. *See* Securities Exchange Act Release No. 23423 (July 11, 1986), 51 FR 25996 (July 18, 1986). In 1987, the Rule was amended to include debt securities issued by Australia, France and New Zealand. *See* Securities Exchange Act Release No. 25072 (October 29, 1987), 52 FR 42277 (November 4, 1987). In 1988, the Rule was amended to include debt securities issued by Austria, Denmark, Finland, the Netherlands, Switzerland, and West Germany. *See* Securities Exchange Act Release No. 26217 (October 26, 1988), 53 FR 43860 (October 31, 1988). In 1992 the Rule was again amended to (1) include debt securities offered by the Republic of Ireland and Italy, (2) change the country designation of "West Germany" to the "Federal Republic of Germany," and (3) replace all references to the informal names of the countries listed in the Rule with references to their official names. *See* Securities Exchange Act Release No. 30166 (January 6, 1992), 57 FR 1375 (January 14, 1992). Finally, the Rule was amended to include debt securities issued by the Kingdom of Spain. *See* Securities Exchange Act Release No. 34908 (October 27, 1994), 59 FR 54812 (November 2, 1994).

[5] *See* Letter from William J. Brodsky, President and Chief Executive Officer, CME, to Arthur Levitt, Jr., Chairman, Commission, dated May 3, 1995.

[6] The marketing and trading of foreign futures contracts is subject to regulation by the CFTC. In particular, Section 4b of the CEA authorizes the CFTC to regulate the offer and sale of foreign futures contracts to U.S. residents, and Rule 9 (17 CFR 30.9), promulgated under Section 2(a)(1)(A) of the CEA, is intended to prohibit fraud in connection with the offer and sale of futures contracts executed on foreign exchanges. Additional rules promulgated under 2(a)(1)(A) of the CEA govern the domestic offer and sale of futures and options contracts traded on foreign boards of trade. These rules require, among other things, that the domestic offer and sale of foreign futures be effected through the CFTC registrants or through entities subject to a foreign regulatory framework comparable to that governing domestic futures trading. *See* 17 CFR 30.3, 30.4, and 30.5 (1991).

[7] There are several types of Brady bonds, but "Par Bradys" and "Discount Bradys" represent the great majority of issues in the Brady bond market. In general, both Par Bradys and Discount Bradys are secured as to principal at maturity by U.S. Treasury zero-coupon bonds. Additionally, usually 12 to 18 months of interest payments are also secured in the form of a cash collateral account, which is maintained to pay interest in the event that the sovereign debtor misses an interest payment.

[8] The Commission notes that Mexican Cetes are not currently registered in the United States. The Commission is aware, however, that certain Mexican sovereign debt is registered in the United States and that the trading of futures on these debt issues would not be exempted under Rule 3a12–8 from the CEA's prohibition on futures overlying individual securities that are not exempted securities. With respect to Brady bonds, the Commission notes that its Division of Corporation Finance issued a no-action letter relating to the offer and sale of Mexican Brady bonds in the United States without registration under the Securities Act. *See* Letter from Anita T. Klein, Attorney, Office of International Corporate Finance, Division of Corporation Finance, to Alan L. Beller, Esq., Cleary, Gottlieb, Steen & Hamilton, dated March 28, 1990.

[9] The CME's proposed futures contracts will be cash-settled (*i.e.*, settlement of the futures contracts will not entail delivery of the underlying securities). The Commission has recognized that a cash-settled futures contract is consistent with the requirement of the Rule that delivery must be made outside the United States. *See* Securities Exchange Act Release No. 25072 (October 29, 1987), 52 FR 42277 (November 4, 1987).

[10] *See* Exhibit D to Form 18–K, Annual Report for Foreign Governments and Political Subdivisions Thereof, 17 CFR 249.218, filed by Mexico.

[11] Moreover, according to a recent survey of members of the Emerging Markets Traders Association ("EMTA"), Mexican debt instruments are the most popularly traded of all emerging markets instruments. According to the survey, the total annual 1994 trading volume for Mexican Cetes amounted to approximately US $27.2 billion, and approximately US $282.3 billion for Mexican Brady bonds. The survey, which was responded to by 80 out of the 333 members of the EMTA, was prepared for the EMTA by Price Waterhouse LLP. *See* 1994 Debt Trading Volume Survey, Emerging Market Traders Association (May 1, 1995).

Mexican Cetes and Mexican Brady bonds. The Commission notes, however, that there are certain differences between the sovereign debt securities of Mexico and the debt securities of the Designated Foreign Governments. In connection with some of the prior amendments to the Rule, the Commission noted that the long-term sovereign debt of those countries was rated in one of the two highest rating categories by at least two nationally recognized statistical rating organizations ("NRSROs").[12] This factor, according to the Commission, could be viewed as indirect evidence of an active and liquid secondary trading market.

Mexico's long-term sovereign debt obligations are not rated in one of the two highest rating categories.[13] Although the Commission in 1987 proposed to incorporate a rating standard specifically exempting securities issued by any country with outstanding long-term sovereign debt rated in one of the two highest rating categories by at least two NRSROs,[14] it ultimately declined to adopt such a rule.[15] At the time of the 1987 Rule proposal, the Commission expressed concerns that in the absence of such a requirement, the Rule might be used as a subterfuge to market or trade unregistered sovereign foreign debt through futures trading. The Commission, however, indicated that it did not intend to preclude futures trading on foreign debt that did not meet this ratings requirement and indeed subsequently sought comment on the feasibility of other factors for consideration, such as volume and depth of trading in a sovereign issuer's debt.

IV. Request for Comments

The Commission seeks comments on designating the debt securities of Mexico as exempted securities under Rule 3a12–8. The Commission is particularly interested in receiving comments to the proposed amendment in light of the fact that Mexico would be the first emerging market country to be included as a Designated Foreign Government. Comments should address whether the trading or other characteristics of Mexican debt warrant an exemption for purposes of futures trading.

In addition, the Commission seeks comment on the general application and operation of the Rule given the increased globalization of the securities markets since the Rule was adopted. Comment also is sought on the appropriateness of designating Mexican sovereign debt as exempted securities even though its long-term debt is not rated in one of the two highest rating categories by at least two NRSROs. The Commission seeks additional comment on whether debt ratings should continue to be used in evaluating proposals to add countries to the Rule and what alternative criteria, such as volume and depth of trading or amount of outstanding debt, could be used.[16]

The Commission further seeks comment on the CME's proposal to develop a contract market for Mexican Brady bonds, in light of the domestic trading activity in the over-the-counter market for these bonds. Commentators also are invited to discuss any unique issues associated with Brady bonds.

V. Cost-Benefit Analysis

Preliminarily, the Commission believes that the proposed amendment offers potential benefits for U.S. investors. If adopted, the proposed amendment would allow U.S. boards of trade to offer in the United States, and U.S. investors to trade, a greater range of futures contracts on foreign government debt obligations.

The Commission does not anticipate that the proposed amendment would result in any direct cost for U.S. investors or others. The proposed amendment would impose no recordkeeping or compliance burdens, and merely would provide a limited purpose exemption under the federal securities laws. The restrictions imposed under the proposed amendment are identical to the restrictions currently imposed under the terms of the Rule and are designed to protect U.S. investors.[17]

The Commission solicits comments on the costs and benefits of the proposed amendment to Rule 3a12–8. Specifically, the Commission requests commentators to address whether the proposed amendment would generate the anticipated benefits, or impose any costs on U.S. investors or others.

VI. Regulatory Flexibility Act Certification

Pursuant to Section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that the amendment proposed herein would not, if adopted, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release as Appendix A.

VII. Statutory Basis

The amendment to Rule 3a12–8 is being proposed pursuant to 15 U.S.C. 78a *et seq.*, particularly Sections 3(a)(12) and 23(a), 15 U.S.C. 78c(a)(12) and 78w(a).

List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

VIII. Text of the Proposed Amendment

For the reasons set forth in the preamble, the Commission is proposing to amend Part 240 of Chapter II, Title 17 of the *Code of Federal Regulations* as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for part 240 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d, 78i, 78j, 78*l*, 78m, 78n, 78o, 78p, 78q, 78s, 78w, 78x, 78*ll*(d), 79q, 79t, 80a-20, 80a-23, 80a-29, 80a-37, 80b-3, 80b-4, and 80b-11, unless otherwise noted.

* * * * *

2. § 240.3a12–8 is amended by removing the word "or" at the end of paragraph (a)(1)(xiv), removing the "period" at the end of paragraph (a)(1)(xv) and adding "; or" in its place, and adding paragraph (a)(1)(xvi) to read as follows:

§ 240.3a12–8 Exemption for designated foreign government securities for purposes of futures trading.

(a) * * *

(1) * * *

(xvi) the United Mexican States.

* * * * *

---

[12] *See* Securities Exchange Act Release No. 26217 (October 26, 1988), 53 FR 43860 (October 31, 1988) (Austria, Denmark, Finland, the Netherlands, Switzerland, and [West] Germany); Securities Exchange Act Release No. 30166 (January 6, 1992), 57 FR 1375 (Republic of Ireland and Italy); Securities Exchange Act Release No. 34908 (October 27, 1994), 59 FR 54812 (November 2, 1994) (Kingdom of Spain).

[13] As of June, 1995, Standard and Poor's Corp. ("S&P") rated Mexico's long-term foreign currency debt BB and its long-term local currency debt BBB+. As of the same date, Mexico's Bonos de Desarrollo (Bondes) were rated Baa3 by Moody's Investors Service.

[14] *See* Securities Exchange Act Release No. 24428 (May 5, 1987), 52 FR 18237 (May 14, 1987).

[15] *See* Securities Exchange Act Release No. 25072 (October 29, 1987), 52 FR 42277 (November 4, 1987).

[16] *See supra* notes 14 and 15 and accompanying text.

[17] The proposal represents the first time an emerging market sovereign debt would be added to the Rule. Additionally, the amendment would permit the trading of futures on Brady bonds. As noted above, the Commission is interested in the impact of this proposal on the objectives of the Rule.

By the Commission.

Dated: September 11, 1995.

Margaret H. McFarland,

Deputy Secretary.

Note: Appendix A to the Preamble will not appear in the Code of Federal Regulations.

Appendix A—Regulatory Flexibility Act Certification

I, Arthur Levitt, Jr., Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed amendment to Rule 3a12–8 ("Rule") under the Securities Exchange Act of 1934 ("Exchange Act") set forth in Securities Exchange Act Release No. 36213, which would define government securities of Mexico as exempted securities under the Exchange Act for the purpose of trading futures on such securities, will not have a significant economic impact on a substantial number of small entities for the following reasons. First, the proposed amendment imposes no record-keeping or compliance burden in itself and merely allows, in effect, the marketing and trading in the United States of futures contracts overlying the government securities of Mexico. Second, because futures contracts on the fifteen countries whose debt obligations are designated as "exempted securities" under the Rule, which already can be traded and marketed in the U.S., still will be eligible for trading under the proposed amendment, the proposal will not affect any entity currently engaged in trading such futures contracts. Third, because the level of interest presently evident in this country in the futures trading covered by the proposed rule amendment is modest and those primarily interested are large, institutional investors, neither the availability nor the unavailability of these futures products will have a significant economic impact on a substantial number of small entities, as that term is defined for broker-dealers in 27 CFR 240.0–10 and to the extent that it is defined for futures market participants in the Commodity Futures Trading Commission's "Policy Statement and Establishment of Definitions of 'Small Entities' for Purposes of the Regulatory Flexibility Act."[18]

Dated: September 8, 1995.

Arthur Levitt, Jr.,

Chairman.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[FRL–5296–2]

RIN 2060–AF33

Hazardous Air Pollutant List; Proposed Modification

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rule, upon promulgation, will amend the Clean Air Act (Act) list of hazardous air pollutants (section 112(b)(1), by removing the compound caprolactam (CAS No. 105–60–2). This action is being taken in response to a petition to delete the substance caprolactam which was filed by AlliedSignal, Inc., BASF Corporation, and DSM Chemicals North America under section 112(b)(3) of the Act. The EPA is granting the petition by issuance of this proposed rule. The decision to grant the petition is based on the Agency's examination of the available information concerning the potential hazards of and projected exposures to caprolactam. Based on this information, EPA has made an initial determination that there are adequate data on the health and environmental effects of caprolactam to determine that emissions, ambient concentrations, bioacccumulation, or deposition of the compound are not reasonably anticipated to cause adverse human health or environmental effects. This determination also takes into consideration the likelihood of adverse effects in light of the very limited potential for ambient inhalation exposure.

DATES: Written comments must be received on or before November 2, 1995. The EPA will hold a public hearing if EPA receives a written request for such a hearing on or before October 18, 1995. If a hearing is requested in a timely manner, EPA will keep the record open for thirty days after such hearing to receive rebuttal or supplementary information.

ADDRESSES: Submit written comments (duplicate copies preferred) to: Central Docket Section (A–130), Environmental Protection Agency, Attention: Docket No. A–94–33, 401 M St. SW., Washington, D.C. 20460. The docket includes a copy of the original petition, comments submitted concerning that petition, and additional materials supporting the proposed rule. The docket may be inspected between 8:00 a.m. and 4:30 p.m. on weekdays at EPA's Central Docket Section, West Tower Lobby, Gallery 1, Waterside Mall, 401 M St., SW, Washington, D.C. 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Dr. Nancy B. Pate, Office of Air Quality Planning and Standards, (MD–12), U.S. EPA, Research Triangle Park, NC 27711, telephone (919) 541–5347.

I. Background

Section 112 of the Act contains a mandate for EPA to evaluate and control emissions of hazardous air pollutants. Section 112(b)(1) includes an initial list of hazardous air pollutants that is composed of specific chemical compounds and compound classes to be used to identify source categories for which the EPA will promulgate emissions standards. The listed categories are subject to emission standards subsequently developed under section 112. The EPA must periodically review the list of hazardous air pollutants and, where appropriate, revise this list by rule. In addition, any person may petition EPA under section 112(b)(3) to modify the list by adding or deleting one or more substances. A petitioner seeking to delete a substance must demonstrate that there are adequate data on the health and environmental effects of the substance to determine that emissions, ambient concentrations, bioaccumulation, or deposition of the substance may not reasonably be anticipated to cause any adverse effects to human health or the environment. To sustain this burden, a petitioner must provide a detailed evaluation of the available data concerning the substance's potential adverse health and environmental effects, and estimate the potential exposures through inhalation or other routes resulting from emissions of the substance.

On July 19, 1993, EPA received a petition from AlliedSignal, Inc., BASF Corporation, and DSM Chemicals North America, Inc. ("petitioners"), to delete caprolactam (CAS No. 105–60–2) from the hazardous air pollutant list in section 112(b)(1), 42 U.S.C., section 7412(b)(1). Following receipt of the petition, EPA conducted a preliminary evaluation to determine whether the petition was complete according to Agency criteria. To be deemed complete, a petition must consider all available health and environmental effects data. A petition must also provide comprehensive emissions data, including current peak and annual average emissions for each source, and must estimate the resultant exposures of people living in the vicinity of the source. In addition, a petition must address the environmental impacts associated with emissions to the ambient air and impacts associated with the subsequent cross-media transport of those emissions. The EPA found the petition to delete caprolactam to be complete and published a notice of receipt and request for comments in the **Federal Register** on August 26, 1993 (58 FR 45081).

The EPA received ten submissions in response to the request for comments concerning the caprolactam petition. Eight of these submissions related to an AlliedSignal facility that emits caprolactam which is located in Irmo, South Carolina. A number of Irmo residents reported health problems that they believed were associated with caprolactam emissions from this plant. The EPA subsequently met with a local citizens' group, representatives of AlliedSignal, and the South Carolina Department of Health and Environmental Control to discuss the citizens' concerns regarding caprolactam emissions from the facility, and to explore mechanisms which could lead to prompt installation of additional controls of such emissions.

On March 13, 1995, EPA executed two detailed agreements with AlliedSignal concerning the Irmo manufacturing facility and another facility located in Chesterfield, Virginia, copies of which are included in the public docket for this rulemaking. AlliedSignal agreed that, if caprolactam is delisted pursuant to this proposal, AlliedSignal will install emissions controls which EPA believes are equivalent to the controls which would have been required had EPA issued a standard to control these sources under section 112. The agreed emissions controls will be incorporated in federally enforceable operating permits for the affected facilities, and will be in place years earlier than controls would have otherwise been required. In addition, AlliedSignal has agreed to establish a citizen advisory panel concerning the Irmo facility in order to improve communications with the community and to assure that citizens have an ongoing role in implementation of the agreed emission reductions.

II. Criteria for Delisting

Section 112(b)(2) of the Act requires EPA to make periodic revisions to the initial list of hazardous air pollutants set forth in section 112(b)(1) and outlines criteria to be applied in deciding whether to add or delete particular substances. Section 112(b)(2) identifies pollutants that should be listed as:

> * * * pollutants which present, or may present, through inhalation or other routes of exposure, a threat of adverse human health effects (including, but not limited to, substances which are known to be, or may reasonably be anticipated to be, carcinogenic, mutagenic, teratogenic, neurotoxic, which cause reproductive dysfunction, or which are acutely or chronically toxic) or adverse environmental effects whether through ambient concentrations, bioaccumulation, deposition, or otherwise * * *

To assist EPA in making judgments about whether a pollutant causes an adverse environmental effect, section 112(a)(7) defines an "adverse environmental effect" as:

> * * * any significant and widespread adverse effect, which may reasonably be anticipated, to wildlife, aquatic life, or other natural resources, including adverse impacts on populations of endangered or threatened species or significant degradation of environmental quality over broad areas.

Section 112(b)(3) establishes general requirements for petitioning EPA to modify the hazardous air pollutant list by adding or deleting a substance. Although the Administrator may add or delete a substance on his own initiative, the burden is on a petitioner to include sufficient information to support the requested addition or deletion under the substantive criteria set forth in sections 112(b)(3) (B) and (C). The Administrator must either grant or deny a petition within 18 months of receipt. If the Administrator decides to grant a petition, the Agency publishes a written explanation of the Administrator's decision, along with a proposed rule to add or delete the substance. If the Administrator decides to deny the petition, the Agency publishes a written explanation of the basis for denial. A decision to deny a petition is final Agency action subject to review in the D.C. Circuit Court of Appeals under Section 307(b) of the Act.

To promulgate a final rule deleting a substance from the hazardous air pollutant list, section 112(b)(3)(C) provides that the Administrator must determine that:

> * * * there is adequate data on the health and environmental effects of the substance to determine that emissions, ambient concentrations, bioaccumulation, or deposition of the substance may not reasonably be anticipated to cause any adverse effects to the human health or adverse environmental effects.

The EPA will grant a petition to delete a substance, and publish a proposed rule to delete that substance, if it makes an initial determination that this criterion has been met. After affording an opportunity for comment and for a hearing, EPA will make a final determination whether the criterion has been met.

The EPA does not interpret section 112(b)(3)(C) to require absolute certainty that a pollutant will not cause adverse effects on human health or the environment before it may be deleted from the list. The use of the terms "adequate" and "reasonably" indicate that the Agency must weigh the potential uncertainties and their likely significance. Uncertainties concerning the risk of adverse health or environmental effects may be mitigated if EPA can determine that projected exposures are sufficiently low to provide reasonable assurance that such adverse effects will not occur. Similarly, uncertainties concerning the magnitude of projected exposures may be mitigated if EPA can determine that the levels which might cause adverse health or environmental effects are sufficiently high to provide reasonable assurance that exposures will not reach harmful levels. However, the burden remains on a petitioner to resolve any critical uncertainties associated with missing information. The EPA will not grant a petition to delete a substance if there are major uncertainties which need to be addressed before EPA would have sufficient information to make the requisite determination.

III. Summary of the Petition

The petition to delete caprolactam stated that the petitioners comprise 100 percent of the U.S. caprolactam producers and caprolactam by-product ammonium sulfate manufacturers, 88 percent of the Nylon 6 fiber producers, 72 percent of the Nylon 6 plastic producers, and the only major supplier of Nylon 6 films. The petition contained the following information:

(A) Identification and location of all facilities producing or using caprolactam;

(B) Estimated current and future air emissions of caprolactam, atmospheric modeling and monitoring data supporting the estimation of peak short-term and annual average ambient concentrations, estimates of the number people potentially exposed to those concentrations, and estimated deposition of caprolactam to the land and surface water;

(C) Documentation of a literature search conducted within 6 months prior to the petition filing, including identification of the data bases searched, the search strategy, and printed results;

(D) Printed copies of all human, animal, in vitro, or other toxicity studies cited in the literature search. In addition, the petition contained unpublished occupational health data and studies collected at the AlliedSignal facility in Hopewell, Virginia;

(E) Printed copies of environmental effect data characterizing the fate of caprolactam when it is released into the atmosphere. This information includes atmospheric residence time, solubility, phase distribution, vapor pressure, octanol/water partition coefficient, particle size, adsorption coefficients, information on atmospheric transformations, potential degradation or transformation products, and bioaccumulation potential; and

(F) A list of all support documents in the petition.

IV. EPA Analysis of Petition

A. Hazard Evaluation

The EPA reviewed the discussion of health effects in the petition and determined that it comprehensively describes the toxicologic and epidemiologic data concerning caprolactam which is currently available. There is extensive toxicologic information concerning caprolactam, but most of the available studies involve ingestion rather than inhalation of the substance.

The toxicologic information on ingestion of caprolactam includes long-term bioassays in mice and rats, a three generation reproduction study in rats, subchronic studies in rats, developmental toxicity studies in rats and rabbits, and even administration to humans. In general, the oral studies indicate that caprolactam has low toxicity. In the available studies, caprolactam was not found to be carcinogenic or mutagenic. Caprolactam caused neurotoxicity in some acute studies at high doses. The most sensitive endpoint in the available oral studies was reduced mean body weight of offspring in a reproductive study in rats (no observed adverse effect level of 50 mg/kg/day).

The no-observed adverse effect level (NOAEL) for reduced mean body weight of offspring in the rat study was used by EPA to derive its current reference dose (RFD) for caprolactam of 0.5 mg/kg/day. The RFD is defined as an estimate (with uncertainty spanning perhaps an order of magnitude) of the daily exposure to the human population (including sensitive subpopulations) that is likely to be without deleterious effects during a life time. The EPA has assigned a "high" confidence level to the RFD for oral exposure to caprolactam.

The available animal data on inhalation of caprolactam consist of two acute toxicity studies, one in guinea pigs and the other in rats. Caprolactam is a highly water soluble solid with a very low vapor pressure at ambient temperatures. These physical properties make it difficult to generate stable atmospheres of caprolactam for use in inhalation toxicity studies and to exclude secondary exposure to caprolactam by other routes.

Given the present lack of suitable inhalation data, EPA concluded that derivation of an inhalation reference concentration (RfC) for caprolactam was infeasible. The petitioners sought to derive an equivalent human inhalation dose from the oral RFD for caprolactam by adjusting for human body weight and inhalation rate. The similarity between the LC_{50} by the inhalation route and the LD_{50} by the oral route in rats does not suggest any important differences in systemic effects from acute exposures between the two routes. However, it is inappropriate to utilize an inhalation dose derived from the oral RFD for all potential adverse effects because caprolactam is a respiratory irritant. Portal of entry effects preclude use of route-to-route extrapolation for such a purpose. Moreover, any comparison between the oral and inhalation routes must consider the possibility of pharmacokinetic and metabolic differences between the routes.

As noted above, the most sensitive endpoint in the available oral studies was reduced mean body weight of offspring in a reproductive toxicity study in rats (no observed adverse effect level of 50 mg/kg/day). The EPA is reluctant to make quantitative comparisons between the oral and inhalation routes and EPA has been unable to validate any general procedures for extrapolation between these routes. Although EPA considers it questionable to evaluate inhalation risks for many chronic effects based on oral data, EPA sometimes evaluates the risk of developmental/reproductive effects by the inhalation route based on an appropriate oral study. In this instance, the oral NOAEL of 50 mg/kg/day would be equivalent to approximately 175 mg/m^3, after adjusting for a human body weight of 70 kg, 100 percent absorption, and a human inhalation rate of 20 m^3/day.

Limited occupational studies of workers with chronic caprolactam exposure have not found any measurable change in pulmonary function compared to matched controls. Chronic workplace exposures to caprolactam in these studies ranged as high as 9,900 μg/m^3 (9.9 mg/m^3). However, respiratory tract irritation from caprolactam vapor has been recorded to occur in workers at 46 mg/m^3. The recommended worker exposure limit for caprolactam vapor, established to reduce the potential for irritation, is 23 mg/m^3 (ACGIH TWA). Both concentrations are far below the figure of 175 mg/m^3 extrapolated above.

B. Exposure Evaluation

The primary use of caprolactam is as the monomer for manufacture of Nylon 6 fiber, resin, and film. Approximately 83 percent of domestically-manufactured caprolactam is used in the production of Nylon 6 fibers, and virtually all of the rest is used to produce Nylon 6 resins and films.

The EPA believes that inhalation is the only important route of nonoccupational exposure resulting from caprolactam emissions. Dermal absorption is likely to be insignificant compared to inhalation. The rapid biodegradation of caprolactam in water as well as the ease of treatability in sewage treatment systems indicates that humans are unlikely to be exposed to significant amounts of caprolactam in drinking water. In addition, caprolactam emitted to the air would be unlikely to concentrate in food sources.

The EPA source category list identifies three categories of sources which emit caprolactam: caprolactam manufacturers, ammonium sulfate manufacturers, and Nylon 6 manufacturers. In their petition, the petitioners evaluated caprolactam releases by each of these types of facilities, as well as two additional categories of facilities: Nylon 6 film manufacturers and facilities that heat set Nylon 6 fiber as part of the manufacture of other products.

The highest annual emissions of caprolactam by an individual facility reported in the petition were at the AlliedSignal Nylon 6 manufacturing plants in Chesterfield, Virginia (233.5 tons/year), and Irmo, South Carolina (164.4 tons/year). As noted above, AlliedSignal has committed to install emission controls at each of these facilities which will be fully operational well before any controls would be required based on any standard promulgated under section 112. These commitments will be implemented through legally enforceable permit terms and are expected to reduce aggregate caprolactam emissions (including uncontrolled fugitive emissions) at these facilities by more than one half, to approximately 111 tons/year and 79 tons/year.

The petitioners presented modeled maximum exposure levels for every major source of caprolactam (sources emitting more than 10 tons annually). The highest estimated caprolactam exposures were for AlliedSignal's Chesterfield manufacturing facility, at which the petitioners estimated that the maximum 1-hour concentration would be 1107.8 $\mu g/m^3$ and the maximum annual concentration would be 44.7 $\mu g/m^3$. After controls are installed at the Chesterfield and Irmo facilities, the projected maximum 1-hour concentrations will be 543 $\mu g/m^3$ and 482 $\mu g/m^3$ respectively, and the projected maximum annual concentrations will be 19 $\mu g/m^3$ and 21 $\mu g/m^3$.

Once the agreed emission controls are installed at the AlliedSignal facilities, the highest modeled caprolactam concentrations will be at certain of the facilities that heat set Nylon 6 fiber. However, the annual caprolactam emissions at these facilities will still be less than the emissions at the AlliedSignal manufacturing facilities, even after controls have been installed at the AlliedSignal facilities. The higher modeled concentrations at facilities that heat set Nylon 6 fiber reflect the more conservative modeling techniques used for these facilities (the petitioners used ISCST modeling for their own manufacturing facilities and Tier II screen modeling for other sources).

C. Human Risk Determination

The maximum modeled concentrations for caprolactam of approximately 1 mg/m^3 for 1-hour, 0.25 mg/m^3 for 24-hour, and 0.05 mg/m^3 for annual are well below the lowest documented nose and throat irritation level of 46 mg/m^3. Moreover, the emission controls which AlliedSignal has agreed to install at its manufacturing facilities will significantly reduce the prospect that any person will be exposed to caprolactam concentrations as great as the maximum estimates presented in the petition.

As noted above, some citizens living near the AlliedSignal facility in Irmo, South Carolina, report that they have experienced adverse health effects in the past which they believe are a result of caprolactam emissions from that facility. The EPA has discussed these concerns at length with local citizens, and has made considerable efforts to assure that prompt and enforceable reductions in caprolactam emissions are achieved at the Irmo facility. However, EPA cannot conclude that there is any relation between caprolactam emissions and the reported health effects based on the information currently available. In 1993, in response to the concerns of citizens living near the Irmo facility, the Agency for Toxic Substance and Disease Registry (ATSDR) conducted a preliminary screening study and recommended that a full study not be conducted since "the concentrations of hazardous substances found in the ambient air sampling were not of health concern and were not plausibly related to the release of hazardous substances." While the ATSDR investigators acknowledged that hazardous substances were present in air releases from the facility, they also stated that the reported symptoms could be associated with naturally occurring allergens in the local environment.

The available oral toxicology data do not suggest that caprolactam is appreciably toxic in humans or test animals. The emission controls which AlliedSignal has agreed to install at its manufacturing plants should further reduce the prospect for actual exposures as great as the maximum exposures estimated in the petition. Even though extrapolation of oral data to the inhalation route of exposure is suspect and uncertainties remain about portal of entry effects from long-term exposure, the available information as a whole indicates that adverse health effects would not be reasonably anticipated in the human populations located near facilities emitting caprolactam. This conclusion is reinforced by consideration of the likelihood of adverse effects given the very limited potential for ambient inhalation exposure. Based on this information, EPA has made an initial determination that there are adequate data on the health and environmental effects of caprolactam to determine that emissions, ambient concentrations, bioacccumulation, or deposition of caprolactam are not reasonably anticipated to cause adverse human health effects.

As explained above, the physical properties of caprolactam tend to make additional inhalation testing difficult to conduct and to interpret. As a result of discussions with EPA, the petitioners conducted an inhalation feasibility study and have now agreed to conduct a 90-day subchronic inhalation study in rats. The variations in exposure concentrations at the targeted exposure levels in the 90 day subchronic inhalation study will likely be high. In addition, the inhalation concentrations generated may not reach the levels which would cause any of the potential systemic effects predicted by studies using the oral route but may achieve concentrations that would produce portal of entry effects.

The EPA anticipates that the results from the 90-day study which the petitioners have agreed to conduct will not materially alter the current EPA assessment. Moreover, EPA does not intend to defer final action in this rulemaking pending submission and analysis of the results from this inhalation study. If the results of this study indicate that there are portal of entry effects or systemic effects from inhalation exposure at levels significantly below those suggested by the Agency's present assessment, EPA will review any final action taken in this rulemaking in light of such data.

D. Environmental Effects

In order to delete a substance from the hazardous air pollutant list, EPA must also evaluate potential environmental effects associated with emissions of the substance. In the case of caprolactam, the information in the petition demonstrates that caprolactam will be rapidly degraded, and is not likely to bioaccumulate, in aquatic ecosystems. Caprolactam also has low toxicity to fish, invertebrates, and higher terrestrial plants. Based on this information, EPA has made an initial determination that there are adequate data on the health and environmental effects of caprolactam to determine that emissions, ambient concentrations, bioacccumulation, or deposition of caprolactam are not reasonably anticipated to cause environmental effects.

V. Proposal to Delete

The EPA hereby proposes to modify the Act list of hazardous air pollutants (section 112(b)(1), 42 U.S.C. 7412(b)(1)) by deleting the compound caprolactam (CAS No. 105–60–2).

VI. Interim Relief

Although EPA has proposed to modify the hazardous air pollutant list by deleting caprolactam, it will remain on the list for most purposes during the pendency of the rulemaking initiated by this notice. However, if caprolactam remains on the hazardous air pollutant list for all purposes during the pendency of the rulemaking to delist caprolactam, certain facilities which would not otherwise be required to obtain operating permits under title V of the Act will be required to prepare and submit applications for operating permits. The EPA has determined that retention, during the rulemaking to delist caprolactam, of permit application requirements which will no longer exist after the delisting process has been completed would result in unnecessary private and public expenditures on preparation, submission, and processing of such applications, and would yield no environmental benefits.

Because retention of the listing of caprolactam for purposes of determining the applicability of title V operating permit requirements during the rulemaking to delist would be burdensome and costly, and would not effectuate the objectives of the Act, and because it would be impracticable and contrary to the public interest to defer administrative relief until after the rulemaking has been completed, EPA has determined that there is good cause to immediately suspend the listing of caprolactam for this limited purpose. Accordingly, EPA is today suspending the listing of caprolactam, for the duration of the rulemaking to delist caprolactam, for purposes of determining the applicability of title V permitting requirements. This action provides sensible regulatory relief for those facilities which manufacture or utilize Nylon 6 products, and who will not otherwise be subject to title V requirements once the delisting of caprolactam has been completed. Any facilities which emit caprolactam but which are otherwise subject to title V requirements are not affected by this action, and must satisfy the applicable permitting requirements.

While the proposed rule to delist caprolactam is pending, State permitting authorities should make any revisions or adjustments in their title V operating programs necessary to implement today's action suspending caprolactam from the hazardous air pollutant list for purposes of determining the applicability of permitting requirements. In the event that the Agency decides at the conclusion of the rulemaking not to delete caprolactam from the list, the Agency will work with affected facilities and State permitting authorities to assure that any title V requirements resulting solely from that decision are implemented in a fair and orderly manner.

VII. Miscellaneous

A. Executive Order 12866

Under Executive Order 12866 (58 FR 57735, October 4, 1993), the Agency must determine whether this regulation, if promulgated, is "significant" and therefore subject to review by the Office of Management and Budget under the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

1. Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities;
2. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
3. Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or
4. Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This action will not result in an annual effect on the economy of $100 million or another adverse economic impact, does not create a serious inconsistency or interfere with another agency's action, and does not materially alter the budgetary impacts of entitlements, grants, user fees, etc. However, since this proposal reflects the Agency's first decision to grant a petition to modify the hazardous air pollutant list, EPA has concluded that it might be construed as raising novel legal or policy issues and has therefore submitted the proposal for OMB review under Executive Order 12866.

B. Regulatory Flexibility Analysis

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis" in connection with any rulemaking for which there is a statutory requirement that a general notice of proposed rulemaking be published. The "initial regulatory flexibility analysis" describes the effect of the proposed rule on small business entities. However, section 605(b) of the Act provides that an analysis not be required when the head of an agency certifies that the rule will not, if promulgated, have a significant impact on a substantial number of small entities.

Because adoption of this proposal would reduce regulatory burdens which would otherwise result from retention of caprolactam on the hazardous air pollutant list, EPA believes that this rule will have no adverse effect on small businesses. For the preceding reason, I certify that this rule will not have a significant economic impact on a substantial number of small entities.

C. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995, EPA must prepare a written statement to accompany any rules that have "Federal mandates" that may result in the expenditure by the private sector of $100 million or more in any one year. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objective of such a rule and that is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising small governments that may be significantly and uniquely affected by the rule.

The Unfunded Mandates Act defines a "Federal private sector mandate" for regulatory purposes as one that, among other things, "would impose an enforceable duty upon the private sector." This proposal to modify the hazardous air pollutant list to delete caprolactam is deregulatory in nature and does not impose any enforceable duties upon the private sector. Therefore, this rulemaking is not a "Federal private sector mandate" and is not subject to the requirements of section 202 or section 205 of the Unfunded Mandates Act. As to section 203, EPA finds that small governments will not be significantly and uniquely affected by this rulemaking.

Dated: September 8, 1995.

[AD-FRL-5296-6]

Clean Air Act Proposed Interim Approval of the Operating Permits Program; Arizona Department of Environmental Quality, Maricopa County Environmental Services Department, Pima County Department of Environmental Quality, Pinal County Air Quality Control District, Arizona: Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed Rule; Extension of comment period.

SUMMARY: The EPA is extending the comment period for a proposed rule published July 13, 1995 (60 FR 36083) in which EPA proposed interim approval of the title V operating permits program submitted by the State of Arizona. The Arizona program is comprised of programs from the Arizona Department of Environmental Quality, the Maricopa County Environmental Services Department, the Pima County Department of Environmental Quality, and the Pinal County Air Quality Control District.

At the request of the Arizona Center for Law in the Public Interest, EPA is

extending the comment period for 30 days.

DATES: The comment period on the proposed rule is extended until September 25, 1995.

ADDRESSES: Comments should be addressed to Regina Spindler, Mail Code A–5–2, U.S. Environmental Protection Agency, Region IX, Air and Toxics Division, 75 Hawthorne Street, San Francisco, CA 94105.

FOR FURTHER INFORMATION CONTACT: Regina Spindler at (415) 744–1251.

Dated: September 5, 1995.

Felicia Marcus,

Regional Administrator.

BILLING CODE 6560-50-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 227

[Docket No. 941084–4284; I.D. 083095C]

Endangered and Threatened Species; Proposed Threatened Status for Southern Oregon and Northern California Steelhead

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Supplementary proposed rule; request for comments.

SUMMARY: NMFS is issuing this supplementary proposed rule to rectify the inadvertent omission of proposed protective regulations from the proposed rule to protect natural steelhead (*Oncoryhnchus mykiss*) populations occurring between Cape Blanco, OR, and the Klamath River Basin in Oregon and California inclusive; hereinafter referred to as the Klamath Mountains Province (KMP). The species was proposed for listing as threatened under the Endangered Species Act (ESA) of 1973 on March 16, 1995. Public comments on the supplementary proposed rule are being accepted.

DATES: Comments must be received by October 16, 1995.

ADDRESSES: Comments on the language in this supplementary proposed rule only should be sent to Environmental and Technical Services Division, NMFS, Northwest Region, 525 NE Oregon Street, Suite 500, Portland, OR 97232.

FOR FURTHER INFORMATION CONTACT: Garth Griffin,503–231-2005; R. Craig Wingert, 310–980–4021; or Marta Nammack, 301–713–1401.

SUPPLEMENTARY INFORMATION: The KMP steelhead "species (distinct population segment)" was proposed for listing under the ESA on March 16, 1995 (60 FR 14253). The **Federal Register** document of that proposal should be consulted for all relevant background information.

Public Comments Solicited

To ensure that the final action resulting from the KMP steelhead proposed rule will be as accurate and as effective as possible, NMFS is soliciting comments and suggestions from the public, other concerned governmental agencies, the scientific community, industry, and any other interested parties (see **ADDRESSES**) regarding this supplementary proposed rule. The final decision on the KMP steelhead proposal will take into consideration the comments received during the initial comment period, comments on this supplementary proposed rule and any additional information received by NMFS, and may differ from the proposed rule.

Classification

The 1982 amendments to the ESA, in section 4(b)(1)(A), restrict the information that may be considered when assessing species for listing. Based on this limitation of criteria for a listing decision and the opinion in *Pacific Legal Foundation* v.

Andrus, 675 F. 2d 825 (6th Cir., 1981), NMFS has categorically excluded all ESA listing actions from environmental assessment requirements of National Environmental Policy Act (48 FR 4413, February 6, 1984).

This proposed rule is exempt from review under E.O. 12866.

List of Subjects in 50 CFR Part 227

Endangered and threatened species, Exports, Imports, Marine mammals, Transportation.

Dated: September 11, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 227 is proposed to be amended as follows:

PART 227—THREATENED FISH AND WILDLIFE

1. The authority citation for part 227 continues to read as follows:

Authority: 16 U.S.C. 1531 *et seq.*

2. Section 227.21 is revised to read as follows:

§ 227.21 Threatened Salmon.

(a) *Prohibitions.* The prohibitions of section 9 of the Act (16 U.S.C. 1538) relating to endangered species apply to threatened species of salmon listed in § 227.4(g), except as provided in paragraph (b) of this section.

(b) *Exceptions.* The exceptions of section 10 of the Act (16 U.S.C. 1539) and other exceptions under the Act relating to endangered species, including regulations implementing such exceptions, also apply to the threatened species of salmon listed in § 227.4(g). This section supersedes other restrictions on the applicability of parts 217 and 222 of this chapter, including, but not limited to, the restrictions specified in § 217.2 and 222.22(a) of this chapter with respect to the species identified in § 227.21(a).

Management Options for the American Lobster Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking (ANPR); request for comments.

SUMMARY: NMFS is seeking comment on options for improving management of the American lobster fishery. Two options specifically being considered are withdrawing the American Lobster Fishery Management Plan (FMP) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and implementing regulations to govern the lobster fishery under the Atlantic Coastal Fisheries Cooperative Management Act (ACFCMA), or preparing a Secretarial amendment to the FMP under the Magnuson Act.

DATES: Written comments on this ANPR must be received on or before November 2, 1995.

ADDRESSES: Comments on the ANPR should be sent to Dr. Andrew A. Rosenberg, Regional Director, National Marine Fisheries Service, Northeast Regional Office, 1 Blackburn Dr., Gloucester, MA 01930. Copies of current Effort Management Team (EMT) proposals or Amendment 5 to the American Lobster Fishery Management Plan are available from Douglas

Marshall, Executive Director, New England Fishery Management Council, 5 Broadway, Saugus, MA 01906–1097.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, 508–281–9273.

SUPPLEMENTARY INFORMATION:

Background

The American lobster fishery is prosecuted primarily in state waters, and is managed under an FMP developed by the New England Fishery Management Council (Council) in consultation with the Atlantic States Marine Fisheries Commission (ASMFC). The primary objective of the FMP is to serve as a vehicle for coordinated management of the American lobster fishery throughout its range, which encompasses both inshore waters under state jurisdictions and offshore waters under Federal jurisdiction. Because the lobster resource supports important inshore fisheries for States from Maine through New Jersey, these States have developed regulations in compliance with the ASMFC Interstate Management Plan. The Federal FMP and regulations both strengthen and unify the state programs by implementing complementary measures in Federal waters.

In 1993, an assessment of the status of the lobster resource determined that it is overfished. In response, the Council developed Amendment 5 to the FMP, which was implemented on July 20, 1994 (59 FR 31938, June 21, 1994). Amendment 5 established a limited access permit system and an EMT for each of the four management areas. EMTs were made up of industry members, state and Federal government personnel, and Council staff. This approach provided a unique opportunity for members of the industry to participate directly in the development of management measures. Each EMT was required to develop a stock rebuilding program for its area and make recommendations to the Council by January 20, 1995 (50 CFR 649.43(a)). The Council would then determine whether to adopt or modify the EMT's recommendations, provide opportunity for public testimony, and submit management measures sufficient to achieve the objectives of the FMP to the Director, Northeast Region, NMFS (Regional Director), on or before July 20, 1995 (§ 649.43(c)). If the Council failed to submit management measures sufficient to achieve the objectives of the FMP on or before July 20, 1995, NMFS, acting on behalf of the Secretary of Commerce, was to determine whether to prepare an amendment to the FMP (§ 649.42(a)(3)) (Secretarial amendment).

The EMT proposals were submitted on schedule. However, on June 28–29, 1995, the Chair of the Council's Lobster Oversight Committee reported that it would not meet the July 20, 1995, deadline. In addition, several state directors informed the Council that they would be unable to implement the EMT proposals, specifically with reference to achieving the fishing mortality rate reduction rates and administration of a trap-tag system embodied in Amendment 5. Consequently, as called for by Amendment 5, NMFS must now consider whether to prepare a Secretarial amendment or take other action, which could include the option of withdrawal of the FMP.

Options

FMP Withdrawal

One option available to NMFS is to withdraw the FMP and implement regulations under the ACFCMA. Under ACFCMA, these regulations must be: (1) Necessary to support the effective implementation of an ASMFC Interstate Fishery Management Plan and (2) consistent with the national standards set forth in section 301 of the Magnuson Act. These regulations could include continuation of the limited access permit system as well as implementation of the EMT proposals to the extent that such proposals are consistent with ACFCMA. This option would remove management responsibility for the lobster fishery from the Council's purview.

Secretarial Amendment

A second option provided under the Magnuson Act is for NMFS to prepare a Secretarial amendment to the existing FMP, in accordance with the national standards, the other provisions of the Magnuson Act, and any other applicable law. The Magnuson Act provides that such action can be taken if the Council fails to develop and submit, after a reasonable period of time, any necessary amendment to an FMP, if the fishery requires conservation and management.

Under this option, a Secretarial amendment could maintain current regulations, such as the limited access permit system, and implement some or all of the measures proposed by the EMTs as deemed consistent with the objectives of the FMP. However, without the full commitment by the States to implement complementary measures to an FMP amendment, the EMT proposals may no longer be sufficient to achieve the fishing mortality reduction goals. Therefore, additional measures, such as time and/or area closures, for federally permitted vessels would be considered. Under this option, the Council would have the opportunity to comment on a Secretarial amendment and to amend the FMP in the future.

Request for Comments

NMFS is interested in receiving comments on the options explained above. The options discussed are not all-inclusive; suggestions for alternative approaches are encouraged. After consideration of the comments, NMFS will decide whether to proceed with any of the options above or other options, as appropriate.

Authority: 16 U.S.C. 1801 *et seq.* and 16 U.S.C. 5101 *et seq.*

RIN 0648–AH00

Groundfish of the Gulf of Alaska; Groundfish Fishery of the Bering Sea and Aleutian Islands Area; Extension of Allocations to Inshore and Offshore Components

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS publishes a proposed rule that would implement through December 31, 1998, allocations of Pacific cod and pollock for processing by the inshore and offshore components in the Gulf of Alaska (GOA) and pollock for processing by the inshore and offshore components in the Bering Sea and Aleutian Islands management area (BSAI). It would also continue the Western Alaska Community Development Quota (CDQ) Program. These provisions are contained in proposed Amendment 40 to the Fishery Management Plan (FMP) for Groundfish of the Gulf of Alaska and proposed Amendment 38 to the FMP for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area, which the North Pacific Fishery Management Council (Council) has submitted to NMFS for review and approval under the Magnuson Fishery Conservation and Management Act (Magnuson Act). If

approved, these amendments would continue measures that were contained in Amendments 18 and 23 to the GOA and BSAI FMPs, respectively. The proposed rule is intended to promote management and conservation of groundfish, enhance stability in the fisheries, and further the goals and objectives contained in the FMPs that govern these fisheries.

DATES: Comments are invited on or before November 2, 1995.

ADDRESSES: Send comments to Ronald J. Berg, Chief, Fisheries Management Division, Attn: Lori Gravel, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668 or deliver them to Room 457, Federal Building, 709 W. 9th Street, Juneau, AK. Individual copies of the proposed amendments and the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) may be obtained from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510. Send comments and suggestions regarding Paperwork Reduction Act (PRA) requirements to Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503, Attn: NOAA Desk Officer.

FOR FURTHER INFORMATION CONTACT: Jay Ginter, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background

The groundfish fisheries in the exclusive economic zone (EEZ) off Alaska are managed under the BSAI and GOA FMPs. Both FMPs were prepared by the Council under authority of the Magnuson Act. The GOA FMP is implemented by regulations appearing at 50 CFR 611.92, 50 CFR part 672, and 50 CFR part 676; the BSAI FMP, at 50 CFR 611.93, 50 CFR part 675, and 50 CFR part 676. General regulations that also pertain to U.S. fisheries appear at 50 CFR part 620. The fisheries for pollock (*Theragra chalcogramma*) and Pacific cod (*Gadus macrocephalus*) and the affected human environment are described in the FMPs, in the environmental impact statements prepared by the Council for each FMP, and in the EA/RIR/IRFA prepared for this action.

Amendments 38 and 40 will extend the provisions of Amendment 18 to the BSAI FMP and Amendment 23 to the GOA FMP. The only significant change is moving the western border of the Catcher Vessel Operational Area (CVOA) 30 minutes to the east, from 168°00′ to 167°30′ W. long. Because Amendments 18 and 23 and their implementing regulations expire on December 31, 1995, and because the Council has yet to complete development of its comprehensive plan to address problems caused by the open access nature of the Alaska groundfish fisheries, the Council voted unanimously at its June 1995 meeting to extend the provisions of the expiring amendments through December 31, 1998, by Amendments 38 and 40.

The problems and issues addressed by Amendments 38 and 40 are discussed in the proposed rule notice for Amendments 18 and 23 (56 FR 66009, December 20, 1991; corrected at 57 FR 2814, January 23, 1992), the final rule implementing Amendment 23 and the initially approved portions of Amendment 18 (57 FR 23321, June 3, 1992); a proposed rule to implement a revision of the parts of Amendment 18 that were disapproved earlier (57 FR 46133 (October 7, 1992); and a final rule to implement the revised parts of Amendment 18 (57 FR 61326, December 24, 1992; corrected at 58 FR 14172, March 16, 1993).

The following text covers separately two issues. The first addresses the allocation of Pacific cod and pollock for processing by the inshore and offshore components in the GOA and pollock for processing by the inshore and offshore components in the BSAI. The second addresses the Western Alaska Community Development Program and its allocation of pollock.

1. The Inshore-Offshore Issue

A. Summary of the Inshore-Offshore Issue of Amendments 18 and 23

Early in 1989, several catcher-processor vessels (factory trawlers) harvested substantial amounts of pollock in the BSAI and GOA. This large, quick harvest forced an early closure of the GOA pollock fishery and prevented inshore harvesters and processors from realizing their anticipated economic benefit from pollock later in the fishing year. Thus, at the April 1989 Council meeting, fishermen and processors from Kodiak Island requested that the Council consider specific allocations of fish for processing by the inshore and offshore components of the fishery to prevent future preemption of resources by one sector of the industry. The Council considered the request and the impacts on coastal community development and stability of the fisheries and prepared Amendments 18 and 23.

NMFS' review of the amendments began on December 1, 1991. On March 4, 1992, the NMFS approved the proposed pollock and Pacific cod allocations for the GOA and the proposed pollock allocation for the BSAI for 1992, but disapproved the proposed allocations for the BSAI in 1993 through 1995. The approved allocations were implemented on June 1, 1992 (57 FR 23321, June 3, 1992).

In his March 4, 1992, letter notifying the Council of his approval of Amendment 23 and partial disapproval of Amendment 18, the Under Secretary and Administrator of NOAA (Administrator) stated that NOAA is not opposed to the concept of an allocation between onshore and offshore interests as an interim measure pending development of a solution to overcapitalization—ideally, a market-based solution. NMFS' disapproval of the BSAI pollock allocations for 1994 and 1995 was based in part on a cost-benefit analysis prepared by NMFS that indicated a significant net economic loss to the Nation under the proposed allocations for years 1993 through 1995. The Administrator urged the Council to work as expeditiously as possible toward some other method of allocating fish than either the olympic system or direct government intervention. Meanwhile, he noted, preventing preemption by one fleet of another, safeguarding capital investments, protecting coastal communities that are dependent on a local fleet, and encouraging fuller utilization of harvested fish are desirable objectives that are provided for under the Magnuson Act.

At its April 21–26, 1992, meeting, the Council considered the NMFS' actions and recommendations and decided to revise Amendment 18. The Council supplemented its previous analysis of allocation alternatives for the original Amendments 18 and 23.

At a special meeting to consider this issue on August 4–5, 1992, the Council again considered the comments of its advisory bodies and the public, adopted its preferred alternative, and submitted it to NMFS as revised Amendment 18. This action would have allocated pollock in the BSAI for processing by the inshore and offshore components, respectively, of 35 percent and 65 percent in 1993, and of 37.5 percent and 62.5 percent in 1994 and 1995. In addition, it would have created a catcher vessel operational area for the second season pollock fishery in the years 1993 through 1995, and it would have allowed vessels in the offshore component that process only (i.e., motherships) to operate in the CVOA so that the catcher vessels that deliver to these vessels also could operate in the CVOA.

In September 1992, the Council submitted revised Amendment 18 to NMFS for review, approval, and implementation under section 304(a) of the Magnuson Act.

On November 23, 1992, after careful consideration of the revised amendment, public comments, the record developed by the Council, and the analyses of the potential effects of the proposed amendment, NMFS approved pollock allocations of 35 percent for processing by the inshore component and 65 percent for processing by the offshore component for the years 1993 through 1995. NMFS also approved the CVOA, including the provision that motherships could operate within that area, and certain other changes of the regulations proposed by NMFS to clarify the regulations implementing Amendments 18 and 23. The final rule implementing these decisions became effective January 19, 1993 (57 FR 61326, December 24, 1992).

B. The Need for and Development of Amendments 38 and 40

The Council stipulated (e.g., sections 14.4.11.7, BSAI FMP) that Amendments 18 and 23 would expire on December 31, 1995, or earlier if replaced with another management regime approved by NMFS. It did so with the understanding that by December 31, 1995, it would have adopted and NMFS would have approved a more comprehensive long-term management program to address the overcapitalization and allocation problems facing the industry, not only for pollock and Pacific cod, but for all groundfish and crab under the Council's authority.

The Council has made some progress on its long-term plan. For example, in June 1995 it adopted a license-limitation programs for the groundfish and crab fisheries. However, the Council estimates that it will take 2 or 3 more years to develop and implement a comprehensive management regime. Consequently, the Council decided it would be necessary to extend the provisions of Amendments 18 and 23 for an additional 3 years to maintain stability in the industry, facilitate further development of the comprehensive management regime, and allow for realization of the goals and objectives of the pollock CDQ program. In making this decision, the Council continued the mandate it established for itself in 1992 when it recognized that a more permanent solution to overcapacity and preemption was needed.

The Council decided that if the provisions of Amendments 18 and 23 expired, then the fishery would return to the "free-for-all" state it was in before Amendments 18 and 23, and the inshore sector again would be faced with the threat of preemption by the large and efficient offshore sector. Thus, the Council began the process to extend the provisions of Amendments 18 and 23.

In June 1994, the Council reaffirmed that its staff should begin analyzing the impacts of the potential extension of Amendments 18 and 23, including the CDQ program in the BSAI. At its October 1994 meeting, the Council identified this issue as highest priority for analysis. In December 1994, the Council presented a draft statement of the problem and reviewed a plan for analyzing the merits and impacts of continuing Amendments 18 and 23. It also requested a detailed reexamination of the CVOA. Further, it identified the treatment of vessels that fish with longline gear and freeze their catch for possible reevaluation under the definitions of inshore and offshore components. At its January 1995 meeting, the Council reviewed a detailed outline for the analyses and noted that the formal analyses would be presented at its April 1995 meeting, the analyses would undergo public review and comment, and the Council would make its final decision in June 1995. At its April 1995 meeting, the Council released a draft EA and RIR of the proposed reauthorization of Amendments 18 and 23 for public review.

Finally, at its meeting in June 1995, the Council reviewed written comments and considered testimony presented at the meeting by the public and its advisory bodies. It voted unanimously to reauthorize the provisions of Amendments 18 and 23 through December 31, 1998, with two changes. First, it moved the western boundary of the CVOA 30 minutes to the east. Second, it allowed catcher-processor vessels to use the CVOA if the pollock quota for processing by the inshore sector had been harvested for the year.

The Council decided to move the western boundary of the CVOA 30 minutes to the east because (a) that part of the CVOA between 168°00′ W. long. and 167°30′ W. long. was not being used by catcher vessels delivering to inshore processors, (b) some operators of catcher-processor vessels of the offshore component requested that they be allowed to operate there, and (c) the area was not critical for protected species.

In deciding to move the western boundary, the Council considered the impact of this move on the accounting of chum salmon caught as bycatch and the chum salmon savings area (§ 675.22(h)). An analysis of chum salmon bycatch data led the Council to conclude that moving the western boundary would have no significant impact on the controls governing chum salmon bycatch.

Furthermore, because the CVOA and statistical area 518 (the Bogoslof District) overlapped, probably only the northern half of the area removed from the CVOA would be open to the offshore component. Roughly the southern half of the area is in statistical area 518 and is closed to directed fishing for pollock under 1995 regulations (60 FR 8479, February 14, 1995), and likely will be closed to directed fishing for pollock in 1996, 1997, and 1998.

C. Summary of Amendments 38 and 40

Because Amendments 18 and 23 were due to expire on December 31, 1995, the June 1995 Council action led to new amendments. The provisions of Amendment 18 became the basis of Amendment 38, and those of 23 became the basis of Amendment 40. The only significant difference between Amendments 18 and 23 and Amendments 38 and 40 is that Amendment 38 moves the western boundary of the CVOA.

Thus, in the BSAI, the apportionments of pollock for domestic processing in each subarea or district and each season would be allocated 35 percent for processing by the inshore component and 65 percent for processing by the offshore component. The western border of the CVOA is moved 30 minutes to the east, from 168°00′ to 167°30′ W. long., thereby reducing its area by about 15 percent. The CVOA will exist from the start of the second season for directed pollock fishing (§ 675.23(e)) until the quota of pollock for processing by the inshore component has been harvested for the year or until December 31. Processor vessels of the offshore component would be allowed to conduct directed fishing operations for pollock in the CVOA only when they were operating under a valid Community Development Plan. Processor vessels in the offshore component that do not catch groundfish would be allowed to process pollock in the CVOA.

In the GOA, the apportionment of pollock for domestic processing in all regulatory areas will be allocated entirely for processing by the inshore component after subtraction of an amount that is projected by the Director, Alaska Region, NMFS (Regional Director) to be caught by or delivered to the offshore component incidental to directed fishing for other groundfish species. The apportionment of Pacific cod for domestic processing in all regulatory areas will be allocated 90 percent for processing by the inshore component and 10 percent for processing by the offshore component.

In both amendments the definitions of the terms "inshore component" and "offshore component" are clarified. Also, both amendments continue the requirement that processor vessels will be included with the inshore component or the offshore component based upon a declaration by the owner of that vessel on the annual application for a Federal permit (§§ 672.4 and 675.4).

Separately, Amendment 40 changes two sections of the GOA FMP. First, section 4.3.1.1, Permit Requirements, is revised to emphasize that certain permits are required of participants in the GOA groundfish fisheries. These requirements are found in regulations implementing the GOA FMP. Second, section 4.3.1.6, Inshore/offshore allocations of pollock, is amended by revising the heading to include Pacific cod, by rewriting the text for clarity, and by noting that the provisions of the section will end on December 31, 1998, or earlier if replaced with another management regime approved by NMFS.

Along the same lines, Amendment 38 changes two sections of the BSAI FMP. First, section 14.4.1, Permit requirements, is also revised to emphasize that certain permits are required of participants in the BSAI groundfish fisheries, and that these requirements are found in regulations implementing the BSAI FMP. Second, section 14.4.11, Inshore/offshore allocations of pollock, is rewritten for clarity and to note that the provisions of the section will end on December 31, 1998, or earlier if replaced with another management regime approved by NMFS. Further, Amendment 38 revises § 14.4.11.6, Bering Sea Catcher Vessel Operational Area, moving the western boundary of the CVOA 30 minutes longitude to the east.

Regulations are also proposed to continue the delay in the opening of the first directed fishery for pollock until February 5 for vessels used before January 26 to fish for BSAI or GOA groundfish or BSAI king or Tanner crab. The Council voted at its June 1994 meeting to change the start of the first directed fishery for pollock (the "A-Season" or "roe season") for processing by the offshore component to January 26. It did so to ensure optimum roe quality and increase the associated revenues. It included the delay to February 5 to discourage pollock vessels from shifting into other fisheries before January 26. NMFS published a final rule to implement these measures on December 16, 1994 (59 FR 64867). They expire December 31, 1995.

D. Summary of the Proposed Inshore-Offshore Regulations

The definitions of the terms (§§ 672.2 and 675.2) "inshore component" and "offshore component" would be clarified and extended through December 31, 1998 and the term "catcher vessel operational area" (CVOA) would be added for clarity.

The general prohibitions against vessels operating during any year in more than one category of the inshore component (§§ 672.7(h)(1) and 675.7(i)(1)) or vessels operating in both the inshore and offshore components (§§ 672.7(h)(2) and 675.7(i)(2)) would be extended through December 31, 1998.

The allocations of Pacific cod and pollock for processing by the inshore and offshore components (§§ 672.20(a)(2)(v) and 675.20(a)(2)(iii)) and specifications of annual allocations (§§ 672.20(c)(1)(ii) and 675.20(a)(3)(i)) would be extended through December 31, 1998.

In the regulations governing the CVOA (§ 675.22(g)), the western boundary would be moved 30 minutes to the east to 167°30′ W. long. The regulations would clarify that the CVOA will exist from the start of the second season for directed fishing for pollock (§ 675.23(e)) until the quota of pollock for processing by the inshore component has been harvested for the year or until December 31. These regulations would be extended through December 31, 1998.

Regulations concerning the bycatch of chum salmon (§ 675.22(h)) refer to the definition of the CVOA as found at § 675.22(g). Under these regulations chum salmon caught in the CVOA as bycatch in the nonroe pollock fishery are attributed towards a 42,000 fish bycatch limit. The Council's decision to move the western boundary of the CVOA and, thereby, reduce its size would affect the area of chum salmon accounting. The Council recognized this effect on its program for reducing chum salmon bycatch and expressed its intent to have the chum salmon accounting take place within the revised boundaries of the CVOA. Because, under this proposed rule, the definition of the CVOA would be moved to § 675.2, NMFS now proposes to amend § 675.22(h)) so it will be consistent with this change.

Also, in accordance with Council intent, NMFS proposes to reimplement until December 31, 1998, regulations governing delays in the start of the first directed fishing seasons for pollock for processing by the offshore component (§ 675.23(e)(2)(ii)).

2. Western Alaska Community Development Quota (CDQ) Program

A. Summary of the History and Provisions of the CDQ Program

The approved portion of Amendment 18 and the final rule implementing Amendment 18 (57 FR 23321, June 3, 1992) allocated pollock for the CDQ program only for a temporary period from 1992 through 1995. The amendment allocated 7.5 percent of the pollock total allowable catch for each BSAI subarea or district to be set aside for the CDQ program. A regulatory amendment (57 FR 54936, November 23, 1992) implemented the CDQ program for 1992 and 1993 by specifying the process for applying for CDQ and the required contents of the Community Development Plan applications. A subsequent regulatory amendment (58 FR 32874, June 14, 1993) implemented the CDQ program for 1994 and 1995.

At its June 1995 meeting, the Council reauthorized the provisions of Amendment 18 through December 31, 1998, including the CDQ program. Much has been learned about the CDQ program since 1992. NMFS has worked closely with the State of Alaska's Departments of Community and Regional Affairs, Fish and Game, and Commerce and Economic Development, as well as the CDQ industry, to develop proposed changes to the pollock CDQ regulations.

B. Proposed Changes to the CDQ Implementing Regulations

This proposed rule extends the definitions of "community development plan (CDP)," "community development quota," "community development quota program," and "community development quota reserve" until December 31, 1998; and makes the following nine changes to the CDQ implementing regulations that have been in effect, but which expire on December 31, 1995.

1. The phrase "applicable through December 31, 1995" at the beginning of the CDQ regulations at part 675.27 is proposed to be replaced by the phrase "applicable through December 31, 1998". This would implement the Council's recommendation to reauthorize the CDQ program for 3 additional years. In addition, the phrase "applicable through December 31, 1995" is deleted from the beginning of paragraphs (e) and (f) because it is unnecessary.

2. Introductory text is added in § 675.27 to describe the goals and purpose of the CDQ program as follows: to allocate CDQ pollock to eligible Western Alaska communities to provide the means for starting or supporting commercial seafood activities that will result in ongoing regionally based commercial seafood or related businesses. This statement is a distillation of previous CDQ proposed and final rules that describe the goals and purpose of the CDQ program and is proposed to be added to these regulations to state precisely the purpose and goals of this program.

3. Under current regulations, paragraph (b)(1)(i) states that the CDP must include the goals and objectives of the CDP. However, a CDP does not have goals and objectives that are separate from those of the CDQ program. Therefore, (b)(1)(i) is replaced with a more correct statement. Specifically, CDPs are project-based documents, and should include a description of the CDP projects that are proposed to be funded by the pollock allocation and how the CDP projects satisfy the goals and purpose of the CDQ program.

4. Paragraph (b)(1)(vii) states that a CDP must include a description of how the CDP would generate new capital or equity for the applicant's fishing or processing operations. However, an applicant may have both fishing and processing operations, so it would be more accurate to state that a CDP must include a description of how the CDP would generate new capital or equity for the applicant's fishing and/or processing operations.

5. Paragraph (b)(2)(vii), states that a CDP should include a budget for implementing a CDP. This level of budget oversight has proven to be inadequate for managing the CDQ program. This paragraph is proposed to be expanded, requiring a general budget to be included in the CDP that would be a general account of estimated income and expenditures for each CDP project for each year of the life of the project.

An annual budget would be required at (e)(1)(ii), and it would be a detailed account of the estimated income and expenditures for each CDP project prior to the beginning of a calendar year. An initial annual budget would be required as part of a CDP application. For each subsequent year, the annual budget would be required to be submitted to NMFS in a report by December 15 of the year preceding the year for which the annual budget applies. Annual budgets would be approved upon receipt by NMFS unless subsequently disapproved by NMFS in writing. The annual budget would be reconciled in a report to NMFS by May 15 after the year for which the annual budget applies. The annual budget reconciliation report would list the actual income and expenditures and highlight the variance between the estimated and actual income/expenditures for each CDP project. If the general budget included in the CDP is no longer valid due to the reconciliation of the annual budget, then the general budget would also be required to be revised and submitted to NMFS with the annual budget reconciliation report.

6. Paragraph (b)(3)(ii)(B) states that the CDP must document the legal relationship between the CDP applicant and the managing organization. This implies that the CDP applicant and the managing organization are different entities. However, in some cases, the CDP applicant is the same as the managing organization. Therefore, this paragraph would be changed to state that the CDP must document the legal relationship between the CDP applicant and the managing organization only if the managing organization is different from the CDP applicant.

7. The definition of a CDP amendment under paragraph (e)(3)(i)(A)–(C) has required unnecessary amendments to be submitted to NMFS. Under the current regulations, paragraph (e)(3)(i)(B) states that any change to the budget of a CDP is a CDP amendment. Minor changes (for example, revisions of a CDP's budget for office supplies) were not meant to be amendments. Therefore, the existing paragraphs at (e)(3)(i)(A)–(C) would be deleted and paragraphs (e)(3)(i)(A)–(F) would be added, specifying in more detail what would constitute a CDP amendment.

8. In 1993, when the first CDP amendments were received by NMFS, guidance at paragraph (e)(3)(ii) regarding the contents of a CDP amendment was not sufficient, and more specific guidance was needed. The existing requirements for the contents of CDP amendments resulted in the submission of CDP amendments in different formats and lacking critical information, making them difficult to evaluate and process. Therefore, the Regional Director provided guidance to the Governor in a letter dated November 3, 1993. Since that date, all CDP amendments have followed the suggested format that was provided in that letter. This guidance is proposed to be added at paragraph (e)(3)(ii)(A)–(F).

9. Currently, a CDQ management organization is not required to notify NMFS of any change to a CDP that does not meet the criteria for a CDP amendment at (e)(3)(i)(A)–(C). Such minor changes are technical amendments. However, a CDP is a working business plan and must be kept up-to-date. NMFS proposes to require that CDQ groups notify the Governor and NMFS in writing of any technical amendments to a CDP before any change occurs. Technical amendments would be approved when the CDQ group receives a written notice from NMFS of the receipt of a technical amendment. The notification should include the pages of the CDP with the text highlighted to show additions and deletions, and the amended pages of the CDP would be included for replacement in the CDP.

Environmental and Regulatory Analyses

The Council prepared an EA/RIR/IRFA for Amendments 38 and 40 in accordance with the National Environmental Policy Act, Executive Order 12866, Regulatory Planning and Review, and the Regulatory Flexibility Act. A copy of the EA/RIR/IRFA may be obtained from the Council (see ADDRESSES).

The EA/RIR/IRFA reviews events leading up to Amendments 18 and 23, examines the fisheries since Amendments 18 and 23 went into effect, and examines the alternatives of (a) letting the provisions of Amendments 18 and 23 expire and (b) continuing those provisions as Amendments 38 and 40.

The EA/RIR/IRFA concludes that the potential environmental impacts of Amendments 38 and 40 are expected to be consistent with those previously predicted for Amendments 18 and 23 in the 1992 final supplemental environmental impact statement. They are also consistent with the findings in the supplemental analysis of September 1992 regarding the probable impacts of the CVOA on marine mammals, seabirds, and prohibited species. Total removals of pollock and Pacific cod are controlled by the total allowable catches, and their monitoring has been enhanced recently to guard against overruns. Catches of prohibited species and impacts on marine mammals are expected to be unchanged. Section 7 consultations by NMFS during consideration of Amendments 18 and 23 and again for Amendments 38 and 40 concluded that the groundfish fisheries are unlikely to jeopardize the continued existence or recovery of any endangered or threatened species.

For the analysis of economic and social impacts of Amendments 38 and

40 and the proposed regulations, the Council did not attempt to redo the previous cost-benefit or distributional analyses; rather, the EA/RIR/IRFA provides a review of the current state of the fisheries and identified significant changes that would affect the overall findings of the previous analyses. It also examined stability within the industry, future tradeoffs for affected industry sectors, and potential impacts on the Council's attempts to develop a more comprehensive plan for managing the groundfish, crab, and halibut fisheries.

The EA/RIR/IRFA concluded that reauthorizing the provisions of Amendments 18 and 23 would result in the same general cost-benefit impacts as projected in the 1992 analyses, although the expected net losses to the Nation's economy were probably overstated in the original analyses, and with changes in product recovery rates and prices since 1992, they were expected to move more towards neutral.

The EA/RIR/IRFA found that continuation of the inshore-offshore program would maintain stability and that disruption of this stability could have serious and adverse implications for successful development of a comprehensive management regime for the fisheries (EA/RIR/IRFA, p. E–9). Continuation of the inshore-offshore program would negatively affect Ballard-Seattle, WA; however, the absence of the program would result in negative social and economic impacts on many coastal Alaskan communities, particularly in those participating in the CDP that have developed additional infrastructure since 1992.

In examining the community development program, the EA/RIR/IRFA asked two questions: (a) Can the development projects and initiative underway now be brought to fruition without a continuation of the allocation? and (b) Once the development projects are complete, can they be sustained in the absence of a direct allocation of pollock? For the first question, the EA/RIR/IRFA concluded that the individual projects as well as the overall development objectives of the program would not be realized if the program ends in 1995. For the second question, the EA/RIR/IRFA stated that this was a difficult question to answer at this time and it remained a critical question, likely to be answered within the context of the comprehensive rationalization process.

Classification

Section 304(a)(1)(D) of the Magnuson Act requires NMFS to publish regulations proposed by a Council within 15 days of receipt of an FMP or an amendment of an FMP and regulations. At this time, NMFS has not determined that either Amendment 38 of the BSAI FMP or Amendment 40 of the GOA FMP (which these rules would implement) is consistent with the national standards, other provisions of the Magnuson Act, and other applicable laws. NMFS, in making that determination, will take into account the data, views, and comments received during the comment period.

This proposed rule has been determined to be not significant for the purposes of E.O. 12866.

The Council prepared an IRFA as part of the regulatory impact review, which describes the impact this proposed rule would have on small entities, if adopted. The IRFA analysis indicates that specific allocations to the inshore and offshore components could benefit small harvesting and processing operations associated with one component and, conversely, negatively impact small operations associated with the other. The magnitudes of the impacts are related to the sizes of the allocations. The continuation of specific allocations to the inshore component as well as the specific allocations of pollock to the CDQ program will continue direct benefits to many small jurisdictions of Southwest and Western Alaska. The support industry benefits directly from the economic activity in both the inshore and offshore sector. Probably, the loss in revenue associated with one component will be offset by gains obtained from the other. Overall, this proposal will impact more than 20 percent of those small entities, and NMFS considers that amount to be a "substantial number." A copy of the EA/RIR/IRFA is available from the Council (see ADDRESSES).

This proposed rule contains collection-of-information requirements related to the Community Development Quota Program that are subject to the PRA. These requests for collection of information have been submitted to the Office of Management and Budget for approval. The public reporting burden for each year of this collection is estimated to average 40 hours per response for completing annual reports, 40 hours per response for completing annual budget reconciliation reports, 30 hours per response for completing substantial amendments, and 4 hours per response for completing technical amendments. For the first year of the CDQ program, completion of CDP applications is estimated to average 160 hours per response. For each of the last 2 years of the program, completion of annual budget reports is expected to average 40 hours per response. OMB approval has been obtained under OMB control number 0648–0269 for the CDQ-managing organization representative requirement to inform NMFS within 24 hours after the CDQ has been reached and fishing ceased. This requirement has an estimated response time of 2 minutes per response.

All reporting burden estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding these burden estimates, or any other aspect of the data requirements, including suggestions for reducing the burden, to NMFS and to the OMB (see ADDRESSES).

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: September 11, 1995.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR parts 672 and 675 are proposed to be amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for 50 CFR part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 et seq.

2. In § 672.2, the definitions of "Inshore component" and "Offshore component" are revised to read as follows:

§ 672.2 Definitions.

* * * * *

Inshore component (applicable through December 31, 1998) means the following three categories of the U.S. groundfish fishery that process pollock harvested in a directed fishery for pollock, or Pacific cod harvested in a directed fishery for Pacific cod in the Gulf of Alaska, or both:

(1) All shoreside processing operations;

(2) Any processor vessel less than 125 ft (38.1 m) in length overall that processes no more than 126 mt per week in round-weight equivalents of an aggregate of those fish and that is declared to be part of the inshore component by its owner in the annual application for a Federal Permit (NOAA Form 88–155) under § 672.4; and

(3) Any processor vessel that processes those fish at a single geographic location in Alaska State waters (waters adjacent to the State of

Alaska and shoreward of the EEZ) during a fishing year and that is declared to be part of the inshore component by its owner in the annual application for a Federal Permit (NOAA Form 88–155) under § 672.4. For the purposes of this definition, NMFS will determine the single geographic location in a fishing year for an individual processor from the geographic coordinates the vessel operator reports on the check-in notice (§ 672.5(c)(1) and § 675.5(c)(1) of this chapter) when that vessel first engages in processing those fish.

* * * * *

Offshore component (applicable through December 31, 1998) means all processor vessels in the U.S. groundfish fisheries not included in the definition of "inshore component" that process pollock caught in directed fisheries for pollock, or Pacific cod caught in directed fisheries for Pacific cod in the Gulf of Alaska, or both.

* * * * *

3. In § 672.7, paragraph (h) heading, and paragraph (h)(2) are revised to read as follows:

§ 672.7 Prohibitions.

* * * * *

(h) *Applicable through December 31, 1998.* * * *

(2) Operate any vessel under both the "inshore component" and "offshore component" definitions at §§ 672.2 and 675.2 of this chapter during the same fishing year.

* * * * *

§ 672.20 [Amended]

4. In § 672.20, the headings of paragraphs (a)(2)(v), (c)(1)(i), (c)(1)(ii), (c)(2)(i) and (c)(2)(ii) are revised to read: *"Applicable through December 31, 1998."*.

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

5. The authority citation for 50 CFR part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

6. In § 675.2, a definition for "Catcher vessel operational area" is added, and the definitions for "Community Development Plan," "Community Development Quota," Community Development Quota Program," Community Development Quota Reserve," "Inshore component," and "Offshore component" are revised to read as follows:

§ 675.2 Definitions.

* * * * *

Catcher vessel operational area (CVOA) (applicable through December 31, 1998) means that part of the Bering Sea subarea south of 56°00′ N. lat. and between 163°00′ and 167°30′ W. long.

Community Development Plan (CDP) (applicable through December 31, 1998) means a plan for a specific Western Alaska community or group of communities approved by the Governor of the State of Alaska and recommended to NMFS under § 675.27.

Community Development Quota (CDQ) (applicable through December 31, 1998) means a Western Alaska community development quota for pollock assigned to an approved CDP. All CDQs, in the aggregate, equal 7.5 percent of the total allowable catch specified for pollock that is placed in reserve under § 675.20(a)(3).

Community Development Quota Program (CDQ program) (applicable through December 31, 1998) means the Western Alaska Community Development Program implemented under § 675.27.

Community Development Quota Reserve (CDQ reserve) (applicable through December 31, 1998) means 7.5 percent of the total allowable catch specified for pollock in each subarea or district that is placed in reserve under § 675.20(a)(3).

* * * * *

Inshore component (applicable through December 31, 1998) means the following three categories of the U.S. groundfish fishery that process pollock harvested in a directed fishery for pollock, or Pacific cod harvested in a directed fishery for Pacific cod in the Gulf of Alaska, or both:

(1) All shoreside processing operations;

(2) Any processor vessel less than 125 ft (38.1 m) in length overall that processes no more than 126 mt per week in round-weight equivalents of an aggregate of those fish and that is declared to be part of the inshore component by its owner in the annual application for a Federal Permit (NOAA Form 88–155) under § 675.4; and

(3) Any processor vessel that processes those fish at a single geographic location in Alaska State waters (waters adjacent to the State of Alaska and shoreward of the EEZ) during a fishing year and that is declared to be part of the inshore component by its owner in the annual application for a Federal Permit (NOAA Form 88–155) under § 675.4. For the purposes of this definition, NMFS will determine the single geographic location in a fishing year for an individual processor from the geographic coordinates the vessel operator reports on the check-in notice (§ 672.5(c)(1) of this chapter and § 675.5(c)(1)) when that vessel first engages in processing those fish.

* * * * *

Offshore component (applicable through December 31, 1998) means all processor vessels in the U.S. groundfish fisheries not included in the definition of "inshore component" that process pollock caught in directed fisheries for pollock, or Pacific cod caught in directed fisheries for Pacific cod in the Gulf of Alaska, or both.

* * * * *

7. In § 675.7, paragraph (i) heading, paragraph (i)(2), and paragraph (j) heading are revised to read as follows:

§ 675.7 Prohibitions.

* * * * *

(i) *Applicable through December 31, 1998.* * * *

(2) Operate any vessel under both the "inshore component" and "offshore component" definitions at §§ 672.2 of this chapter and 675.2 during the same fishing year.

(j) *Applicable through December 31, 1998.*

* * * * *

8. In § 675.20, the headings of paragraphs (a)(2)(iii), (a)(3)(i), (a)(3)(ii), and (a)(3)(iii) are revised to read as follows:

§ 675.20 General limitations.

(a) * * *

(2) * * *

(iii) *Applicable through December 31, 1998.*

* * * * *

(3) * * *

(i) *Applicable through December 31, 1998.* * * *

(ii) *Applicable through December 31, 1998.* * * *

(iii) *Applicable through December 31, 1998; application for approval of a CDP and CDQ allocation.* * * *

* * * * *

9. In § 675.22, paragraphs (g) and (h)(2) are revised to read as follows:

§ 675.22 Time and area closures.

* * * * *

(g) *Catcher vessel operational area (applicable through December 31, 1998).* (1) This area is established annually for directed fishing for pollock from the beginning of the second season of directed fishing for pollock (defined at § 675.23(e)) until either the date that NMFS determines that the pollock quota for processing by the inshore component has been harvested or December 31.

(2) Catcher vessels may conduct directed fishing in this area.

(3) Processor vessels in the offshore component are prohibited from conducting directed fishing for pollock in this area unless they are operating under a CDP approved by NMFS.

(4) Processor vessels in the offshore component that do not catch groundfish but do process pollock caught in a directed fishery for pollock may operate within this area to process pollock.

(5) Processor vessels that catch or process groundfish in directed fisheries for species other than pollock may operate within this area.

(h) * * *

(2) When the Regional Director determines that 42,000 nonchinook salmon have been caught by vessels using trawl gear during August 15 through October 14 in the CVOA (defined in § 675.2), NMFS will prohibit fishing with trawl gear for the remainder of the period September 1 through October 14 in the Chum Salmon Savings Area defined under paragraph (h)(1) of this section.

10. In § 675.23, paragraph (e)(2) heading is revised to read as follows:

§ 675.23 Seasons.

* * * * *

(e) * * *

(2) *Applicable through December 31, 1998.* * * *

* * * * *

11. In § 675.27, the section heading is revised, introductory text is added, and paragraphs (b)(1)(i), (b)(1)(vii), (b)(2)(vii), (b)(3)(ii)(B), (e), and the heading of paragraph (f) are revised to read as follows:

§ 675.27 Western Alaska Community Development Quota Program (applicable through December 31, 1998).

The goals and purpose of the CDQ program are to allocate CDQ pollock to eligible Western Alaska communities to provide the means for starting or supporting commercial seafood activities that will result in ongoing regionally based commercial seafood or related businesses.

* * * * *

(b) * * *

(1) * * *

(i) A description of the CDP projects that are proposed to be funded by the pollock allocation and how the CDP projects satisfy the goals and purpose of the CDQ program;

* * * * *

(vii) Description of how the CDP would generate new capital or equity for the applicant's fishing and/or processing operations;

* * * * *

(2) * * *

(vii) A general budget for implementing the CDP. A general budget is a general account of estimated income and expenditures for each CDP project that is described at paragraph (b)(1)(i) of this section for the total number of calendar years that the CDP is in effect. An annual budget is required to be submitted with a CDP as described at paragraph (e)(1)(ii) of this section;

* * * * *

(3) * * *

(ii) * * *

(B) Documentation of a legal relationship between the CDP applicant and the managing organization (if the managing organization is different from the CDP applicant), which clearly describes the responsibilities and obligations of each party as demonstrated through a contract or other legally binding agreement; and

* * * * *

(e) *Monitoring of CDPs*—(1) *CDP reports.* The following reports must be submitted to NMFS.

(i) *Annual progress reports.* CDP applicants are required to submit annual progress reports to the Governor by June 30 of the year following a CDQ allocation. Annual progress reports will include information describing how the CDP has met its milestones, goals, and objectives. On the basis of those reports, the Governor will submit an annual progress report to NMFS and recommend whether CDPs should be continued. NMFS must notify the Governor in writing within 45 days of receipt of the Governor's annual progress report, accepting or rejecting the annual progress report and the Governor's recommendations on multiyear CDQ projects. If NMFS rejects the Governor's annual progress report, NMFS will return it for revision and resubmission. The report will be deemed approved if NMFS does not notify the Governor in writing within 45 days of the report's receipt.

(ii) *Annual budget report.* An annual budget report is a detailed estimation of income and expenditures for each CDP project as described in paragraph (b)(1)(i) of this section for a calendar year. The first annual budget report shall be included in the CDP. Each additional annual budget report must be submitted to NMFS by December 15 preceding the year for which the annual budget applies. Annual budget reports are approved upon receipt by NMFS unless disapproved in writing by December 31. If disapproved, the annual budget report may be revised and resubmitted to NMFS. NMFS will approve or disapprove a resubmitted annual budget report in writing.

(iii) *Annual budget reconciliation report.* A CDQ group must reconcile each annual budget by May 15 of the year following the year for which the annual budget applied. Reconciliation is an accounting of the annual budget's estimated income and expenditures with the actual income and expenditures, including the variance in dollars and variance in percentage for each CDP project that is described in paragraph (b)(1)(i) of this section. If a general budget as described at paragraph (b)(2)(vii) of this section is no longer correct due to the reconciliation of an annual budget, then the general budget must also be revised to reflect the annual budget reconciliation, and the revised general budget must be included in the annual budget reconciliation report.

(2) If an applicant requests an increase in CDQ allocation under a multiyear CDP, the applicant must submit a new CDP application for review by the Governor and approval by NMFS as described in paragraphs (b) and (c) of this section.

(3) *Substantial amendments.* A CDP is a working business plan and must be kept up-to-date. Substantial amendments to a CDP will require written notification to the Governor and subsequent approval by the Governor and NMFS before any change in a CDP can occur. The Governor may recommend to NMFS that the request for an amendment be approved. NMFS may notify the Governor in writing of approval or disapproval of the amendment within 30 days of receipt of the Governor's recommendation. The Governor's recommendation for approval of an amendment will be deemed approved if NMFS does not notify the Governor in writing within 30 days of receipt of the Governor's recommendation. If NMFS determines that the CDP, if changed, would no longer meet the criteria under paragraph (d) of this section, or if any of the requirements under this section would not be met, NMFS shall notify the Governor in writing of the reasons why the amendment cannot be approved.

(i) For the purposes of this section, substantial amendments are defined as changes in a CDP, including, but not limited to, the following:

(A) Any change in the applicant communities or replacement of the managing organization;

(B) A change in the CDP applicant's harvesting or processing partner;

(C) Funding a CDP project in excess of $100,000 that is not part of an approved general budget;

(D) More than a 20 percent increase in the annual budget of an approved CDP project;

(E) More than a 20 percent increase in actual expenditures over the approved annual budget for administrative operations; or

(F) The Governor recommends to NMFS that the following is a substantial amendment:

(*1*) A material change in the contractual agreement(s) between the CDP applicant and their harvesting or processing partner; or

(*2*) A material change in a CDP project.

(ii) Notification of an amendment to a CDP shall include the following information:

(A) The background and justification for the amendment that explains why the proposed amendment is necessary and appropriate;

(B) An explanation of why the proposed change to the CDP is an amendment according to paragraph (e)(3)(i) of this section;

(C) A description of the proposed amendment, explaining all changes to the CDP that result from the proposed amendment;

(D) A comparison of the original CDP text with the text of the proposed changes to the CDP, and the changed pages of the CDP for replacement in the CDP binder;

(E) Identification of any NMFS' findings that would need to be modified if the amendment is approved along with the proposed modified text;

(F) A description of how the proposed amendment meets the requirements of the CDQ regulations in this section. Only those CDQ regulations that are affected by the proposed amendment need to be discussed.

(4) *Technical amendments.* Any change to a CDP that is not a substantial amendment as defined at paragraph (e)(3)(i) of this section, is a technical amendment. It is the responsibility of the CDQ group to coordinate with the Governor to ensure that a proposed technical amendment does not meet the definition for a substantial amendment. Technical amendments require written notification to the Governor and NMFS before the change in a CDP occurs. A technical amendment will be approved when the CDQ group receives a written notice from NMFS announcing the receipt of the technical amendment. The Governor may recommend to NMFS in writing that a technical amendment be disapproved at any time. NMFS may disapprove a technical amendment in writing at any time with the reasons therefor. Notification should include:

(i) The pages of the CDP with the text highlighted to show deletions and additions; and

(ii) The changed pages of the CDP for replacement in the CDP binder.

(5) It is the responsibility of the CDQ-managing organization to cease fishing operations once its respective CDQ pollock allocation has been reached. Total pollock harvests for each CDP will be determined by observer estimates of total catch and catch composition as reported on the daily observer catch message. The CDQ-managing organization must arrange for processors to transmit a copy of the observer daily catch message to it in a manner that allows the CDQ-managing organization to inform processors to cease fishing operations before the CDQ allocation has been exceeded. CDQ-managing organization representatives must also inform NMFS within 24 hours after the CDQ has been reached and fishing has ceased. If NMFS determines that the observer, the processor, or the CDQ-managing organization failed to follow the procedures described in paragraph (h) of this section for estimating the total harvest of pollock, or violated any other regulation in this part, NMFS reserves the right to estimate the total pollock harvest based on the best available data.

(f) *Suspension or termination of a CDP.*

Vol. 60, No. 180

Monday, September 18, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Southwest Washington Provincial Advisory Committee Meeting Notice

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Southwest Washington Provincial Advisory Committee will meet on October 3 and 4, 1995, in Woodland, Washington, at the Oak Tree Restaurant, near Exit No. 21 on Interstate 5. The meeting will begin at 9 a.m. and continue until 4:30 p.m.

Meeting purpose is to assess watershed health conditions within the Cowlitz, Lewis, Wind River, and White Salmon Basins. The Advisory Committee will apply this information in advising Federal land managers on implementing the President's Northwest Forest Plan. Agenda items to be covered include: (1) Basin Health Assessment findings, (2) Basin Goals and Objectives, (3) Forest Program priorities, (4) Public Open Forum, (5) Forest Monitoring Program, and (6) Committee Progress Assessment.

All Southwest Washington Provincial Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend. The "open forum" provides opportunity for the public to bring issues, concerns, and discussion topics to the Advisory Committee. The "open forum" is scheduled near the conclusion of this meeting. Interested speakers will need to register prior to the open forum period. The committee welcomes the public's written comments on committee business at any time.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Mark Maggiora, Public Affairs, at (360) 750–5007, or write Forest Headquarters Office, Gifford Pinchot National Forest, 6926 E. Fourth Plain Blvd., PO Box 8944, Vancouver, WA 98668–8944.

Dated: September 11, 1995.

J. Sharon Heywood,

Deputy Forest Supervisor.

ASSASSINATION RECORDS REVIEW BOARD

Notice of Formal Determinations

SUMMARY: The Assassination Records Review Board (Review Board) met in a closed meeting on August 28th and August 29th, 1995, and made formal determinations on the release of records under the President John F. Kennedy Assassination Records Collection Act of 1992 (JFK Act). By issuing this notice the Review Board complies with the section of the JFK Act that request the Review Board to publish the results of its decisions on a document-by-document basis in the **Federal Register** within 14 days of the date of the decision.

FOR FURTHER INFORMATION CONTACT: T. Jeremy Gunn, Acting General Counsel and Associate Director for Research and Analysis, Assassination Records Review Board, Second Floor, 600 E Street, NW., Washington, DC 20530, (202) 724–0088, fax (202) 724–0457.

SUPPLEMENTARY INFORMATION: This notice complies with the requirements of the *President John F. Kennedy Assassination Records Collection Act of 1992,* 44 U.S.C. 2107.9(c)(4)(A) (1992), On August 28th and August 29th, 1995, the Review Board made formal determinations on records it reviewed under the JFK Act. These determinations are listed below. The assassination records are identified by the record identification number assigned in the President John F. Kennedy Assassination Records Collection database maintained by the National Archives. For each document, the number of releases of previously redacted information is noted as well as the number of sustained postponements.

BILLING CODE 6820-TD-M

DEPARTMENT OF COMMERCE

Bureau of the Census

[Docket No. 950911228–5228–01]

The American Community Survey

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of consideration.

SUMMARY: Notice is hereby given that the Bureau of the Census is considering a proposal to conduct The American Community Survey under the authority of Title 13, United States Code, Sections 182 and 225. On the basis of information and recommendations received by the Bureau of the Census, the data have significant application to the needs of other government agencies and the public. The survey will provide data for small areas and small subpopulations that are necessary to evaluate a continuous measurement system to collect, on a continual basis, data that have traditionally been collected only once every ten years in the decennial census. These data are not publicly available from nongovernment or other governmental sources.

DATES: Any suggestions or recommendations concerning the proposed survey should be submitted in writing by October 18, 1995.

ADDRESSES: Director, Bureau of the Census, Washington, DC 20233.

FOR FURTHER INFORMATION CONTACT: Lawrence S. McGinn, Chief, Continuous Measurement Office, U.S. Census Bureau, on (301) 763–8327.

SUPPLEMENTARY INFORMATION: The Census Bureau is authorized to conduct surveys necessary to furnish current data on subjects covered by the major census authorized by Title 13, United States Code. The data from this survey will determine the feasibility of a continuous measurement system that provides socioeconomic data on a continual basis throughout the decade for small areas and small subpopulations. Currently, the decennial census is the only source of data available for small area levels and, therefore, these data are collected only once every ten years. A continuous measurement system also would provide a mechanism for identifying and sampling subpopulation groups for future surveys which will be of great benefit to the Federal Statistical System and provide data needed by other agencies.

This survey will be a full-scale implementation of continuous measurement in six test sites. The survey will also include a national sample to test response rates and the Census Bureau's ability to obtain telephone numbers for nonresponse households. The data collected in this survey will be within the general scope and nature of those inquiries covered in the decennial census every ten years.

The Census Bureau will select the housing units for the survey from a sample of six sites selected to test full continuous measurement operations and a sample from designated areas around the country to obtain mail response rates. The Bureau will mail questionnaires to the households covered by this survey and require the submission as soon as possible after receipt. Participation of the selected households will be mandatory in accordance with the provisions of Title 13.

This survey was approved by the Office of Management and Budget (OMB) for public use, in accordance with the Paperwork Reduction Act, Public Law 96–511, as amended, and was given approval number 0607–0810. A previous notice was published in the **Federal Register** on June 15, 1995, Volume 60, Number 115, page 31447, informing the public of this submission and inviting public comment. We will provide copies of the forms upon written request to the Director, Bureau of the Census, Washington, DC 20233.

Based upon the foregoing, I have directed that a test be conducted for the purpose of collecting these data for evaluation of the procedures related to a continuous measurement operation.

Dated: September 12, 1995.

Martha Farnsworth Riche,

Director, Bureau of the Census.

[FR Doc. 95–23085 Filed 9–15–95; 8:45 am]

BILLING CODE 3510–07–P

Bureau of Export Administration

[Docket No. 2101–01]

In the Matter of: Francesco Grazi, Chez Pietro Grazi, V Cantonale, 6532 Castione, Ticino, Switzerland, Respondent; Final Decision and Order

On August 22, 1995, the Administrative Law Judge (ALJ) entered his Recommended Decision and Order in the above-referenced matter. The Recommended Decision and Order, a copy of which is attached hereto and made a part hereof, has been referred to me for final action. The Respondent failed to respond to the charges in this matter. After describing the facts of the case and his findings based on those facts, the ALJ found that the Respondent, Francesco Grazi, on two separate occasions violated Section 787.2 of the Export Administration Regulations (EAR). The Respondent caused, aided, abetted, counselled, or induced a third party to reexport U.S.-origin commodities from Switzerland to Bulgaria, without obtaining the reexport authorization required by Section 774.1 of the EAR.

The ALJ found that the appropriate penalty for the violations should be that the Respondent and all successors, assignees, officers, representatives, agents and employees be denied for a period of fifteen years from this date all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving commodities or technical data exported or to be exported from the United States and subject to the Export Administration Regulations.

Based on my review of the entire record, I AFFIRM the Recommended Decision and Order of the Administrative Law Judge.

This constitutes final agency action in this matter.

Dated: September 4, 1995.

William A. Reinsch,

Under Secretary for Export Administration.

Recommended

On January 14, 1992, the Office of Export Enforcement, Bureau of Export Administration, U.S. Department of Commerce (Department), issued a Charging Letter alleging that Francesco Grazi (Grazi) committed two violations of Section 787.2 of the Export Administration Regulations (currently codified at 15 C.F.R. Parts 768–799 (1995)) (the Regulations), issued pursuant to the Export Administration Act of 1979, as amended (50 U.S.C.A. app. §§ 2401–2420 (1991, Supp. 1993, and Pub. L. No. 103–277, July 5, 1994)) (the Act).[1] As established in the Status Report the Department filed in this matter on May 1, 1992, the Charging Letter was served on Grazi on or about April 21, 1992. Grazi has not answered or otherwise responded to the allegations set forth in the Charging Letter. On June 19, 1995, I issued an Order directing that the Department make its submission pursuant to Section 788.8 of the Regulations by August 18, 1995. In accordance with that Order, the Department made the submission required by Section 788.8 of the Regulations on August 18, 1995.

Background

The January 14, 1992 Charging Letter alleges that, on two separate occasions, on or about January 14, 1987 and on or about May 8, 1987, Grazi caused, aided, abetted, counseled, or induced a third party to reexport U.S.-origin commodities from Switzerland to Bulgaria without first obtaining the reexport authorization required by Section 774.1 of the Regulations. Schedule A to the Charging Letter, which was attached thereto and incorporated by reference therein, identified the approximate date of reexport from Switzerland, the commodity involved, the Samata S.A. (Samata) Purchase Order number, the Air Waybill number for the export from the United States, and the Fincosid[2] Order Number.

Finding

On the basis of the Department's submission and all of the supporting evidence presented, I have determined that Grazi committed the violations alleged in the Charging Letter issued against him on January 14, 1992.

For those violations, the Department urges as a sanction that Grazi's export privileges be denied for 15 years. In light of the nature of the violations, I concur in the Department's recommendation.

Accordingly, it is therefore ordered,

First, that all outstanding individual validated licenses in which Grazi appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Exporter Services for cancellation. Further, all of Grazi's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

Second, that Francesco Grazi, Chez Pietro Grazi, V Cantonale, 6532 Castione, Ticino, Switzerland, and all of his successors, assigns, officers, representatives, agents, and employees, shall, for a period of 15 years from the date of final agency action, be denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, and subject to the Regulations.

A. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

B. After notice and opportunity for comment as provided in Section 788.3(c) of the Regulations, any person, firm, corporation, or business organization related to the respondent by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

C. As provided by Section 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Exporter Services, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

Third, that a copy of this Order shall be served on Grazi and the Department in accordance with section 778.16(b)(2) of the Regulations.

Fourth, that this Order, is affirmed or modified, shall become effective upon entry of the final action by the Under Secretary for Export Administration, in accordance with the Act (50 U.S.C.A. app. § 2412(c)(1) and the Regulations (15 CFR 788.23).

To be considered in the 30 day statutory review process which is mandated by Section 13(c) of the Act, submissions must be received in the Office of the Under Secretary for Export Administration, U.S. Department of Commerce, 14th & Constitution Ave., N.W., Room 3898B, Washington, D.C., 20230, within 12 days. Replies to the other party's submission are to be made within the following 8 days. 15 CFR 788.23(b), 50 FR 53134 (1985). Pursuant to Section 13(c)(3) of the Act, the order of the final order of the Under Secretary may be appealed to the U.S. Court of Appeals for the District of Columbia within 15 days of its issuance.

Dated: August 22, 1995.

Edward J. Kuhlmann,

Administrative Law Judge.

[FR Doc. 95–23059 Filed 9–15–95; 8:45 am]

BILLING CODE 3510–DT–M

---

[1] The Act expired on August 20, 1994. Executive Order 12924 (59 FR 43437, August 23, 1994) continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. §§ 1701–1706 (1991)).

[2] At the time of the alleged violations, Grazi was the president of Fincosid SA, a Swiss company. A Charging Letter was also issued against Fincosid. On April 2, 1992, in responding to the Administrative Law Judge's March 4, 1992 Order, the Department advised the Administrative Law Judge that it had learned that Fincosid no longer exists and, therefore, withdrew the Charging Letter issued to Fincosid.

Bureau of Export Administration 9–18

[Docket No. 1107–07]

In the Matter of: Herman Van Croonenburg, Urb. El Paraiso, Parc. 145—Villa Favorita, E–29680 Estepona—Malaga, Spain; Respondent; Final Decision and Order

On August 22, 1995, the Administrative Law Judge (ALJ) entered his Recommended Decision and Order in the above-referenced matter. The Recommended Decision and Order, a copy of which is attached hereto and made a part hereof, has been referred to me for final action.

After describing the facts of the case and his findings based on those facts, the ALJ found that the Respondent on four separate occasions reexported U.S.-origin commodities from Switzerland to Austria, without obtaining the reexport authorization required by Section 774.1 of the Export Administration Regulations.

The ALJ recommended that the appropriate penalty for the violations should be that the Respondent and all successors, assignees, officers, representatives, agents and employees be denied for a period of fifteen years from this date all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving commodities or technical data exported or to be exported from the United States and subject to the Export Administration Regulations.

Based on my review of the record in this proceeding, I AFFIRM the Recommended Decision and Order of the Administrative Law Judge.

This constitutes final agency action in this matter.

Dated: September 4, 1995.

William A. Reinsch,

Under Secretary for Export Administration.

Recommended Decision and Order

On August 30, 1991, the Office of Export Enforcement, Bureau of Export Administration, U.S. Department of Commerce (Department), issued a Charging Letter alleging that Herman Anton van Croonenburg (van Croonenburg) committed four violations of Section 787.6 of the Export Administration Regulations (currently codified at 15 CFR Parts 768–799 (1995)) (the Regulations), issued pursuant to the Export Administration Act of 1979, as amended (50 U.S.C.A. app. § § 2401–2420 (1991, Supp. 1993, and Pub. L. No. 103–277, July 5, 1994)) (the Act).[1] On November 4, 1991, van Croonenburg answered the Charging Letter, but did not request a hearing.[2]

On September 6, 1991, this matter was consolidated with several other related matters and has proceeded through the administrative process since that time. On March 22, 1995, I issued an Order urging the parties to begin settlement discussions and directed the parties to report to me regarding the progress of those discussions. On April 5, 1995, in accordance with that Order, the Department wrote to van Croonenburg to determine if he was interested in pursuing a possible settlement in this matter. To date, van Croonenburg has not responded to the Department's offer to discuss a possible settlement. However, settlement discussions in several of the other related matters were successful. On June 19, 1995, following the submission of settlement proposals in these other related proceedings, I issued an Order directing the Department to file the submission required under Section 788.14 of the Regulations by August 18, 1995 against van Croonenburg. In accordance with that Order, the Department made the submission required by Section 788.14 of the Regulations on August 18, 1995.

---

[1] The Act expired on August 20, 1994. Executive Order 12924 (59 FR 43437, August 23, 1994) continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. § § 1701–1706 (1991)).

[2] Indeed, other than his answer, van Croonenburg has not filed any pleadings or responded either to any of my Orders or any of the Department's pleadings in this matter.

Background

The August 30, 1991 Charging Letter alleges that, on four separate occasions between on or about September 2, 1986 and on or about June 8, 1987, van Croonenburg, in his capacity as President of Marli S.A. (Marli),[3] reexported U.S.-origin commodities from Switzerland to Austria without first obtaining the reexport authorization required by Section 774.1 of the Regulations. Schedule A to the Charging Letter, which was attached thereto and incorporated by reference therein, identifies the approximate date of reexport from Switzerland to Austria, the commodity involved, the Samata S.A. (Samata) Purchase Order number, the House Air Waybill number for the exports from Switzerland to Austria that were made by air.

Finding

On the basis of the Department's submission and all of the supporting evidence presented, I have determined that van Croonenburg committed the violations alleged in the Charging Letter issued against him on August 30, 1991.

For those violations, the Department urges as a sanction that van Croonenburg's export privileges be denied for 15 years. In light of the nature of the violations, I concur in the Department's recommendation.

Accordingly, it is therefore ordered,

First, that all outstanding individual validated licenses in which van Croonenburg appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Exporter Services for cancellation. Further, all of van Croonenburg's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

Second, that Herman van Croonenburg, Urb. El Paraiso, Parc. 145—Villa Favorita, E-29680 Estepona—Malaga, Spain, and all of his successors, assigns, officers, representatives, agents, and employees, shall, for a period of 15 years from the date of final agency action, be denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, and subject to the Regulations.

A. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

B. After notice and opportunity for comment as provided in Section 788.3(c) of the Regulations, any person, firm, corporation, or business organization related to the respondent by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

C. As provided by Section 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Exporter Services, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

Third, that a copy of this Order shall be served on van Croonenburg and the Department in accordance with Section 788.16(b)(2) of the Regulations.

Fourth, that this Order, as affirmed or modified, shall become effective upon entry of the final action by the Under Secretary for Export Administration, in accordance with the Act (50 U.S.C. A. app. § 2412(c)(1)) and the Regulations (15 CFR 788.23).

To be considered in the 30 day statutory review process which is mandated by Section 13(c) of the Act, submissions must be received in the Office of the Under Secretary for Export Administration, U.S. Department of Commerce, 14th & Constitution Ave., NW., Room 389B, Washington, DC 20230, within 12 days. Replies to the other party's submission are to be made within the following 8 days. 15 CFR 788.23(b), 50 FR 53134 (1985). Pursuant to Section 13(c)(3) of the Act, the order of the final order of the Under Secretary may be appealed to the U.S. Court of Appeals for the District of Columbia within 15 days of its issuance.

Dated: August 22, 1995.

Edward J. Kuhlmann,

Administrative Law Judge.

BILLING CODE 3510-DT-M

---

[3] A Charging Letter was also issued against Marli. However, on January 6, 1992, after several attempts to serve Marli has failed, the Department withdrew that Charging Letter after it determined that Marli had ceased to exist. *See* Notice of Withdrawal of Charging Letter, filed January 6, 1992.

Foreign-Trade Zones Board

[Order No. 774]

Grant of Authority For Subzone Status, Brother Industries (U.S.A.) Inc. (Typewriters and Word Processors) Bartlett, Tennessee

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment* * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade

zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR Part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved;

Whereas, an application from the City of Memphis, Tennessee, grantee of Foreign-Trade Zone 77, for authority to establish special-purpose subzone status for the typewriter and word processor manufacturing facilities of Brother Industries (U.S.A.) Inc., located in Bartlett, Tennessee, was filed by the Board on November 22, 1994, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 38–94, 59 FR 62709, 12/6/94); and,

Whereas, the Board has found that the requirements of the FTZ Act and Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby authorizes the establishment of a subzone (Subzone 77B) at the Brother Industries (U.S.A.) Inc. facilities in Bartlett, Tennessee, at the locations described in the application, subject to the FTZ Act and the Board's regulations, including § 400.28.

Signed at Washington, DC, this 11th day of September 1995.

Susan G. Esserman,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-P

[Docket 51-95]

Foreign-Trade Zone 167—Green Bay, WI Application for Subzone Status Robin Manufacturing U.S.A., Inc., Plant (Internal-Combustion Engines) Hudson, WI

An application has been submitted to the Foreign-Trade Zones Board (the Board) by Brown County, Wisconsin, grantee of FTZ 167, requesting special-purpose subzone status for the small internal-combustion engine manufacturing plant of Robin Manufacturing U.S.A., Inc. (RMI) (a joint venture between Polaris Industries, Inc. (Minneapolis, MN), and Fuji Heavy Industries (Japan)), located in Hudson, Wisconsin. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on September 5, 1995.

The RMI plant (2 acres/56,000 sq.ft.) is located at 1201 Industrial Road in Hudson (St. Croix County), Wisconsin, some 15 miles east of Minneapolis—St. Paul, Minnesota, The facility (19 employees) is used to produce spark-ignition internal combustion engines (up to 500 cc in size) for recreational vehicles such as golf carts and all-terrain vehicles (up to 100,000 units per year). The company also plans to manufacture industrial engines (up to 1,000 cc) for farm, lawn, and garden equipment (HTS# 8407.32.20, 8407.33.30). Currently all of the engines' components are sourced abroad including: crankcases, cylinder heads, manifolds, balancer shafts, connecting rods, pistons, rocker arms, intake/exhaust valves, bearings and housings, flywheels, pulleys, gaskets, magnetos, fasteners, housings, fuel pumps, electrical components, and spark plugs (1995 duty rate range: 0.2—9.3%). The application indicates that 50 percent of all parts (by value) will be purchased from U.S. suppliers within three years after approval of subzone status.

Zone procedures would exempt RMI from Customs duty payments on the foreign components used in export production. On its domestic sales, RMI would be able to choose the lower duty rates that apply to finished engines (duty free, 2.5%) for the foreign components noted above. The application indicates that the savings from zone procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is November 17, 1995. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to December 4, 1995.

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce District Office, 108 Federal Building, 110 South Fourth Street, Minneapolis, MN 55401.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th Street & Pennsylvania Avenue, NW, Washington, DC 20230.

Dated: September 11, 1995.

John J. Da Ponte, Jr.,

Executive Secretary

BILLING CODE 3510-DS-P

National Oceanic and Atmospheric Administration

[I.D. 090795C]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Pacific Fishery Management Council (Council) will convene a public meeting of its salmon stock review teams.

DATES: The meeting will begin on September 28, 1995, at 10 a.m.

ADDRESSES: The meeting will be held at the Natural Resource Building, 1111 Washington Street, SE, Room 630, Olympia, WA.

Council address: Pacific Fishery Management Council, 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: John Coon, Fishery Management Coordinator (Salmon); telephone: (503) 326–6352.

SUPPLEMENTARY INFORMATION: The primary purpose of this meeting is to initiate a review of the status of some stocks of Puget Sound and Quillayute chinook, and Strait of Juan de Fuca coho. This review is required under the Council's salmon fishery management plan when a stock fails to meet its spawning escapement objective for 3 consecutive years.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Lawrence D. Six, Executive Director, at (503) 326–6352 at least 5 days prior to the meeting date.

Dated: September 12, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Increase of a Guaranteed Access Level for Certain Wool Textile Products Produced or Manufactured in the Dominican Republic

September 12, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing a guaranteed access level.

EFFECTIVE DATE: September 19, 1995.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On the request of the Government of the Dominican Republic, the Government of the United States has agreed to increase the current guaranteed access level (GAL) for Category 442.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 60 FR 17321, published on April 5, 1995.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 12, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on March 30, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 19, 1995, you are directed to increase the guaranteed access level for Category 442 to 105,000 dozen.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

Import Charges for Certain Cotton Textile Products Produced or Manufactured in Malaysia

September 12, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs applying charges to 1994 levels.

EFFECTIVE DATE: September 19, 1995.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Based on investigations conducted by the Government of the United States, CITA has determined that in 1994 textile products, produced or manufactured in Malaysia and entered into the United States with the incorrect country of origin, were transshipped in circumvention of the Bilateral Textile Agreement, effected by exchange of notes dated January 12 and 28, 1994, between the Governments of the United States and Malaysia. Consultations were held between the Governments of the United States and Malaysia on this matter on June 6–7, 1994. Accordingly, in the letter published below, the Chairman of CITA directs the Commissioner of Customs to charge the following amounts to the 1994 quota levels, as notified to the Textiles Monitoring Body, pursuant to the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing (ATC), for the categories listed below. The 1994 level for Category 339 is currently filled. Therefore, charges in the amount of 12,835 dozen will be applied to the 1995 limit for Category 339.

Category	Amount to be charged
339	12,835 dozen.
341	4,455 dozen.

The U.S. Government is taking this action pursuant to the January 12 and 28, 1994 Agreement.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 58 FR 65580, published on December 15, 1993.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the ATC, but are designed to assist only in the implementation of certain of its provisions.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 12, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: To facilitate implementation of the Bilateral Textile Agreement, effected by exchange of notes dated January 12 and 28, 1994, between the Governments of the United States and Malaysia, I request that, effective on September 19, 1995, you charge the following amounts to the following categories for the period which began on January 1, 1994 and extended through December 31, 1994 (see the directive dated December 9, 1993), as notified to the Textiles Monitoring Body, pursuant to the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing:

Category	Amount to be charged
339	12,835 dozen.
341	4,455 dozen.

This letter will be published in the **Federal Register**.

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

Adjustment of Import Limits for Certain Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Philippines

September 12, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing limits.

EFFECTIVE DATE: September 19, 1995.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6713. For information on embargoes and quota re-openings, call (202) 482–3715. For information on categories on which consultations have been requested, call (202) 482-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for Categories 443, 647/648 and 659–H are being increased for carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Also see 60 FR 17334, published on April 5, 1995.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 12, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on March 30, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in the Philippines and exported during the twelve-month period beginning on January 1, 1995 and extending through December 31, 1995.

Effective on September 19, 1995, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted limit [1]
Levels in Group I	
443	41,888 numbers.
647/648	973,502 dozen.
659–H [2]	1,223,903 kilograms.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1994.

[2] Category 659–H: only HTS numbers 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090 and 6505.90.8090.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before November 17, 1995.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202–4651, or should be electronic mailed to the internet address #FIRB@ed.gov, or should be faxed to 202–708–9346.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Department of Education (ED) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: September 12, 1995.

Gloria Parker,

Director, Information Resources Group.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG95–88–000, et al.]

Central Termoélectrica Buenos Aires S.A., et al.; Electric Rate and Corporate Regulation Filings

September 11, 1995.

Take notice that the following filings have been made with the Commission:

1. Central Termoélectrica Buenos Aires S.A.

[Docket No. EG95–88–000]

On August 30, 1995, Central Termoélectrica Buenos Aires S.A., Avda. Espana 3301, (1107) Capital Federal, Buenos Aires, Argentina, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Section 32(a)(1) of the Public Utility Holding Company Act of 1935, as amended by Section 711 of the Energy Policy Act of 1992. The applicant is a corporation that seeks exempt wholesale generator status with regard to its eligible facility under construction in Buenos Aires, Argentina. The facility will consist initially of one 200 MW simple cycle combustion turbine generator, fueled by oil or gas. In a second phase, the facility will be converted to combined cycle operation and enlarged to 320 MW. The facility will include such interconnection components as are necessary to interconnect the facility with the utility grid.

Comment date: September 29, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Entergy S.A.

[Docket No. EG95–89–000]

On August 30, 1995, Entergy S.A., c/o Entergy Power Group, Three Financial Centre, Suite 210, 900 South Shackleford Road, Little Rock, Arkansas 72211, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Section 32(a)(1) of the Public Utility Holding Company Act of 1935, as amended by Section 711 of the Energy Policy Act of 1992. The applicant is a corporation that is engaged directly and indirectly and exclusively in owning and operating natural gas/oil-fired generating units located in and around the greater metropolitan area of Buenos Aires, Argentina. The total installed generating capacity of the facilities currently in operation is 1260 MW.

Comment date: September 29, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. Entergy Power Development Corporation

[Docket No. EG95–90–000]

On September 1, 1995, Entergy Power Development Corporation, Three Financial Centre, Suite 210, 900 South Shackleford Road, Little Rock, Arkansas 72211, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Section 32(a)(1) of the Public Utility Holding Company Act of 1935, as amended by Section 711 of the Energy Policy Act of 1992.

The applicant is a corporation that is engaged directly or indirectly and exclusively in owning or operating, or both owning and operating, several electric power facilities. The applicant has previously been found to be an exempt wholesale generator. This application is occasioned by the applicant's intended acquisition of an indirect ownership interest in an eligible facility under construction in Buenos Aires, Argentina. The facility will consist initially of one 200 MW simple cycle combustion turbine generator, fueled by oil or gas. In a second phase, the facility will be converted to combined cycle operation and enlarged to 320 MW. The facility will include such interconnection components as are necessary to interconnect the facility with the utility grid.

Comment date: September 29, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

4. Northeast Utilities Service Company

[Docket No. ER95–1686–000]

Take notice that Northeast Utilities Service Company (NUSCO) on September 1, 1995, tendered for filing revisions to its Long-Term Firm, Short-Term, Non-Firm and Network Transmission Tariffs. NUSCO states that the revised tariffs reflect the Commission's fixed charge methodology and satisfy the comparability standards contained in the Commission's Open Access NOPR, Docket No. RM95–8.

NUSCO states that a copy of this filing has been mailed to all customers with

whom it has entered into service agreements under its transmission tariffs, to parties in the ongoing compliance proceeding in Docket No. EC90–10–007 and to the state commissions in each of the six New England states and New York.

NUSCO requests that the Tariffs become effective on November 1, 1995.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Entergy Power Holding I, Ltd.

[Docket No. EG95–91–000]

On September 1, 1995, Entergy Power Holding I, Ltd., Three Financial Centre, Suite 210, 900 South Shackleford Road, Little Rock, Arkansas 72211, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Section 32(a)(1) of the Public Utility Holding Company Act of 1935, as amended by section 711 of the Energy Policy Act of 1992.

The applicant is a corporation that is engaged directly or indirectly and exclusively in owning or operating, or both owning and operating, several electric power facilities. The applicant has previously been found to be an exempt wholesale generator. This application is occasioned by the applicant's intended acquisition of an indirect ownership interest in an eligible facility under construction in Buenos Aires, Argentina. The facility will consist initially of one 200 MW simple cycle combustion turbine generator, fueled by oil or gas. In a second phase, the facility will be converted to combined cycle operation and enlarged to 320 MW. The facility will include such interconnection components as are necessary to interconnect the facility with the utility grid.

Comment date: September 29, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

6. New York State Electric & Gas Corporation

[Docket No. ER95–1589–000]

Take notice that on August 18, 1995, New York State Electric & Gas Corporation (NYSEG) tendered for filing a letter advising the Commission why no termination notice was filed in the agreement scheduled to terminate on June 30, 1995, between NYSEG and the New York Power Authority.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. Northern States Power Company (Minnesota); Northern States Power Company (Wisconsin)

[Docket No. ER95–1662–000]

Take notice that on August 31, 1995, Northern States Power Company-Minnesota (NSP–M) and Northern States Power Company-Wisconsin (NSP–W) jointly tender and request the Commission to accept a Transmission Service Agreement which provides for 50 MW of Reserved Transmission Service to Wisconsin Power and Light Company. The source party is Otter Tail Power Company and the recipient party is Wisconsin Power and Light Company.

NSP requests that the Commission accept for filing the Transmission Service Agreement effective as of August 5, 1995. NSP requests a waiver of the Commission's notice requirements pursuant to Part 35 so the Agreement may be accepted for filing effective on the date requested.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. Illinois Power Company

[Docket No. ER95–1663–000]

Take notice that on August 31, 1995, Illinois Power Company (IPC), tendered for filing an Interchange Agreement between IPC and Wisconsin Power and Light Company (WP&L). IPC states that the purpose of this agreement is to provide for the selling of capacity and energy by IPC to WP&L.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. Northern States Power Company (Minnesota)

[Docket No. ER95–1664–000]

Take notice that on August 31, 1995, Northern States Power Company (Minnesota) (NSP), tendered for filing a Supplemental Power Agreement among NSP, the City of Glencoe (City) and the Central Minnesota Municipal Power Agency (CMMPA) dated July 30, 1995. This agreement allows CMMPA to purchase additional power and energy from NSP on behalf of the City.

NSP requests that the Commission accept for filing this agreement effective as of December 1, 1995.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

10. Public Service Company of New Hampshire

[Docket No. ER95–1665–000]

Take notice that on August 31, 1995, Public Service Company of New Hampshire (PSNH) pursuant to Section 205 of the Federal Power Act, filed proposed changes to charges for decommissioning Seabrook Unit 1 to be collected under PSNH Federal Energy Regulatory Commission Rate Schedules Nos. 133, 134, 135 and 142. These charges are recovered under a formula rate that is not changed by the filing. The proposed adjustment in charges is necessitated by a ruling of the New Hampshire Nuclear Decommissioning Finance Committee adjusting the funding requirements for decommissioning Seabrook Unit 1.

PSNH has requested an effective date of November 1, 1995 for the adjusted charges.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

11. Great Bay Power Corporation

[Docket No. ER95–1666–000]

Take notice that on August 31, 1995, Great Bay Power Corporation (Great Bay), tendered for filing a service agreement between Phibro Inc. and Great Bay for service under Great Bay's Tariff for Short Term Sales. This Tariff was accepted for filing by the Commission on November 11, 1993, in Docket No. ER93–924–000. The service agreement is proposed to be effective September 1, 1995.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

12. Wisconsin Electric Power Company

[Docket No. ER95–1667–000]

Take notice that on August 31, 1995, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an Electric Service Agreement between itself and Central Illinois Light Company (CILCo). The Electric Service Agreement provides for service under Wisconsin Electric's Coordination Sales Tariff.

Wisconsin Electric requests an effective date of sixty days from date of filing. Copies of the filing have been served on CILCo, the Public Service Commission of Wisconsin and the Michigan Public Service Commission.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

13. Northeast Utilities Service Company

[Docket No. ER95–1668–000]

Take notice that on August 31, 1995, Northeast Utilities Service Company tendered for filing: (1) a Notice of Termination of Transmission Tariff No. 4; and (2) a request for waiver of compliance filing.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

14. Virginia Electric and Power Company

[Docket No. ER95–1669–000]

Take notice that on August 31, 1995, Virginia Electric and Power Company (the Company), tendered for filing a letter agreement implementing the rate schedules included in the Interconnection and Operating Agreement between the Company and Old Dominion Electric Cooperative.

Copies of the filing were served upon Old Dominion Electric Cooperative, the Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

15. Virginia Electric and Power Company

[Docket No. ER95–1670–000]

Take notice that on August 31, 1995, Virginia Electric and Power Company (Virginia Power), tendered for filing a Service Agreement between Consolidated Edison Company of New York, Inc. and Virginia Power, dated August 31, 1994, under the Power Sales Tariff to Eligible Purchasers dated May 27, 1994. Under the tendered Service Agreement Virginia Power agrees to provide services to Consolidated Edison Company of New York, Inc. under the rates, terms and conditions of the Power Sales Tariff as agreed by the parties pursuant to the terms of the applicable Service Schedules included in the Power Sales Tariff.

Copies of the filing were served upon the New York Public Service Commission, the Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

16. The Washington Water Power Company

[Docket No. ER95–1671–000]

Take notice that on August 31, 1995, The Washington Water Power Company (WWP), tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13, a signed service agreement under FERC Electric Tariff Volume No. 4 with TransCanada Northridge Power Ltd. along with a Certificate of Concurrence with respect to exchanges. WWP requests waiver of the prior notice requirement and requests an effective date of September 1, 1995.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

17. Northern Indiana Public Service Company

[Docket No. ER95–1672–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Energy Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and Heartland Energy Services, Inc. (Heartland). Under this Service Agreement, Northern Indiana Public Service Company agrees to provide services to Heartland under Northern Indiana Public Service Company's Power Sales Tariff, which was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

18. Northern Indiana Public Service Company

[Docket No. ER95–1673–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and Michigan South Central Power Agency (the Agency). Under this Service Agreement, Northern Indiana Public Service Company agrees to provide services to the Agency under Northern Indiana Public Service Company's Power Sales Tariff, which was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

19. Northern Indiana Public Service Company

[Docket No. ER95–1674–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Energy Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and NorAm Energy Services, Inc. (NES). Under this Service Agreement, Northern Indiana Public Service Company agrees to provide services to NES under Northern Indiana Public Service Company's Power Sales Tariff, which was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

20. Northern Indiana Public Service Company

[Docket No. ER95–1675–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Energy Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and Enron Power Marketing, Inc. (EPU). Under this Service Agreement, Northern Indiana Public Service Company agrees to provide services to EPU under Northern Indiana Public Service Company's Power Sales Tariff, which was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

21. Northern Indiana Public Service Company

[Docket No. ER95–1676–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Energy Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and Citizens Lehman Power Sales (Citizens). Under this Service Agreement, Northern Indiana Public Service Company agrees to provide services to Citizens under Northern Indiana Public Service Company's Power Sales Tariff, which

was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

22. Northern Indiana Public Service Company

[Docket No. ER95–1677–000]

Take notice that on August 31, 1995, Northern Indiana Public Service Company (Northern), pursuant to Section 35.13 of the Federal Energy Regulatory Commission's Rules and Regulations, 18 CFR 35.13, tendered for filing an executed Service Agreement between Northern Indiana Public Service Company and Tennessee Power Company (TPCO). Under this Service Agreement, Northern Indiana Public Service agrees to provide services to TPCO under Northern Indiana Public Service Company's Power Sales Tariff, which was accepted for filing by the Commission and made effective by Order dated August 17, 1995 in Docket No. ER95–1222–000.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

23. Commonwealth Edison Company

[Docket No. ER95–1680–000]

Take notice that on August 29, 1995, Commonwealth Edison Company (ComEd) submitted two Service Agreements, establishing Heartland Energy Services (Heartland), and Catex Vitol Electric, L.L.C. (Catex Vitol), as customers under the terms of ComEd's Transmission Service Tariff FTS–1 (FTS–1 Tariff). The Commission has previously designated the FTS–1 Tariff as FERC Electric Tariff, Original Volume No. 4.

ComEd requests an effective date of August 4, and August 14, 1995, respectively, and accordingly seeks waiver of the Commission's notice requirements. Copies of this filing were served upon Heartland, Catex Vitol and the Illinois Commerce Commission.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Project No. 11142–000 Maine]

Consolidated Hydro Maine, Inc., Notice of Availability of Draft Environmental Assessment

September 12, 1995.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the application for a new license for the Estes Lake Hydroelectric Project, located in the townships of Sanford and Alfredin York County, Maine and has prepared a Draft Environmental Assessment (DEA) for the project. In the DEA, the Commission's staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate environmental protection or enhancement measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the DEA are available for review in the Public Reference Branch, Room 3104, of the Commission's offices at 941 North Capitol Street, N.E., Washington, D.C. 20426.

Any comments should be filed within 45 days from the date of this notice and should be addressed to Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Please affix "Estes Lake Hydroelectric Project No. 11142" to all comments. For further information, please contact Frankie Green at (202) 501–7704.

BILLING CODE 6717–01–M

[Docket No. GT95–56–000]

Algonquin Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

September 12, 1995.

Take notice that on September 1, 1995, Algonquin Gas Transmission Company (Algonquin) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet, with a proposed effective date of October 1, 1995:

Eighth Revised Sheet No. 1101

Algonquin states that the purpose of this filing is to reflect a change in Algonquin's index of purchasers.

Algonquin states that copies of this filing were served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TM96–1–118–001]

Arkansas Western Pipeline Co.; Notice of Proposed Changes in FERC Gas Tariff

September 12, 1995.

Take notice that on September 6, 1995, Arkansas Western Pipeline Company (AWP) tendered for filing a corrected hard copy of First Revised Sheet No. 4 to its FERC Gas Tariff First Revised Volume No. 1.

AWP states that the purpose of this filing is to file a corrected hard copy of the tariff sheet (originally filed on August 28, 1995) to implement for the first time an ACA charge in its rates. Specifically, the hard copy of the ACA filing erroneously omitted the word "any" in the following sentence, which appears at the bottom of the First

Revised Sheet No. 4: "All rates exclusive of any fuel usage and applicable shrinkage of zero percent (0%)."

Any person desiring to protest the subject filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests should be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and available for public inspection.

[Docket No. RP95–400–001]

Distrigas of Massachusetts Corporation; Notice of Tariff Filing

September 12, 1995.

Take notice that on September 6, 1995, Distrigas of Massachusetts Corporation (DOMAC) tendered for filing pursuant to Part 154 of the regulations of the Federal Energy Regulatory Commission (Commission) compliance tariff sheets as specified in the letter order issued in this proceeding on August 28, 1995.

DOMAC states that copies of the filing were served upon all of DOMAC's customers and affected state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests should be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

BILLING CODE 6717–01–M

[Docket No. TM96–1–4–000]

Granite State Gas Transmission Inc.; Notice of Change in Annual Charge Adjustment

September 12, 1995.

Take notice that on September 6, 1995, Granite State Gas Transmission, Inc. (Granite State) tendered for filing to become part of its FERC Gas Tariff, Third Revised Volume No. 1, the revised tariff sheets listed below containing changes in rates for effectiveness on October 1, 1995:

Fifth Revised Sheet No. 21
Sixth Revised Sheet No. 22
Fifth Revised Sheet No. 22

According to Granite State, the revised tariff sheets are submitted to reflect the Annual Charge Adjustment authorized for the 1996 fiscal year in its transportation rate schedules.

Granite State further states that copies of its filing have been mailed to its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP95–185–008]

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

September 12, 1995.

Take notice that on September 5, 1995, Northern Natural Gas Company (Northern) tendered for filing to become part of the Northern's FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheet, proposed to be effective September 1, 1995:

First Revised Sheet No. 105

Northern states that such tariff sheet is being submitted in compliance with the Commission's "Order on Rehearing", issued August 3, 1995, in Docket No. RP95–185–002, to clarify the tariff provision addressing turnback of TFF capacity.

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests must be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket Nos. ES95–37–001 and ES95–37–002]

Texas-New Mexico Power Company and Texas Generating Company II; Notice of Amended Application

September 12, 1995.

Take notice that on September 8, 1995, Texas-New Mexico Power Company (TNP) and Texas Generating Company II (TGC II) filed amendments the application filed in Docket No. ES95–37–000. Such amendments provide explanations of both an existing credit agreement which was authorized by the Commission in Docket No. ES94–12–000 et al.[1] and an amended credit agreement which TNP and TGC II are proposing to enter into. The amendments differentiate between the two agreements, as well as noting the anticipated benefits to be realized by entry into the proposed amended credit agreement. TNP notes that entry into the amended credit agreement will allow the refinancing of currently outstanding long-term debt with debt under the amended credit agreement which will bear a cost lower than the existing long-term debt. TNP also notes that its long-term debt is not anticipated to be of investment grade until 1998 and would therefore have a cost higher than the debt under the amended credit agreement. In addition to savings to be realized through the refinancing the existing long-term debt, TNP further notes that, under the terms of the amended credit agreement, it will also realize cost savings as compared to borrowings under the present credit agreement which would be replaced by the proposed credit agreement.

TNP and TGC II also note that the proposed credit agreement is, in essence, an extension of the existing credit agreement for an additional two years but under terms that are simpler and more favorable than the terms of the existing credit agreement.

TNP and TGC II also submitted amended Exhibit C, Balance Sheet; Exhibit D, Income Statement; and E, Statement of Cash Flows and Computation of Interest Coverage, for the twelve months ended June 30, 1995, as well as supplemental information on TNP's anticipated financial condition. The amendments also corrected a reference to TGC II in the original filing which should have been a reference to TNP.

TNP and TGC II also request Commission action by September 25, 1995, instead of September 15, 1995 as originally requested.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 20, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants partiers to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–23027 Filed 9–15–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM95–2–76–000]

Wyoming Interstate Company, Ltd.; Notice of Filing

September 12, 1995.

Take notice that on August 30, 1995, Wyoming Interstate Company, Ltd. (WIC) filed of the following tariff sheets to its FERC Gas Tariff, with an effective date of September 1, 1995:

First Revised Volume No. 1
First Revised Sheet No. 5.1
Second Revised Volume No. 2
First Revised Sheet No. 4A
Fourth Revised Sheet No. 5

WIC proposes to reduce its current Fuel Gas and Unaccounted-for Gas ("FL&U") percentage from one percent to a new level of zero percent. This filing is a non-annual filing pursuant to Section 24 of WIC's First Revised Volume No. 1 and Article 31 of WIC's Second Revised Volume No. 2. Since the December 1, 1994 effective date of the current FL&U percentage WIC states it has experienced a FL&U percentage of less than one percent on its system and a change at this time will result in WIC's transportation customers receiving the benefit of a lower FL&U percentage during the winter heating season.

WIC states that copies of this filing were served on its customers and state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 19, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[AD-FRL–5296–8]

Access to Confidential Business Information Under the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA has authorized the California Air Resources Board (CARB) access to information that has been, or will be, submitted to the EPA under Section 114 of the Clean Air Act (CAA), as amended.

Some of the information may be claimed to be confidential business information (CBI) by the submitter.

DATES: Access to confidential data submitted to the EPA will occur no sooner then ten days after issuance of this notice.

FOR FURTHER INFORMATION CONTACT: Doris Maxwell, Document Control Officer, Office of Air Quality Planning and Standards (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (919) 541–5312.

SUPPLEMENTARY INFORMATION: The EPA is issuing this notice to inform all submitters of information under Section 114 of the CAA that the EPA may provide the above-mentioned State agency access to these materials on a need-to-know basis.

In accordance with 40 CFR 2.301(h), the EPA has determined that CARB requires access to CBI concerning consumer and commercial products submitted to the EPA under Section 183(e) and Section 114 of the CAA in order to carry out its duties under California environmental protection laws and the CAA. Some of the information may be claimed or determined to be CBI. The CARB will be required to sign a nondisclosure agreement and will be briefed on appropriate security procedures before being permitted access to CBI. All CARB access to CAA CBI will take place at CARB's facilities. The CARB will have appropriate procedures and facilities in place to safeguard the CAA CBI to which CARB has access.

Clearance for access to CAA CBI is scheduled to expire on September 30, 1998.

Dated: September 11, 1995.

Mary Nichols,

Assistant Administrator for Air and Radiation.

Jack's Creek/Sitkin Smelting Superfund Site de Minimis Settlement; Proposed Administrative Settlement Under the Comprehensive Environmental Response, Compensation and Liability Act

AGENCY: United States Environmental Protection Agency.

ACTION: Request for public comment.

SUMMARY: The United States Environmental Protection Agency is proposing to enter into a *de minimis* settlement pursuant to Section 122(g)(4) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (CERCLA), 42 U.S.C. 9622(g)(4). This proposed settlement is intended to resolve the liability under CERCLA of Joseph Smith and Sons, Inc. ("Joseph Smith"), for response costs incurred by the United States Environmental Protection Agency at the Jack's Creek/Sitkin Smelting Superfund Site, Maitland County, Pennsylvania.

---

[1] 66 FERC ¶ 62,054 (1994).

DATES: Comments must be provided on or before October 18, 1995.

ADDRESS: Comments should be addressed to the Docket Clerk, United States Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania, 19107, and should refer to: In Re: Jack's Creek/Sitkin Smelting Superfund Site, Maitland County, Pennsylvania, U.S. EPA Docket No. III–94–40–DC.

FOR ADDITIONAL INFORMATION CONTACT: Daniel Isales (215) 597–4774, or Pamela Lazos (215) 597–8504, United States Environmental Protection Agency, Office of Regional Counsel, (3RC22), 841 Chestnut Building, Philadelphia, Pennsylvania, 19107.

Notice of De Minimis Settlement

In accordance with Section 122(i)(1) of CERCLA, 42 U.S.C. 9622(i)(1), and Section 7003(d) of the Solid Waste Disposal Act, 42 U.S.C. 6973(d), notice is hereby given of a proposed administrative settlement concerning the Jack's Creek/Sitkin Smelting Superfund Site in Maitland County, Pennsylvania. The administrative settlement was signed by the United States Environmental Protection Agency, Region III's Regional Administrator on June 30, 1995 and is subject to review by the public pursuant to this Notice. The agreement is also subject to the approval of the Attorney General, United States Department of Justice or her designee and for the grant of a covenant not to sue for damages to natural resources, is also subject to agreement in writing by the Department of the Interior ("DOI").

The settling party has agreed to pay $14,066.18 to United States Environmental Protection Agency toward EPA CERCLA response costs and $506.25 to DOI for damages to natural resources, subject to the contingency that the Environmental Protection Agency may elect not to complete the settlement based on matters brought to its attention during the public comment period established by this Notice.

EPA is entering into this agreement under the authority of Sections 122(g) and 107 of CERCLA, 42 U.S.C. 9622(g) and 9607. Section 122(g) of CERCLA, 42 U.S.C. 9622(g), authorizes early settlements with *de minimis* parties to allow them to resolve their liabilities under, inter alia, Section 107 of CERCLA, 42 U.S.C. 9607, to reimburse the United States for response costs incurred in cleaning up Superfund sites without incurring substantial transaction costs. The grant of a covenant not to sue for damages to natural resources by DOI to those parties paying their share of such allocated costs is subject to agreement in writing by DOI pursuant to Section 122(j) of CERCLA, 42 U.S.C. 9622(j).

The Environmental Protection Agency will receive written comments upon this proposed administrative settlement for thirty (30) days from the date of publication of this Notice. Moreover, pursuant to Section 7003(d) of the Solid Waste Disposal Act, 42 U.S.C. 6973(d), the public may request a meeting in the affected area. A copy of the proposed Administrative Order on Consent can be obtained from the Environmental Protection Agency, Region III, Office of Regional Counsel, (3RC20), 841 Chestnut Building, Philadelphia, Pennsylvania, 19107 by contacting Daniel Isales at (215) 597–4774 or Pamela Lazos at (215) 597–8504.

W.T. Wisniewski,

Acting Regional Administrator, EPA Region III.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Approved by Office of Management and Budget

September 11, 1995.

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1980, Pub. L. 96–511. For further information contact Shoko B. Hair, Federal Communications Commission, (202) 418–1379.

Federal Communications Commission

OMB Control No.: 3060–0106.

Expiration Date: 08/31/98.

Title: Reports of Overseas Telecommunications Traffic—Section 43.61.

Estimated Annual Burden: 2,370 total annual hours; 14.81 hours per response; 160 respondents.

Description: The telecommunications traffic data report is an annual reporting requirement imposed on common carriers engaged in the provision of overseas telecommunications services. The reported data is useful for international planning, facility authorization, monitoring emerging developments in communications services, analyzing market structures, tracking the balance of payments in international communications services, and market analysis purposes. The reported data enables the Commission to fulfill its regulatory responsibilities.

OMB Control No.: 3060–0511.

Expiration Date: 08/31/98.

Title: ARMIS Access Report, FCC Report 43–04.

Estimated Annual Burden: 172,500 total annual hours; 1150 hours per response; 150 respondents.

Description: The Access Report is needed to administer our accounting, jurisdictional separations and access charge rules, and to analyze revenue requirements and rates of return and to collect financial and operating data from all Tier 1 local exchange carriers.

OMB Control No.: 3060–0512.

Title: ARMIS Quarterly Report.

Estimated Annual Burden: 132,000 total annual hours; 220 hours per response; 150 respondents.

Description: The Quarterly Report is needed to administer the accounting, jurisdictional separations and access charge rules, and to analyze revenue requirements and rates of return and to collect financial and operating data from all Tier 1 local exchange carriers.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

[Report No. AUC–95–06]

Auction Notice and Filing Requirements for 493 BTA Authorizations for Multipoint Distribution Service in the 2 GHz Band, Scheduled for November 13, 1995

AGENCY: Federal Communications Commission.

ACTION: Public notice.

SUMMARY: This Public Notice, released September 5, 1995, announced the auction and filing requirements for the 493 BTA authorizations for the Multipoint and/or Multichannel Distribution Service (MDS) in the 2 GHz Band, scheduled to begin November 13, 1995. The Public Notice included, as an Appendix, an upfront payment schedule. On September 12, 1995, the FCC's Wireless Telecommunications Bureau issued another Public Notice with a revised upfront payment schedule, which differed slightly from September 5, 1995 Appendix and supersedes the schedule previously published. Both the September 5, 1995 and the September 12, 1995 Public Notices should be read together. These Public Notices are directed toward the Commission's goal of efficiently distributing the unused MDS spectrum through competitive bidding, and are designed to assist prospective bidders in preparing for the upcoming MDS auction.

FOR FURTHER INFORMATION CONTACT: The FCC auction contractor; Tradewinds International, Inc., at (202) 637–FCC1 (637–3221).

The complete text of the Public Notice dated September 5, 1995 follows. Copies of this item is available for public inspection in Room 207, 2033 M Street, NW., Washington, DC and may also be obtained from the FCC copy contractor, ITS, Inc. at (202) 418–0620, and the FCC auction contractor, Tradewinds International, Inc. at (202) 637–FCC1 (637–3221).

Report No. AUC–95–06, Auction No. 6, September 5, 1995

I. Introduction

On Monday, November 13, 1995, the Federal Communications Commission (FCC or Commission) will commence a simultaneous multiple round auction for 493 authorizations to provide single channel Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS), collectively referred to as MDS. The frequencies allocated to MDS are as follows: 2150–2156 MHz (designated as Channel 1); 2156–2162 MHz (designated as Channel 2) or 2156–2160 (designated as Channel 2A); 2596–2602 MHz, 2608–2614 MHz, 2620–2626 MHz, and 2632–2638 MHz (designated as Channels E1, E2, E2, and E4, respectively); 2602–2608 MHz, 2614–2620 MHz, 2626–2632 MHz, and 2638–2644 MHz (designated as Channels F1, F2, F3 and F4, respectively); 2650–2656 MHz, 2662–2668 MHz, and 2674–2680 MHz (designated as Channels H1, H2 and H3, respectively). In 1992, the frequency spectrum of 2160–2162 MHz was reallocated to emerging technologies, and thus, any subsequent MDS use of these 2 MHz will be secondary. The authorizations to be auctioned will authorize the construction of facilities to provide service on the usable MDS channels within the 493 Basic Trading Area (BTAs) and BTA-like areas in the United States. A channel is usable if the proposed station design is in compliance with the Commission's interference standards. The channels allocated to MDS, when supplemented with leased channels from the Instructional Television Fixed Service (ITFS), are generally used to provide multichannel video programming service (popularly referred to as "wirless cable") to subscribers.

In each of the 493 BTAs, one authorization will be offered for bid. Bidders should note that MDS is a service heavily encumbered with previously authorized and proposed MDS and ITFS facilities. Most of the thirteen MDS channels have already been authorized in the largest metropolitan areas, especially in the eastern half of the United States. Given the limited amount of usable MDS spectrum remaining and the presence of incumbents in most BTAs, each prospective bidder should carefully evaluate the BTAs in which it is interested prior to the commencement of bidding. The attached Appendix lists the market number, authorization number and population of each BTA, as well as the upfront payment amount associated with each BTA and reduced upfront payment amount for eligible small businesses.

The precise schedule for bidding in the first week of the auction will be announced approximately two weeks prior to the start of the auction. Unless otherwise announced, bidding will be conducted on each business day until bidding has stopped on all BTA service areas. Bidding in this auction will only be permitted from remote locations, either electronically (by computer) or telephonically.

Those wishing to participate in the auction must submit a "short-form" application on FCC Form 175–M in accordance with the Commission's rules and instructions in this Public Notice and in the Bidder Information Package. Applicants should be aware that the FCC Form 175–M is a revised form specifically for this MDS auction and will be the only form accepted for filing. The FCC Form 175–M must be received no later than 5:30 p.m. Eastern Daylight Time on Tuesday, October 10, 1995, and must be received either electronically or manually pursuant to the instructions set forth in the Bidder Information Package. Applicants for the MDS auction are encouraged to file their FCC Form 175–M electronically. Applicants should also be aware that only those applicants who file applications electronically will be permitted the option to bid electronically. Applicants who file their applications manually will only be permitted to bid telephonically. Limited instructions regarding electronic filing are contained in this Public Notice. More detailed instructions on electronic filing will be contained in the Bidder Information Package. Applicants whose FCC Forms 175–M have been accepted will be required to submit an upfront payment (in U.S. dollars) to be eligible to participate in the auction. As detailed in Section II.B. of this Public Notice, the upfront payment must be made by wire transfer or cashier's check payable to the "Federal Communications Commission" or "FCC" and must be received on or before Monday, October 30, 1995, at the Mellon Bank in Pittsburgh, Pennsylvania. No other form of payment will be accepted.

A. Bidder Information Package

Prospective bidders who have already contacted the FCC Auction Hotline expressing an interest in MDS will receive the Bidder Information Package for the MDS auction approximately ten to fifteen business days from the issuance of this Public Notice. Other prospective applicants may obtain the Bidder Information Package for the MDS auction by contacting Tradewinds International, Inc., at (202) 637–FCC1 (637–3221).

The FCC recently issued a Report and Order (WT Docket No. 95–69, 60 Fed. Reg. 38,276 (July 26, 1995)) establishing fair and reasonable fees for Bidder Information Packages. Although all prospective applicants who request a Bidder Information Package will receive their first copy of this package for free, additional copies will be provided at a cost of $16.00 per package (including postage). Payment for additional Bidder Information Packages may be made by Visa/Master Card or check payable to the "Federal Communications Commission" or "FCC" and mailed to Tradewinds International, Inc.

The Bidder Information Package will contain the following information:

1. A list of BTA authorizations to be offered simultaneously;
2. Detailed procedures, terms and conditions of the auction;
3. Detailed instructions regarding the completion and filing of the FCC Form 175–M, including instructions on electronic filing and remote access of FCC Form 175–M applications filed with the Commission;
4. Electronic and telephone bidding procedures;
5. All applications/forms needed to participate in the FCC Auction:

a. A short-form application to participate in the auction (FCC Form 175–M) for bidders who intend to file manually, Additionally, a supplemental form (FCC Form 175–S) will be included for those who wish to apply for more than five markets.

b. An FCC Remittance Advice Form (FCC Form 159) to be submitted by each bidder with its upfront payment, and by each winning bidder with its down payment, final payment and installment payments, if applicable (as described below), including instructions on filling out the form and samples of completed FCC Form 159s;

c. A registration form to participate in the FCC's Auction Seminar to be held at the FCC's auction facility in Washington, D.C. on Tuesday, October 24, 1995. This seminar is only for applicants whose FCC Forms 175–M have been filed;

d. An order form for the purchase of remote electronic bidding software;

6. Wire transfer instructions;

7. A partial bibliography of auction specific FCC rules and regulations;

8. The Report and Order in MM Docket No. 94–131 and PP Docket No. 93–253, FCC 95–230 (released June 30, 1995), summarized at 60 Fed. Reg. 36,524 (July 17, 1995) (MDS Report and Order), which modified the MDS application process and adopted competitive bidding procedures for MDS. This MDS Report and Order contains the amended part 21 rules pertaining to MDS and a draft application for an MDS authorization (FCC Form 304 or "long-form" application) to be submitted after the auction by winning bidders to obtain a station license;

9. An FCC Licensee Qualification Report (FCC Form 430), which must be submitted after the auction by winning bidders as part of their Form 304 long-form applications or statements of intention; and

10. Other general auction information.

B. Relevant Authority

Prospective Bidders must familiarize themselves thoroughly with the procedures, terms and conditions (collectively, "Terms") contained in the Second Report and order in PP Docket No. 93–253, 9 FCC Rcd 2348 (1994), 59 Fed. Reg. 22,980 (May 4, 1994), Second Memorandum Opinion and Order in PP Docket No. 93–253, 9 FCC Rcd 7245 (1994), 59 Fed. Reg. 44,272 (Aug. 26, 1994); the Erratum to the Second Memorandum Opinion and Order in PP Docket No. 93–253 (Oct. 19, 1994); and the MDS Report and Order (collectively referred to as "the Relevant Orders"). The rules contained in the Relevant Orders, this Public Notice, and Terms in the Bidder Information Package are not negotiable. Prospective bidders should review these auction documents thoroughly prior to the auction to make certain that they understand all of the provisions and are willing to be bound by all of the Terms before participating in the auction.

Potential bidders should also be aware of several items pending before the Commission that affect MDS. Thirteen petitions for reconsideration have been filed requesting that the Commission reconsider and/or clarify certain aspects of the MDS Report and Order. In addition, numerous members of the wireless cable industry have filed a request for a declaratory ruling asking that the Commission examine current MDS and ITFS operational requirements that were adopted before digital compression technology was envisioned, and reinterpret them appropriately for digital operations. Further, the Commission has announced the opening of an ITFS filing window from October 16–20, 1995. Prospective bidders should consider the impact of these pending matters in their valuation of the BTA service areas before submitting any bids in the auction.

The information contained in this Public Notice and in the Bidder Information Package may be amended or supplemented by the Commission at any time. The Commission will issue Public Notices to convey the new or supplemental information to prospective bidders. It is the responsibility of all prospective bidders to remain current with all FCC rules and with all Public Notices pertaining to this auction. Copies of FCC documents, including Public Notices, may be obtained for a fee by calling International Transcription Service, Inc. at (202) 857–3800. Additionally, prospective bidders may retrieve some of these documents from the FCC Internet node via anonymous FTP@fcc.gov.

II. Bidder Eligibility

In order to be eligible to bid in the MDS auction, bidders must (i) satisfy the Commission's eligibility requirements; (ii) submit a short-form application on FCC Form 175–M (and Form 175–S if necessary); and (iii) remit an upfront payment in compliance with applicable FCC rules and regulations. To meet the eligibility requirements for participation in this auction, prospective bidders must be qualified to receive a BTA authorization and an MDS station license. See 47 C.F.R. § 21.923. All prospective applicants should review carefully each of the rules contained in subparts A, B, C, D, E and K of Part 21 of the Commission's rules, as amended by the MDS Report and Order, as well as Subparts I and Q of Part 1 of the Commission's rules.

Bidders that qualify as small businesses or as small business consortia are eligible for reduced upfront payments (see Section II.B), bidding credits of 15% (a discount on the winning bid price) and installment payments (which allow eligible winning bidders to pay the net amount of their winning bids in installments). Small businesses are entities that, together with their affiliates, have average annual gross revenues that are not more than $40 million for the preceding three calendar years. See 47 C.F.R. §§ 21.960 and 21.961 for eligibility criteria and other terms pertaining to reduced upfront payments, bidding credits and installments payments. These special measures available to small businesses in the MDS auction are also discussed in the Bidder Information Package.

Winning bidders claiming eligibility as small businesses should note that they will be required to file supporting documentation to establish that they qualify as small businesses. See 47 C.F.R. § 21.960(e). Winning bidders claiming eligibility as small businesses may be subject to audits by the Commission to confirm bidder eligibility. See 47 C.F.R. § 21.960(f) and (g).

A. Short-Form Application (FCC Form 175–M)

In order to be eligible to bid, applicants must submit an FCC Form 175–M application to the Commission. This application must be received by the FCC no later than 5:30 p.m. Eastern Daylight Time on Tuesday, October 10, 1995. Late applications will not be accepted. Applications may be submitted electronically, by hand delivery, by certified U.S. mail (return receipt requested) or by private courier. Applicants should consult the detailed application procedures provided in the Bidder Information Package before submitting their FCC Form 175-M.

1. Completion of Form 175–M

Because of the significance of the FCC Form 175-M application to the auction, it is important to take note of the following requirements. Applicants will be required to complete all the items on the FCC Form 175-M. Applicants should carefully review §§ 1.2105(a)(2), 21.952 and 21.960(e) of the Commission's rules prior to completing FCC Form 175-M. In completing an FCC Form 175-M, applicants should note the following:

a. Applicants should apply for all authorizations for which they seek bidding eligibility. Bids will not be accepted for authorizations for which a applicant has not applied on its FCC Form 175–M.

b. For "Auction Number," applicants filing manually should enter "6".

c. Applicants will be required to create a ten-digit FCC Account Number, which the Commission will use to identify and track applications. Applicants must create this FCC Account Number by using their taxpayer identification number (TIN) with a prefix of "O" (i.e., 0123456789). If, and only if, an applicant does not have a taxpayer identification number, the applicant may use its ten-digit area code and telephone number (i.e., 5552345678). Each applicant must use this same number when submitting additional information or material regarding its application, including on its FCC Form 159 (FCC Remittance Advice) accompanying any required auction deposits or payments submitted to the Commission. This number also must be used whenever an applicant writes, calls, or otherwise inquires about its application. Qualified bidders will need this number to participate in the auction.

d. Applicants must indicate on their FCC Form 175–M, if applicable, their status as a rural telephone company, minority-owned business, women-owned business and/or small business. See 47 C.F.R. §§ 1,2110(b), 21.961. The indication of applicants' status as a rural telephone company, minority-owned business or woman-owned business is for statistical purposes only. In Item #10, by checking the appropriate box to indicate status as a small business, an applicant certifies that it is eligible for the special measures available to small businesses, i.e., that, together with its affiliates, the applicant has annual gross revenues of less than $40 million. See 47 C.F.R. §§ 21.960, 21.961(b). All applicants should pay particular attention to the provisions of 47 C.F.R. §§ 1.2110, 21,960 and 21.961, relating to designed entities.

e. Applicants must identify on the FCC Form 175–M the market number for each authorization on which they seek bidding eligibility. The market number for each BTA is listed in the attached Appendix. The upfront payment amounts for each BTA are also included in this Appendix so that applicants can calculate upfront payments amounts required to be eligible to bid on the largest combination of "activity" or "bidding" units on which the applicants anticipate being active in any single round of bidding. See Section II.B below and the MDS Report and Order for detailed information about upfront payments. Applicants should note that the BTAs in the attached Appendix have been organized within the corresponding Major Trading Area (MTA). BTA service areas are based on Rand McNally 1992 Commercial Atlas & Marketing Guide, 123rd Edition, at pages 38–39. Rand McNally organizes the 50 states and the District of Columbia into 487 BTAs. Six additional BTA-like areas will be licensed separately. They are:

(1) American Samoa;

(2) Guam;

(3) Northern Mariana Islands;

(4) Mayagüez/Aguadilla-Ponce, Puerto Rico. Consisting of the following municipos: Adjuntas, Aguada, Aguadilla, Añasco, Arroyo, Cabo Rojo, Coama, Guánica, Guayama, Guayanilla, Hormigueros, Isabela, Jayuya, Juana Díaz, Lajas, Las Marías, Mayagüez, Maricao, Maunago, Moca, Patillas, Peñuelas, Ponce, Quebradillas, Rincón, Sabana Grande, Salinas, San Germán, Santa Isabel, Villalba, and Yauco;

(5) San Juan, Puerto Rico (including all other municipos not included in Mayagüez/Aguadilla-Ponce); and

(6) United States Virgin Islands.

f. Applicants must list the name(s) of the person(s) authorized to represent them at the auction (up to a maximum of three). Only those individuals listed on the Form 175–M will be authorized to submit and withdraw high bids for the applicant during the auction.

g. Applicants should read the "certifications" on the FCC Form 175–M carefully before submitting their application. Applicants who file their FCC Form 175–M applications electronically will not be required to transmit an original or electronic signature. However, similar to a manually filed FCC Form–M, upon submission, the certifying official has made the representation that he/she is an authorized representative of the applicant for the authorization(s) selected, and that he/she has read the instructions and the certifications and that all matters and things stated in the application and attachments, including exhibits, are true and correct. These certifications help to ensure a fair and competitive auction and require, among other things, disclosure of certain information on agreements or arrangements concerning the auction. Submission of a false certification to the Commission may result in penalties, including monetary forfeitures, BTA authorization and/or station license forfeitures, and ineligibility to participate in future auctions, and/or criminal prosecution.

h. If the Commission wishes to communication with the applicant by mail, telephone or fax, such communications will be directed to the contact person identified on the FCC Form 175–M. A space has been provided for both a telephone number and a fax number. All written communications will be directed to the applicant at the address specified on the FCC Form 175–M. (Applicants must provide a street address; P.O. Box addresses should not be used.)

i. Applicants must attach an exhibit providing the name, citizenship and address of all partners, if the applicant is a partnership; of a responsible officer or director, if the applicant is a corporation; of the trustee, if the applicant is a trust; or, if the applicant is none of the foregoing, list the name, address and citizenship of a principal or other responsible person.

j. Applicants must attach an exhibit identifying all parties with whom they have entered into any consortium arrangements, joint ventures, partnerships or other agreements or understandings which relate in any way to this auction.

k. Microfiche copies of the FCC Form 175–M and 175–S are required for all manual submissions in excess of five pages. For this auction, the FCC will allow submission of a 3.5″ diskette, in lieu of microfiche, which contains ASCII text (.TXT) files of all exhibit documentation attached to the FCC Form 175–M.

2. Electronic Filing of FCC Form 175–M Applications

The Commission recently implemented a remote access system to allow applicants to submit their FCC Form 175–M applications electronically. The remote access system for initial filing of the FCC Form 175–M applications will generally be available 24 hours per day beginning at approximately the same time as the release of the Bidder Information Package. FCC Form 175–M applications that are filed electronically using this remote access system must be submitted and confirmed by 5:30 p.m. Eastern Daylight Time on Tuesday, October 10, 1995. Late applications or unconfirmed submissions of electronic data will not be accepted. The electronic filing process consists of an initial filing period and a resubmission period to make minor corrections. (*See* Paragraph 5. *Procedures after FCC Form 175–M Applications are Filed and Process for Minor Corrections* below.) Detailed filing instructions will be provided in the Bidder Information Package.

Those applicants who wish to file their FCC Form 175–M electronically or review other FCC Form 175–M applications on-line will need the following hardware and software.

Hardware Requirements

- CPU: Intel 80386 or above (80486 or faster recommended).
- RAM: 8MB RAM (more recommended if you have multiple applications open).
- Hard Disk: 10MB available disk space.
- 1.44MB 3.5″ Floppy Drive (to install the remote system).
- Modem: v.32bis 14.4kbps Hayes compatible Modem.
- Monitor: VGA or above.
- Mouse or other pointing device.
- Three 1.44MB Floppy Disks.

Software Requirements

- FCC-provided application software (will be available via Internet or the FCC Bulletin Board Service).
- PPP Asynchronous Communications Package that is Winsock v1.1 compliant (tested—Trumpet v2.0b, NetManage Chaneleon v4.1, Wollongong Pathway Access for Windows v3.2.[1]
- Microsoft Windows 3.1 or above, or Microsoft Windows for WorkGroups v.3.11 or above.[1]

Applicants who wish to file their FCC Form 175–M applications electronically through the FCC Remote Access System must first download the FCC-provided application software from either the Internet or the FCC Bulletin Board System. Applicants should note that previous versions of the Remote FCC Form 175 software will not work. Applicants must download the version specific to this auction, FCC175v3.exe.

Internet Access

In order to download the compressed file from Internet, you will need to have access to the Internet and an ftp client software as follows:

FTP: The following instructions are for the command line version of ftp.

(1) Connect to the FCC ftp server by typing ftp fcc.gov.

(2) At the user name prompt, type anonymous [Enter].

(3) At the password prompt, type your Internet e-mail address [Enter].

(4) To allow the file to be downloaded type: binary [Enter].

(5) Change your current directory to the FCC175 directory by typing: cd/pub/Auctions/MDS/BTA/FCC175 [Enter].

(6) Use the get command to download files from the FCC ftp server by typing: get F175V3.EXE [Enter].

(7) If you wish to exit, type: bye [Enter].

Gopher: gopher.fcc.gov or use any gopher to get to "all the gophers in the world" then 'U.S.' then 'DC' then 'FCC'.

World Wide Web: ftp://fcc.gov.

Dial—In Access to the FCC Auction Bulletin Board System (BBS)

The FCC Auction Bulletin Board System provides dial-in access for the FCC-provided application software. In order to access the FCC Auction BBS, use a communications package that can handle at least xmodem protocol (e.g., pcAnyWhere, Telix, Procomm) to dial in to (202) 682–5851. Use the settings of 8 data bits, no parity and 1 stop bit (8,N,1).

For New Users Follow Steps 1–6, Otherwise Go to Step 7

(1) Type New, [Enter]. If the word ANSI is blinking, type Y for yes. If the word ANSI is not blinking, type N for No.

(2) Type in your first and last name and press [Enter]. This will be your login name.

(3) Type in your Telephone number and press [Enter].

(4) Type in your Fax number and press [Enter].

(5) Type in what you want your password to be and press [Enter].

(6) Retype the password for verification and press [Enter].

Once the Account Is Generated

(7) Type M for MDS Auction Files and press [Enter].

(8) Type P for Programs and Applications and press [Enter].

(9) Move the cursor to the file named F175V3.EXE and type [Control]–D (hold the Ctrl key down and press the D key) for Download and press [Enter].

(10) Type the letter representing the transfer protocol desired and press [Enter]. How the file is downloaded and where it gets downloaded depends on the transfer protocol package used.

(11) Repeat steps 10 and 11 to download additional files, or press X and [Enter] to Exit the screen.

To Exit

(12) Type X to Exit and press [Enter] and continue to do so until asked if you want to Exit the BBS. Press Y for Yes when asked to verify your leaving.

The FCC-provided application software available through Internet and the Auction BBS will be in a self-extracting compressed file format. Once the compressed file has been downloaded, you will need to generate the installation disks.

To generate the installation disks, type F175V3.EXE/! and press [Enter].

The extracted files will be executable programs for submitting and reviewing FCC Form 175-M applications along with a README.TXT file. The text file will provide instructions for installing the software on the applicant's personal computer. For technical assistance in downloading, extracting, installing or using the FCC application software contact the FCC Technical Support Hotline at (202) 414–1260.

3. Manual Filing of FCC Form 175–M

For those applicants who file manually, whether mailed, hand delivered or sent by private courier, applications must be addressed to: Office of the Secretary, Attn: Auction 6 Short-Form Processing, Federal Communications Commission, 1919 M Street, NW., Room 222, Washington, DC 20554.

Applications will not be accepted if delivered to any other location. Applicants who wish to file manually should note that the FCC Form 175–M has been revised specifically for this auction. Only the revised FCC Form 175–M will be accepted for filing. Additionally, applicants should be aware that if they file manually they will only be permitted to submit their bids telephonically. Electronic bidding is reserved for parties who submit their applications electronically.

4. Application Fee

No application fee need accompany the FCC Form 175–M for the auction.

5. Procedures After FCC Form 175–M Applications Are Filed and Procedures for Minor Corrections

After the deadline for filing the FCC Form 175–M applications has passed, the Commission will process all applications to determine whether they are acceptable for filing. The Commission will issue a Public Notice listing all applications which are accepted for filing, rejected, and those which have minor defects that may be corrected. The Public Notice will also announce the deadline for filing corrected applications. As described more fully in the Commission's general auction rules and in the MDS Report and Order, applicants may make minor corrections to their FCC Form 175–M applications. Applicants will not be permitted to make major modifications to their applications. In particular, failure to sign a manually filed FCC Form 175–M cannot be corrected and will cause the application to be dismissed and the applicant to be ineligible to participate in the auction. See 47 C.F.R. §§ 1.2105(b); 21.952(c). Applicants who file their FCC Form 175–M application electronically will not be required to transmit an original or electronic signature.

---

[1] The FCC is in the process of testing Windows95. Contact the FCC Technical Support Hotline at (202) 414–1260.

After the deadline for resubmitting corrected applications, the Commission will release another Public Notice announcing all applications that have been accepted for filing, including applicants who have corrected defective applications.

B. Upfront Payments

In order to be eligible to bid in the auction, applicants must submit an upfront payment together with an FCC Remittance Advice, FCC Form 159. The upfront payment will be due on Monday, October 30, 1995. A sample FCC Form 159 and further instructions for making auction payments will be included in the Bidder Information Package.

All payments must be made in U.S. dollars, must be in the form of a wire transfer or cashier's check, and must be made payable to the "Federal Communications Commission" or "FCC." No other form of payment will be accepted. Cashier's checks must be drawn on a financial institution whose deposits are insured by the Federal Deposit Insurance Corporation (FDIC). All payments whether by wire transfer or cashier's check, must be made to the Mellon Bank by Pittsburgh, Pennsylvania. Payments made by cashier's check must be received by 11:59 p.m. Eastern Standard Time, Monday, October 30, 1995. Payments made by wire transfer must be received by 3:00 p.m. Eastern Standard Time, Monday, October 30, 1995. Bidders making payments by wire transfer should allow sufficient time for the wire transfer to be confirmed.

Failure to deliver the upfront payment in a timely manner will result in dismissal of the application and inability to participate in the auction.

A bidder should calculate its upfront payment on the basis of the largest combination of "activity" or "bidding" units on which the bidder anticipates being active in any single round of bidding. (The number of bidding units associated with any particular BTA equals the amount of the upfront payment for that BTA, as set forth in the attached Appendix. These upfront payments were calculated by the Commission, taking into account the population and the approximate amount of usable spectrum in each BTA.) The combination of bidding units on which a bidder is active in a round equals the sum of the bidding units associated with the BTAs on which the bidder has submitted a bid, or on which the bidder is the standing high bidder. The upfront payment submitted by each applicant is not attributed to specific BTA service areas but instead will define the largest combination of bidding units on which the applicant will be permited to bid in any single round of bidding. Thus, if an applicant submits a $100,000 total upfront payment, the applicant could be active in any single round on two BTA service areas with 50,000 bidding units each, on five BTAs with 20,000 bidding units each, on ten BTAs with 10,000 bidding units each, or on any combination of BTAs for which the sum of associated bidding units totals 100,000 or less. See MDS Report and Order at ¶¶ 135–137.

An applicant may, on its FCC Form 175-M, apply for every authorization being offered, but the total upfront payment submitted by the applicant will determine the combinations of BTA service areas on which the applicant will actually be permitted to be active in any single round of bidding.

A prospective bidder in the MDS auction that claims status as a small business will be eligible for a 25% reduction in its upfront payment requirement. Thus, a bidder claiming eligibility as a small business and wishing to be eligible to bid on a particular BTA service area will be required to submit an upfront payment equal to 75% of the upfront payment specified for bidders who don't qualify for the small business credits. A small business eligible for this reduction in its upfront payment will not have the number of its bidding units decreased as a result of submitting a reduced upfront payment. For example, if a small business applicant wants to be eligible to bid on a BTA with an upfront payment of $100,000, it will be required, under the reduced upfront payment measure, to submit only $75,000 to qualify to bid on that BTA. This applicant will still, however, receive 100,000 bidding units—the number of bidding units equivalent to the full upfront payment amount associated with that BTA. See MDS Report and Order at ¶ 138.

The Commission will issue a Public Notice announcing all qualified bidders for the MDS auction. Qualified bidders are those whose FCC Form 175-M applications have been accepted for filing and who have submitted timely upfront payments sufficient to make them eligible to bid on at least one of the BTA authorizations applied for on the FCC Form 175-M application.

III. Auction Event and Bidding Rounds

The MDS auction will begin at 9:00 a.m. Eastern Standard Time on Monday, November 13, 1995. The precise schedule for bidding in the first week of the auction will be announced two weeks prior to the start of the auction.

Generally bids will be submitted twice each day during the first three days of bidding. The Commission may, however, increase or decrease the amount of time for bid submission as well as the number of rounds per day depending upon such factors as the bidding activity level or the aggregate amount of high bids.

IV. Auction Procedures

The BTA authorizations will be awarded through a simultaneous multiple round auction. Bids will be accepted on all BTA service areas in each round of the auction until bidding stops on all BTAs. See Section IV.E for specific information about stopping rules. High bid amounts will be posted after the end of the bid submission period in each round of bidding. Information regarding all valid bids submitted and all bid withdrawals in each round also will be provided along with the minimum accepted bids for the next round.

A. Number of Authorizations That May Be Acquired

The Commission has imposed no limitations on the number of BTA authorizations that any one entity may acquire in the MDS auction.

B. Bid Submission and Withdrawal Procedures

Bidders that are eligible to bid electronically, those that filed their FCC Form 175–M electronically, may order the auction bidding software by filling out the order form contained in the Bidder Information Package. The cost of the bidding software is $175 plus $25 for shipping and handling. Qualified bidders that use the remote electronic auction system will be charged $2.30 per minute pursuant to the recently issued Report and Order (WT Docket No. 95–69, 60 Fed. Reg. 38,276 (July 26, 1995)). All qualified bidders also have the option to submit and withdraw high bids telephonically through an "800" number which will be provided in the registration materials.

1. Bid Submission

Details will be set forth in the Bidder Information Package on the procedures to be used in bidding.

2. Bid Withdrawals

A high bidder that wants to withdraw one or more of its high bids during the course of the auction may do so during the bid withdrawal period subject to the withdrawal penalty specified in Section 21.959(a)(1) of the Commission's rules, 47 C.F.R. § 21.959(a)(1).

C. Minimum Bid Increments and Tie Bids

The minimum bid increment is the amount or percentage by which a bid must be raised above the previous high bid in order to be accepted as a valid bid in the current round. The amount of the minimum accepted bid for each BTA service area (the sum of the minimum bid increment and the high bid from the previous round) will be announced before the beginning of each round. The Commission may, in its discretion, raise or lower the amount of the minimum bid increment at any time during the auction. The Commission generally will raise the amount of the minimum bid increments early in the auction and when bidding activity is high. Conversely, the Commission will generally lower the minimum bid increments towards the end of the auction and when bidding activity is low. There will be no minimum opening bids for any of the BTA service areas in the MDS auction and no minimum bid increment for a BTA service area until that BTA has received a bid.

Each bid will be date and time stamped when it is entered into the computer system. In the event of tie bids, the Commission will identify the high bidder on the basis of the order in which bids are received by the Commission, starting with the earliest bid.

D. Activity Rule

In order to ensure that the auction closes within a reasonable period of time, the Commission will impose an activity rule to discourage bidders from waiting until the end of the auction before participating. The activity rule provides for three stages with increasing levels of bidding activity required in each stage in order for a bidder to maintain its current eligibility.

We note that the required activity level in Stage I and Stage II of the MDS auction will be relatively high so as to increase the pace of the auction, which is needed to ensure a timely completion given the large number of authorizations being offered. In Stage III of the auction the required activity level will be higher than in Stages I and II, but will still provide bidders with some flexibility to shift their bids to other BTA service areas.

A bidder will be considered active on a BTA service area in the current round if it is either the high bidder at the end of the bid withdrawal period in the previous round or submits a bid in the current round which meets or exceeds the minimum accepted bid. A bidder's activity level in a round is the sum of the "activity" or "bidding" units associated with the BTA service areas on which the bidder is active. The minimum required activity levels for each stage of the MDS auction are as follows:

Stage One: During the first stage of the auction, a bidder that wishes to maintain its current eligibility is required to be active on BTA service areas encompassing at least 50% of the bidding units for which it is currently eligible. Failure to maintain the requisite activity level will result in a reduction in the amount of bidding units associated with BTAs upon which a bidder will be eligible to bid in the next round of bidding (unless an activity rule waiver is used). During the first stage, if activity is below the required minimum level, eligibility in the next round will be calculated by multiplying the current round activity by two (2/1).

Stage Two: In each round of the second stage, a bidder who wishes to maintain its current eligibility is required to be active on BTA service areas encompassing at least 80% of the bidding units for which it is eligible in that particular round. During the second stage, if activity is below the required minimum level, eligibility in the next round will be calculated by multiplying the current round activity by five-fourths (5/4).

Stage Three: In each round of the third stage, a bidder who wishes to maintain its current eligibility is required to be active on BTA service areas encompassing 95% of the bidding units for which it is eligible in that particular round. In the final stage, if activity in the current round is below 95% of current edibility, eligibility in the next round will be calculated by multiplying the current round activity by twenty-nineteenths (20/19).

As stated above, activity requirements increase in each auction stage; therefore, it is especially important for bidders to check current activity during the bid submission period in the first round following a stage transition. Bidders who do not wish to submit any new bids in that round can confirm their current activity level (measured in terms of their standing high bids) telephonically or electronically through the FCC remote access system by entering the bid submission module and comparing the current activity to the activity required.

Bidders will be provided five activity rule waivers that may be used in any round during the course of the auction. If a bidder's activity level is below the required activity level a waiver will be applied automatically, if a bidder still has waivers remaining and does not submit a bid or an automatic waiver override. That is, if a bidder fails to submit a bid in a round or does not submit an automatic waiver override, and its activity level from any standing high bids (high bids at the end of the bid withdrawal period in the previous round) falls below its required activity level, a waiver will be applied automatically. A waiver will preserve current eligibility in the next round. An activity rule waiver applies to an entire round of bidding and not to a particular BTA service area. An automatic waiver invoked in a round in which there are no new valid bids will not keep the auction open.

Bidders will be afforded an opportunity to override the automatic waiver mechanism if they wish to intentionally reduce their bidding eligibility and do not want to use a waiver to retain their eligibility at its current level. If a bidder overrides the automatic waiver mechanism, its eligibility will be permanently reduced and it will not be permitted to retain its bidding eligibility for a previous round.

Bidders also will have the option of proactively entering an activity rule waiver during the bid submission period. If a bidder submits a proactive waiver in a round in which no other bidding activity occurs, the auction will remain open. Therefore in the later rounds of the auction, if a bidder does not intend to bid but wants to ensure that the auction does not close, it should enter a proactive waiver in place of a bid. The submission of a proactive waiver will prevent the auction from closing.

E. Stopping Rules

Bidding will normally remain open on all BTA service areas until bidding stops on every service area. The auction will close after one round passes in which no new bids or proactive waivers are submitted. The Wireless Telecommunications Bureau retains the discretion, however, to keep an auction open even if no new valid bids and no proactive waivers are submitted. In the event the Bureau exercises this discretion, the effect will be the same as if a bidder had submitted a proactive waiver. Thus, if a bidder has any activity rule waivers left, an automatic waiver will be applied if its activity from standing high bids does not meet its required activity level. Bidders whose activity from the standing high bids does not meet its required activity level and that have no activity rule waivers remaining will have their maximum eligibility reduced according to the activity rules described above.

The Bureau may also declare at any time after 40 rounds that the auction will end after a specified number of additional rounds. If the Bureau invokes this stopping rule, it will accept bids in the final round(s) only for BTA service areas on which the high bid increased in at least one of the preceding three rounds. The Bureau also retains the discretion to close bidding on a particular BTA service area or areas individually. In the unlikely event that the Bureau uses such a market-by-market stopping rule, we would anticipate doing so only after 40 rounds, applying it first to the largest BTAs, and only if three or more rounds have passed without any bids on these BTA service areas.

The Bureau does not intend to exercise these options except in extreme circumstances, such as where the auction is proceeding very slowly, there is minimal overall bidding activity and it appears unlikely that the auction will close within a reasonable period of time. Before exercising these options, however, the Bureau would first attempt to increase the pace of the auction by announcing that the auction will move into the next stage, where bidders would be required to maintain a higher level of bidding activity. Under these circumstances, the Bureau may also first increase the number of bidding rounds per day and increase the amount of the minimum bid increments for those limited number of BTA service areas where there is still a high level of bidding activity.

F. Delay, Suspension or Cancellation of the Auction

The Commission may, by Public Notice or by announcement during the auction, delay, suspend or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative necessity, or for any other reason that affects the fair and competitive conduct of competitive bidding. In such cases, the Commission may, in its sole discretion, resume the auction starting from the beginning of the current or some previous round or cancel the auction in its entirety. The Commission will delay the auction in the event of technical failure involving the electronic bidding system or the telephone lines.

G. Default and Disqualification Penalties

Any high bidder who defaults by failing to remit the required down payment within the prescribed time or is disqualified after bidding is declared closed will be subject to the penalties described in Section 21.959(a)(2) of the Commission's rules, 47 C.F.R. § 21.959(a)(2). In addition, if a default or disqualification involves gross misconduct, misrepresentation or bad faith by an applicant, the Commission may declare the applicant and its principals ineligible to bid in future auctions, and may take any other action that it deems necessary, including institution of proceedings to revoke any existing authorizations or station licenses held by the applicant. See Second Report and Order in PP Docket No. 93–253, 9 FCC Rcd 2348 (1994), 59 Fed. Reg. 22,980 (May 4, 1994) at ¶ 198.

H. Releasing Bidder Identities

Bidders' identities and FCC Account Numbers will be disclosed prior to the auction. Thus, bidders will know in advance of the auction the identities of the bidders against whom they are bidding.

V. Post-Auction Procedures for High Bidders

A. Down Payment

The winning bidder for each BTA authorization must submit FCC Form 159 along with sufficient additional funds (a "down payment") to bring the amount of money on deposit with the government to 20% of its winning bid within five business days after bidding is declared closed and the high bidders are announced by Public Notice. However, a winning bidder that is a small business eligible for installment financing will be required to bring its total deposit up to only 10% of its winning bid (less any applicable bidding credits) within five business days after bidding is declared closed and the high bidders are announced. The remainder of the down payment, an additional 10% of the applicant's net winning bid, will be due from the small business winning bidder within five business days following the public notice announcing that its BTA authorization is ready to be issued. See MDS Report and Order at ¶¶ 142–144.

In the event that any winning bidder has withdrawn a bid or bids and is subject to a bid withdrawal penalty or penalties, the bidder's upfront payment will be applied to satisfy such bid withdrawal penalties before being applied toward its down payment on the authorizations it has won.

B. Submission of Long-Form Application (FCC Form 304) or Statement of Intention

Within 30 business days after bidding is declared closed and high bidders are announced, a winning bidder must timely submit for each BTA service area for which it is the winning bidder wither: (i) a properly completed FCC Form 304 application for an MDS station license within the BTA service area; or (ii) a statement of intention with regard to the BTA service area, showing the encumbered nature of the BTA, identifying all previously authorized or proposed MDS and ITFS facilities, and describing in detail the winning bidder's plan for obtaining the previously authorized and/or proposed MDS stations within the BTA. See MDS Report and Order at ¶¶ 150–154. FCC Form 304s, with the applicable filing fees, must be sent to Mellon Bank in Pittsburgh, Pennsylvania. Statements of intention must be sent to the Office of the Secretary, Attn: MDS Post-Auction Processing Section, Federal Communications Commission, 1919 M Street, NW., Room 222, Washington, DC 20554.

C. Construction Build-out Requirement

Each BTA authorization holder must submit a showing to the Commission five years after the BTA authorization is issued demonstrating that it is providing a signal level sufficient to provide adequate service to approximately two-thirds of the population of the area within its control in the licensed BTA. The holder of the BTA authorization must submit maps and other supporting documents showing compliance with this construction build-out requirement. See MDS Report and Order at ¶ 43.

VI. Bidder Alert

The terms contained in the Commission's Report and Orders, Public Notices and in the Bidder Information Package are not negotiable. Prospective bidders should review these auction documents thoroughly prior to the auction to make certain that they understand all of the provisions and are willing to be bound by all of the Terms before making any bid.

All applicants must certify under penalty of perjury on their FCC Form 175–M applications that they are legally, technically and financially qualified. Prospective bidders are reminded that submission of a false certification to the Commission is a serious matter that may result in severe

[FR Doc. 95-23162 Filed 9-15-95; 8:45 am]

BILLING CODE 6712-01-C

[Correction to Report No. AUC-95-06]

Auction Notice and Filing Requirements for 493 BTA Authorizations for Multipoint Distribution Service in the 2 GHz Band, Scheduled for November 13, 1995

AGENCY: Federal Communications Commission.

ACTION: Public Notice.

SUMMARY: This Public Notice, released September 12, 1995, revised the Appendix attached to Report No. AUC–95–06 dated September 5, 1995. Both the September 5, 1995 and the September 12, 1995 Public Notices should be read together. These Public Notices are directed toward the Commission's goal of efficiently distributing the unused MDS spectrum through competitive bidding, and are designed to assist prospective bidders in preparing for the upcoming MDS auction.

FOR FURTHER INFORMATION CONTACT: The FCC auction contractor, Tradewinds International, Inc., at (202) 637–FCC1 (637–3221).

The complete text of the Public Notice dated September 12, 1995 follows. Copies of this item are available for public inspection in Room 207, 2033 M Street, N.W., Washington, D.C. and may also be obtained from the FCC copy contractor, ITS, Inc. at (202) 418–0620, and the FCC auction contractor, Tradewinds International, Inc. at (202) 637–FCC1 (637–3221).

This Public Notice corrects the Appendix attached to Report No. AUC–95–06, dated September 5, 1995. The upfront payment amounts listed in the following table differ slightly from those in the September 5, 1995 Appendix and supersede those previously published. The revised upfront payments have been rounded up to the next dollar. The revised small business payments are 75 percent of the total upfront payments due, rounded up to the next dollar. This rounding procedure is being implemented to ensure that the maximum initial eligibility for each bidder will be a whole number (a condition required by the Commissions' auction implementation software) and to ensure that, when the upfront payment of a small business bidder is adjusted (by multiplying it by 4/3) to calculate the maximum initial eligibility, the small business bidder will have an appropriate number of "activity" or "bidding" units.

The upfront payment schedule guarantees that if a small business bidder and a bidder that is not a small business each submit upfront payments for the same combination of markets, the maximum initial eligibility for the bidder that is not a small business will equal the sum of the upfront payments for those markets, whole the maximum initial eligibility for the small business bidder will be equal to or possibly slightly larger than the sum of the upfront payments for those markets. For example, a small business bidder submitting an upfront payment for all markets would have a maximum initial eligibility equal to 4,647,790 bidding units, while a bidder that is not a small business would have a maximum initial eligibility of 4,647,596 bidding units. Differences of this nature are a result of the rounding process employed.

Small business bidders should monitor their eligibility carefully during the course of the auction, especially during stage transitions. When a bidder's activity level in a particular round is below its required bidding activity level for that round, even by one bidding unit, the bidding software will automatically charge a waiver to that bidder. Thus, small business bidders may be charged a waiver that they did not intend to exercise. To avoid this, small business bidders would need to use the automatic waiver override procedures. A discussion of the activity rule is contained in Report No. AUC–95–06, dated September 5, 1995. For further information, contact Karen Wrege, Auctions Division, at (202) 418–0660.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1066–DR]

Oklahoma; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Oklahoma, (FEMA–1066–DR), dated September 1, 1995, and related determinations.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Oklahoma dated September 1, 1995, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of September 1, 1995:

The Counties of Canadian, Greer, and Harmon for Public Assistance, and Hazard Mitigation Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Craig S. Wingo,

Division Director, Infrastructure Support Division.

BILLING CODE 6718-02-P

FEDERAL MARITIME COMMISSION

Inquiry Into Port Restrictions and Requirements in the United States/Japan Trade

September 12, 1995.

AGENCY: Federal Maritime Commission.

ACTION: Notice.

SUMMARY: The Federal Maritime Commission is collecting information regarding certain restrictions and requirements for the use of port and terminal facilities in Japan, to determine whether they create conditions unfavorable to shipping in the United States/Japan trade, or constitute adverse conditions affecting U.S. carriers that do not exist for Japanese carriers in the United States. The Commission is collecting information regarding (1) The "prior consultation" system, a process of mandatory discussions and operational approvals for port usage; (2) mandatory weighing and measuring requirements; (3) restrictions on Sunday work; and (4) the disposition of the Japanese Harbor Management Fund.

DATES: Comments may be submitted on or before November 17, 1995.

ADDRESSES: Send submissions to: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573–0001, (202) 523–5740.

SUPPLEMENTARY INFORMATION: The Federal Maritime Commission ("Commission") is collecting information about certain restrictions and requirements for the use of port and terminal facilities in Japan, to assess whether they create conditions unfavorable to shipping in the United States/Japan trade, or constitute adverse conditions affecting U.S. carriers that do not exist for Japanese carriers in the United States. The Commission is specifically concerned with: (1) The effects of the "prior consultation" system, a process of mandatory discussions and operational approvals involving Japanese port and terminal management, shoreside labor unions, and containership operators; (2) the requirement that all containerized cargo exported from Japan be weighed and measured, apparently without regard for commercial necessity; (3) restrictions on the operation of Japanese ports on Sunday; and (4) the disposition of the Japan Harbor Management Fund.

Prior Consultation

The prior consultation system in Japan is administered and controlled by the Japan Harbor Transportation Association ("JHTA"), an association of companies providing harbor transportation services, including terminal operators, stevedores, and sworn measures. Under this system, carriers serving Japan must consult with JHTA about any operational matters involving Japanese ports or harbor labor. Such matters appear to include, inter alia, inauguration of new services, rationalization agreements between carriers which involve vessel sharing or berthing changes, changes in stevedoring contractors, technological or equipment changes, weighing and measuring, and Sunday work. Prior consultation also appears to be required for minor matters, such as change of vessel name or route, or substitution of vessels. After it consults with a shipowner, JHTA may conduct consultations with labor interests, then approve or deny the shipowner's request.

This system of consultations—between JHTA and carriers on the one hand, and JHTA and unions on the other—originated in the 1960's, as a means for resolving labor disputes arising out of the introduction of containerization. Over time, however, prior consultation requirements have been extended to even minor matters, such as vessel substitution, which do not appear to involve potential labor relations issues. While its scope has increased, the prior consultation system itself has remained characterized by a lack of transparency. The process is said to lack written records, clear written bases for decisions, and appeal rights, and to include a system of closed "pre-prior consultation" meetings to determine which user requests will be accepted for prior consultation.

Because of its broad discretion to review and disapprove virtually all aspects of shipowners' harbor operations, JHTA appears to have amassed an exceptional level of control over the market for terminal operations and services in Japan. In particular, it appears that shipowners have no free choice of terminal operators and stevedores; instead, JHTA assigns operators to carriers, virtually eliminating competition in this area. Circumvention of JHTA in dealings with individual operators is generally viewed to be impossible, as it could lead to disapproval of shipowner plans and disruption of cargo handling labor.

It appears that the prior consultation requirement and the attendant lack of competition in the harbor services market has had a number of adverse effects on carriers serving Japan. These include increased port charges and costs, inefficiency, and inflexibility. Among other things, the prior consultation requirement may impede the ability of shipowners, both individually and in vessel sharing consortia, to reduce costs by rationalizing port operations and dealing with operators of their choice.

Mandatory Weighing and Measuring

Currently, it appears that all containerized cargo exported from Japan is required to be weighed and measured by one of two sworn measuring associations, Nippon Kaiji Kentei Kyokai and Shin Nihon Kentei Kyokai, both of which appear to be members of JHTA. This policy is set forth in a 1980

memorandum between JHTA and the Japan Council of Port and Harbor Transport Workers' Unions. Rates for weighing and measuring services are filed with, and approved by, the Japanese Ministry of Transport ("MOT").

There is no clear justification for the policy of mandatory weighing and measuring of cargo. Internationally applied liability conventions do not require carriers to weigh and measure cargo, as carriers may accept shipper-provided weights and measurements. Furthermore, in many instances physical weighing and measuring of cargo may not even take place; instead, measurers' figures may be derived from samples or statistical information.

It appears that mandatory weighing and measuring was implemented to provide constant work for sworn measures, as the industry shifted toward the use of containers and box-rated cargo. However, the justification for continuing this practice indefinitely is unclear, given that many harbor workers have retired or left the ports since the introduction of containerization in Japan's trades over two decades ago. Also, it appears that the measuring companies have recently increased weighing and measuring charges—with MOT approval—based in part on a need to attract *new* labor to perform these services.

Sunday Work

In recent years, the performance of harbor work on Sundays in Japanese ports has been either severely restricted or prevented altogether, causing inefficiency and disruption for both carriers and shippers. Recent press reports have indicated a provisional easing of restrictions on Sunday work; however, the extent of that progress is not clear.

Prior to 1988, work was not performed on Sundays at Japanese ports. In 1988, a policy of limited Sunday work was put in place; carriers wishing services on Sunday were allowed to seek prior consultation and approval from JHTA. However, Sunday work was discontinued entirely in 1991. It appears that Sunday work was halted as a result of an ongoing dispute involving JHTA and the two large harbor labor organizations, the National Council of Dockworkers' Unions of Japan and the Japanese Confederation of Port and Transport Workers' Unions, regarding compliance with a 1991 labor agreement.

The restriction of Sunday work has been a matter of longstanding concern for the United States Government, and has been raised in bilateral maritime discussions with Japanese officials. In September 1992 Maritime Administrator Warren G. Leback indicated that the Sunday work practices caused serious problems for U.S. carriers, and affected ship scheduling throughout the Pacific Basin.

It has recently been reported that an "Agreement on Exceptional Measures for the No-Cargo-Handling-on-Sundays System" was concluded by JHTA, representing harbor management, and the labor groups, the Japan Council of Port and Harbor Transport Workers' Unions and the Japanese Confederation of Port and Transport Workers' Unions. This agreement, effective June 11, 1995, calls for the implementation of Sunday cargo handling at Japan's six major ports: Tokyo, Yokohama, Nagoya, Osaka, Kobe, and Kitakyushu. The agreement is said to be "provisional" in nature, and is effective for one year only.

The agreement is reported to contain several conditions for the provision of Sunday work. Sunday work is limited to terminals which conform to the "5–9 Accord" labor agreement (signed May 9, 1991) which guarantees, among other things, a 5-day work week, 8-hour days, limits on overtime, and certain numbers of Saturdays, Sundays, and holidays off. Only carriers who have paid all MOT-approved port charges will be eligible. Cargo will be moved only between vessels and containeryards; no cargo will be accepted at the yard or delivered on Sunday.

It appears that Sunday work will be from 8:30 a.m. to 4:30 p.m. only. Extra wages will be determined regionally, and carriers and harbor transportation firms will be required to apply for Sunday work through the district harbor transportation associations by noon on Fridays. The trade press has reported that fees for Sunday cargo handling will be 60 percent higher than ordinary fees.

Despite these positive steps, a number of concerns regarding Sunday work remain. We are uncertain of the extent to which the agreement has been implemented, as well as the effects of remaining restrictions and increased fees applicable to Sunday work. Also, the outlook for a long-term solution to the Sunday work issue is unclear, given the one-year "provisional" nature of the recent agreement.

Harbor Management Fund

In Docket No. 91–19, *Actions to Address Conditions Affecting U.S. Carriers Which do not Exist for Foreign Carriers in the U.S./Japan Trade*, the Commission launched an investigation into a fund, known as the "Harbor Management Fund," collected by JHTA from ocean carriers. In particular, the Commission examined whether JHTA, with the support of MOT, coerced payments from carriers into the fund by threatening labor instability and unavailability. It was alleged that the fund was to be used for import distribution centers or other projects from which U.S. carriers would receive no economic benefits.

Docket No. 91–19 was discontinued on June 13, 1991, based on an agreement between JHTA and participating carriers. It was agreed that collections from carriers for the fund would be discontinued after March 31, 1992, and similar assurances were provided by the Government of Japan Minister of Transport to American President Lines. Also, JHTA committed to use the fund proceeds only for harbor labor-related purposes, to ensure that benefits would accrue to all carriers contributing to the fund.

While collections for the fund were stopped in 1992 as agreed, it appears that the commitment to use remaining proceeds for labor-related purposes has not been satisfied. When Docket No. 91–19 was discontinued, the Commission directed Japanese carrier parties to file quarterly reports on the status of the fund. The last of these reports, filed May 31, 1994, showed that only nominal amounts had been expended from the fund since 1992. Fund activity for the past year, as well as JHTA's plans for disposition of the fund monies, remain unclear.

Government Supervision of Port Transportation Services

While port services in Japan are generally provided by private companies, the Government of Japan may exercise substantial regulatory control and oversight over these operators. For example, under the Japanese Port Transportation Business Law, persons wishing to provide port transportation services must apply for a certificate from MOT. In deciding whether to grant such a certificate, MOT evaluates, inter alia, whether the business in question "has an appropriate plan to perform the business," and whether it would "cause port transportation supply to be excessively over transportation demand." Art. 5 & 6. It appears that restrictive use of this licensing authority by MOT may effectively prevent new operators from entering terminals to compete with existing JHTA members, and to prevent non-Japanese flag lines from establishing their own terminal operations in Japan.

MOT also has broad statutory authority to correct restrictive or unfair harbor practices. Rates charged by port transportation businesses must be approved by MOT, which determines whether the rates are reasonable and non-discriminatory. Art. 9. MOT must approve operators' "terms and conditions on port transportation," to determine that "there is no fear that the terms and conditions may impede the benefits of users," and also approve any changes in operators' business plans. Art. 11 & 17. If MOT determines that the port transportation businesses "impeded benefits of users" it may order changes in business plans, terms and conditions, or rates. Art. 21.

JHTA itself operates with the permission of, and under the supervision of, MOT. JHTA was incorporated in 1965 as a "juristic person" under Article 34 of the Civil Code of Japan, which provides that public interest, not-for-profit organizations may be incorporated subject to the permission of "competent authorities." As the competent authority, MOT may, inter alia, annul its incorporation if JHTA violates MOT orders or acts in contravention of the public interest.[1]

In addition, it appears that the Japanese Fair Trade Commission ("FTC"), which administers the Antimonopoly Law, exercises some authority over JHTA. It was reported in the press that, in the 1970's and 1980's, the FTC warned JHTA that the prior consultation system might be in violation of the Antimonopoly Law of Japan. Because of these concerns, the JHTA announced in 1985 the abolishment of the prior consultation system. However, it appears that the prior consultation system was reestablished in 1986, with the conclusion of an agreement between JHTA and an organization of Japanese carriers. The terms of that agreement expressly state that it was concluded "under the guidance of the Ministry of Transport," and the agreement was signed, as a witness, by an MOT official.

Antimonopoly concerns resurfaced in 1990, when four stevedoring companies in Tokyo and Yokohama filed a complaint with the FTC, claiming that JHTA and prior consultation had incapacitated their businesses. While the resolution of these complaints is not clear, it has been reported in the press that in 1993 MOT advised JHTA to take remedial action to ensure that the prior consultation system is administered in a fair manner. Also, in 1994, the FTC released a report calling for a review of the existing licensing system and for substantial deregulation of the harbor transportation system.

Discussion

The Commission is statutorily charged with addressing restrictive or unfair foreign practices in the maritime services area. Section 19 of the Merchant Marine Act, 1920, 46 U.S.C. app. § 876, authorizes the Commission, *inter alia:*

> To make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade * * * including intermodal movements, terminal operations, * * * and other activities and services integral to transportation systems, and which arise out of or result from foreign laws, rules, or regulations or from competitive methods or practices employed by owners, operators, agents, or masters of vessels of a foreign country; * * *.

Also, the Foreign Shipping Practices Act of 1988, 46 U.S.C. app. § 1710a ("FSPA"), authorizes the Commission to

> Investigate whether any laws, rules, regulations, policies, or practices of foreign governments, or any practices of foreign carriers or other persons providing maritime or maritime-related services in a foreign country result in the existence of conditions that—
>
> (1) Adversely affect the operations of United States carriers in the United States oceanborne trade; and
>
> (2) Do not exist for foreign carriers of that country in the United States under the laws of the United States or as a result of acts of United States carriers or other persons providing maritime or maritime-related services in the United States.

Under the FSPA, if the Commission determines that such adverse conditions exist, it may "take such action as it considers necessary and appropriate against any foreign carrier that is a contributing cause to, or whose government is a contributing cause to, such conditions." Such action may include limitations on sailings, suspension of tariffs, suspension of agreements, or fees not to exceed $1,000,000 per voyage.

The Commission has serious concerns that prior consultation, mandatory weighing and measuring, and restrictions on Sunday work may create conditions unfavorable to shipping in the U.S. trade with Japan, or conditions which adversely affect the operations of U.S. carriers in Japan that do not exist for foreign carriers in the United States. In addition to subjecting carriers to potentially high costs and charges, such restrictions may prevent carriers from pursuing efficiency through the rationalization of harbor operations, thereby disadvantaging importers, exporters, and carriers in the U.S.-Japan trades. The Commission is further concerned that commitments regarding disposition of the Harbor Management Fund, made upon the discontinuation of Docket No. 91–19, may not be fully satisfied.

While these matters are largely administered by JHTA and private terminal operators, they appear to be implemented with the approval and cooperation of the Government of Japan. Such support may include the protection of JHTA operators from competition by MOT's restrictive use of licensing authority, the approval of charges for unnecessary mandatory weighing and measuring, and the failure of the Government of Japan to use its substantial regulatory and oversight authority to prevent JHTA from abusing its effective control over harbor operations and the prior consultation system.

Therefore, by this Notice, the Commission is inviting all interested parties to file information, views, and comments with respect to prior consultation, mandatory weighting and measuring, Sunday work, and the Harbor Management Fund, and their effects on the oceanborne carriage of goods between the United States and Japan. Confidential or sensitive information and documents submitted pursuant to this Order shall, upon request of the responding parties, be treated confidentially to the full extent permitted by law; provided, however, that such confidential treatment shall not foreclose use by the Commission of such information in any subsequent formal proceeding.

Also, by separate Orders issued pursuant to Section 19(6) of the Merchant Marine Act, 1920, 46 U.S.C. app. § 876(6), and section 10002(d) of the Foreign Shipping Practices Act, 46 U.S.C. app. § 1710a(d), the Commission is requiring ocean common carriers in the U.S./Japan trades to provide information on these matters. It is expected that the information received in response to this Notice and the corresponding Orders will allow for a full consideration of these matters, and will enable the Commission to determine whether further action in this area is warranted.

By the Commission.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Timothy Ken Driskell, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 2, 1995.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Timothy Ken Driskell*, Alpharetta, Georgia, and Daniel Crawford Chasteen, Roswell, Georgia; to collectively acquire as trustees of First Colony Bank 401(k) Stock Bonus Plan, Alpharetta, Georgia, an additional 4.29 percent, for a total of 14.26 percent, of the voting shares of First Colony Bancshares, Inc., Alpharetta, Georgia, and thereby indirectly acquire First Colony Bank, Alpharetta, Georgia.

B. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Cyrus A. Ansary*, Bethesda, Maryland; to acquire a total of 21 percent of the voting shares of Pinnacle Financial Services, Inc., St. Joseph, Michigan, and thereby indirectly acquire Peoples State Bank of St. Joseph, St. Joseph, Michigan.

Board of Governors of the Federal Reserve System, September 12, 1995.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-F

Investors Financial Services Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 12, 1995.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Investors Financial Services Corp.*, Boston, Massachusetts; to become a bank holding company by acquiring 100 percent of the voting shares of Investors Bank & Trust Company, Boston, Massachusetts.

2. *Walden Bancorp, Inc.*, Acton, Massachusetts; to become a bank holding company by acquiring 100 percent of the voting shares of The Co-operative Bank of Concord, Acton, Massachusetts, and Braintree Savings Bank, Braintree, Massachusetts.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *1st United Bancorp*, Boca Raton, Florida; to acquire 100 percent of the voting shares of The American Bancorporation of the South, Merritt Island, Florida, and thereby indirectly acquire The American Bank of the South, Merritt Island, Florida.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Citizens National Bancshares, Inc.*, Hope, Arkansas; to acquire 100 percent of the voting shares of Peoples Bancshares, Inc., Lewisville, Arkansas, and thereby indirectly acquire Peoples Bank and Loan Company, Lewisville, Arkansas.

D. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Pinnacle Bancorp, Inc.*, Central City, Nebraska; to acquire 100 percent of the voting shares of State Bank, Palmer, Nebraska, and to acquire an additional 5.3 percent, for a total of 11.5 percent of the voting shares of The Farmers National Bank of Central City, Central City, Nebraska.

Board of Governors of the Federal Reserve System, September 12, 1995.

BILLING CODE 6210-01-F

Pinnacle Financial Services, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 2, 1995.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Pinnacle Financial Services, Inc., St. Joseph, Michigan; to acquire Maco Bancorp, Inc., Merrillville, Indiana, and its subsidiary, First Federal Savings Bank of Indiana, Merrillville, Indiana, and thereby engage in the operation of a savings association, pursuant § 225.25(b)(9) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 12, 1995.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

"Made in USA" Consumer Perception Study Information Collection Requirements

AGENCY: Federal Trade Commission.

ACTION: Notice of application to OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) for clearance of information collections to gather information on consumer perception and attitudes regarding "Made in USA" and other country of origin advertising and labeling claims.

SUMMARY: OMB clearance is being sought for two questionnaires to be used in connection with a survey to gather information regarding "Made in USA" and other country of origin claims in advertising and labeling of products. Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, directs the Commission to prevent "deceptive acts and practices." Under this general authority, the Commission has prohibited deceptive "Made in USA" claims in product advertising and labeling. The Commission's longstanding standard in this area is that a manufacturer can make an unqualified "Made in USA" claim only if the product is "wholly of domestic origin." *See, e.g., Windsor Pen Corp.*, 64 F.T.C. 454 (1964).

Recently, the Commission sought public comments on a proposed consent agreement prohibiting unqualified "Made in USA" claims for both imported products and products assembled in the United States from domestic and foreign components. In response, the Commission received 150 comments, many of which urged reconsideration of the standard, stating that it is too stringent, does not reflect current consumer perceptions in today's globalized economy, and is inconsistent with other government standards. At the same time, Congress has shown interest in this issue, most notably by passing the 1994 Crime Bill, which provides that certain "Made in USA" labels must comply with the Commission's standards under Section 5 of the FTC Act. On July 11, 1995, the Commission announced that it would re-examine the standard by (1) conducting a comprehensive review of consumers' perceptions of "Made in USA" and

similar claims and (2) holding a public workshop to examine issues relevant to the standard.

The proposed survey is necessary to assist the Commission in evaluating its existing standard, determining whether it should be changed, and formulating a new standard if appropriate. The Commission's existing "Made in USA" policy is supported by a 1991 study showing that approximately 77% of consumers who were asked about an unqualified "Made in USA" claim interpreted the claim to mean that "all or nearly all" parts and labor are domestic. The test involved two different products and asked questions of 400 participants.

While the test results appear to support the Commission's existing policy, evidence also suggests that consumer perceptions are influenced by the nature of the claims and the product being tested. Therefore, the Commission believes that testing different claims and different products would provide a more complete understanding of consumer perceptions of country of origin claims. In addition, including a larger number of consumers in the survey will provide a broader basis from which to evaluate consumer perceptions. Finally, consumer perceptions may have changed—even since 1991—due to the rapid globalization of our economy. These changes may have occurred to differing extents for different products.

Accordingly, the survey is designed to expand the Commission's knowledge by eliciting, for several different products, current consumer perceptions of country of origin claims, including "Made in USA claims." Although consumer perceptions and attitudes are not the only factors to consider in determining the appropriate standard for law enforcement in this area, they are extremely important because they help to identify which claims deceive consumers. The survey data will also be used to assist the Commission in preparing for the upcoming public workshop and ensuring that the workshop is as useful, productive, and focused as possible.

The FTC is seeking clearance for two questionnaires to be used in connection with the survey. Both questionnaires will be used to interview adult consumers in shopping malls around the country. Using the first questionnaire, approximately 1,200 consumers will be shown advertisements and/or product labels and then asked questions concerning product claims. This questionnaire consists of approximately 30 questions and will take an estimated ten minutes to complete, for a total burden estimate of 200 hours.

The second questionnaire will be used to ask an additional 400 consumers different questions about product claims. It consists of approximately 15 questions and will take an estimated ten minutes to complete, for a total burden estimate of 67 hours.

DATES: Comments on this clearance application must be submitted on or before October 18, 1995.

ADDRESSES: Send comments both to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503, Attn: Desk Officer for the Federal Trade Commission and to the Office of the General Counsel, Federal Trade Commission, Washington, DC 20580. Copies of the application may be obtained from the Public Reference Section, Room 130, Federal Trade Commission, Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Robert Easton, Special Assistant, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580 (202) 326–3029.

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Regional Offices and Health Resources and Services Administration; Statement of Organization, Functions and Delegations of Authority

Part H, Chapter H, Public Health Service (PHS), of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services (DHHS), Chapters HB, HD, and HG are amended as follows:

(1) Chapter HB, Health Resources and Services Administration (47 FR 38409–24, August 31, 1982, as amended most recently at 60 FR 29859–62, June 6, 1995);

(2) Chapter HD, PHS Regional Offices (44 FR 21711, April 11, 1979, as amended most recently at 58 FR 30066, May 25, 1993); and

(3) Chapter HG, Indian Health Service (52 FR 47053–67, December 11, 1987, as amended most recently at 58 FR 36693, July 8, 1993).

These changes will provide the Health Resources and Services Administration (HRSA) with direct responsibility for their field programs and associated resources by formalizing and redirecting field responsibilities. Responsibility and resources in the Regional Offices for facilities and construction engineering activities related to the Indian Health Service will be redirected to the Indian Health Service. Additionally, the responsibility and resources in the Regional Offices for facilities and construction engineering activities currently supported by HRSA will be redirected to HRSA. Although, the changes will not affect Chapter HC, Centers for Disease Control and Prevention (CDC), by way of this **Federal Register** notice the Division of Preventive Health Services in the PHS Regional Offices is deleted.

Health Resources and Services Administration

Under Chapter HB, Health Resources and Services Administration, Section HB–10, Organization and Functions, amend the functional statements as indicated below:

Under the Office of the Administrator (HBA1), delete the "and" preceding item (3), add an "and", and add a new item (4) as follows:

(4) serves as the HRSA focal point for activities pertaining to field coordination.

Public Health Service Regional Offices

Under Chapter HD, Public Health Service (PHS) Regional Offices, delete the title Public Health Service (PHS) Regional Offices and substitute the following:

Office of the Regional Health Administrator (HD)

Under Section HD–00 Mission, delete the statement in its entirety and substitute the following:

Section HD–00 Mission. The Office of the Regional Health Administrator supports the PHS mission of improving the health of the Nation's population by assuring a coordinated regional effort in support of national health policies and State and local needs within each region.

Under Section HD–10, Organization and Functions, delete the statement in its entirety and *substitute the following:*

Section HD–10 Organization. The Office of the Regional Health Administrator (HD1–HDX).

Under Section HD–20, Functions. Public Health Service (PHS Regional Offices (HD1–HDX)

(a) *Delete the statement Public Health Service (PHS) Regional Offices (HD1–HDX) in its entirety and substitute the following:*

Office of the Regional Health Administrator (HD1–HDX). The Office of the Regional Health Administrator is headed by the Regional Health Administrator (RHA) who serves as the regional field representative of the Assistant Secretary for Health (ASH) who: (1) Conducts support activities as the senior public health official in the region, providing liaison with State, Territorial, and local health officials and private and professional organizations; (2) directs the staff of the Office of Women's Health, the Office of Minority Health and directs and coordinates regional implementation of family planning programs and related activities; (3) provides input from regional, State, and local perspectives to assist ASH and PHS agencies in the formulation, development, analysis, and evaluation of PHS field programs and initiatives; (4) assists with the implementation of PHS programs in the regions by supporting the coordination of activities, alerting program officials of potential issues, and assessing the effectiveness of programs for purposes of identifying opportunities for improving policies and service delivery systems; (5) serves as the focal point for PHS regional emergency preparedness activities; (6) acts as liaison to provide regional administrative support services to PHS field components, as appropriate, and provides advice and assistance upon request to ASH and PHS agencies regarding personnel and other administrative matters affecting field staff; (7) works with the Regional Directors and regional representatives of other Federal agencies; and (8) at the direction of ASH, or at the request of a PHS Agency Head, operates special programs in one or more regions.

(b) *Delete the following functional statements in their entirety:*

Office of Engineering Services (HD2E, HD6E and HDXE)

Division of Federal Employee Occupational Health (HD1H–X)

Division of Community Health Services (HD4C)

Division of Family Health and Resources Development (HD3R–4R)

Division of Health Services Delivery (HD1V–HD3V and HD5V–XV)

Division of Preventive Health Services (HD1U–HDXU)

Division of Health Resources Development (HD1W–2W and HD5W–XW)

Delegations of Authority

Under Chapter HD, Regional Offices, Section HD–30, Delegations of Authority.

All authorities delegated to officials in the PHS Regional Offices will continue in effect in them or their successors pending further redelegations, provided they are consistent with this reorganization.

Indian Health Service

Under Chapter HG, Indian Health Service, Section HG–20 Functions, following the title for the Office of Environmental Health and Engineering (HGA6) at the end of item (3) add a comma after Engineering and the following:

"including providing total architectural/engineering/contracting services;"

This reorganization is effective upon date of signature.

Dated: September 7, 1995.

Philip R. Lee,

Assistant Secretary for Health.

[FR Doc. 95–23066 Filed 9–15–95; 8:45 am]

BILLING CODE 4160–17–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. FR–3917–N–21]

Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for

review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: November 17, 1995.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Oliver Walker, Housing, Department of Housing & Urban Development, 451—7th Street, SW, Room 9116, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Oliver Walker, Telephone number (202) 708–1694 (this is not a toll-free number) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1955 (44 U.S.C. Chapter 35, as amended).

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Section 8 Housing Assistance Payment (HAP) Contract, Part II.

OMB Control Number: 2502–0409.

Description of the need for the information and proposed use: The Secretary of HUD, according to Multifamily Housing Property Disposition (MFPD) Reform Act of 1994 (section 203(e)(1), is authorized under certain circumstances to enter into contracts under Section 8 of the Untied States Housing Act of 1937, with owners of multifamily housing projects. 24 CFR 886, Subpart C authorizes the use of the Housing Assistance Payment (HAP) contract, Part II as the administrative mechanism to provide Section 8 housing assistance to purchasers of HUD-owned and foreclosure sale multifamily projects. The HAP Contract, Part II (HUD–52522-D) is a legal document, which as the administrative mechanism to provide Section 8 housing assistance from the Federal Government to the owner, commits the owner to HUD regulations and procedures governing the purpose and use of Section 8 assistance funds.

Agency form numbers: HUD–52522–D.

Members of affected public: Property Owners and Property Management Agents.

An estimation of the total numbers of hours needed to prepare the information collection is 22,824, the number of respondents is 729, frequency of response is 1, and the hours of response is 2,597.

Status of the proposed information collection: Extension with change.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: September 8, 1995.

Nicolas P. Retsinas,

A/S Secretary for Housing-Federal Housing Commissioner.

[FR Doc. 95–22940 Filed 9–15–95; 8:45 am]

BILLING CODE 4210–27–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Draft Recovery Plan for the Madison Cave Isopod for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a draft Recovery Plan for the Madison Cave Isopod (Antrolana lira). The Madison Cave Isopod is a subterranean freshwater crustacean endemic to the Shenandoah Valley in Virginia. The species was listed as threatened in November 1982 due to its extremely limited distribution and threats to the quality of its deep karst habitat. The objective of the proposed Recovery Plan is to protect Madison Cave isopod populations by conserving its groundwater habitat, thereby enabling its removal from the Federal list of endangered and threatened wildlife and plants. To accomplish this, the draft Plan recommends recovery activities that should continue or be initiated. If the Recovery Plan is successfully implemented, full recovery may be achieved by 2005. The Service solicits review and comment from the public on this draft Plan.

DATES: Comments on the draft Recovery Plan must be received December 18, 1995 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft Recovery Plan can obtain a copy from the U.S. Fish and Wildlife Service, Chesapeake Bay Field Office, 177 Admiral Cochrane Drive, Annapolis, Maryland 21401, telephone 410/573–4537 and fax 410/269–0832. Comments should be sent to the same address, to the attention of G. Andrew Moser.

FOR FURTHER INFORMATION CONTACT: G. Andrew Moser at 410/573–4537 (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare Recovery Plans for most of the listed species native to the United States. Recovery Plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 et seq.) requires the development of Recovery Plans for listed species unless such a Plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during Recovery Plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will also take these comments into account in the course of implementing Recovery Plans.

The document submitted for review is the draft Madison Cave Isopod (Antrolana lira) Recovery Plan. The Madison Cave isopod is a subterranean crustacean endemic to the Shenandoah Valley of Virginia. This monotypic genus is the only freshwater member of the family Cirolanidae found north of Texas. Until 1990, A. lira was known only from two sites, Madison Saltpetre

Cave and a fissure near the cave; since June 1990, the isopod has been collected from five additional sites. Although specimens from all seven sites are morphologically identical, they probably represent more than one but less than seven genetic populations. Population size appears to be extremely small at five of the species' seven occurrence sites.

The Madison Cave isopod was listed as a threatened species in November 1982. Urban and agricultural development threaten the quality of its groundwater habitat, and the small population size at most of its sites indicates that this species is highly sensitive to disturbance. The Madison Cave isopod, which is difficult to study and collect, is known only from areas where fissures descend to the groundwater table, thus allowing access to the surface of underground lakes, or deep karst aquifers. Little is known of the physical and chemical conditions of A. lira habitat. The temperature of the water ranges from 11–14 °C, as is typical of groundwater for the latitude, and the water is saturated with calcium carbonate, a condition also typical of groundwater in areas of limestone. The level of the karst aquifers can fluctuate for tens of meters at some sites. The extent of the recharge zone of the aquifer at any site is unknown.

The objective of the draft Recovery Plan is to protect populations of Antrolana lira from potential threats to the quality of its deep karst aquifer habitat, thereby enabling the removal of this threatened species from the Federal list of endangered and threatened wildlife and plants. Delisting may be considered when: (1) Populations of Antrolana lira and groundwater quality at Front Royal Caverns, Linville Quarry Cave No. 3, and Madison Saltpetre Cave/Steger's Fissure are shown to be stable over a ten-year monitoring period; (2) the recharge zone of the deep karst aquifer at each of these population sites is protected from all significant contamination sources; and (3) sufficient population sites are protected to maintain the genetic diversity of the species.

Recovery activities designed to achieve these objectives include: (1) Determining the number of genetic populations, (2) searching for additional populations, (3) identifying potential sources and entry points of contamination of the deep karst aquifer habitat, (4) protecting known populations and habitats from a watershed perspective, (5) collecting baseline ecological data for management and recovery, and (6) implementing a program to monitor recovery progress and future needs. Contingent on vigorous implementation of all recovery tasks, full recovery is anticipated by the year 2005.

The draft Recovery Plan is being submitted for technical and agency review. After consideration of comments received during the review period, the Plan will be submitted for final approval.

Public Comments Solicited

The Service solicits written comments on the Recovery Plan described. All comments received by the date specified above will be considered prior to approval of the Plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 8, 1995.

Ralph C. Pisapia,

Acting Regional Director.

[FR Doc. 95–23083 Filed 9–15–95; 8:45 am]

BILLING CODE 4310–55–M

Bureau of Land Management

[AK–963–1410–00–P; F–14893–A2]

Alaska; Modified Notice for Publication; Alaska Native Claims Selection

On August 7, 1995, a notice was published stating that a decision to issue conveyance of certain lands to Mary's Igloo Native Corporation would be forthcoming. The first paragraph stated that the lands to be conveyed aggregated approximately 11,529 acres and proceeded to give a land description of T. 2 S., R. 29 W., and Tps. 3, 4, and 5 S., R. 30 W., Kateel River Meridian. That paragraph is modified to read as follows:

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Mary's Igloo Native Corporation for certain lands within Tps. 3 and 4 S., R. 30 W., Kateel River Meridian, aggregating approximately 5,603 acres. The lands involved are in the vicinity of Mary's Igloo, Alaska.

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government, or regional corporation, shall have until October 18, 1995 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Except as modified above, the Notice of August 7, 1995, remains as written.

Katherine L. Flippen,

Acting Chief, Branch of Southwest Adjudication.

BILLING CODE 4310–JA–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–738 (Preliminary)]

Foam Extruded PVC and Polystyrene Framing Stock From the United Kingdom

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a preliminary antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731–TA–738 (Preliminary) under section 733(a) of the Tariff Act of 1930, as amended by section 212(b) of the Uruguay Round Agreements Act (URAA), Public Law 103–465, 108 Stat. 4809 (1994) (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the United Kingdom of foam extruded PVC and polystyrene framing stock, provided for in subheadings 3924.90.20 and 3926.90.98 of the Harmonized Tariff Schedule of the United States, that is alleged to be sold in the United States at less than fair value. Unless the Department of Commerce extends the time for initiation pursuant to section 732(c)(1)(B), the Commission must complete preliminary antidumping investigations in 45 days, or in this case by October 23, 1995. The Commission's views are due at the Department of Commerce within 5 business days thereafter, or by October 30, 1995.

For further information concerning the conduct of this investigation and rules of general application, consult the

Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

EFFECTIVE DATE: September 8, 1995.

FOR FURTHER INFORMATION CONTACT: Debra Baker (202–205–3180), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. Information can also be obtained by calling the Office of Investigations' remote bulletin board system for personal computers at 202–205–1895 (N,8,1).

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on September 8, 1995, by Marley Mouldings, Inc., Marion, VA.

Participation in the Investigation and Public Service List

Persons (other than petitioners) wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in sections 201.11 and 207.10 of the Commission's rules, not later than seven (7) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this preliminary investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference

The Commission's Director of Operations has scheduled a conference in connection with this investigation for 9:30 a.m. on September 29, 1995, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Debra Baker (202–205–3180) not later than September 26, 1995, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written Submissions

As provided in sections 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before October 4, 1995, a written brief containing information and arguments pertinent to the subject matter of the investigation. Parties may file written testimony in connection with their presentation at the conference no later than three (3) days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII, as amended by the URAA. This notice is published pursuant to section 207.12 of the Commission's rules.

Issued: September 13, 1995.

By order of the Commission.

Donna R. Koehnke,

Secretary.

[FR Doc. 95–23091 Filed 9–15–95; 8:45 am]

BILLING CODE 7020–02–P

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–290 (Sub-No. 171X)]

Norfolk Southern Railway Company—Abandonment Exemption—Between Jacksonville and Fort McClellan, AL

Norfolk Southern Railway Company (NS) has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its line of railroad between milepost 48.0–N at Jacksonville and milepost 55.3–N at Fort McClellan, in Calhoun County, AL, a total distance of 7.3 miles.

NS has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to use of this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on October 18, 1995, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29[3] must be filed by September 28, 1995. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by October 10, 1995, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any pleading filed with the Commission should be sent to applicant's representative: James R. Paschall, Three Commercial Place, Norfolk, VA 23510.

If the notice of exemption contains false or misleading information, the exemption is void *ab initio.*

NS has filed an environmental report which addresses the abandonment's effects, if any, on the environmental and historic resources. The Section of Environmental Analysis (SEA) will issue an environmental assessment (EA) by September 22, 1995. Interested persons may obtain a copy of the EA by writing to SEA (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief of SEA, at (202) 927–6248. Comments on environmental and historic preservation matters must be filed within 15 days after the EA is available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: September 11, 1995.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 95–23105 Filed 9–15–95; 8:45 am]

BILLING CODE 7035–01–P

---

[1] A stay will be issued routinely by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Commission's Section of Environmental Analysis in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines,* 5 I.C.C.2d 377 (1989). Any entity seeking a stay on environmental concerns is encouraged to file its request as soon as possible in order to permit the Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.,* 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use request as long as it retains jurisdiction to do so.

MERIT SYSTEMS PROTECTION BOARD

Opportunity to File Amicus Briefs in Cases Involving Possible Furlough of Administrative Law Judges

AGENCY: Merit Systems Protection Board.

ACTION: The Merit Systems Protection Board is providing an opportunity for interested parties to submit amicus briefs in a number of pending cases filed pursuant to 5 U.S.C. § 7521 and 5 CFR 1201.131.

SUMMARY: The Merit Systems Protection Board currently has seven pending complaints filed by separate agencies pursuant to 5 U.S.C. § 7521 and 5 CFR 1201.131. The basic premise of each complaint is that there is a possibility that Congress may not enact an appropriation or continuing resolution for fiscal year 1996 on or before October 1, 1995, and that the resulting lapse in funding would necessitate the furlough of all agency employees, including administrative law judges. Therefore, the agencies are requesting that the Board make a finding that there is good cause for the imposition of a furlough action against each agency's administrative law judges.

The Board also has a complaint filed by the National Labor Relations Board seeking permission to furlough its administrative law judges. The NLRB states in its filing that it anticipates its fiscal year 1996 budget will be insufficient to cover its present rate of spending, and that the furlough of its administrative law judges will thus be necessary to avoid deficit spending.

The Board has issued orders in each of the eight cases noting that there is a question whether the procedure provided for by 5 U.S.C. § 7521 is intended to cover the situations described in the agencies' complaints. Specifically, the Board has determined that there is a question whether a furlough which seven agencies allege would be necessitated by a lapse in funding caused by the failure of Congress to enact an appropriation or continuing resolution is the type of personnel action to which the protections of 5 U.S.C. § 7521 need by applied. In the case of the NLRB, the Board has determined that there is a question whether a furlough allegedly necessitated by a cut by Congress in the agency's appropriation is an action to which the protections of 5 U.S.C. § 7521 may be applied. In *Horner* v. *Andrzjewski*, 811 F.2d 571 (Fed. Cir. 1987), which involved furloughs under a similar statute, 5 U.S.C. § 7513, the court recognized that not all furloughs are within the Board's jurisdiction. The court stated that where a furlough action is taken "because an agency has no choice * * * it can reasonably be said that an agency did not 'take an action' covered by Chapter 75." *Id.* at 576.

In considering these questions, the Board is concerned with the possibility that the provisions of the Antideficiency Act (31 U.S.C. §§ 1341, 1350) may be violated by any action the Board might take in declining to authorize an agency the right to furlough administrative law judges due to a lapse in funding caused by the failure to enact appropriation bills or a continuing resolution, or by Congress' failure to fund an agency at current budget levels. The Board is inviting any interested party to submit amicus briefs addressing these jurisdictional issues.

DATES: All briefs submitted in response to this notice shall be filed with the Clerk of the Board on or before September 22, 1995.

ADDRESSES: All briefs shall be captioned "Administrative Law Judge Furlough Appeals" and entitled "Amicus Brief." Only one copy of the brief need be submitted. Briefs should be filed with the Office of the Clerk, Merit Systems Protection Board, 1120 Vermont Avenue NW., Washington, DC 20419.

FOR FURTHER INFORMATION CONTACT: Shannon McCarthy, Deputy Clerk of the Board, or Matthew Shannon, Counsel to the Clerk, (202) 653–7200.

Dated: September 13, 1995.

Robert E. Taylor,

Clerk of the Board.

BILLING CODE 7400–1–M

NATIONAL SCIENCE FOUNDATION

Notice of Conference

The National Science Foundation's (NSF) Directorate for Education and Human Resources (EHR) will host its Fourth National Conference, September 21–September 23, 1995 at the Washington Hilton and Towers Hotel, 1919 Connecticut Avenue, NW., Washington, DC 20009. The hours of the Conference are: September 21, from 6:00 p.m. until 7:30 p.m.; September 22 from 8:00 a.m. until 5:30 p.m. and September 23, from 8:30 a.m. until 6:00 p.m.

This event represents a continuation of last year's conference which focused on major issues related to minority education, along with an update on efforts implemented in the last year and results to date. Planned activities include workshops to exhibit EHR's accomplishments in broadening diversity in science and technology fields through its human resource development programs, as well as discussions by national leaders of strategies to disseminate successful efforts nationwide. There also will be presentations of research by NSF-supported students, and presentations by the NSF research directorates.

The conference will not operate as an advisory committee. It will be open to the public. Participants will include persons representing the heads of national associations, education, science, mathematics and engineering practitioners, and Federal and state government officials.

For additional information, contact Dr. Elmima C. Johnson, Staff Associate, Office of the Assistant Director for Education & Human Resources, Room 805, 4201 Wilson Boulevard, Arlington, VA 22230, (703) 306–1605; 6841.

Dated: September 8, 1995.

Luther S. Williams,

Assistant Director, Education and Human Resources.

NUCLEAR REGULATORY COMMISSION

Tennessee Valley Authority

[Docket No. 50–328]

Sequoyah Nuclear Plant Unit 2; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Tennessee Valley Authority (the licensee) to withdraw its July 19, 1995, application for proposed amendment to Facility Operating License No. 79 for the Sequoyah Nuclear Plant Unit 2, located in Soddy Daisy, Tennessee.

The proposed amendment would have revised the technical specification surveillance requirements and bases to incorporate alternate steam generator tube plugging criteria at tube support plate intersections. The approach was similar to guidance given in Generic Letter 95–05, "Voltage-Based Repair Criteria for Westinghouse Steam Generator Tubes Affected by Outside Diameter Stress Corrosion Cracking."

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on August 1, 1995 (60 FR 39189). However, by letter dated September 7, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated July 19, 1995, and the licensee's letter dated September 7, 1995, which withdrew the application for license amendment.

The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee.

Dated at Rockville, Maryland, this 11th day of September 1995.

For the Nuclear Regulatory Commission.

David E. LaBarge, Sr.

Project Manager, Project Directorate II–3, Division of Reactor Projects— I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

OFFICE OF PERSONNEL MANAGEMENT

Notice of Request for Expedited Review of a Revised Information Collection; RI 30–2 and RI 30–44

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces that the Office of Personnel Management has submitted to the Office of Management and Budget a request for expedited approval of an information collection. The form RI 30–2, Annuitant's Report of Income, is used by disability annuitants under age 60 to report their earnings annually to the Office of Personnel Management. Form RI 30–44, Report of Income is Not Usable, is used to follow-up with the annuitant when the information from the RI 30–2 is not usable.

It is estimated that there will be 21,000 respondents to the RI 30–2, and 260 respondents to the RI 30–44. It takes approximately 35 minutes to complete the RI 30–2, and approximately 5 minutes to complete the RI 30–44. The combined annual burden is 12,272 hours.

Copies of these two forms are appended to this notice.

DATES: Comments on this proposal should be received within 7 calendar days from the date of this publication. OMB has been requested to act within 10 calendar days.

ADDRESSES: Send or deliver comments to—

Lorraine E. Dettman, Chief, Retirement and Insurance Service, Operations Support Division, U.S. Office of Personnel Management, 1900 E Street NW., Room 3349, Washington, DC 20415

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building NW., Room 10235, Washington, DC 20503.

FOR INFORMATION REGARDING ADMINISTRATIVE COORDINATION—CONTACT: Mary Beth Smith-Toomey, Management Services Division, (202) 606–0623.

U.S. Office of Personnel Management.

Lorraine A. Green,

Deputy Director.

For Agency Use Only

○ I ○ II ○ III ○ IV

Please complete and return this form ONLY if:
1. *You had earned income for the calendar year 1995; or*
2. *You are a Federal Employees Retirement System retiree receiving an award of monthly Social Security disability benefits; or*
3. *You have been reemployed in the Federal service after you separated for disability retirement.*

Dear Annuitant:

This form, Annuitant's Report of Earned Income, is mailed each year to Civil Service Retirement System and Federal Employees' Retirement System annuitants who are receiving disability retirement benefits and who were under age 60 during the prior year. OPM is required by title 5, U.S. Code, sections 8337 (d) and 8455(a)(2), as stated in title 5, Code of Federal Regulations, sections 831.502(e)(1) and 844.402(d), to obtain information about your income from wages or self-employment. This is needed because your annuity must be terminated effective June 30 of the year following the one in which your income exceeds 80 percent of the current rate of pay of the position you occupied immediately before retirement. **If you are age 60 this current year, this will be the last time we will send you this income reporting form.**

If we determine that you are restored to earning capacity, we will send you information about your annuity terminating on June 30; we will also notify you whether you are eligible for an immediate, non-disability retirement or a deferred retirement beginning at age 62.

This year we will not be sending follow-up notices.

Privacy Act and Public Burden Statement

Information you furnish will be used to determine your eligibility to continue receiving annuity benefits. Information may be shared, and is subject to verification, via paper, electronic media, or through use of computer matching programs, with national, state, local, or other agencies in order to determine and issue benefits under their programs, to obtain information necessary for continuation of benefits under this program, or to report income for tax purposes. It may also be shared and verified, as noted above, with law enforcement agencies when they are investigating a violation or potential violation of the civil or criminal law.

Solicitation of this information is authorized by 5 U.S.C. 8347(a) and 5 U.S.C. 8461(g). Provision of this information is voluntary; however, failure to supply all of the information requested IF YOU HAD EARNED INCOME may result in suspension of your annuity benefit.

We think this form takes an average 35 minutes per response to complete, including the time for reviewing instructions, getting the needed data, and reviewing the completed form. Send comments regarding our estimate or any other aspect of this form, including suggestions for reducing completion time, to the OPM Reports and Forms Management Officer, OMB Clearance Number 3206-0034, Office of Personnel Management, Washington, DC 20415.

Information and Instructions for Completing the Annuitant's Report of Earned Income

Please complete and return this form **only** if:

1. You had earned income for the calendar year 1995; or
2. You are a Federal Employees Retirement System retiree receiving an award of monthly Social Security disability benefits; or
3. ~~You have been reemployed in the Federal service after you separated for disability retirement.~~

What To Report As Earned Income - All income from wages and self-employment plus deferred income you actually earned between January 1 and December 31 of the past year, as explained below.

- Income from wages is any gross pay, salary, bonus, or award you received for working for someone else (including overtime, vacation pay, etc.) before ***any*** withholdings or deductions.
- If your W-2 shows different amounts for "Wages, tips, other compensation" and "Social Security wages," enter the ***higher amount*** on the Report of Earned Income. If you have more than one W-2, add the amounts shown and report the total.
- **Deferred Income** for "restored to earning capacity" determination is any income, cash or property, where you have the option of receiving or deferring receipt until sometime in the future. In short, if you voluntarily defer a portion of your earnings, that income is still considered for earning capacity purposes. Even if deferred income is not subject to income tax until a future year, it is still counted as earning capacity in the year in which it is earned.
- Income from self-employment is any net profit you made from working or managing your own business, whether at home or elsewhere. Net profit is the amount remaining after deduction for business expenses and before deduction of any personal expenses or exemptions as allowed by the Internal Revenue Service. A net loss from self-employment in one business may not offset 1) income from wages and 2) income from another self-employment endeavor, unless the two businesses are interrelated components of a single enterprise.
- Income resulting from personal services such as rents, royalties, etc.
- Interest or dividends resulting from your own trade or business.
- Do not deduct business expenses from wages or commission you receive for working for someone else.
- If you are reemployed in the Federal service, you must report the gross amount of your salary. Your agency should be deducting the gross amount of your annuity from your salary.

If all or a portion of your income was derived from a partnership, corporation, or sole proprietorship, please complete form RI 30-2 and enclose a detailed explanation,including the following items: income you received directly from wages, fringe benefits, and employee expenses; gross revenue and pre-tax profit of the enterprise; number of workers employed (if a partnership, give the number of partners); your role or position and hours worked; the principle product produced or service supplied; and your total cash investment and percentage of ownership in the enterprise (include your individual share plus shares held by immediate family members). Report separately income received from independent businesses and salary received from working for someone else. Please write your CSA claim number on your explanation.

What Not To Report As Earned Income - Any income from the following sources:

- ***Pensions or annuities***
- Gifts
- Social Security proceeds
- Insurance proceeds
- Unemployment compensation
- Money which you earned before retirement
- Inheritances
- Capital gains
- Non-employment prizes or awards
- Fellowships or scholarships
- Business losses
- Alimony/child support

PLEASE CAREFULLY REVIEW THE EXAMPLE ON THE REVERSE SIDE

RI 30-2A
Revised January 1995

Instructions for Completing the Enclosed Form

IT IS IMPORTANT THAT YOU FOLLOW ALL OF THE INSTRUCTIONS BELOW.

1. The enclosed form has been designed to allow your answers to be read using optical scanning equipment. Therefore, use **only a pencil** to darken the circles. If you make a mistake, erase it completely and darken the correct circles. Do not use a felt tip pen or other pen to complete this form.

2. Complete the Annuitant's Report of Earned Income for 1995 as illustrated in the example below:

EXAMPLE

Item 1 of the form is reproduced here to illustrate how you should make your entries on this form. The example illustrates how this question would be completed for an annuitant whose earned income in 1995 was $8,289.39.

(1) In the box begin with zeros and write the highest amount shown on your W-2's rounded to the nearest dollar (008289), and (2) darken the appropriate circles for that amount. For earnings of $8,289.39, you would complete block 1 as shown.

	DOLLARS						CENTS	
$	0	0	8	2	8	9	0	0
	●	●	0	0	0	0		
	1	1	1	1	1	1		
	2	2	2	●	2	2		
	3	3	3	3	3	3		
	4	4	4	4	4	4		
	5	5	5	5	5	5		
	6	6	6	6	6	6		
	7	7	7	7	7	7		
	8	8	●	8	●	8		
	9	9	9	9	9	●		

3. If the Annuitant's Report of Earned Income for 1995 is stapled or damaged, delays in processing may occur. **Please do not** send a photocopy or duplicate this form. If you send a photocopy or damage this form, it will delay processing your response. If you need another form, please write to the address shown in item 4 or call (202)606-0249 or (202) 606-0238.

4. Please be sure to sign the enclosed Annuitant's Report of Earned Income for 1995 and mail it in the enclosed envelope to:

U.S. Office of Personnel Management
P.O. Box 579
Washington, DC 20044-0579

If you need assistance:

If, after carefully reading the instructions, you need assistance to complete the form, you may contact us weekdays from 8:00 a.m. to 5:00 p.m. Eastern Time on (202) 606-0249 or (202) 606-0238.

Annuitant's Report of Income - Followup

Claim number	
Disability Earnings Survey document number	

We have received the "Annuitant's Report of Income" form which you completed and returned to this office. However, due to the poor condition in which it reached us or because it contained conflicting or apparently erroneous information, we were unable to process the form. For this reason, we are asking you again to supply the amount of your earnings from wages and self-employment by completing the items below:

1. My income for calendar year was $ .00	**Do *NOT* include your annuity from OPM in the amount you report here.**

2. Please sign your name *(do not print)* and give the date of signature below.

Signature	Date

Return this letter in the envelope provided to:

Office of Personnel Management
P.O. Box 579
Washington, DC 20044

Your annuity payments may be suspended if this letter is not received at OPM by

Thank you for your cooperation.

Notice of Request for Clearance of Commercial Garnishment Application Form

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, May 22, 1995), this notice announces that the Office of Personnel Management intends to submit to the Office of Management and Budget a request for clearance of an information collection, voluntary commercial garnishment application form. The application is intended to be completed by creditors and will facilitate the processing by Federal agencies of commercial garnishment orders by providing information about the order in a uniform manner that would otherwise not be possible as a result of the wide variety of commercial garnishment orders issued by various State and local jurisdictions.

OPM anticipates that approximately 100 forms will be completed annually for OPM employees, each requiring an estimated ten minutes to complete, for a total public burden of approximately 17 hours. OPM anticipates, however, that many other Federal agencies will also be suggesting that creditors complete the form.

A copy of the proposed form is appended to this notice.

DATES: Comments on this proposed form should be received within 60 calendar days from the date of this publication.

ADDRESSES: Send or deliver comments to: Lorraine Lewis, General Counsel, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Murray M. Meeker, Attorney, Office of the General Counsel, (202) 606–1980.

U.S. Office of Personnel Management.

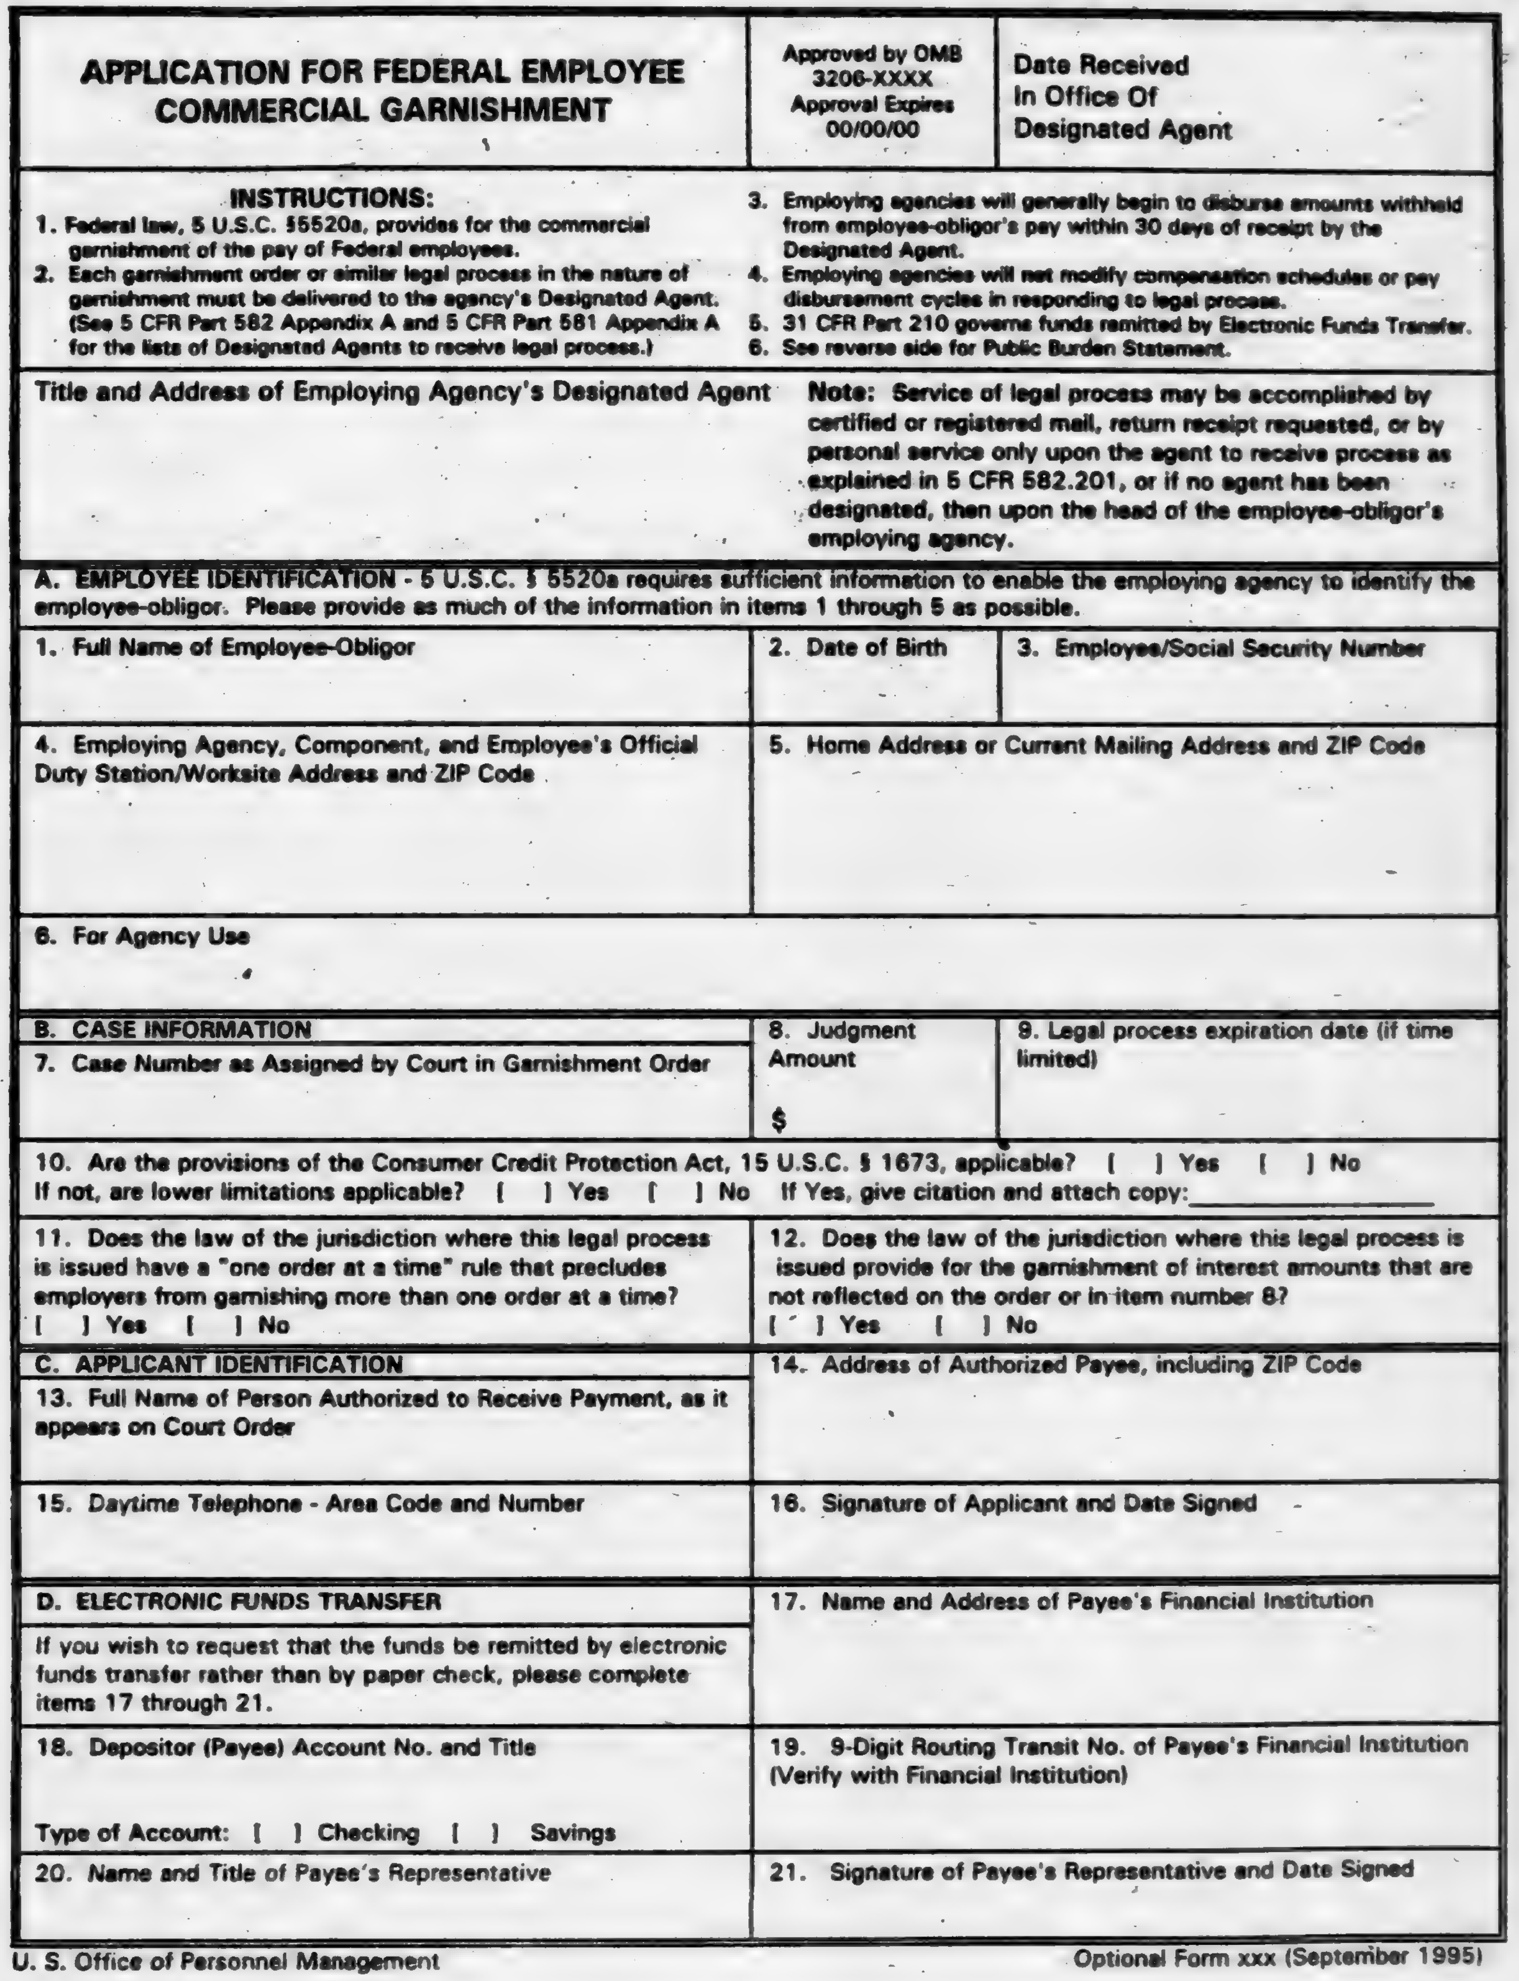
Deputy Director.

BILLING CODE 6325–01–M



APPLICATION FOR FEDERAL EMPLOYEE COMMERCIAL GARNISHMENT	Approved by OMB 3206-XXXX Approval Expires 00/00/00	Date Received In Office Of Designated Agent

INSTRUCTIONS:

1. Federal law, 5 U.S.C. §5520a, provides for the commercial garnishment of the pay of Federal employees.
2. Each garnishment order or similar legal process in the nature of garnishment must be delivered to the agency's Designated Agent. (See 5 CFR Part 582 Appendix A and 5 CFR Part 581 Appendix A for the lists of Designated Agents to receive legal process.)
3. Employing agencies will generally begin to disburse amounts withheld from employee-obligor's pay within 30 days of receipt by the Designated Agent.
4. Employing agencies will not modify compensation schedules or pay disbursement cycles in responding to legal process.
5. 31 CFR Part 210 governs funds remitted by Electronic Funds Transfer.
6. See reverse side for Public Burden Statement.

Title and Address of Employing Agency's Designated Agent

Note: Service of legal process may be accomplished by certified or registered mail, return receipt requested, or by personal service only upon the agent to receive process as explained in 5 CFR 582.201, or if no agent has been designated, then upon the head of the employee-obligor's employing agency.

A. EMPLOYEE IDENTIFICATION - 5 U.S.C. § 5520a requires sufficient information to enable the employing agency to identify the employee-obligor. Please provide as much of the information in items 1 through 5 as possible.

1. Full Name of Employee-Obligor
2. Date of Birth
3. Employee/Social Security Number
4. Employing Agency, Component, and Employee's Official Duty Station/Worksite Address and ZIP Code
5. Home Address or Current Mailing Address and ZIP Code
6. For Agency Use

B. CASE INFORMATION

7. Case Number as Assigned by Court in Garnishment Order
8. Judgment Amount $
9. Legal process expiration date (if time limited)
10. Are the provisions of the Consumer Credit Protection Act, 15 U.S.C. § 1673, applicable? [ ] Yes [ ] No
If not, are lower limitations applicable? [ ] Yes [ ] No If Yes, give citation and attach copy:____________
11. Does the law of the jurisdiction where this legal process is issued have a "one order at a time" rule that precludes employers from garnishing more than one order at a time? [ ] Yes [ ] No
12. Does the law of the jurisdiction where this legal process is issued provide for the garnishment of interest amounts that are not reflected on the order or in item number 8? [ ] Yes [ ] No

C. APPLICANT IDENTIFICATION

13. Full Name of Person Authorized to Receive Payment, as it appears on Court Order
14. Address of Authorized Payee, including ZIP Code
15. Daytime Telephone - Area Code and Number
16. Signature of Applicant and Date Signed

D. ELECTRONIC FUNDS TRANSFER

If you wish to request that the funds be remitted by electronic funds transfer rather than by paper check, please complete items 17 through 21.

17. Name and Address of Payee's Financial Institution
18. Depositor (Payee) Account No. and Title
Type of Account: [ ] Checking [ ] Savings
19. 9-Digit Routing Transit No. of Payee's Financial Institution (Verify with Financial Institution)
20. Name and Title of Payee's Representative

BILLING CODE 6325-01-M

PENSION BENEFIT GUARANTY CORPORATION

Request for Approval Under the Paperwork Reduction Act of a Revision of a Currently Approved Collection of Information

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for OMB approval of revision.

SUMMARY: This notice advises the public that the Pension Benefit Guaranty Corporation has requested approval by the Office of Management and Budget for a revision of the collection of information in the PBGC's premium forms (currently approved under OMB control number 1212–0009). The premium forms are being modified to require a certification by the plan administrator relating to the participant notice required under the PBGC's recently-published regulation on Disclosure to Participants.

DATES: The PBGC is requesting that OMB complete action on the PBGC's request for extension of approval by September 29, 1995. Comments must be received by that date.

ADDRESSES: All written comments should be addressed to Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Pension Benefit Guaranty Corporation, Washington, DC 20503, with a copy to the Office of the General Counsel, Suite 340, Pension Benefit Guaranty Corporation, 1200 K Street, N.W., Washington, DC 20005–4026. The request for extension will be available for public inspection at the PBGC Communications and Public Affairs Department, Suite 240, 1200 K Street, N.W., Washington, DC 20005–4026, between 9:00 a.m. and 4:00 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, or Deborah C. Murphy, Attorney, Office of the General Counsel, Suite 340, Pension Benefit Guaranty Corporation, 1200 K Street, N.W., Washington, DC 20005–4026, 202–326–4024 (202–326–4179 for TTY and TDD).

SUPPLEMENTARY INFORMATION: Section 4011 of the Employee Retirement Income Security Act of 1974 requires plan administrators of certain underfunded single-employer pension plans to provide an annual notice to plan participants and beneficiaries of the plans' funding status and the limits on the Pension Benefit Guaranty Corporation's guarantee of plan benefits. The PBGC's regulation on Disclosure to Participants (60 FR 34412 (June 30, 1995), to be codified as 29 CFR Part 2627) implements section 4011. Under section 4011 and Part 2627, a plan that must pay a variable-rate premium under ERISA section 4006 and Part 2610 must furnish the participant notice unless the plan is otherwise exempt under Part 2627.

The participant notice requirement only applies (subject to certain exemptions) to plans that must pay a variable rate premium. In order to monitor compliance with Part 2627, the PBGC has added a participant notice certification to Schedule A to PBGC Form 1. Schedule A is promulgated by the PBGC under ERISA sections 4006 and 4007 and the PBGC's regulation on Payment of Premiums (29 CFR Part 2610), and is used to report information to the PBGC about the variable rate premium. Office of Management and Budget approval (1212–0009) of Schedule A expires February 28, 1998.

At the same time, the PBGC is removing from the 1996 Schedule A the special certification language in existing items 10(a), (b) and (c). The general certification in item 10, preceding item 10(a), is broad enough to include the three existing special certifications.

The PBGC has redrafted item 10 on the 1996 Schedule A, including the new participant notice certification, to read as follows:

10. Certification of Plan Administrator

All single-employer plan administrators *must* sign and complete this line. (See instructions, page 23.)

I certify, under penalties of prejury (18 U.S.C. 1001), that I have examined the completed PBGC Form 1 (including Schedule A and attachments) and, to the best of my knowledge and belief, the Form 1 (including Schedule A and attachments) and this certificate are in conformance with the premium regulation and instructions, complete, and accurate, and any information I made available to the enrolled actuary is true, correct, and complete.

I further certify, under penalties of perjury (18 U.S.C. 1001), that, for the plan year preceding the premium payment year, a Participant Notice as provided for in ERISA section 4011 (29 U.S.C. 1311) and the PBGC's regulation on Disclosure to Participants (29 CFR Part 2627):

(a) [ ] Was not required to be issued; or

(b) [ ] Was issued as required.

(c) [ ] Explanation attached.

Note. Check box (a), (b), or (c). If you check box (c), attach an explanation and check the box in item 19 on Form 1. Check box (a) if no variable rate premium was required for the plan year preceding the premium payment year or the plan was otherwise exempt (see instructions).

The draft instructions for the redrafted item 10 are as follows:

8. Certification of Plan Administrator

The plan administrator of a single-employer plan must sign and date the certification in item 10 of Schedule A. We may return any filing that does not have your original signature in item 10. The certification has two parts: a general certification about the correctness of your premium filing, and a new certification regarding compliance with the participant notice requirements in ERISA section 4011 (29 U.S.C. 1311) and the PBGC's regulation on Disclosure to Participants (29 CFR Part 2627).

For each plan year in which a variable rate premium is payable for a plan, the plan administrator must issue a notice to participants about the plan's funding status and the limits on the PBGC's guarantee, unless the plan is exempt from the notice requirement under the Disclosure to Participants regulation. The participant notice is due no later than two months after the Form 5500 due date (or extended due date) for the prior plan year.

The new certification relates to the participant notice requirement for the plan year preceding the premium payment year. You must check box (a), (b), or (c). If you check box (c) (*e.g.*, because a required participant notice was not issued or was issued late), you must attach an explanation and check the box in item 19 of Form 1.

Note: If your plan had no variable rate premium for the plan year preceding the premium payment year, the participant notice requirement did not apply for that year and you can check box (a). Other exemptions are described in the Disclosure to Participants regulation. Note in particular that the regulation contains exemptions for certain new and newly-covered plans and, for the 1995 plan year, for certain small plans (generally under 100 participants).

The PBGC is requesting OMB to approve this revision of Schedule A and related instructions without any change in the expiration date of OMB's current approval. Other changes to the premium forms for 1996 (*e.g.*, allowing plans to claim overpayment credits on Form 1–ES) will be minor and non-substantive.

The participant notice certification will require simply that a box be checked to indicate whether, for the prior year, the plan was exempt from, or complied with, the participant notice requirement. The burden of redrafted item 10 as it will appear on the 1996 Schedule A, including the new certification, will therefore be no greater than the burden of existing item 10 as it appears on the 1995 Schedule A.

The PBGC estimates that it receives a total of about 66,300 premium filings annually from a total of 56,000 single-employer and 2,000 multiemployer plans (some of which make an estimated filing in addition to the final filing), an average of about 1.14 filings per plan. The PBGC also estimates that the total burden of the collection of information, including the new participant notice certification, is about 80,670 hours, or an average of about 1.22 hours per filing. (The estimated burden includes recordkeeping under 29 CFR § 2610.11.)

Issued at Washington, D.C., this 14th day of September 1995.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

POSTAL RATE COMMISSION

[Docket No. A95–19; Order No. 1076]

Notice and Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued September 12, 1995.

Before Commissioners: Edward J. Gleiman, Chairman; W.H. "Trey" LeBlanc III, Vice-Chairman; George W. Haley; H. Edward Quick, Jr.; Wayne A. Schley.

In the Matter of: Eckhart Mines, Maryland 21528: (Walter Rankin, Petitioner).

Docket Number: A95–19
Name of Affected Post Office: Eckhart Mines, Maryland 21528
Name(s) of Petitioner(s): Walter Rankin
Type of Determination: Closing
Date of Filing of Appeal Papers: September 5, 1995
Categories of Issues Apparently Raised:
1. Effect on postal services [39 U.S.C. 404(b)(2)(C)].
2. Effect on the community [39 U.S.C. 404(b)(2)(A)].

After the Postal Service files the administrative record and the Commission reviews it, the Commission may find that there are more legal issues than those set forth above. Or, the Commission may find that the Postal Service's determination disposes of one or more of those issues.

The Postal Reorganization Act requires that the Commission issue its decision within 120 days from the date this appeal was filed (39 U.S.C. § 404 (b)(5)). In the interest of expedition, in light of the 120-day decision schedule, the Commission may request the Postal Service to submit memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request and the Postal Service shall serve a copy of its memoranda on the petitioners. The Postal Service may incorporate by reference in its briefs or motions, any arguments presented in memoranda it previously filed in this docket. If necessary, the Commission also may ask petitioners or the Postal Service for more information.

The Commission Orders

(a) The Postal Service shall file the record in this appeal by September 20, 1995.

(b) The Secretary of the Postal Rate Commission shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Margaret P. Crenshaw,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36212; File No. SR–Amex–95–36]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the American Stock Exchange, Inc., Relating to the Disclaimer Provisions of Amex Rule 902C

September 11, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 25, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Amex Rule 902C to include Inter@ctive Enterprises L.L.C., publisher and owner of Inter@ctive Week, a bi-weekly magazine in the disclaimer provisions of that Rule. The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Section (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In conjunction with the Exchange's proposal to trade options on the Inter@ctive Week Internet Index ("Index"), the Exchange proposes to amend Rule 902C to provide a disclaimer for Inter@ctive Enterprises L.L.C., publisher and owner of Inter@ctive Week, a bi-weekly magazine. The Exchange's proposal to list and trade options on the Index was filed pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934 on August 23, 1995.[3] The disclaimer, identical in content to disclaimers currently in place for Standard & Poors Corporation[4] and Morgan Stanley & Co. Incorporated,[5] states that Inter@ctive Enterprise L.L.C. does not guarantee the accuracy or completeness of the Index, makes no express or implied warranties with respect to the Index and shall have no liability for any damages, claims, losses or expenses caused by errors in the Index calculation.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to SR–Amex–95–36 and should be submitted by October 10, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36219; File No. SR–DTC–95–09]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing of a Proposed Rule Change Seeking to Establish a Legal Guidance System

September 12, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on April 27, 1995, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–DTC–95–09) as described in Items I, II, and III below, which items have been prepared primarily by DTC. On July 25, 1995, DTC filed an amendment to the proposed rule change.[2] On August 22, 1995, DTC filed a second amendment to the proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

DTC is filing the proposed rule change to establish a service whereby DTC participants and nonparticipants (*e.g.*, transfer agents) can obtain information and documentation necessary to effect a legal transfer of a deposit.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[4]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to establish an inquiry-only Legal Guidance System ("LGS"), which is a menu-driven, user-friendly system designed to provide DTC participants and nonparticipants (*e.g.*, transfer agents)[5] with information regarding the documents necessary to effect a legal deposit.[6] Lgs will be accessible by DTC participants and nonparticipants through DTC's Participant Terminal System ("PTS"). LGS contains industry requirements, individual state and province requirements, and transfer agent requirements for processing legal deposits. DTC will post a disclaimer in the LGS user guide notifying users that DTC shall not be liable to the user for any liability for damages resulting from mistakes or omissions in LGS.[7]

The LGS menu approach will guide users through a step-by-step process to ascertain the relevant requirements for transferring legal deposits. LGS also will have a "fast forward" navigation option that will allow an experienced user to quickly access the requisite information. Users also will be able to request through LGS that certain transfer documents be sent to their offices via facsimile transmission. In the near future, DTC plans to interface LGS with its Pending Legal Deposit System to track and monitor document expiration. The fee charged to DTC participants and nonparticipants for the LGS service will be DTC's standard fee for PTS inquires.

DTC believes the proposed rule change is consistent with the requirements of Section 17A of the Act[8] and the rules and regulations thereunder because the rule proposal will facilitate the prompt and accurate clearance and settlement of securities transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments from DTC participants or others have not been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which DTC consents, the Commission will:

(a) by order approve such proposed rule change or

(b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to the file number SR–DTC–95–09 and should be submitted by October 10, 1995.

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] DTC amended its proposal to allow organizations that are not DTC participants, such as transfer agents, to subscribe to the Legal Guidance System. Letter from Piku K. Thakkar, Assistant Counsel, DTC, to Mark Steffensen, Esq., Division of Market Regulation ("Division"), Commission (July 21, 1995).

[3] As proposed in the original filing, once a user logged onto the Legal Guidance System a disclaimer of liability message appeared on the terminal screen. DTC has amended its proposal to eliminate this message from the Legal Guidance System terminal screen. Instead, the disclaimer will appear in a user guide. Letter from Piku K. Thakkar, Assistant Counsel, DTC, to Peter Geraghty, Division, Commission (August 17, 1995).

[4] The Commission has modified the text of the summaries prepared by DTC.

[5] Presently, DTC envisions that LGS will be utilized only by nonparticipant transfer agents. However, the availability of LGS will not be limited to nonparticipants who are transfer agents. Telephone conversation between Piku K. Thakkar, Assistant Counsel, DTC, and Mark Steffensen, Attorney, Division, Commission (September 11, 1995).

[6] A "legal deposit" consists of a registered security and any legal documentation required to effect the legal transfer and registration of the security from the registered holder's name into DTC's nominee name.

[7] Specifically, the disclaimer will state that "DTC does not represent the accuracy, adequacy, or fitness for a particular purpose of the following information, which is provided as is. DTC shall not be liable for: 1) any loss resulting directly or indirectly from mistakes, omissions, interruptions, delays, errors, or defects arising from or related to this service; and 2) any special, consequential, exemplary, incidental, or punitive damages."

[8] 15 U.S.C. 78q–1 (1988).

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[9]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–36211; File No. SR–NASD–95–16]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to a Customer Complaint Reporting Rule

September 8, 1995.

On July 6, 1995, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change[1] pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[2] and Rule 19b–4 thereunder.[3] The rule change amends the NASD Rules of Fair Practice to require NASD members to report to the NASD the occurrence of certain specified events and quarterly summary statistics concerning customer complaints.

Notice of the proposed rule change, together with its terms of substance, was provided by issuance of a Commission release[4] and by publication in the **Federal Register**.[5] No comments were received in response to the notice. This order approves the proposed rule change.

On May 19, 1994, the Commission's Large Firm Project Report was published, detailing the findings of a review it undertook, in conjunction with the New York Stock Exchange ("NYSE") and the NASD, regarding the hiring, retention and supervisory practices of nine of the largest broker-dealers in the United States. This review was commenced because of increased concerns on the part of the Commission and others over the frequency and severity of sales practice abuses.

In the Report, Commission staff stressed the need for self-regulatory organizations ("SROs") to develop better means of identifying sales practice problems at an earlier stage. Commission staff noted, in connection with its review, that the NYSE Rule 351 database was extremely useful and was a significant help to the staff in conducting its review. In general, NYSE Rule 351 is a broad reporting rule that requires members to report to the NYSE certain specified information that may reflect a violation of, among other things, the federal securities laws or the rules of the NYSE. In addition, NYSE Rule 351 requires members to report, on a periodic basis, statistical information regarding customer complaints. In the Report, Commission staff recommended that the NASD adopt a rule based on NYSE Rule 351 and require its members to report customer complaint information on a quarterly basis as an additional tool to aid in the identification of problem brokers.

In its rule filing, the NASD expressed concern that critical material information identified in the proposed rule, such as reports on statutory disqualifications, internal disciplinary actions, and quarterly statistical data regarding customer complaints received by a member is not currently required by Form U–4 or other forms to be reported to the NASD. The NASD believes, therefore, that the affirmative obligation of members to provide the NASD with notice of certain events concerning member firms or their associated persons will significantly enhance the NASD's ability to quickly identify and take appropriate action against problem representatives.

The proposed rule change is similar to NYSE Rule 351. The Rule will require a member to file a report with the NASD when any of 10 different specified events occur. These events range from situations where a court, government agency, or SRO has determined that there has been a violation of the securities laws, to circumstances where a firm has received a written customer complaint alleging theft or misappropriation of funds or securities, or forgery. The rule also will require a person associated with a member to promptly report the existence of any of the ten events to the member. Moreover, the rule will require a member to report to the NASD statistical and summary information regarding written customer complaints received by the member or relating to the firm or any of its associated persons. The reporting requirements of the proposed rule will not apply to members that are subject to similar reporting requirements of another SRO. For example, NASD members that are also members of the NYSE will not be subject to the NASD's rule.

The Commission has determined to approve the NASD's proposal. The Commission finds that the rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD, including the requirements of Sections 15A(b) (6) and (7) of the Act.[6] Section 15A(b)(6) requires, in part, that the rules of a national securities association be designed to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; and to protect investors and the public interest. Section 15A(b)(7) requires that the rules of a national securities association provide that its members and persons associated with its members shall be appropriately disciplined for violation of any provision of the Act, the rules or regulations thereunder, or the rules of the association. The Commission believes that the proposed rule will provide important regulatory information that will assist in the detection and investigation of sales practice violations. This, in turn, should assist the NASD in carrying out its disciplinary responsibilities as well as assist it in protecting investors and the public from fraudulent and manipulative acts and practices. As noted above, the Commission itself found such information extremely useful in its review of sales practice abuses.

It is Therefore Ordered, pursuant to Section 19(b)(2) of the Act,[7] that the proposed rule change SR–NASD–95–16 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

BILLING CODE 8010-01-M

[Rel. No. IC–21347; 812–9560]

London Pacific Life & Annuity Company, et al.; Notice of Application

September 12, 1995.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: London Pacific Life & Annuity Company (the "Company"), London Pacific Financial and Insurance Services (the "Distributor"), and LPLA Separate Account One (the "Separate Account"); on behalf of themselves and other separate accounts that the Company or the Distributor may establish to support individual variable deferred annuity contracts issued by the Company ("Future Accounts" and, together with the Separate Account, the "Accounts").

RELEVANT ACT SECTIONS: Order requested under section 6(c) of the Act that would exempt applicants from sections 26(a)(2)(C) and 27(c)(2) of the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit them to deduct a mortality and expense risk charge and a distribution charge from the assets of the Accounts, in connection with individual variable deferred annuity contracts.

FILING DATES: The application was filed on March 30, 1995, and amended on August 23, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 10, 1995, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street N.W., Washington, D.C. 20549. Applicants: 3109 Poplarwood Court, Raleigh, North Carolina 27604.

FOR FURTHER INFORMATION CONTACT: Sarah A. Buescher, Staff Attorney, at (202) 942–0573, or C. David Messman, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Company is a stock life insurance company organized in North Carolina and is authorized to sell life insurance and annuities in forty states and the District of Columbia.

2. The Separate Account is a segregated asset account established by the Company to fund certain individual variable deferred annuity contracts to be issued by the Company (the "Contracts"). In the future, the Company may issue other variable annuity contracts that are materially similar to the Contracts ("Future Contracts").

3. The Separate Account is registered as a unit investment trust under the Act. The Separate Account is divided into subaccounts. Each subaccount will invest in the shares of a portfolio of LPT Variable Insurance Series Trust (the "Trust"). The Trust is registered as an open-end management investment company under the Act. In the future, the Company may create additional subaccounts.

4. The Distributor will serve as the distributor of the Contracts. The Distributor is registered under the Securities Exchange Act of 1934 as a broker-dealer and is a member of the National Association of Security Dealers, Inc.

5. The Contracts would be available for individuals in retirement plans that may or may not qualify for federal income tax advantages. The Contracts require a minimum initial contribution of $10,000, except for Individual Retirement Annuities, which require a $1,000 minimum initial contribution. The minimum subsequent contribution is $1,000, or $100 if the owner elects the periodic investment plan option. Contract owners may allocate contributions to one or more subaccounts of the Separate Account and to the fixed account.

6. The Contracts provide for different guaranteed death benefits, depending on the age of the Contract owner and the maturity date. If the Contract owner or the oldest joint owner dies before age 75 and during the accumulation period, the death benefit is equal to the greater of the following: (a) the "Adjusted Contribution," which is the initial contribution increased for subsequent contributions and reduced for subsequent partial withdrawals in the same proportion that the Contract value was reduced on the date of the withdrawal; (b) the Contract value determined as of the end of the valuation period during which the Company receives both due proof of death and an election of the payment method; or (c) the Contract value on the most recent seven year Contract anniversary or the Adjusted Contributions as of the most recent seven year Contract anniversary, whichever is greater. This amount is increased for subsequent contributions and reduced for subsequent partial withdrawals in the same proportion that the Contract value was reduced on the date of the withdrawal. If the owner or oldest joint owner dies on or after age 75, but before age 85 and during the accumulation period, the death benefit will follow the same formula as above and will be subject to any applicable Contingent Deferred Sales Charge ("CDSC") determined at the time the death benefit is paid. If the Contract owner or oldest joint owner dies on or after age 85 and during the accumulation period, the death benefit will be the Contract value determined as of the end of the valuation period during which the Company receives due proof of death and an election for the payment method, less any applicable CDSC determined at the time the death benefit is paid.

7. The Contract owner may transfer all or part of the owner's interest in a subaccount or the fixed account. If more than the number of free transfers have been made in a Contract year, the Company will deduct a Transfer Fee for each subsequent transfer.

8. If all or a portion of an owner's unliquidated (not previously surrendered or withdrawn) contribution is withdrawn within the first seven Contract years, applicants will assess a CDSC. The amount of the CDSC is as follows:

Contract year in which withdrawal occurs	Charge as percentage of amount withdrawn
1	7
2	7
3	6
4	5
5	4
6	3
7	2
8 and after	0

The Company may issue other Contracts in the future which will not impose a CDSC. Once each Contract year, Contract owners may withdraw up to 10% of their unliquidated contributions without incurring a CDSC.

9. The Company will deduct an annual contract maintenance charge of $36 each Contract year. No contract maintenance charge is payable if the Contract value in the Separate Account and the fixed account is greater than or equal to $50,000 on the Contract anniversary. The Company also will deduct an administration charge from the assets of the Separate Account at an annual rate of .15%

10. Applicants represent that the annual contract maintenance charge and the asset-based administration charge will not increase during the life of the Contracts. In addition, applicants represent that the charges represent reimbursement for the expenses expected to be incurred over the life of the Contracts, and applicants do not intend to profit from the charges. Applicants will rely on rule 26a–1 under the Act to deduct these charges.[1]

11. The Company proposes to deduct a distribution charge at an annual rate of .10% of the average daily net asset value of each subaccount. This charge and the CDSC would compensate the Company for the costs associated with the distribution of the Contracts. The Company does not intend to profit from this charge, and the Company would not increase this charge. The Company would monitor the performance of the Separate Account to ensure that with respect to any Contract owner the cumulative sum of the distribution charge and the CDSC would not exceed 9% of the total contributions paid.

12. The Company proposes to deduct a daily mortality and expense risk charge of 1.25%. Of that amount, approximately .25% is for mortality risk and 1.00% is for expense risk. The Company assumes the mortality risk that annuitants may live for a longer period than estimated when the guarantees in the Contract were established, thus requiring the Company to pay out more in annuity income than it had planned. The Company also assumes a mortality risk in that it may be obligated to pay a death benefit, in excess of the Contract value. The expense risk assumed by the Company is that the other fees may be insufficient to cover the actual cost of administering the Contracts.

13. If the mortality and expense risk charge is insufficient to cover the actual cost of the risks, the Company will bear the shortfall. Conversely, if the charge is more than sufficient, the excess will be profit to the Company and will be available for any proper corporate purpose, including payment of distribution expenses.

14. If the premium taxes are applicable to a Contract, they may be deducted when incurred. Currently, the Company pays premium taxes when incurred, and deducts the tax upon withdrawal, payment of a death benefit, or purchase of an annuity under the Contract.

Applicants' Legal Analysis

1. Applicants request an exemption pursuant to section 6(c) from sections 26(a)(2)(C) and 27(c)(2) to the extent necessary to permit the deduction from the Separate Account and Future Accounts of the distribution charge and the mortality and expense risk charge. Sections 26(a)(2)(C) and 27(c)(2), in relevant part, prohibit a registered unit investment trust, its depositor or principal underwriter, from selling periodic payment plan certificates unless the proceeds of all payments, other than sales loads, are deposited with a qualified bank and held under arrangements which prohibit any payment to the depositor or principal underwriter except a reasonable fee, as the Commission may prescribe, for performing bookkeeping and other administrative duties normally performed by the bank itself.

2. Section 6(c) authorizes the Commission to exempt any person from any provision of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

3. Applicants also request relief with respect to Future Contracts. Applicants present that the terms of the relief requested with respect to any Future Contracts are consistent with the standards of section 6(c). Applicants represent that additional requests for exemptive relief would present no issues under the Act not already addressed in this application, and that investors would not receive any benefit or additional protections thereby.

4. Applicants represent that the requested relief is appropriate in the public interest, because it would promote competitiveness in the variable annuity contract market by eliminating the need for applicants to file redundant exemptive applications, thereby reducing their administrative expenses and maximizing the efficient use of resources. The delay and expense involved in repeatedly seeking exemptive relief would reduce applicants' ability effectively to take advantage of business opportunities as they arise.

5. Applicants represent that the distribution charge is an appropriate method to help defray the Company's costs associated with the sale of the Contracts. Applicants will describe the purpose of the distribution charge in the prospectus and applicants will state in the perspectus that the staff of the SEC deems the distributions charge to constitute a deferred sales charge.

6. Applicants represent that the 1.25% mortality and expense risk charge is within the range of industry practice for comparable variable annuity contracts. This representation is based on an analysis of the mortality risks, the expense risks, estimated costs, and industry practice. The Company will maintain and make available to the SEC upon request a memorandum setting forth in detail the products analyzed and the methodology and results of applicants' analysis.

7. Prior to relying on any exemptive relief granted herein with respect to Future Contracts, applicants will determine that the mortality and expense risk charges will be within the range of industry practice for comparable contracts, and/or reasonable in relation to the risks assumed by the Company. The Company will maintain and make available to the SEC upon request a memorandum setting forth the basis of such conclusion.

8. The Company acknowledges that distribution expenses may in part be financed by profits derived from the mortality and expense risk charges. The Company has concluded that there is a reasonable likelihood that the proposed distribution financing arrangement will benefit the Separate Account and the Contract owners. The Company will maintain and make available to the SEC upon request a memorandum setting forth the basis of such conclusion.

9. Prior to relying on any exemptive relief granted herein with respect to Future Contracts or Future Accounts, applicants will determine that there is a reasonable likelihood that the distribution financing arrangement will benefit the Accounts and their investors. The Company will maintain and make available to the SEC upon request a memorandum setting forth the basis of such conclusion.

10. The Separate Account and Future Accounts will invest in a management investment company that has adopted a plan pursuant to rule 12b–1 under the Act only if that Company has undertaken to have such plan formulated and approved by its board of directors, a majority of whom are not "interested persons" of the company within the meaning of section 2(a)(19) of the Act.

---

[1] Rule 26a–1, allows for payment of a fee for bookkeeping and other administrative expenses provided that the fee is no greater than than the cost of the services provided, without profit.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC–21344; File No. 812–9472]

The Northwestern Mutual Life Insurance Company, et. al.

September 11, 1995.

AGENCY: Securities and Exchange Commission (the "Commission" or the "SEC").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: The Northwestern Mutual Life Insurance Company ("Northwestern"), Northwestern Mutual Variable Life Account ("Account") and Northwestern Mutual Investment Services, Inc. ("NMIS").

RELEVANT 1940 ACT SECTIONS: Order requested under Section 6(c) of the 1940 Act for exemptions from: the provisions of, and the rules under, the 1940 Act—other than Sections 7 and 8(a)—specified in Rule 6e–2(b) thereunder; and the provisions of Sections 2(a)(32), 2(a)(35), 12(b), 22(c), 26(a)(1), 26(a)(2), 27(a)(1), 27(c)(1), 27(c)(2) and 27(d) of the 1940 Act, subparagraphs (b)(1), (b)(12), (b)(13)(i), (b)(13)(ii), (b)(13)(iii), (b)(13)(iv), (b)(13)(v), (c)(1) and (c)(4) of Rule 6e–2, and Rules 12b–1(a)(1) and 22c–1 under the 1940 Act.

SUMMARY OF THE APPLICATION: Applicants seek an order permitting them to offer and sell certain scheduled premium variable life insurance policies ("Policies") that provide for the following: a death benefit which may include a portion which is not guaranteed for the lifetime of the insured; premiums, the payment of which may be suspended in defined circumstances; optional unscheduled additional premiums; both a contingent deferred sales charge and a sales charge deducted from premiums, neither of which is subject to refunds; deduction of an administrative surrender charge on lapse or surrender; deduction from the Policy's account value of cost of insurance charges, charges for substandard risks and incidental insurance benefits, and minimum death benefit guarantee risk charges; values and charges based on the Commissioners 1980 Standard Ordinary Mortality Tables (the "1980 CSO Tables"); the deduction from premium payments of an amount that is reasonably related to Northwestern's increased federal tax burden resulting from the application of Section 848 of the Internal Revenue Code of 1986, as amended; the holding of mutual fund shares funding the Account in an open account arrangement, without a trust indenture or use of a trustee; and the sale of mutual fund shares to the Account without the use of an underwriter for the mutual fund.

FILING DATE: The application was filed originally on February 8, 1995. An amended and restated application was filed on September 7, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the exemption will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the SEC and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 6, 1995, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, c/o The Northwestern Mutual Life Insurance Company, 720 East Wisconsin Avenue, Milwaukee, WI 53202, Attn: John M. Bremer, Senior Vice President, General Counsel and Secretary.

FOR FURTHER INFORMATION CONTACT: Patrice M. Pitts, Special Counsel, or Wendy Finck Friedlander, Deputy Chief, Office of Insurance Products (Division of Investment Management), at (202) 942–0670.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the Public Reference Branch of the SEC.

Applicants' Representations

1. Northwestern, a mutual life insurance company organized under the laws of Wisconsin, is licensed to do business in all of the states and the District of Columbia.

2. In 1983, Northwestern established the Account to fund the Policies. The Account is organized as a separate account under Wisconsin law, and is registered as a unit investment trust under the 1940 Act.

3. The Account has nine separate divisions ("Divisions"), each of which invests solely in a corresponding portfolio ("Portfolio") of Northwestern Mutual Series Fund, Inc. ("Fund"), an open-end management company registered under the 1940 Act. Shares of each portfolio are purchased by Northwestern for the corresponding Account Division at net asset value.

4. NMIS, a wholly owned subsidiary of Northwestern, serves as investment adviser to the Fund and underwriter for the Policies. NMIS is registered as a broker-dealer under the Securities Exchange Act of 1934, and is registered as an investment advisor under the Investment Advisers Act of 1940.

5. The Policy incorporates certain fundamental features characteristic of scheduled premium variable life insurance policies contemplated by Rule 6e–2, including a guarantee against lapse if specified required premiums are paid by their due dates. In addition, Policy owners will have the options of: (i) Making premium payments in excess of the required premiums, either to increase the Policy value which supports the gua[illegible] amount or to purchase var[illegible] additional insurance, or (ii) [illegible]g premium payments when th[illegible] value already is sufficient to pay future premiums.

6. The death benefit under a Policy will vary based upon investment performance of the Fund's Portfolios, subject to the minimum guarantee as provided by the Policy. The minimum guaranteed death benefit available under every Policy corresponds to the guaranteed minimum face amount of a traditional scheduled premium variable life insurance policy, and will neither increase nor decrease as long as premiums are paid when due and no Policy debt is outstanding. In addition to the minimum guaranteed feature, the death benefit may include one or more other parts: "Additional Protection" which is guaranteed for only a specified period, depending on the age and risk classification of the insured; "Variable paid-up additional insurance" which may be purchased by either paying additional premium or by applying any dividends to purchase paid-up additions; and "Excess Amount"—the amount by which Policy value exceeds what is required to support the minimum guaranteed death benefit and

Additional Protection—which reflects the payment of additional premiums or Policy dividends, or favorable investment performance. Each of these death benefit features may vary, to some degree, to reflect investment performance.

7. Partial surrenders of the Policies will be permitted so long as the Policy that remains meets the regular minimum size requirements. A partial surrender will cause the Policy to be split into two; one Policy will be surrendered, the other will continue in force on the same terms as the original Policy except that the premiums will be based on the reduced amount of insurance. The owner will receive a new Policy document. The cash value and death benefit will be proportionately reduced.

8. Premiums, dividends and most charges for the Policies follow an annualized structure, based on the Policy anniversary, with adjustment to reflect the dates on which events take place during a Policy year. The Policies permit payment of premiums as often as monthly, but Northwestern places the scheduled net annual premium in the Account on the anniversary date at the beginning of each Policy year regardless of the frequency on which premiums are being paid. Northwestern advances this amount on that date (unless the entire annual premium already has been paid), and Northwestern is reimbursed as premium payments are thereafter received from the Policy owner. Premiums paid on other than an annual basis are increased to: (i) reflect the time value of money, based on an 8% interest rate; and (ii) cover the administrative costs to process the additional premium payments.

A. Deductions and Charges From Premiums

1. Northwestern will deduct from premiums 8% of each premium paid. This deduction is for sales expenses (4.5%), state premium taxes (2.25%), and a federal deferred acquisition cost tax charge (1.25%).

2. An annual Policy fee of up to $84.00 is deducted; Northwestern expects to reduce the deduction to $60.00 after the first ten years.

3. For the minimum guaranteed death benefit there is an annual charge of $0.12 per $1,000 of insurance, for the guarantee that the amount of the death benefit will not be reduced if the net rate of return is less than the 4% rate assumed.

4. An annual administrative expense charge of $0.12 per $1,000 of minimum guaranteed death benefit and Additional Protection will be deducted for the first ten years. Northwestern expects to waive the charge thereafter. This charge is for issuance expenses (other than sales expenses) which tend to vary with Policy amount.

5. Any extra premium charged for insureds who do not qualify for one of the three best underwriting classifications, and any premium for additional benefits, also are deducted before determining the net premium to be placed in the Account.

B. Deductions and Charges From Policy Value

1. While payment of premiums is suspended,[1] a portion of the annual charges which ordinarily would be deducted from premiums will be deducted instead from Policy value. This deduction also will be made each year on the Policy anniversary.

2. Northwestern will deduct cost of insurance charges from the Policy value and from the value of any paid-up additional insurance. Generally, these charges are assessed on each Policy anniversary at rates that do not exceed those prescribed in the 1980 CSO Tables.

3. The Policy value also will be reduced by any surrender charges, administrative charges, or decrease in Policy debt that may result from a withdrawal, a decrease in the face amount of insurance, or a change to variable benefit paid-up insurance.

C. Deductions and Charges From Assets of the Account and the Fund

1. Northwestern will assess the daily mortality and expense risk charge at an effective rate of 0.6% per annum of the Account assets attributable to the Policy. This charge is for the (mortality) risk that insureds may live for shorter periods of time than estimated, and for the (expense) risk that costs of issuing and administering the Policies may be higher than estimated.

2. Total Fund expenses for investment advisory and other services provided to the Fund will be assessed on a daily basis. These expenses will vary by portfolio, and currently fall in the approximate range of 0.22% to 1.0% of assets, on an annual basis.

D. Transaction Charges

1. Twenty-five dollars ($25.00) may be deducted from the Policy value upon each withdrawal of excess value or each transfer of invested amounts among the Account Divisions. These charges are designed to defray only the estimated costs of effecting the transactions. Currently, Northwestern is waiving these charges.

2. Northwestern will assess a charge for the administrative costs incurred in processing a partial surrender. Current estimates place this charge at $250.

E. Surrender Charges

1. Surrender charges are deducted from the Policy value and will reduce the Policy proceeds if a Policy is surrendered before the premium due at the beginning of the fifteenth Policy year has been paid. These charges include the administrative surrender charge for issue expenses, and the premium surrender charge for sales expenses. Both of these surrender charges are based on the minimum annual premium for the minimum guaranteed death benefit and the Additional Protection, excluding any amount for extra mortality benefits or for additional Policy benefits.

2. An administrative surrender charge may be deducted if the Policy is surrendered or lapses in the first ten (10) Policy years. This charge provides partial compensation for estimated administrative expenses, such as the cost of collecting and processing premiums, processing applications, conducting medical examinations, establishing Policy records, determining insurability and assigning the insured to a risk classification, and issuing the Policy. These expenses exclude any costs properly attributable to sales or distribution activity. The maximum administrative surrender charge is $216, plus $1.08 per $1,000 of the face amount of insurance. This charge decreases to zero after the first ten (10) Policy years.

3. Northwestern will deduct a premium surrender charge, for sales expenses, upon surrender or lapse of a Policy during the first fifteen (15) Policy years. The premium surrender charge is a percentage of the annual premium for the Policy face amount (including a term insurance premium for the portion which is not guaranteed for the lifetime of the insured), reduced proportionately if total premiums actually paid are less than those annual premiums due during the first five (5) Policy years.

4. A deduction from the Policy proceeds for a proportionate part of the surrender charges will be made if a partial surrender takes place before the premium due at the beginning of the fifteenth Policy year has been paid.

F. Deduction of Charge for Section 848 Deferred Acquisition Costs

1. Northwestern will deduct a charge equal to 1.25% of each premium payment to cover the estimated cost of

---

[1] Payment of premiums may be suspended, at the Policyowner's option, when certain conditions are met.

its increased federal tax burden related to receipt of premiums in connection with the Policies. This increased federal tax burden results from Section 848 of the Internal Revenue Code of 1986 (as amended), which was enacted in 1990 to modify the federal income taxation of life insurance companies. Section 848 requires life insurance companies to capitalize and amortize, over a period of ten years, part of their general expenses for the current year. Under prior law, these expenses were deductible in full from the current year's gross income.

2. The amount of deductions that would have to be amortized over ten years rather than deducted in the year incurred is a percentage of the current year's net premiums received in connection with certain types of insurance contracts. The percentage varies, depending on the type of insurance contract involved, according to a schedule set forth in Section 848(c)(1).

3. In effect, Section 848 accelerates the realization of income from insurance contracts covered by that section and, accordingly, accelerates the payment of taxes on the income generated by those contracts. Consequently, taking into account the time value of money, the tax burden of the insurance company related to those contracts is increased. Because the amount of general deductions that must be capitalized and amortized is measured by premiums paid, an increased federal tax burden results from the receipt of those premiums. Applicants state that, in this respect, the impact of Section 848 can be compared to that of a state premium tax.

4. The Policies fall under the category of "specified contracts" under Section 848, so that 7.7% of the net premiums received under the Policies must be capitalized and amortized. The increased tax burden on Northwestern resulting from this requirement can be quantified as follows. For every $10,000 of new premiums received by Northwestern under the Policies in a given year, the general deductions of Northwestern are reduced by $731.50, or (a) $770 (7.7% of $10,000) minus (b) $38.50 (one-half year's portion of the ten-year amortization). Using a 35% corporate tax rate, this results in an increase in tax for the current year of $256.03. This increase in tax will be partially offset by increased deductions which will be allowed during the next ten years as a result of amortizing the remainder of the $770 ($77 in each of the following nine years and $38.50 in the tenth).

5. To the extent that capital must be used by Northwestern to satisfy its increased federal tax burden under Section 848 resulting from the receipt of premiums, such capital is not available for investment. Because the targeted rate of return for Northwestern (*i.e.*, the return Northwestern seeks on invested capital) exceeds 11%,[2] Northwestern submits that a discount rate of 11% is appropriate when calculating the present value of its future tax deductions resulting from the amortization described above. To the extent that the 11% discount rate is lower than Northwestern's actual targeted rate of return, a measure of comfort is provided that the calculation of Northwestern's increased tax burden attributable to receipt of premiums will continue to be reasonable over time, even if the corporate tax rate applicable to Northwestern is reduced, or its targeted rate of return is lowered.

6. Applying this 11% discount rate, and assuming a 35% corporate tax rate, the present value of the increased deductions amounts to a tax savings of $153.97. Thus, the present value of the increased tax burden resulting from the effect of Section 848 of each $10,000 of net premiums received under the policies is $102.06 ($256.03 minus $153.97).

7. Because state premium taxes are deductible when computing an insurance company's federal income taxes, Northwestern does not incur incremental income tax when it passes on state premium taxes to its policy owners. In contrast, federal income taxes are not deductible in computing a company's federal income taxes. Therefore, to compensate Northwestern fully for the impact of Section 848, it would be necessary to allow Northwestern to impose an additional charge which would make it whole not only for the $102.06 additional tax burden attributable to Section 848, but also for the tax on the additional $102.06 itself. This additional charge can be determined by dividing $102.06 by the complement of the 35% federal corporate income tax rate (*i.e.*, 65%) resulting in an additional charge of $157.01 for each $10,000 of net premiums, or 1.57%.

8. Tax deductions are of value to a company only to the extent that a company has sufficient gross income to take the deductions fully. Based on prior experience, Northwestern believes that it is reasonable to expect that future federal income tax deductions will be taken fully.

9. It is the judgment of Northwestern that a charge of 1.25% would reimburse it appropriately for the impact of Section 848 on its federal tax liabilities. Applicants represent that the proposed "DAC tax" charge is reasonably related to Northwestern's increased federal tax burden under Section 848, taking into account the benefit to Northwestern of the amortization permitted by Section 848 and the use of an 11% discount rate in computing the future deductions resulting from such amortization, such rate being no greater than Northwestern's targeted rate of return.

Applicants' Legal Analysis and Conclusions

Applicants request exemptions pursuant to Section 6(c) of the 1940 Act from: the provisions of, and those rules under, the 1940 Act—other than Sections 7 and 8(a)—specified in Rule 6e–2(b) thereunder; Sections 2(a)(32), 2(a)(35), 12(b), 22(c), 26(a)(1), 26(a)(2), 27(a)(1), 27(c)(1), 27(c)(2) and 27(d) of the 1940 Act; and subparagraphs (b)(1), (b)(12), (b)(13)(i), (b)(12)(ii), (b)(13)(iii), (b)(13(iv), (b)(13)(v), (c)(1) and (c)(4) of Rule 6e–2, and Rules 12b–1(a)(1) and 22c–1, under the 1940 Act. Applicants seek these exemptions to the extent necessary to permit them to offer and sell the Policies.

A. Request for Exemptions Relating to Definition of "Variable Life Insurance Contract"

1. Rule 6c–3 under the 1940 Act grants exemptions from numerous provisions of the 1940 Act to separate accounts of life insurance companies that support variable life insurance policies. The exemptions provided by Rule 6c–3 are available only to registered separate accounts whose assets are derived solely from the sale of "variable life insurance contracts" which meet the definitions set forth in Rule 6e–2(c)(1) or "flexible premium variable life insurance contracts" which meet the definition set forth in Rule 6e–3(T)(c)(1) under the 1940 Act, and from certain advances made by the insurer.

2. A "variable life insurance contract" is defined in Rule 6e–2(c)(1) to include only life insurance policies which provide both a death benefit and a cash surrender value which vary to reflect the investment experience of the separate account, and which guarantee that the death benefit will not be less than an amount stated in the policy. The required guaranteed minimum death benefit need be provided only so long as

---

[2] In determining the targeted rate of return used in arriving at this discount rate, Northwestern first identified a reasonable risk-free rate of return that it could expect to earn over the long term. Northwestern then determined the premium it must earn over that risk-free rate of return given the inherently risky nature of the insurance products it sells. Applicants represent that such factors are appropriate to consider in determining the targeted rate of return.

premiums are duly paid in accordance with the terms of the policy.

3. The death benefit will vary with investment performance when the value is sufficiently large that, in order to qualify the Policy as life insurance for federal income tax purposes, the death benefit must be increased. This could happen, for example, because of very favorable investment performance, the payment of additional premiums, or both. In addition, to some degree, each of the possible additional components of the death benefit—*i.e.*, the Additional Protection, the Variable paid-up additional insurance, and Excess Amount—also will vary to reflect investment performance.

4. Applicants submit that the death benefit under the Policy varies to reflect investment experience within the meaning of Rule 6e–2(c)(1). Applicants concede, however, that the death benefit under the Policy is not precisely the type of variable death benefit contemplated when Rule 6e–2 was adopted, and that the Policy contains other provisions that are not specifically addressed in Rule 6e–2. Accordingly, Applicants request exemptions from the definition of "variable life insurance contract" in Rule 6e–2(c)(1) and from all sections of and rules under the 1940 Act—other than Sections 7 and 8(a)—specified in Rule 6e–2(b), under the same terms and conditions applicable to a separate account that satisfies the conditions set forth in Rule 6e–2(a), and to the extent necessary to permit the offer and sale of the Policy in reliance on Rule 6e–2, except as otherwise set forth in the application.

5. Applicants submit that the definition of "variable life insurance contract" in Rule 6e–2(c)(1) was drafted at a time when less flexibility regarding premium payments and other policy features were offered than subsequently have been permitted. The Policy provides considerable latitude for the purchaser to select the desired combination of minimum guaranteed death benefit, Additional Protection, and Variable paid-up additional insurance. While such a choice may not have been contemplated when Rule 6e–2 was drafted, Applicants submit that purchasers are well served by the opportunity to choose a combination of features which they believe suits their own need with respect to the relationship of cash value, death benefit and investment performance.

6. Applicants further submit that the considerations that led the Commission to adopt Rules 6c–3 and 6e–2 apply equally to the Account and the Policy, and that the exemptions provided by those rules should be granted to Applicants on the terms specified in those rules, except to the extent that further exemption from those terms is specifically requested.

B. Request for Exemptions Relating to Sales Charges

1. Sections 26(a)(2) and 27(c)(2) may be construed to require that the proceeds of all payments under a Policy be deposited in the Account and that no payment be made from the Account to Northwestern or any affiliated person of Northwestern, except for bookkeeping and other administrative services. The premium surrender charge (for sales expenses) may be deemed inconsistent with the foregoing provisions, to the extent that the deduction from the Policy value would constitute payment for an expense not specifically permitted. Applicants request exemptions from Sections 26(a)(2) and 27(c)(2) to the extent necessary to permit the premium surrender charge to be deducted upon surrender or lapse of a Policy, as described in the application.

2. Section 2(a)(35) and Rules 6e–2(b)(1) and 6e–2(c)(4) may be construed to contemplate that the sales charge for a variable life insurance policy will be deducted from premiums. The deduction of a premium surrender charge under the Policies may be deemed inconsistent with those provisions. Applicants request exemptions from Section 2(a)(35) and Rules 6e–2(b)(1) and 6e–2(c)(4), to the extent necessary to permit part of the Policy's sales charge to be deducted from premium payments, and part as a surrender charge.

3. Applicants submit that Rule 6e–2(c)(4) may be construed to comprehend a sales charge imposed on other than premiums. This is because the definition is an intellectual construct rather than a reflection of the actual methodology of administering variable life insurance policies, referring in paragraphs (i) and (ii), for example, to other amounts that are *not* deducted from premiums.

4. Section 27(a)(1) and Rule 6e–2(b)(13)(i) may be construed to contemplate that the sales charge under a policy will be deducted from premiums. Northwestern's deduction of part of its sales charge on a contingent deferred basis may be deemed inconsistent with the foregoing provisions, to the extent that the sales charge is deducted from other than premiums. Applicants request an exemption from those provisions to the extent necessary to permit part of the Policy's sales charge to be deducted from premium payments, and part to be deducted as a surrender charge.

5. In pertinent part, Sections 2(a)(32), 27(c)(1), and 27(d) prohibit Applicants from selling the Policy unless it is a "redeemable security."[3] Subparagraphs (b)(12), (b)(13)(iv), and (b)(13)(v) of Rule 6e–2 afford exemptions from Section 27(c)(1), and subparagraphs (b)(13)(iv) and (b)(13)(v) of Rule 6e–2 afford exemptions from Section 27(d), to the extent necessary for cash value to be regarded as satisfying the redemption and sales charge refund requirements of the 1940 Act. However, the exemptions afforded by subparagraphs (b)(12), (b)(13)(iv), and (b)(13)(v) of Rule 6e–2 may not contemplate a contingent deferred sales charge. Moreover, Northwestern's deduction of the premium surrender charge may be viewed as reducing the proceeds that the Policy owner would receive on surrender below the Policy owner's proportionate share of the current net assets of the Account. Applicants request an exemption from the foregoing provisions to the extent necessary to permit part of the sales charge under a Policy to be deducted from premium payments, and part to be deducted as a surrender charge.

6. Applicants represent that Rule 6e–2 was adopted at a time when less flexibility regarding premium payments and other policy features were offered than subsequently have been permitted. Because of these features, particularly premium flexibility, it is possible that the premiums actually received by the insurance company by the date of surrender or lapse of a Policy may be less than the full amount of scheduled minimum premiums paid on or before the relevant due dates. It is unclear how the technical sales load computation provisions in Rule 6e–2 apply under such circumstances, particularly with respect to the premium surrender charge.

7. Applicants submit that, although the definition of "redeemable security" found in Section 2(a)(32) does not expressly provide for the imposition of a sales charge at the time of redemption, such a charge is not necessarily inconsistent with the definition of "redeemable security." Applicants further submit that the premium surrender charge is similar to the "redemption" charge authorized in Section 10(d)(4) of the 1940 Act, and that Congress obviously intended that such a "redemption charge"—which is expressly described as a "discount from net asset value"—be deemed consistent with the concept of "proportionate share" under Section 2(a)(32).

8. Applicants submit that there will be no restriction on, or impediment to, surrender that should cause the Policy to be considered other than a redeemable security within the meaning of the 1940 Act and the rules thereunder. The Policy provides for surrender and withdrawals of excess Policy value. The prospectus for the Policy will disclose the contingent deferred nature of part of the sales charge. Upon surrender or lapse, a Policy owner will receive his or her "proportionate share" of the Account—*i.e.*, the amount of net premiums paid, reduced by the amount of all charges and increased by the amount of all return credited to the Policy.

9. Rule 22c–1, adopted pursuant to Section 22(c), prohibits Applicants from redeeming a Policy except at a price based on the current net asset value of the Policy that is next computed after receipt of the request for full or partial surrender of the Policy. Rule 6e–2(b)(12) affords exemptions from Rule 22c–1. Rules 22c–1 and 6e–2(b)(12), read together, impose requirements with respect to both the amount payable on surrender and the time as of which such amount is calculated. The proposed premium surrender charge may be deemed inconsistent with Section 22(c) and Rule 22c–1 to the extent that the sales charge can be viewed as causing a Policy to be redeemed at a price based on less than the current net asset value that is next computed after full or partial surrender of the Policy.

10. Applicants submit that the premium surrender charge will not have the dilutive effect which Rule 22c–1 is designed to prohibit because a surrendering Policy owner would receive no more than an amount equal to the cash surrender value determined pursuant to the formula set out in his or her Policy and after receipt of his or her request. Furthermore, variable life insurance policies, by nature, do not lend themselves to the kind of speculative short-term trading that Rule 22c–1 was aimed against and, even if they could be so used, the surrender charge would discourage, rather than encourage, any such trading.

11. Applicants submit that deduction of part of the sales charge as a deferred charge on surrender or lapse will be more favorable to Policy owners than deduction of the same amount of charge from premiums. First, the amount of the Policy owner's premium payment that will be allocated to the Account and be available to earn a return for the Policy owner will be greater than it would be if the sales charge were deducted from premiums. Second, the total dollar amount of sales load under a Policy is no higher than that permitted by Rule 6e–2(b)(3)(13) for a conventional scheduled premium variable life insurance policy. For a Policy owner who does not lapse or surrender in the early Policy years, the dollar amount of sales load is lower than would be permitted if taken entirely as front-end deductions from premium payments made under a Policy. Third, the cost of insurance charge imposed will be less than it otherwise would be if the same amount of sales charge were deducted from premium payments, because the allocation of a greater amount of the Policy owner's premium to the Account reduces the amount at risk (*i.e.*, the amount of death benefit less the Policy value) upon which the cost of insurance charge is based. Moreover, Applicants represent that the proposed sales load structure provides equitable treatment to both surrendering and persisting Policy owners. That is, if the insurer is not permitted to charge a sales load in the form of a contingent deferred charge, it would have to deduct the sales load entirely from premium payments, thereby charging persisting Policy owners more than may otherwise be necessary to recover the distribution costs attributable to such Policy owners.

12. The premium surrender change, although imposed on other than the premium, will cover expenses associated with the offer and sale of the Policy, just as other forms of sales loads do. Applicants submit that the mere fact that the timing of the imposition of the surrender charge may not fall neatly within the literal pattern of all provisions discussed above, does not change its essential nature as a sales charge. Moreover, Applicants represent that proposed amendments to Rule 6e–2 would permit assessment of a sales charge on a contingent deferred basis.

13. Applicants represent that the percentages of sales load never will exceed the sum of 30% of the premium payments paid for the first Policy year plus 10% of premium payments paid for the second Policy year, and will not exceed 9% of premium payments expected to be paid over the lesser of 20 years or the expected lifetime of the insured. For this reason, Applicants submit that the Policy is consistent with the principles and policies underlying the sales load limitations in Section 27(a)(2) of the 1940 Act, and Rules 6e–2 (b)(13)(i) and (b)(13)(v).

14. Applicants submit that premium and other flexibility options under the Policy are a potential benefit to Policy owners.

C. Request for Exemptions Relating to Collection of Administrative Surrender Charge

1. Although the expenses that the administrative surrender charge is designed to recover are associated with the issuance of a Policy, Northwestern will deduct the administrative surrender charge from the Policy Value—not premiums—in the event of early surrender or lapse of a Policy, and such a deduction will reduce the proceeds otherwise payable. Such a deduction of the administrative surrender charge pursuant to the Policies may be deemed to violate Sections 2(a)(32), 22(c), 27(c)(1), 27(d), and Rule 22c–1 for essentially the same reasons as the premium surrender charge might be deemed to violate those 1940 Act sections and rules. Accordingly, Applicants request exemptions from the foregoing provisions of the 1940 Act to the extent necessary to permit the deduction of the administrative surrender charge upon early surrender or lapse of a Policy.

2. Applicants submit that imposition of the administrative surrender charge is more favorable to Policy owners than a charge deducted entirely from premiums or from the Policy value over the life of the Policy. Because the reduction of the Policy owner's investment in the Account is less than it would be were the administrative surrender charge taken in full in the first Policy year, there is a larger Policy value initially earning a return for the Policy owner. In addition, for a Policy owner who does not lapse or surrender in the early Policy years, the total dollar amount of the charges for issuance and maintenance expenses is no more than Northwestern would be permitted to deduct from premium payments or by way of periodic deductions from Policy value. Also, the total dollar amount of the administrative surrender charge will be no higher than Northwestern would be permitted to deduct if this charge were in the form of a deduction from premium payments and/or from the Policy value prior to the lapse or surrender of a Policy.

3. Applicants represent that the administrative surrender charge has not been increased to take account of the time value of money (*i.e.*, the investment costs attributable to deferment of the charge) or the fact that not all Policy owners would incur the charge.

4. Northwestern does not intend to make a profit on the administrative surrender charge.

5. Administrative charges deducted in the form of a surrender charge are

---

[3] A "redeemable security," as defined in Section 2(a)(32), entitles a Policy owner to receive his or her approximate proportionate share of the current net assets of the Account upon surrender.

specifically permitted by Rule 6e–3(T)(b)(13)(iv)(C) for variable life insurance policies offered and sold in reliance on the rule. Applicants submit that the relief requested herein with respect to the administrative surrender charge under the Policies is equally appropriate.

D. Request for Exemptions Relating to Deduction of Insurance Charges From Policy Value

1. Sections 26(a)(2) and 27(c)(2) may be construed to prohibit Northwestern from deducting certain insurance charges from the Policy value. Applicants request exemptions from the foregoing sections and Rule 6e–2(b)(13)(iii)[4] to the extent necessary to permit the deduction of certain insurance charges from Policy value, as described in the application.

2. Applicants submit that the deduction of cost of insurance charges from the Policy value is fair and reasonable, and in accordance with the practice under most other variable life insurance policies.

3. Applicants further submit that deduction from the Policy value of charges for substandard risks and incidental insurance benefits also is reasonable and appropriate. If all such charges were required to be deducted solely from premiums, it would be necessary for Northwestern to: (a) reduce the premium flexibility under the Policy; and/or (b) limit further the classes of insureds for whom the Policy will be available, and limit or eliminate the kinds of rider benefits that Northwestern intends to make available.

4. Applicants submit that Rule 6e–3(T) authorizes deductions from account value for all of these insurance charges in connection with policies eligible to rely on that rule, and that proposed amendments to Rule 6e–2 would authorize deductions from account value of the risk charges for guaranteed benefits.

5. Applicants submit that their method of deducting cost of insurance charges is fair and reasonable, and consistent with general industry practice.

6. Applicants submit that charges for substandard risks and incidental insurance benefits must be deducted from Policy value, as a practical matter.

7. The Policy provides for an annual charge, based on the face amount of insurance, for the death benefit guarantee. Generally, this charge is deducted from annual premiums, but if payment of premiums is suspended, the charge will be deducted from Policy value. In addition, an annual cost of insurance charge based on the amount at risk and the attained age and risk classification of the insured is deducted from Policy value; this charge also applies to the values which support any variable paid-up additional insurance.

8. Applicants represent that the proposed method of deducting insurance charges is not designed to yield more revenues than if these charges were assessed solely against premiums.

9. Northwestern represents that these risk charges are reasonable in relation to the risks assumed under the Policy. The methodology used to support this representation is based on an analysis of the pricing structure of the Policies—including other charges, and an analysis of the various risks—including special risks arising out of provisions that allow additional and unscheduled premium payments and, in certain circumstances, suspension of premium payments. Northwestern undertakes to keep and make available to the Commission the documentation used to support this representation.

10. Northwestern further represents that there is a reasonable likelihood that the distribution financing arrangement of the Account will benefit the Account and Policy owners. Northwestern will keep and make available to the Commission on request a memorandum setting forth the basis for this representation.

11. Applicants agree that if the requested order is granted, such order will be expressly conditioned on Applicants' compliance with the following: the Account will invest only in management investment companies which have undertaken, in the event they should adopt any plan under Rule 12b–1 under the 1940 Act to finance distribution expenses, to have a board of directors, a majority of whom are not interested persons of the company, formulate and approve such plan.

E. Request for Exemptions Relating to Use of 1980 Standard Ordinary Mortality Tables

1. Section 27(a)(1) prohibits an issuer of periodic payment plan certificates from imposing a sales load exceeding 9% of the payments to be made on such certificates. Rule 6e–2(b)(13)(i) provides an exemption from Section 27(a)(1) to the extent that the sales load, as defined in Rule 6e–2(c)(4), does not exceed 9% of the payments to be made on the variable life insurance policy during the period equal to the lesser of 20 years or the anticipated life expectancy of the insured, based on the Commissioners 1958 Standard Ordinary Mortality Table (the "1958 CSO Table").

2. Rule 6e–2(c)(4), in defining "sales load," contemplates the deduction of an amount for the cost of insurance based on the 1958 CSO Table and the assumed investment return specified in the Policy. Following the adoption of Rule 6e–2, the National Association of Insurance Commissioners adopted the 1980 CSO Tables, which reflect more recent information and data about mortality. The guaranteed cost of insurance rates under the Policy are based on the 1980 CSO Tables. Applicants request exemptions from Section 27(a)(i) and Rules 6e–2(c)(1), 6e–2(b)(13)(i), and 6e–2(4) to the extent necessary to permit cost of insurance to be calculated based on the 1980 CSO Tables, for purposes of testing compliance with those rules and that statutory provision.

3. Applicants represent that proposed amendments to Rule 6e–2 would require use of the 1980 CSO Tables for purposes of Rules 6e–2(b)(13)(i) and 6e–2(c)(4), where the 1980 CSO Tables relate to the insurance rates guaranteed under an insurance policy.

4. Applicants further represent that because cost of insurance charges based on the 1980 CSO Tables generally are lower than those based on the 1958 CSO Table, lower charges and higher Policy values generally result if charges are based on the 1980, rather than the 1958, CSO Tables.

F. Request for Exemptions Relating to the DAC Tax

1. Section 2(a)(35), in pertinent part, defines "sales load" as the difference between the price of a security to the public and that portion of the proceeds from its sale that is received and invested or held for investment by the depositor, less any portion of such difference deducted for trustee's or custodian's fees or other fees that are not properly chargeable to sales or promotional activities.

2. Section 27(c)(2) prohibits a registered investment company or a depositor or underwriter for such company from making any deduction from payments made under periodic plan certificates other than a deduction for sales load. Sections 27(a)(1) and 27(h)(1) of the 1940 Act, as modified by Rule 6e–2(b)(13)(i), limit the amount of sales load that can be deducted in connection with variable life insurance policies issued in reliance on Rule 6e–2.

3. Applicants state that Rules 6e–2(b)(13)(iii) and 6e–3(T)(b)(13)(iii) each provide exemptive relief from Section 27(c)(2) to permit an insurer to deduct certain charges other than sales load, including deductions to pay the insurer's tax liabilities—imposed by any State or other governmental entity—arising as a result of its receipt of premium payments. Applicants seek relief from Section 27(c)(2) only to the extent necessary to permit deductions from premium payments received in connection with the Policies in an amount that is reasonable in relation to Northwestern's increased federal tax burden related to the receipt of such premiums. Applicants also request exemptions from Rule 6e–2(c)(4)(v) so that the proposed "DAC tax" charge is treated as other than sales load for purposes of Section 27 and the provisions of Section 27 referred to in Rule 6e2.

4. The exemption requested by Applicants is necessary in order for them to rely on certain provisions of Rule 6e–2(b)(13)(i), which provides exemptions from Sections 27(a)(1)and 27(h)(1). Issuers and their affiliates may rely on subparagraph (b)(13)(i) of Rule 6e–2 only if they meet the limitations on "sales load," as defined in paragraph (c)(4) of that rule. Applicants state that these limitations may not be met if the deduction for an increase in Northwestern's federal tax burden is included in sales load.

5. Rule 6e–2(c)(4) defines "sales load" as the excess of premium payments over certain itemized charges and adjustments. Applicants submit that a deduction for an insurer's increased federal tax burden as described above does not fall squarely into any of those itemized charges or adjustments. Arguably, then, such a deduction may be treated as "sales load" under a literal reading of Rule 6e–2(c)(4).

6. Applicants submit that there is no public policy reason for including deductions made to pay federal taxes in sales load, nor is there any language in the releases in which the Commission adopted Rule 6e–2 or adopted and amended Rule 6e–3(T) suggesting that the exclusion from the definition of sales load of deductions for tax liabilities attributable to premiums was based on the type of governmental entity imposing the taxes.

7. Applicants submit that the public policy underlying Rule 6e–2(b)(13)(i), like that underlying Sections 27(a)(1) and 27(h)(1), is to prevent excessive sales loads from being charged in connection with the sale of periodic payment plan certificates. Applicants submit that the treatment of a tax burden charge attributable to premium payments as sales load would not further this objective because such a deduction bears no relation to the payment of sales commissions or other distribution expenses. Applicants state that the Commission has concurred with this conclusion by excluding deductions for state premium taxes from the definition of "sales load" in Rule 6e–2(c)(4).

8. Applicants assert that the source for the definition of sales load found in Rule 6e–2(c)(4) supports this analysis. Applicants submit that the Commission's intent in adopting subparagraph (c)(4) of Rule 6e–2 was to tailor the general terms of Section 2(a)(35) to variable life insurance contracts. Just as the percentage limits of Sections 27(a)(1) and 27(h)(1) depend on the definition of sales load in Section 2(a)(35) for their efficacy, the percentage limits in subparagraph (b)(13)(i) of Rule 6e–2 depend on subparagraph (c)(4). Applicants submit, therefore, that Rule 6e–2(c)(4) does not depart, in principle, from Section 2(a)(35).

9. Applicants assert that Section 2(a)(35) excludes from the definition of "sales load" deductions from premiums for "issue taxes." Applicants submit that this suggests that excluding deductions made to pay an insurer's costs attributable to its tax obligations from the definition of "sales load" in Rule 6e–2 is consistent with the policies of the 1940 Act.

10. Applicants further submit that the reference in Section 2(a)(35) to administrative expenses or fees that are "not properly chargeable to sales or promotional activities" suggests that the only deductions intended to fall within the definition of "sales load" are those properly chargeable to such activities. Because the proposed deductions will be used to compensate Northwestern for its increased federal tax burden attributable to the receipt of premiums, and are not properly chargeable to sales or promotional activities, Applicants assert that the language in Section 2(a)(35) also indicates that not treating such deductions as sales load is consistent with the policies of the 1940 Act.

11. Applicants represent that Northwestern will monitor the reasonableness of the "DAC tax" charge to be deducted. Applicants represent, further, that the registration statement for the Policies will: (a) Disclose the charge; (b) explain the purpose of the charge; and (c) state that the charge is reasonable in relation to Northwestern's increased federal tax burden under Section 848 resulting from the receipt of premiums. Applicants also represent that the registration statement for the Policies will contain as an exhibit an actuarial opinion as to: (a) The reasonableness of the charge in relation to Northwestern's increased federal tax burden under Section 848 resulting from the receipt of premiums; (b) the reasonableness of the targeted rate of return that is used in calculating such charge; and (c) the appropriateness of the factors taken into account in determining such targeted rate of return.

12. Applicants assert that it is proper for an insurer to deduct a charge for the tax burden attributable to premiums received from variable life insurance policies, and to exclude such a deduction from sales load, because the deduction for the insurer's increased federal tax burden is a legitimate expense of the company, and is not for sales and distribution expenses. Applicants note that the Commission has previously considered similar deductions for premium taxes in connection with its adoption of Rule 6e–2 and Rule 6e–3(T). In each case, the Commission permitted deductions for such taxes to be made and to be treated as other than sales load. Applicants assert that the proprietary of a charge for an insurers tax burden attributable to premiums received is the same whether such burden arises under state or federal law.

G. Request for Exemptions Relating to Custodianship Arrangements

1. In pertinent part, Sections 26(a)(1) and 26(a)(2) prohibit Applicants from selling the Policy unless it is issued pursuant to a trust indenture or other such instrument that designates one or more trustees or custodians, qualified as specified, to have possession of all securities in which the Account invests.

2. In pertinent part, Section 27(c)(2) may be read to prohibit Applicants from selling the Policy unless the proceeds of all purchase payments are deposited with a trustee or custodian as specified.

3. Rule 6e–2(b)(13)(iii) affords an exemption from Sections 26(a)(1), 26(a)(2), and 27(c)(2), provided that the life insurer complies, to the extent applicable, with all other provisions of Section 26 as if it were a trustee or custodian for the Account, and assuming that it meets the other requirements set forth in the rule.

4. Applicants represent that the holding of Fund shares by the Account or its depositor under an open account arrangement—without having possession of share certificates and without a trust indenture or other such instrument—may be deemed inconsistent with the foregoing provisions. Accordingly, Applicants request exemptions from Sections

---

[4] In pertinent part, Rule 6e–2(b)(13)(iii) provides an exemption from Sections 26(a)(2) and 27(c)(2), subject to certain conditions which Applicants submit that they satisfy.

26(a)(1), 26(a)(2) and 27(c)(2), to the extent necessary.

5. Applicants represent that current industry practice calls for unit investment trust separate accounts, such as the Account, to hold shares of management investment companies in uncertificated form. Applicants further represent that holding shares of underlying management investment companies in uncertificated form contributes to efficiency in the operation and sale of such shares by separate accounts, and generally saves costs.

6. Applicants note that, in contrast to the Policies (which are covered by Rule 6e–2), policies covered by Rule 6e–3(T) may rely on Rules 6e–3(T)(b)(13)(iii) (B) and (C) which, in effect, afford the exemptions requested here by the Applicants. The Commission has proposed amendments to Rule 6e–2(b)(13)(iii) to permit life insurers to hold the assets of a separate account without a trust indenture or other such instrument, and to permit a separate account organized as a unit investment trust to hold the securities of any registered investment company that offers its shares to the separate account in uncertificated form. Applicants also note that the Commission has adopted 1940 Act Rule 26a–2 which affords exemptions in connection with variable annuity separate accounts that are essentially similar to those requested here. Accordingly, Applicants presume that the Commission adopted or proposed the foregoing exemptive rules based on a determination that, where state insurance law protects separate account assets and open account arrangements foster administrative efficiency and cost savings, safekeeping of separate account assets does not necessarily depend on the presence of a trustee, custodian or trust indenture, or the issuance of share certificates.

7. Northwestern represents that: it will comply with all other applicable provisions of Section 26 of the 1940 Act as if it were a trustee or custodian for its Account (subject to the other exemptive relief requested in the application); it will file with the insurance regulatory authority of Wisconsin an annual statement of its financial condition in the form prescribed by the National Association of Insurance Commissioners—the most recent such statement indicated that Northwestern has a combined capital and surplus of at least $1 million; it is examined from time to time by the insurance regulatory authority of Wisconsin as to its financial condition and other affairs; and it is subject to supervision and inspection with respect to its separate account operations.

H. Request for Exemptions Relating to Sale of Fund Shares Without an Underwriter

1. Section 12(b) of the 1940 Act provides, in pertinent part, that it shall be unlawful for any registered open-end company to act as a distributor of securities of which it is the issuer, except through an underwriter, in contravention of such rules and regulations as the Commission may prescribe. Rule 12b–1(a)(1) provides, in pertinent part, that, except in compliance with the provisions of that rule, it shall be unlawful for a registered open-end management investment company to act as a distributor of securities of which it is the issuer, except through an underwriter.

2. Applicants request exemption from Section 12(b) and Rule 12b–1(a)(1) to the extent necessary to permit the Fund to sell the shares of its portfolios to the Account without the use of an underwriter, on the condition that Applicants not use the Fund's assets for distribution expenses unless the Fund complies with 1940 Act Rule 12b–1(b).

3. Applicants state that shares of the Fund Portfolios have been and will be sold only to the Account and to other separate accounts of Northwestern, except for the seed money shares purchased by Northwestern itself. The shares will be sold at net asset value without any sales charge or underwriting spread. Applicants represent that the Fund bears no expenses for distribution of its shares.

4. Applicants submit that, in view of the foregoing facts, no useful purpose would be served by requiring the Fund to use an underwriter for the sale of the shares of its portfolios to the Account. Direct sales of these shares to the Account would not expose the Fund to any underwriting risks, since such shares are issued only when requests for their purchase are received from the Account. Nor would the direct sales to the Account create any expenses for the Fund.

Conclusion

Applicants assert that, for the reasons set forth above, the requested exemptions meet the standards of Section 6(c) of the 1940 Act. The requested exemptions are necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

ACTION: Notice of Reporting Requirements Submitted for Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATES: Comments should be submitted within 30 days of this publication in the **Federal Register**. If you intend to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

COPIES: Request for clearance (OMB 83–1), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Submit comments to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Georgia Greene, Small Business Administration, 409 3rd Street, SW., 5th Floor, Washington, DC 20416, Telephone: (202) 205–6629.

OMB Reviewer: Donald Arbuckle, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Title: Disaster Survey Worksheet.

SBA Form No.: SBA Form 987.

Frequency: On Occasion.

Description of Respondents: Individuals, businesses and public officials within an area requesting a disaster declaration.

Annual Responses: 4,000.

Annual Burden: 333.

Dated: August 21, 1995.

BILLING CODE 8025–01–P

DEPARTMENT OF TRANSPORTAION

Federal Aviation Administration

Receipt of a Noise Compatibility Program Revision and Request for Review; Charlotte/Douglas International Airport, Charlotte, NC

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed revision to the noise compatibility program that was submitted for Charlotte/Douglas International Airport under the provisions of Title I of the Aviation Safety and Noise Act of 1979 (Pub. L. 96–193) (hereinafter referred to as "the Act") and 14 CFR Part 150 by the City of Charlotte. This revised program was submitted subsequent to a determination by the FAA that associated noise exposure maps submitted under 14 CFR Part 150 for Charlotte/Douglas International Airport were in compliance with applicable requirements effective July 11, 1989.

Upon acceptance of the Noise Exposure Maps, the FAA received the initial noise compatibility program on November 20, 1989. It was approved May 18, 1990. The proposed revision to the noise compatibility program will be approved or disapproved on or before February 19, 1996.

EFFECTIVE DATE: The effective date of the start of FAA's review is August 23, 1995. The public comment period ends October 22, 1995.

FOR FURTHER INFORMATION CONTACT: Thomas M. Roberts, Program Manager, Atlanta Airports District Office, Campus Building, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337–2747. Telephone (404) 305–7153. Comments on the revised noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed noise compatibility program revision for Charlotte/Douglas International Airport which will be approved or disapproved on or before February 19, 1996. This notice also announces availability of this program for public review and comment.

This revision will add Churches within the definitions of "public buildings" under the approved noise compatibility program Land-Use Corrective Measure No. 2 paragraph entitled "Soundproofing of Public Buildings."

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAA) Part 150 promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the noise compatibility program revision for Charlotte/Douglas International Airport, effective on August 23, 1995. It was requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act. Preliminary review of the submitted material indicates that it conforms to the requirements for submittal of noise compatibility programs, but further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before February 19, 1996.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program revision with specific reference to these factors. All comments, other than those properly addressed to the local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 617, Washington, DC 30591

Federal Aviation Administration, Atlanta Airports District Office, Campus Building, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337–2747

T.J. Orr, Aviation Director, Charlotte/Douglas International Airport, P.O. Box 19066, Charlotte, North Carolina

Questions may be directed to the individual named above under the heading, FOR FURTHER INFORMATION CONTACT.

Issued in Atlanta, Georgia, August 23, 1995.

Dell T. Jernigan,

Manager, Atlanta Airports District Office.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Intent To Prepare an Environmental Impact Statement and To Hold an Environmental Scoping Meeting for Airport Improvements at Manchester Airport, Manchester, New Hampshire

AGENCY: Federal Aviation Administration.

ACTION: Notice of public environmental scoping meeting.

SUMMARY: The Federal Aviation Administration (FAA) is issuing notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for airport improvements under consideration by the City of Manchester Department of Aviation for Manchester Airport in the City of Manchester and Town of Londonderry, New Hampshire. To insure that all significant issues related to this planning effort are identified, a public scoping meeting will be held.

FOR FURTHER INFORMATION CONTACT: John Silva, Environmental Program Manager, Federal Aviation Administration, New

England Region, Airports Division, 12 New England Executive Park, Burlington, Massachusetts 01803. Telephone no.: 617–238–7602.

SUPPLEMENTARY INFORMATION: The FAA, in cooperation with the City of Manchester Department of Aviation, will prepare an EIS on a proposal to implement a program of airfield and terminal area improvements to meet current and future safety and capacity demands.

The EIS will evaluate a range of actions, including runway and taxiway improvements for Runways 17–35 and 6–24 as well as improvements to the Terminal Complex; Air Cargo Facilities; Aircraft Rescue and Firefighting, and Maintenance/Snow Removal buildings; and Traffic and Access routes.

Comments and suggestions are invited from federal, state, and local agencies, and other interested parties, in order to ensure that a full range of issues related to the airfield and terminal area improvements under consideration are identified and addressed in the scope of work for the EIS.

PUBLIC SCOPING MEETINGS: In order to provide for both agency and public input, two scoping sessions have been scheduled on October 19, 1995. An afternoon Agency Scoping Meeting will be held for federal, state and local agencies at 1:00 pm in the 3rd floor Board Room at Manchester Airport. An evening Public Scoping Workshop for public input will be held at 5:00 pm. This meeting, to which agency personnel are invited, will be held at the Londonderry High School cafeteria (on the left side of the building), 295 Mammoth Road, Londonderry, New Hampshire.

Issued in Burlington, Massachusetts, on September 8, 1995.

John C. Silva,

Acting Manager, Airports Division, FAA, New England Region.

BILLING CODE 4910–13–M

Civil Tiltrotor Development Advisory Committee

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act Public Law (72–362); 5 U.S.C. (App. I), notice is hereby given of a meeting of the Federal Aviation Administration (FAA) sponsored Civil Tiltrotor Development Advisory Committee (CTRDAC) to be held October 11 at 10:00 a.m. The meeting will take place at the U.S. Department of Transportation, 400 7th Street, SW., Washington, DC in rooms 10234–10236.

The agenda for the fourth meeting of the CTRDAC will include: (1) discussion of the committee report; (2) identification of policy issues; (3) review of work plans/schedule; (4) other business.

Since access to the DOT building is controlled, all persons who plan to attend the meeting must notify Ms. Karen Braxton, Staff Assistant to the Designated Federal Official on (202) 267–9451 prior to close of business on October 3. Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Noncommittee members wishing to present oral statements, obtain information, or who plan to access the building to attend the meeting should also contact Ms. Braxton.

Members of the public may present a written statement to the Committee at any time.

Persons with a disability requiring special services, such as an interpreter for the hearing impaired, should contact Ms. Karen Braxton (202) 267–9451 at least seven days prior to the meeting.

Issued in Washington, DC on September 12, 1995.

Robert D. Smith,

Designated Federal Official, Civil Tiltrotor Development Advisory Committee.

[FR Doc. 95–23101 Filed 9–15–95; 8:45 am]

BILLING CODE 4910–13–M

Executive Committee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Executive Committee of the Federal Aviation Administration Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on October 10, 1995, at 1 p.m. Arrange for oral presentations by September 29, 1995.

ADDRESSES: The meeting will be held at the Aerospace Industries Association of America, 1250 Eye Street, NW., Wright Room, Washington, DC, 1 p.m.

FOR FURTHER INFORMATION CONTACT: Miss Jean Casciano, Federal Aviation Administration (ARM–25), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–9683; fax (202) 267–5075.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Executive Committee to be held on October 10, 1995, at the Aerospace Industries Association of America, 1250 Eye Street, NW., Wright Room, Washington, DC, 1 p.m. The agenda will include:

- A vote on the proposed recommendation developed by the Flight Data Recorder Working Group.
- Other business.

Copies of the proposed recommendation will be available to interested persons prior to the meeting. A copy may be obtained by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT.**

Attendance is open to the interested public but will be limited to the space available. The public must make arrangements by September 29, 1995, to present oral statements at the meeting. The public may present written statements to the executive committee at any time by providing 25 copies to the Executive Director, or by bringing the copies to him at the meeting. In addition, sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting. Arrangements may be made by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT.**

Issued in Washington, DC, on September 12, 1995.

Chris A. Christie,

Executive Director, Aviation Rulemaking Advisory Committee.

[FR Doc. 95–23092 Filed 9–15–95; 8:45 am]

BILLING CODE 4910–13–M

Research, Engineering And Development Advisory Committee, Challenge 2000 Subcommittee

Pursuant to section 10(A)(2) of the Federal Advisory Committee Act (Public Law 92–463; 5 U.S.C. App.2), notice is hereby given of a meeting of the Challenge 2000 Subcommittee of the Federal Aviation Administration (FAA) Research, Engineering and Development Advisory Committee to be held Friday, September 29, 1995, 9 a.m. to 5 p.m. The meeting will take place at the FAA, 800 Independence Avenue, SW., Rooms 5 BC, Washington, DC.

This will be an informational meeting for the subcommittee members, with briefings on both the FAA certification process and comparative briefings from other safety-critical industries such as nuclear power and pharmaceutical industries.

Attendance is open to the interested public but limited to the space available. With the approval of the subcommittee chairman, members of the public may present oral statements at the meeting. Persons wishing to present oral statements, obtain information, or attend the meeting should contact Ms. Nancy Lane, AIR–510, 800 Independence Ave., SW., Washington, DC at (202) 267–7061, who will serve as the FAA Designated Federal Official to the Subcommittee.

Members of the public may present a written statement to the Subcommittee at any time.

Issued in Washington, DC, on September 12, 1995.

Randall J. Stevens,

Acting Manager, Research Division.

BILLING CODE 4910–13–M

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 CFR Part 236

Pursuant to Title 49 CFR Part 235 and 49 U.S.C. App. 26, the following railroads have petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of Title 49 CFR Part 236 as detailed below.

Block Signal Application (BS–AP)–No. 3365

Applicant: Consolidated Rail Corporation, Mr. J.F. Noffsinger, Chief Engineer—C&S, 2001 Market Street, P.O. Box 41410, Philadelphia, Pennsylvania 19101–1410.

Consolidated Rail Corporation (Conrail) seeks approval of the proposed discontinuance and removal of "CP Esplen" Interlocking, milepost 2.4, on Conrail's Mon Line, Pittsburgh Division, and discontinuance of the Form D Control System on the single main track Carnegie Secondary, near Pittsburgh, Pennsylvania. The proposed changes are associated with track reconfiguration and extension of the No. 2 main track southward to "CP Beck" on the Mon Line. The proposed changes include: conversion of the Carnegie Secondary to an industrial track; conversion of old No. 1 power-operated switch to hand operation; removal of signals 3E, 3S, 22N, and 21N; installation of new "CP 2" near milepost 3.0 on the Mon Line; and installation of an electrically lock hand-operated switch north of "CP 2" for the industrial track connection on track No. 2.

The reason given for the proposed changes is to facilitate the extension of track No. 2, which is necessitated by increased coal traffic on the Mon Line.

BS–AP–No. 3366

Applicant: Burlington Northern Railroad Company, Mr. William G. Peterson, Director of Signal Engineering, 1900 Continental Plaza, Fort Worth, Texas 76102–5304.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system on the two main tracks, near Alliance, Nebraska, on the Alliance Division, Angora Subdivision, consisting of the discontinuance and removal of "Prairie" control point, milepost 3.1 and the reduction of the traffic control system limits from "Prairie", milepost 3.1 to "South Alliance", milepost 4.53.

The reason given for the proposed changes is to make better use of signals in a traffic congested area.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and contain a concise statement of the interest of the protestant in the proceeding. The original and two copies of the protest shall be filed with the Associate Administrator for Safety, FRA, 400 Seventh Street, S.W., Washington, D.C. 20590 within 45 calendar days of the date of issuance of this notice. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, D.C. on September 12, 1995,

Phil Olekszyk,

Deputy Associate Administrator for Safety Compliance and Program Implementation.

[FR Doc. 95–23115 Filed 9–15–95; 8:45 am]

BILLING CODE 4910–06–P

National Highway Traffic Safety Administration

[Docket No. 95–77; Notice 1]

Cantab Motors, Ltd.; Receipt of Application for Decision of Inconsequential Noncompliance

Cantab Motors, Ltd. (Cantab) of Purcellville, Virginia, had determined that some of its vehicles fail to comply with the automatic restraint system requirements of 49 CFR 571.208, Federal Motor Vehicle Safety Standard (FMVSS) No. 208, "Occupant Crash Protection," and has filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports." Cantab has also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—"Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of an application is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the application.

Paragraph S4.1.4 of FMVSS No. 208 requires that vehicles manufactured on or after September 1, 1989, be equipped with a restraint system at each front outboard designated seating position that meets the standard's frontal crash protection requirements by means that require no action by vehicle occupants. This type of system is referred to as an automatic restraint system.

The agency granted an exemption for Cantab to manufacture vehicles without automatic restraints between May 16, 1990 and May 1, 1993. Cantab imported and manufactured nine vehicles without automatic restraint systems during this time period. However, after the exemption had expired, Cantab imported and manufactured nine more vehicles without automatic restraint systems. Of these nine vehicles, seven entered the U.S. during 1994 and two in 1995. These vehicles all meet the requirements of Standard No. 208 prior to the implementation of automatic restraint requirements. Cantab has subsequently applied for an exemption from the automatic restraint requirements for this type of vehicle. Notice of receipt of its application was published on July 14, 1995 [60 FR 36328].

Cantab supports its application for inconsequential noncompliance with the following:

> [Cantab] submits that, during the entire time period subsequent to its initial grant of exemption in May of 1990, it has imported and manufactured a total of eighteen cars. Nine of these were imported during the period of exemption, nine subsequent to its lapsing and prior to [Cantab's] submission of a second application for exemption. Each of these eighteen cars were identically constructed to meet all applicable FMVSS, including those of FMVSS 208 prior to implementation of the automatic restraint requirements. During this time, [Cantab] has made substantial progress in the development of a dual air bag system and expects to have it installed and operative within a year.
>
> [Cantab] has previously suggested to NHTSA in its [May 10, 1995] petition for exemption, the unusual nature of its vehicles—cars driven by enthusiasts for pleasure, rather than daily for business commuting or on long trips, by people who own two or more other passenger cars for such purposes.
>
> [Cantab] respectfully suggests that its nine noncomplying cars, representing a minuscule proportion of the total number of motor vehicles sold and operated in the U.S. during the period of 1994–1995, operated as noted above, constructed with well-proven safety systems, would not materially affect overall motor vehicle safety, and that their operation would be in the public interest and would be consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

Interested persons are invited to submit written data, views, and arguments on the application of Cantab, described above. Comments should refer to the docket number and be submitted to: Docked Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, D.C., 20509. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the application is granted or denied, the notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: October 18, 1995.

(15 U.S.C. 1417; delegations of authority at 49 CFR 1.50 and 501.8)

Issued on: September 12, 1995.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

[FR Doc. 95–23055 Filed 9–15–95; 8:45 am]

BILLING CODE 4910-59-M

[Docket No. 95–78; Notice 1]

Ford Motor Company; Receipt of Application for Decision of Inconsequential Noncompliance

Ford Motor Company (Ford) of Dearborn, Michigan has determined that some of its vehicles fail to comply with the display identification requirements of 49 CFR 571.101, Federal Motor Vehicle Safety Standard (FMVSS) No. 101, "Controls and Displays," and has filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Report." Ford has also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—"Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of an application is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the application.

In Footnote 3 to Table 2 in Standard No. 101, it is specified that, "[i]f the odometer indicates kilometers, then 'KILOMETERS' or 'km' shall appear, otherwise, no identification is required."

Ford manufactured approximately 300,000 vehicles (1995 model year Rangers, Explorers, Crown Victorias, and Grand Marquis, certain 1994 and 1995 Mustangs, and certain 1995 Ford-built Mazda B-Series pickup trucks) which may not comply with the display identification requirements of Standard No. 101. Within the total population of 300,000 vehicles, any number of between 24 and 124 vehicles were manufactured with an odometer that measures distance in units of kilometers but is not labeled as such as Standard No. 101 requires. Ford has already found and corrected 24 of these noncompliant odometers in service, therefore, up to 100 of them could still exist.

Ford supports its application for inconsequential noncompliance with the following:

> In Ford's judgment, this condition is inconsequential as it relates to motor vehicle safety. [Ford's] basis for this belief is that: 1) an owner of an affected vehicle will readily recognize the condition and return the vehicle to a Ford dealer for corrections; 2) even if the condition were to go undetected, the role of the odometer in alerting drivers to potential safety-related problems is minimal; and 3) no reports of accidents or injuries related to this condition are known or expected.
>
> Ford believes, as evidenced by those odometers already identified by owners, that this condition becomes obvious to an owner early in the "life" of a vehicle because of more rapid mileage accumulations, better than expected fuel economy, etc., and that an owner will seek repair for the condition through a Ford dealer. Ford will continue to remedy the condition of any of the vehicles brought to its attention at no cost to the owners, under normal warranty terms.
>
> With respect to the relationship of the odometer to safety, in past rulemaking (FR Vol. 47, No. 216 at 50497) the agency concluded that the role of the odometer in alerting drivers to potential safety-related problems is not crucial. This conclusion was among those leading to the rescission of Federal Motor Vehicle Safety Standard No. 127, Speedometers and Odometers. That standard contemplated that the purpose of the odometer requirement was twofold. First, it was to inform purchasers of used vehicles of the actual mileage of the vehicles they were purchasing to enable them to ascertain the probable condition of the vehicle. Second, it was to provide an owner with information so that he or she could maintain a periodic maintenance schedule. In rescinding Safety Standard No. 127, the agency acknowledged that its reliance on the Tri-Level Study of the Causes of Traffic Accidents by the Indiana University Institute for Research in Public Safety, which led to the odometer requirement, was misplaced. The agency concluded that although the study found that problems with vehicle systems were causal or contributing factors in up to 25 percent of the accidents studies—such as problems with the brake system, tires, lights and signals, for example—all of those causes involved components which must be periodically replaced or serviced regardless of mileage. The agency thereby concluded that deterioration in performance, such as brake pulling, or in appearance, such as tire wear, etc., are readily apparent to the driver and should do more to alert the driver to potential safety-related problems than the distance traveled indication on the odometer.
>
> Ford agrees with the agency's conclusion that the odometer reading is not a crucial factor in alerting drivers to potential safety-related vehicle problems, and therefore, it submits that the absence of the "km" designation is not crucial in this regard. We believe the vehicles that are the subject of this petition present no direct or indirect risk to motor vehicle safety. Furthermore, in the case of the vehicles in question, even if the odometer indication were a crucial indicator or required periodic maintenance, the odometer reading, if relied on for this purpose, would cause a driver to seek maintenance sooner than required because the indicated mileage would be approximately 1.6 times greater than the distance actually traveled.
>
> Therefore, while the absence of the "km" designation is technically a noncompliance, and the odometer of the affected vehicles registers distance traveled in kilometers while the speedometer registers in miles per hour, we believe, for the reasons cited above, the condition presents no risk to motor vehicle safety.

Interested persons are invited to submit written data, views, and arguments on the application of Ford, described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the application is granted or denied, the notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: October 18, 1995.

Associate Administrator for Safety Performance Standards.

[FR Doc. 95–23054 Filed 9–15–95; 8:45 am]

BILLING CODE 4910-59-M

[Docket No. 95–39; Notice 2]

Volkswagen of America, Inc.; Grant of Application for Decision of Inconsequential Noncompliance

Volkswagen of America, Inc. (VWoA) of Auburn Hills, Michigan, determined that some of its vehicles fail to comply with the power window requirements of 49 CFR 571.118, Federal Motor Vehicle Safety Standard (FMVSS) No. 118, "Power-Operated Window, Partition, and Roof Panel Systems," and filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports." VWoA has also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—"Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

Notice of receipt of the application was published on May 17, 1995, and an opportunity afforded for comment (60 FR 26475).

Paragraph S4(e) of FMVSS No. 118 states that power operated windows may be closed only "during the interval between the time the locking device which controls the activation of the vehicle's engine is turned off and the opening of either of a two-door vehicle's doors or, in the case of a vehicle with more than two doors, the opening of its front doors."

From September 1, 1992 through March 5, 1995, VWoA manufactured approximately 1,200 1995 GTI vehicles and 18,795 1993–1995 Jetta III vehicles that do not comply with the power window requirements of FMVSS No. 118. The power windows in these vehicles can be operated when the ignition key is in the "off" position and the passenger side front door has been opened. The windows should not be able to be operated in this scenario.

VWoA supported its application for inconsequential noncompliance with the following:

The purpose of the requirement in S4(e) of FMVSS 118 specifying that the power window system not be functional if the ignition key is in the "off" position and one of the front doors has been opened, is to reduce the possibility of unsupervised children operating the power windows in the vehicle. S4(e) is based upon the assumption that before one of the front doors has been opened, an adult remains in the vehicle to supervise and protect children from the safety risks associated with the operation of the power window system. S4(e) further assumes that after one of the front vehicle doors has been opened, no adult remains in the vehicle and thereby creates a risk that children remaining in the vehicle may injure themselves by activating operational power windows without supervision. S4(e) seeks to eliminate that risk.

In the case of the affected vehicles, the power windows cease to be operable if the driver door is opened, but remain operational for a period of 10 minutes after the passenger side front door has been opened. The rationale supporting the 10 minute period is to allow the driver to close any open windows even though he may already have turned off the ignition and the passenger may have opened the door and exited the vehicle. It is a convenience feature permitted by law in Europe and offered by Volkswagen to the market in Europe as a convenience feature.

The power-operated roof panel systems cannot be operated after the ignition key has been turned off.

VWoA believes that its European configuration inadvertently built into certain vehicles delivered in the United States does not affect their safety in a discernible way. VWoA believes that as long as the driver door of the vehicle has not been opened, a person of driving age inevitably remains in the vehicle because the exiting of the driver on the passenger side front door is extremely difficult and therefore unlikely. The affected vehicles are equipped with bucket seats and a center transmission console which cause the movement of the driver to the passenger side of the vehicle without contortion to be difficult and virtually impossible. Also, it makes no sense to suggest that a driver would exit the vehicle on the passenger side of a vehicle with bucket seats and [a] floor mounted transmission lever when he can conveniently open the driver's door for exit.

VWoA has received no customer complaints or claims relating to the ability of the windows to operate after the passenger door has been opened.

It should also be noted that the Volkswagen Owner's Manual contains an express warning against leaving children unattended in a vehicle and against misuse of the ignition key. The warning reads as follows:

WARNING

Do not leave children unattended in the vehicle especially with access to vehicle keys. Unsupervised use of the keys can result in starting of the engine and use of vehicle systems such as the power windows and power sunroof, which could result in serious personal injury.

As explained, the probability of unsupervised children being exposed to injury from power-operated window systems during the 10 minute interval after the ignition key has been turned off and the passenger side front door is opened and before the driver side front door is opened, is non-existent and that therefore this noncompliance is inconsequential to motor vehicle safety.

VWoA requests that this [application] be granted so that an unnecessary and costly consumer recall action [can] be avoided. VWoA expects a particularly low owner response to such a recall, if it were undertaken, because the ability to operate the power windows after the front passenger side door has been opened would likely be viewed by the owner to offer a valuable convenience feature without any apparent safety disadvantage.

No comments were received on the application.

VWoA is correct that the purpose of requiring inoperative power windows is to reduce the possibility of unsupervised children operating them. In the noncompliant vehicles, the power window system remains operable only when the front passenger side door is opened, a time when the operator presumably remains behind the wheel. If the operator exits by the driver's door, the system is disabled; it is not likely that an operator would exit by means of the passenger door since that would entail passing over the cumbersome console between the two seats. Thus, the purpose of the requirement in this situation is still highly likely to be met.

In consideration of the foregoing, the applicant has met its burden of persuasion that the noncompliance herein described is inconsequential to motor vehicle safety. Accordingly, the applicant is hereby exempted from the requirements of 49 U.S.C. 30118 and 30120 to notify and remedy a noncompliance with a Federal motor vehicle safety standard.

(15 U.S.C. 1417; delegations of authority at 49 CFR 1.50 and 501.8)

Issued on: September 12, 1995.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

BILLING CODE 4910-59-P

DEPARTMENT OF THE TREASURY

[Treasury Directive Number 15–12]

Delegation of Authority to the Director, Bureau of Alcohol, Tobacco and Firearms, to Investigate Violations of 18 U.S.C. §§ 1956 and 1957

September 11, 1995.

1. *Purpose.* This Directive delegates to the Director, Bureau of Alcohol, Tobacco and Firearms (ATF), authority to investigate violations of 18 U.S.C. §§ 1956 and 1957.

2. *Delegation.* By virtue of the authority vested in the Secretary of the Treasury by 18 U.S.C. §§ 981, 1956(e) and 1957(e) and the authority delegated to the Under Secretary (Enforcement) by Treasury Order (TO) 101–05, there is hereby delegated to the Director, ATF:

a. investigatory authority over violations of 18 U.S.C. § 1956 or 1957 involving 18 U.S.C. §§ 2341–2346 (trafficking in contraband cigarettes); § 38 of the Arms Export Control Act, 22 U.S.C. § 2778 (relating to the importation of items on the U.S. Munitions Import List, except violations relating to exportation, in transit, temporary import, or temporary export transactions); and 18 U.S.C. § 1952 (relating to travelling in interstate commerce, with respect to liquor on which Federal excise tax has not been paid); or any act or activity constituting an offense listed in 18 U.S.C. § 1961(1), with respect to any act or threat involving arson, which is chargeable under State law and punishable for more than one year imprisonment; and

b. seizure and forfeiture authority and related authority under 18 U.S.C. § 981 relating to violations of 18 U.S.C. § 1956 or 1957 within the investigatory jurisdiction of ATF under paragraph 2.a., and seizure authority under 18 U.S.C. § 981 relating to any other violation of 18 U.S.C. § 1956 or 1957 if the bureau with investigatory authority is not present to make the seizure. Property seized under 18 U.S.C. § 981 where investigatory jurisdiction is with another bureau not present at the time of the seizure shall be turned over to that bureau.

3. *Forfeiture Remission.* The Director, ATF, is authorized to remit or mitigate forfeitures of property valued at not more than $500,000 seized pursuant to paragraph 2.b.

4. *Redelegation.* The authority delegated by this Directive may be redelegated.

5. *Coordination.*

a. If at any time during an investigation of a violation of 18 U.S.C. § 1956 or 1957, the Director, ATF, discovers evidence of a matter within the jurisdiction of another Treasury bureau, the Director, ATF, shall immediately notify that bureau of the investigation and invite that bureau to participate in the investigation. The Director, ATF, shall attempt to resolve disputes over investigatory jurisdiction with other Treasury bureaus at the field level.

b. The Under Secretary (Enforcement) shall settle disputes that cannot be resolved by the bureaus. The Under Secretary (Enforcement) shall settle disputes over investigatory jurisdiction with the Internal Revenue Service in consultation with the Commissioner, Internal Revenue Service.

c. With respect to matters discovered within the investigatory jurisdiction of a Department of Justice bureau or the Postal Service, the Director, ATF, shall adhere to the provisions on notice and coordination in the "Memorandum of Understanding Among the Secretary of the Treasury, the Attorney General and the Postmaster General Regarding Money Laundering Investigations," dated August 16, 1990, or any such subsequent memorandum of understanding entered pursuant to 18 U.S.C. § 1956(e) or 1957(e).

d. With respect to seizure and forfeiture operations and activities within its investigative jurisdiction, ATF shall comply with the policy, procedures, and directives developed and maintained by the Treasury Executive Office for Asset Forfeiture. Compliance shall include adhering to the oversight, reporting, and administrative requirements relating to seizure and forfeiture contained in such policy, procedures, and directives.

6. *Authorities.*

a. 18 U.S.C. §§ 981, 1952, 1956, 1957, 1961, and 2341–2346.

b. 31 U.S.C. §§ 5311–5326 (other than violations of 31 U.S.C. § 5316).

c. 22 U.S.C. § 2778.

d. TO 101–05, "Reporting Relationships and Supervision of Officials, Offices and Bureaus, Delegation of Certain Authority, and Order of Succession in the Department of the Treasury."

e. TO 102–14, "Delegation of Authority with Respect to the Treasury Forfeiture Fund Act of 1992," dated January 10, 1995.

7. *Cancellation.* Treasury Directive 15–12, "Delegation of Authority to the Director, Bureau of Alcohol, Tobacco and Firearms to Investigate Violations of 18 U.S.C. §§ 1956 and 1957," dated May 1, 1991, is superseded.

8. *Expiration Date.* This Directive shall expire three years from the date of issuance unless superseded or cancelled prior to that date.

9. *Office of Primary Interest.* Office of the Under Secretary (Enforcement).

Ronald K. Noble,

Under Secretary (Enforcement).

BILLING CODE 4810-25-P

[Treasury Directive Number 15–29]

Delegation of Authority to the Commissioner, United States Customs Service, To Investigate Violations of 18 U.S.C. §§ 1956 and 1957

September 11, 1995.

1. *Purpose.* This Directive delegates to the Commissioner, United States Customs Service, authority to investigate violations of 18 U.S.C. §§ 1956 and 1957.

2. *Delegation.* By virtue of the authority vested in the Secretary of the Treasury by 18 U.S.C. §§ 981, 1956(e) and 1957(e) and the authority delegated to the Under Secretary (Enforcement) by Treasury Order (TO) 101–05, there is hereby delegated to the Commissioner, United States Customs Service:

a. investigatory authority over violations of 18 U.S.C. § 1956 or 1957 involving 18 U.S.C. §§ 542, 545, 549, 659, 1461–63, 1465, 2251–52, 2314, and 2321; 19 U.S.C. § 1590; 21 U.S.C. § 863; offenses under § 11 of the Export Administration Act of 1979 (50 U.S.C. App. § 2410); offenses under § 206 of the International Emergency Economic Powers Act (50 U.S.C. § 1705); offenses under § 16 of the Trading With the Enemy Act (50 U.S.C. App. § 16); and offenses under § 38 of the Arms Export Control Act (22 U.S.C. § 2778) (relating to the exportation, intransit, temporary import, or temporary export transactions);

b. investigatory authority over violations of 18 U.S.C. § 1956(a)(2)(B)(ii), involving a reporting violation under 31 U.S.C. § 5316;

c. investigatory authority over violations of 18 U.S.C. § 1956(a)(3) relating to violations within the investigatory jurisdiction of the U.S. Customs Service under paragraphs 2.a. and b.; and

d. seizure and forfeiture authority and related authority under 18 U.S.C. § 981 relating to violations of 18 U.S.C. § 1956 or 1957 within the investigatory jurisdiction of the Customs Service under paragraphs 2.a., 2.b., and 2.c., and seizure authority under 18 U.S.C. § 981 relating to any other violation of 18 U.S.C. § 1956 or 1957 if the bureau with investigatory authority is not present to make the seizure. Property seized under 18 U.S.C. § 981 where investigatory jurisdiction is with another bureau not present at the time of the seizure shall be turned over to that bureau.

3. *Forfeiture Remission.* The Commissioner, United States Customs Service, is authorized to remit or mitigate forfeitures of property valued at not more than $500,000 seized pursuant to paragraph 2.d.

4. *Redelegation.* The authority delegated by this directive may be redelegated.

5. Coordination.

a. If at any time during an investigation of a violation of 18 U.S.C. § 1956 or 1957, the U.S. Customs Service discovers evidence of a matter within the jurisdiction of another Treasury bureau or office, the U.S. Customs Service shall immediately notify that bureau or office with investigatory jurisdiction of the investigation and invite that bureau or office to participate in the investigation. The Commissioner, U.S. Customs Service, shall attempt to resolve disputes over investigatory jurisdiction with other Treasury bureaus at the field level or in the case of the Office of Foreign Assets Control, at the headquarters level.

b. The Under Secretary (Enforcement) shall settle disputes that cannot be resolved by the bureaus. The Under Secretary (Enforcement) shall settle disputes over investigatory jurisdiction with the Internal Revenue Service in consultation with the Commissioner, Internal Revenue Service.

c. With respect to matters discovered within the investigatory jurisdiction of a Department of Justice bureau or the Postal Service, the U.S. Customs Service shall adhere to the provisions on notice and coordination in the "Memorandum of Understanding Among the Secretary of the Treasury, the Attorney General and the Postmaster General Regarding Money Laundering Investigations," dated August 16, 1990, or any such subsequent memorandum of understanding entered pursuant to 18 U.S.C. § 1956(e) or 1957(e).

d. With respect to seizure and forfeiture operations and activities within its investigative jurisdiction, U.S. Customs Service shall comply with the policy, procedures, and directives developed and maintained by the Treasury Executive Office for Asset Forfeiture. Compliance will include adhering to the oversight, reporting, and administrative requirements relating to seizure and forfeiture contained in such policy, procedures, and directives.

6. Authorities.

a. 18 U.S.C. §§ 542, 545, 549, 659, 981,1461–1463, 1465, 1956, 1957, 2251–52, 2314, and 2321.

b. 19 U.S.C. § 1590.

c. 21 U.S.C. § 863.

d. 22 U.S.C. § 2778.

e. 31 U.S.C. § 5316.

f. 50 U.S.C. App. § 16, 1705, and App. 2410.

g. TO 101–05, "Reporting Relationships and Supervision of Officials, Offices and Bureaus, Delegation of Certain Authority, and Order of Succession in the Department of the Treasury."

h. TO 102–14, "Delegation of Authority with Respect to the Treasury Forfeiture Fund Act of 1992," dated January 10, 1995.

7. *Cancellation.* Treasury Directive 15–29, "Delegation of Authority to the Commissioner, United States Customs Service to Investigate Violations of 18 U.S.C. §§ 1956 and 1957," dated May 1, 1991, is superseded.

8. *Expiration Date.* This Directive shall expire three years from the date of issuance unless superseded or cancelled prior to that date.

9. *Office of Primary Interest.* Office of the Under Secretary (Enforcement).

Ronald K. Noble,

Under Secretary (Enforcement).

BILLING CODE 4810-25-P

[Treasury Directive Number 15–42]

Delegation of Authority to the Commissioner, Internal Revenue Service, To Perform Functions Under the Money Laundering Control Act of 1986, as Amended

September 11, 1995.

1. *Purpose.* This Directive delegates to the Commissioner, Internal Revenue Service (IRS), investigatory, seizure and forfeiture authority under the Money Laundering Control Act of 1986, Public Law 99–570, Subtitle H (October 27, 1986), as amended.

2. *Delegation.* By virtue of the authority vested in the Secretary of the Treasury by 18 U.S.C. §§ 981, 1956(e), 1957(e) and the authority delegated to the Under Secretary (Enforcement) by Treasury Order (TO) 101–05, there is hereby delegated to the Commissioner, IRS:

a. investigatory authority over violations of 18 U.S.C. §§ 1956 and 1957 where the underlying conduct is subject to investigation under Title 26 or under the Bank Secrecy Act, as amended; 31 U.S.C. §§ 5311–5328 (other than violations of 31 U.S.C. § 5316);

b. seizure and forfeiture authority over violations of 18 U.S.C. § 981 relating to violations of:

(1) 31 U.S.C. §§ 5313 and 5324; and

(2) 18 U.S.C. §§ 1956 and 1957 which are within the investigatory jurisdiction of IRS pursuant to paragraph 2.a.; and

c. seizure authority relating to any other violation of 18 U.S.C. § 1956 or 1957 if the bureau with investigatory authority is not present to make the seizure. Property seized under 18 U.S.C. § 981 where investigatory jurisdiction is solely with another bureau not present at the time of the seizure shall be turned over to that bureau.

3. *Forfeiture Remission.* The Commissioner, IRS, is authorized to remit or mitigate forfeitures of property valued at not more than $500,000 seized pursuant to paragraph 2.b.

4. *Redelegation.* The authority delegated by this directive may be redelegated.

5. *Coordination.*

a. If at any time during an investigation of a violation of 18 U.S.C. § 1956 or 1957, IRS discovers evidence of a matter within the jurisdiction of another Treasury bureau, to the extent authorized by law, IRS shall immediately notify that bureau of the investigation and invite that bureau to participate in the investigation. The Commissioner, IRS, shall attempt to resolve disputes over investigatory jurisdiction with other Treasury bureaus at the field level.

b. The Under Secretary (Enforcement) shall settle disputes that cannot be resolved by the bureaus in consultation with the Commissioner, IRS.

c. With respect to matters discovered within the investigatory jurisdiction of a Department of Justice bureau or the Postal Service, IRS shall adhere to the provisions on notice and coordination in the "Memorandum of Understanding Among the Secretary of the Treasury, the Attorney General and the Postmaster General Regarding Money Laundering Investigations," dated August 16, 1990, or any such subsequent memorandum of understanding entered pursuant to 18 U.S.C. § 1956(e) or 1957(e).

d. With respect to seizure and forfeiture operations and activities within its investigative jurisdiction, IRS shall comply with the policy, procedures, and directives developed and maintained by the Treasury Executive Office for Asset Forfeiture. Compliance will include adhering to the oversight, reporting, and administrative requirements relating to seizure and forfeiture contained in such policy, procedures, and directives.

6. *Authorities.*

a. 18 U.S.C. §§ 981, 1956 and 1957.

b. 31 U.S.C. §§ 5311–5328 (other than violations of 31 U.S.C. § 5316).

c. TO 101–05, "Reporting Relationships and Supervision of Officials, Offices and Bureaus, Delegation of Certain Authority, and Order of Succession in the Department of the Treasury."

d. TO 102–14, "Delegation of Authority with Respect to the Treasury Forfeiture Fund Act of 1992," dated January 10, 1995.

7. *Cancellation.* Treasury Directive 15–42, "Delegation of Authority to the Commissioner, Internal Revenue Service to Perform Functions Under the Money Laundering Control Act of 1986, as amended," dated May 1, 1991, is superseded.

8. *Expiration Date.* This Directive shall expire three years from the date of issuance unless superseded or cancelled prior to that date.

9. *Office of Primary Interest.* Office of the Under Secretary (Enforcement).

Ronald K. Noble,

Under Secretary (Enforcement).

[Treasury Directive Number 15–54]

Delegation of Authority to the Director, United States Secret Service, To Investigate Violations of 18 U.S.C. §§ 1956 and 1957

September 11, 1995.

1. *Purpose.* This Directive delegates to the Director, United States Secret Service, authority to investigate violations of 18 U.S.C. §§ 1956 and 1957.

2. *Delegation.* By virtue of the authority vested in the Secretary of the Treasury by 18 U.S.C. §§ 981, 1956(e), 1957(e) and the authority delegated to the Under Secretary (Enforcement) by Treasury Order (TO) 101–05, there is hereby delegated to the Director, United States Secret Service:

a. investigatory authority over violations of 18 U.S.C. §§ 1956 and 1957 involving an offense under 18 U.S.C. §§ 471–473 (counterfeiting of obligations or securities of the United States); 18 U.S.C. §§ 500–503 (counterfeiting of blank or postal money orders, postage stamps, foreign government postage and revenue stamps, and postmarking stamps); 18 U.S.C. § 657 (involving theft, embezzlement or misapplication by employees of the Federal Deposit Insurance Corporation); and 18 U.S.C. § 1029 (fraud and related activity in connection with access devices); and

b. seizure and forfeiture authority and related authority under 18 U.S.C. § 981 relating to violations of § 1956 or 1957 within the investigatory jurisdiction of Secret Service under paragraph 2.a., and seizure authority under 18 U.S.C. § 981 relating to any other violations of 18 U.S.C. § 1956 or 1957 if the bureau with investigatory authority is not present to make the seizure. Property seized under 18 U.S.C. § 981 where investigatory jurisdiction is with another bureau not present at the time of the seizure shall be turned over to that bureau.

3. *Forfeiture Remission.* The Director, United States Secret Service, is authorized to remit or mitigate forfeitures of property valued at not more than $500,000 seized pursuant to paragraph 2.b.

4. *Redelegation.* The authority delegated by this directive may be redelegated.

5. *Coordination.*

a. If at any time during an investigation of a violation of 18 U.S.C. § 1956 or 1957, Secret Service discovers evidence of a matter within the jurisdiction of another Treasury bureau, Secret Service shall immediately notify that bureau of the investigation and invite that bureau to participate in the investigation. Secret Service shall attempt to resolve disputes over investigatory jurisdiction with other Treasury bureaus at the field level.

b. The Under Secretary (Enforcement) shall settle disputes that cannot be resolved by the bureaus. The Under Secretary (Enforcement) shall settle disputes over investigatory jurisdiction with the Internal Revenue Service in consultation with the Commissioner, Internal Revenue Service.

c. With respect to matters discovered within the investigatory jurisdiction of a Department of Justice bureau or the Postal Service, Secret Service shall adhere to the provisions on notice and coordination in the "Memorandum of Understanding Among the Secretary of the Treasury, the Attorney General and the Postmaster General Regarding Money Laundering Investigations," dated August 16, 1990, or any such subsequent memorandum of understanding entered pursuant to 18 U.S.C. § 1956(e) or 1957(e).

d. With respect to seizure and forfeiture operations and activities within its investigative jurisdiction, Secret Service shall comply with the policy, procedures, and directives developed and maintained by the Treasury Executive Office for Asset Forfeiture. Compliance will include adhering to the oversight, reporting, and administrative requirements relating to seizure and forfeiture contained in such policy, procedures, and directives.

6. *Authorities.*

a. 18 U.S.C. §§ 471–473, 500–503, 657, 981, 1029, 1956 and 1957.

b. TO 101–05, "Reporting Relationships and Supervision of Officials, Offices and Bureaus, Delegation of Certain Authority, and Order of Succession in the Department of the Treasury."

c. TO 102–14, "Delegation of Authority with Respect to the Treasury Forfeiture Fund Act of 1992," dated January 10, 1995.

7. *Cancellation.* Treasury Directive 15–54, "Delegation of Authority to the Director, United States Secret Service to Investigate Violations of 18 U.S.C. §§ 1956 and 1957," dated May 1, 1991, is superseded.

BILLING CODE 6712-01-F

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 10:00 a.m., Friday, September 22, 1995.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: September 14, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

Corrections

Federal Register
Vol. 60, No. 180
Monday, September 18, 1995

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 58

[DA-91-010A]

Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products; United States Standards for Grades of Colby Cheese

Correction

In rule document 95–4953 beginning on page 11246, in the issue of Wednesday, March 1, 1995, make the following correction:

§58.2479 [Corrected]

On page 11249, in the third column, in §58.2479, in the table entitled "TABLE I--CLASSIFICATION OF FLAVOR WITH CORRESPONDING U.S. GRADE", in the subheading entitled "A", in the sixth line, "S" should be removed.

[Federal Acquisition Circular 90–32]

Federal Acquisition Regulation; Introduction of Miscellaneous Amendments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of final rules.

SUMMARY: This document serves to introduce the final rules which follow and which comprise Federal Acquisition Circular (FAC) 90–32. The Federal Acquisition Regulatory Council has agreed to issue FAC 90–32 to amend the Federal Acquisition Regulation (FAR).

DATES: For effective dates, see individual documents following this one.

FOR FURTHER INFORMATION CONTACT: The team leader or FAR Staff Analyst whose name appears in relation to each FAR case or subject area. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC, 20405 (202) 501–4755. Please cite FAC 90–32 and FAR case number(s).

SUPPLEMENTARY INFORMATION: Federal Acquisition Circular 90–32 amends the Federal Acquisition Regulation (FAR) as specified below:

Item	Subject	FAR case	Team leader
I	Truth in Negotiations Act and Related Changes	94–720 & 94–721.	Al Winston (703) 602–2119.
II	Protests, Disputes and Appeals	94–730	Craig Hodge (703) 274–8940.
III	Acquisition of Commercial Items	94–790	Lawrence Trowel (703) 695–3858.
IV	Whistleblower Protections for Contractor Employees (Ethics).	94–803	Jules Rothlein (703) 697–4349.
V	Small Business	94–780	Victoria Moss (202) 501–4764.
VI	Publicizing Contract Actions	95–606	Ralph DeStefano (202) 501–1758.
VII	Subcontractor Payments	94–762	John Galbraith (703) 697–6710.
VIII	Reimbursement of Protest Costs	94–731	Craig Hodge (703) 274–8940.

Case Summaries

For the actual revisions and/or amendments to these FAR cases, refer to the specific item number and subject set forth in the documents following these item summaries.

Item I—Truth in Negotiations Act and Related Changes (FAR Cases 94–720 and 94–721)

This final rule is issued pursuant to the Federal Acquisition Streamlining Act of 1994 (FASA), Pub. L. 103–355 to implement those portions of FASA that make specific changes to the Truth in Negotiations Act (TINA) or that impact other areas of the FAR that affect contract pricing.

This rule implements Sections 1201 through 1210 and Sections 1251 and 1252 of the FASA. A new exception is added to the requirement for the submission of "cost or pricing data" for commercial items; the approval level for waivers is changed, and prohibitions are placed on acquiring "cost or pricing data" when an exception applies. The coverage includes a clear explanation of adequate price competition as required by the FASA.

Coverage has been included that addresses (1) "information other than cost or pricing data," (2) exceptions based on established catalog or market price, (3) interorganizational transfers of commercial items at price, and (4) price competition when only one offer has been received.

The new policy also expands the exception based on adequate price competition and provides for a special exception for commercial items. A new section addressing "information other than cost or pricing data" is created and a Standard Form 1448 is provided for use by contractors.

The new policy at FAR 15.804–1(b)(1)(ii) recognizes circumstances when it can be determined that adequate price competition exists even though only one offeror has responded to the Government"s requirement.

In addition, this rule finalizes, with changes, the interim rule in FAC 90–22 that made TINA requirements for civilian agencies substantially the same as those for the Department of Defense (increasing the threshold for submission of "cost or pricing data" to $500,000 and adding penalties for defective pricing). Provisions were also included that increase the threshold for cost or pricing data submission every 5 years beginning October 1, 1995.

Although the instruction to amend contracts without consideration to update the cost or pricing data threshold has been removed from the FAR, the statutory authority and requirement to update the threshold remain in effect. Accordingly, contracting officers shall, if requested by a prime contractor, modify contracts to change the threshold in the contract to the cost or pricing data threshold in paragraph 15.804–2(a)(1), without requiring consideration. The contract modification shall be accomplished by inserting into the contract the current version of the clauses 52.215–23, Price Reduction for Defective Cost or Pricing Data—Modifications, and 52.215–25, Subcontractor Cost or Pricing Data–Modifications, or 52.215–24, Subcontractor Cost or Pricing Data, as applicable. These new contract clauses shall apply only to contract modifications and subcontracts for which agreement on price occurs after the contracting officer has inserted the new clauses.

Item II—Protests, Disputes, and Appeals (FAR Case 94–730)

This final rule implements requirements of the Federal Acquisition Streamlining Act of 1994 pertaining to protests, disputes, and appeals.

The primary changes included in this rule are new definitions of "day," "filed," and "protest." Most of the adjustments merely reflect current practice, except for the definition of "day," which changes from a presumed "working day" to a presumed "calendar day." Agencies are now clearly allowed to take corrective action to include payment of costs to the protester and are allowed to stay contract performance in the face of a likely protest. Both agency and GAO protests must now be filed within fourteen calendar days of discovery of protest grounds, instead of the former ten working days. There is also an explicit warning that, in the event of a conflict between the FAR and GAO protest procedure regulations, the GAO regulations govern. The period of time for submission of the agency administrative report has been adjusted from the former 25 working days to 35 calendar days. Agencies are required to prepare a protest file for prospective, non intervening offerors to review, and to suspend performance of the contract if the protest is filed within ten days of award or five days of debriefing, where the debriefing is required. GAO decisions are normally due out within 125 days, and attorney fees are generally capped at $150 an hour, except for small businesses.

There is also an explicit statement that, in case of conflict with the FAR, GSBCA rules govern questions of GSBCA protest procedure. The GSBCA now has more GAO-like suspension standards and time periods. Agencies are required to reimburse the judgment fund for costs awarded the protester. Protest costs are limited at the GSBCA as they are with GAO protests, such as with the attorney fee cap. Settlements are now generally to be made public information.

In the disputes area, the claims certification threshold begins at $100,000. Claims must be filed within six years of accrual, except for Government claims involving fraud. Small claims now reach disputes of $50,000, and accelerated claims have a threshold of $100,000.

Item III—Acquisition of Commercial Items (FAR Case 94–790)

This final rule implements Title VIII of the Federal Acquisition Streamlining Act of 1994. The rule encourages the acquisition of commercial end items and components by Federal Government agencies as well as contractors and subcontractors at all levels. The most significant revisions are in the following FAR parts:

Part 2 has been amended to incorporate the definitions of "commercial item," "component," "commercial component" and "non developmental item."

Part 10 has been completely revised by establishing the requirement for market research as the first step in the acquisition process. Market research is an essential element in the later steps of describing the agency's need, developing the overall acquisition strategy and identifying terms and conditions unique to the item being acquired.

Part 11 has been completely revised to address the process of describing agency needs. It contains some of the language on specifications and standards formerly found in FAR Part 10, but takes a more streamlined approach. In addition, the revised Part 11 establishes the Government's order of precedence for requirements documents and addresses the concept of market acceptance. Part 11 also contains coverage on Delivery or Performance Schedules, Liquidated Damages, Priorities and Allocations, and Variations in Quantity taken from the current Part 12 with only minor editorial revisions. The current Part 12 coverage on Suspension of Work, Stop Work Orders, and Government Delay of Work has been moved to Subpart 42.13 with only minor editorial revisions.

Part 12 has been completely revised to address the acquisition of commercial items.

- —Subpart 12.1 states that the policies in the revised Part 12 are applicable to all acquisitions of commercial items above the micro-purchase threshold. The requirements of other parts of the FAR apply to commercial items to the extent they are not inconsistent with Part 12.
- —Subpart 12.2 identifies special requirements for the acquisition of commercial items.
- —Subpart 12.3 establishes standard provisions and clauses for use in the acquisition of commercial items. It is essential that contracting officers be allowed to tailor solicitations and contracts to meet the needs of the particular acquisition and the marketplace for that item. Subpart 12.3 gives contracting officers broad authority to tailor solicitations and contracts, a practice itself that is consistent with commercial practices.
- —A new form, the Standard Form (SF) 1449, Solicitation/Contract/Order for Commercial Items, is established. The most significant element is the addition of acceptance blocks at the bottom of the form that will allow suppliers of commercial items to utilize the SF 1449 to document receipt of the supplies or services by the Government, avoiding the need for preparation of separate receipt/acceptance forms.
- —Subpart 12.5 identifies the applicability of certain laws to the acquisition of commercial items. It contains the list of laws determined to be inapplicable to executive agency prime contracts for acquisition of commercial items. This list has been expanded to also include those laws that have been revised in some manner to modify their applicability to commercial items. Agency unique laws determined to be inapplicable to prime contracts are not addressed in this rule and may be addressed separately by the respective agencies. This subpart also contains the list of laws determined to be inapplicable to subcontracts for commercial items. This list has been expanded to also include those laws that have been revised in some manner to modify their applicability to subcontracts for commercial items.
- —Subpart 12.6 identifies two streamlined procedures for the evaluation and solicitation of contracts for commercial items. These procedures may be used at the discretion of the contracting officer.

Part 52 has been amended to include several new provisions and clauses to be used in all solicitations and contracts for the acquisition of commercial items:

- —Section 52.212–1, Instructions to Offerors—Commercial Items, contains solicitation instructions for the acquisition of commercial items.
- —Section 52.212–2, Evaluation—Commercial Items, contains evaluation information that has been simplified and tailored to meet the requirements of commercial items.
- —Section 52.212–3, Offeror Representations and Certifications—Commercial Items, includes, in one provision, the certifications and representations required to comply with laws or Executive orders.
- —Section 52.212–4, Contract Terms and Conditions—Commercial Items, contains the terms and conditions believed to be consistent with customary commercial practice.
- —Section 52.212–5, Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items, implements provisions of law or Executive Orders applicable to Government acquisitions of commercial items or commercial components. The clause at 52.212–5 represents the minimum number of clauses required to implement statutes and Executive orders. Certain clauses may apply depending upon the circumstances; the contracting officer will indicate which of these clauses apply for the specific acquisition.
- —Section 52.244–6, Subcontracts for Commercial Items and Commercial Components, implements the preference for the acquisition of commercial items or nondevelopmental items as components of items to be supplied under Federal contracts. This clause will be used in all solicitations and contracts for supplies and services other than commercial items.

Item IV—Whistleblower Protections for Contractor Employees (Ethics) (FAR Case 94–803)

The final rule published as Item III of FAC 90–30 added FAR Subpart 3.9, Whistleblower Protections for Contractor Employees, to implement Sections 6005 and 6006 of the Federal Acquisition Streamlining Act of 1994. The rule contained an effective date of September 19, 1995, but did not discuss the subject of applicability. The rule applies to all contracts in existence as of September 19, 1995, for reprisals to Government contractor employees occurring on or after that date.

Some existing Department of Defense contracts contain a clause addressing whistleblower protections based on a prior statute, 10 U.S.C. 2409a. The remedies provided by FAR Subpart 3.9 do not apply to contracts otherwise covered by the provisions of 10 U.S.C. 2409a.

Item V—Small Business (FAR Case 94–780)

This final rule implements Sections 7101(a) 7106, and 10004 of the Federal Acquisition Streamlining Act (FASA) of 1994. Section 7101(a) of FASA deletes Sections 15(e) and (f) of the Small Business Act (15 U.S.C. 631, et seq.). Those sections established the priority for award of set-asides and provided the statutory basis for a procurement preference for concerns located in Labor Surplus Areas (LSA). Based on this deletion, this rule removes the LSA set-aside program and LSA subcontracting program from the FAR.

Section 7106 of FASA revises Sections 8 and 15 of the Small Business Act to accommodate a Governmentwide goal of 5 percent for women-owned small businesses. This rule deletes existing, separate coverage relating to women-owned businesses and revises existing coverage to place women-owned small businesses on an equal footing with small disadvantaged businesses. In connection with this revision, the Standard Forms 294 and 295 are revised and streamlined.

Section 10004 of FASA, which requires the collection of specified data through the Federal Procurement Data System, is being implemented by FAR case 94–701. This rule augments that coverage by providing a solicitation provision to collect the information on women-owned businesses as required by that FAR case.

Item VI—Publicizing Contract Actions (FAR Case 95–606)

This final rule amends FAR sections 5.207(b)(4) and (b)(6). The amendment deletes the requirement for the Federal Information Processing Standard (FIPS) Number in Commerce Business Daily synopses and, in lieu thereof, requests Government Printing Office (GPO) Billing Account Code Information.

Item VII—Subcontractor Payments (FAR Case 94–762)

This final rule implements Sections 2091 and 8105 of the Federal Acquisition Streamlining Act of 1994. The rule amends FAR Parts 28, 32, and 52 to reflect: statutory requirements related to providing information to subcontractors and prospective subcontractors concerning bonds under the Miller Act; that while the Government does not have privity with subcontractors, and does not serve as a collection agent for them, the Government properly has an interest in the financial capability, managerial competence, and business ethics of companies doing business with the Government; that the contracting officer should be informed about both sides of the argument in a dispute between the prime contractor and its subcontractor in order to exercise good business judgment; and finally, when an assertion raises a creditable question concerning the accuracy of a contractor certification, the contracting officer must decide whether the certification is inaccurate in any material respect, and, if so, bring the matter to the attention of the appropriate authorities, in accordance with agency regulations.

Item VIII—Reimbursement of Protest Costs (FAR Case 94–731)

This final rule implements Sections 1016, 1403, and 1435 of the Federal Acquisition Streamlining Act of 1994. The primary effect of this rule is to allow the Government to seek reimbursement for protest costs it has paid a protester, such as the protester's attorney fees, where that protest has been sustained based upon the awardee's misrepresentation. In addition to any other remedies available, the Government may collect this debt by offsetting the amount against any payment due the awardee under any Government contract the awardee might have.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Federal Acquisition Circular

[Number 90–32]

Federal Acquisition Circular (FAC) 90–32 is issued under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator for the National Aeronautics and Space Administration.

Unless otherwise specified below, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90–32 is effective October 1, 1995. FAC Items I, and V through VIII, are applicable for solicitations issued on or after October 1, 1995.

Item II—Where this rule repeats a GSBCA rule that went into effect earlier, the date of the GSBCA rule and its applicability provision prevail; otherwise, this rule is applicable to protests or claims filed on or after October 1, 1995.

Item III—For solicitations issued on or after October 1, 1995: Use of the new policies, provisions and clauses is optional for solicitations issued before December 1, 1995, and mandatory for solicitations issued on or after December 1, 1995.

Item IV—Effective September 19, 1995.

Dated: September 7, 1995.

Roland A. Hassebrock,

Col, USAF Director, Defense Procurement (Acting).

Dated: September 6, 1995.

Ida M. Ustad,

Associate Administrator for Acquisition Policy, General Services Administration.

Dated: September 7, 1995.

Tom Luedtke,

Deputy Associate Administrator for Procurement, National Aeronautics and Space Administration.

Federal Acquisition Regulation; Truth in Negotiations Act and Related Changes

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rules.

SUMMARY: These final rules are issued pursuant to the Federal Acquisition Streamlining Act of 1994 to implement those portions of Pub. L. 103–355 that make specific changes to the Truth in Negotiations Act (TINA) or that impact other areas of the FAR that affect contract pricing. These regulatory actions were subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Al Winston, Truth in Negotiations Act (TINA) Team Leader, at (703) 602–2119 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GSA Building, Washington, DC 20405, (202) 501–4755. Please cite FAR case 94–721.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994 (Pub. L. 103–355) (the Act) provides authorities that streamline the acquisition process and minimize burdensome government-unique requirements.
